CELLULAR, MOLECULAR, AND BIOMEDICAL SCIENCES

OVERVIEW

The Cellular, Molecular and Biomedical Sciences (CMB) program provides personalized training in a graduate-student focused, state-of-the-art research environment. Our graduates are highly qualified scientists ready to take on the rigors of scientific careers.

Our interdisciplinary program is comprised of highly dedicated research faculty in 16 departments across the UVM campus. This breadth, combined with a collegial atmosphere, provides an ideal environment for studying the molecular, cellular, genetic, biophysical, and biochemical mechanisms that control organismal development and underlie human disease.

DEGREES

- Cellular, Molecular and Biomedical Sciences M.S.
- Cellular, Molecular and Biomedical Sciences Ph.D.

FACULTY

Amiel, Eyal; Assistant Professor, Department of Medical Lab and Radiation Science; PHD, Dartmouth Medical School

Anathy, Vikas; Assistant Professor, Department of Pathology; PHD, Madurai Kamraj University

Ballif, Bryan A.; Associate Professor, Department of Biology; PHD, Harvard University

Barlow, John W.; Assistant Professor, Department of Animal Science; DVM, University of Illinois Urbana-Champaign

Berger, Christopher Lewis; Associate Professor, Department of Molecular Physiology and Biophysics; PHD, University of Minnesota Twin Cities

Bond, Jeffrey P.; Professor, Department of Microbiology and Molecular Genetics; PHD, University of Rochester

Boonney, Elizabeth Ann; Professor, Department of Obstetrics and Gynecology; MD, Stanford University

Botten, Jason W.; Assistant Professor, Department of Medicine-Immunobiology; PHD, University of New Mexico

Bouchard, Beth Ann; Assistant Professor, Department of Biochemistry; PHD, University of Vermont

Boyson, Jonathan E.; Associate Professor, Department of Surgery; PHD, University of Wisconsin Madison

Brayden, Joseph Elliott; Professor, Department of Pharmacology; PHD, University of Vermont

Budd, Ralph Charles; Professor, Department of Medicine-Immunobiology; MD, Weill Cornell Medical College

Burke, John MacKenzie; Professor, Department of Microbiology and Molecular Genetics; PHD, Massachusetts Institute of Technology

Carr, Frances Eileen; Professor, Department of Pharmacology; PHD, University of Illinois Chicago

Cipolla, Marilyn Jo; Professor, Department of Neurological Sciences; PHD, University of Vermont

Delaney, Terrence Patrick; Associate Professor, Department of Plant Biology; PHD, University of Washington Seattle

Diehl, Sean A.; Assistant Professor, Department of Medicine-Infectious Disease; PHD, University of Vermont

Dostmann, Wolfgang R. G.; Professor, Department of Pharmacology; MD, University of Munich

Doublye, Sylvie; Professor, Department of Microbiology and Molecular Genetics; PHD, University of North Carolina Chapel Hill

Dunlop, Mary J.; Assistant Professor, School of Engineering; PHD, California Institute of Technology

Everse, Stephen Jay; Associate Professor, Department of Biochemistry; PHD, University of California San Diego

Finette, Barry Alan; Professor, Department of Pediatrics; MD, University of Texas

Francklyn, Christopher Steward; Professor, Department of Biochemistry; PHD, University of California Santa Barbara

Freeman, Kaley; Assistant Professor, Department of Surgery; MD, University of Colorado Boulder

Gilmartin, Gregory Michael; Associate Professor, Department of Microbiology and Molecular Genetics; PHD, University of Virginia

Harris, Jeanne M.; Associate Professor, Department of Plant Biology; PHD, University of California Berkeley

Heintz, Nicholas H.; Professor, Department of Pathology; PHD, University of Vermont

Honda1, Robert J.; Associate Professor, Department of Biochemistry; PHD, Ohio State University

Howe, Alan K; Associate Professor, Department of Pharmacology; PHD, Northwestern University

Huber, Sally Ann; Professor, Department of Pathology; PHD, Duke University

Huston, Christopher D.; Associate Professor, Department of Medicine-Infectious Disease; MD, Cornell University

Irvin, Charles G.; Professor, Department of Medicine-Pulmonary; PHD, University of Wisconsin Madison

Janssen-Heininger, Yvonne M.W.; Professor, Department of Pathology; PHD, University of Lumburg

Jetton, Thomas Lawrence; Associate Professor, Department of Medicine-Endocrinology; PHD, Vanderbilt University

Johnson, Douglas Ian; Professor, Department of Microbiology and Molecular Genetics; PHD, Purdue University

Kelm, Robert John; Associate Professor, Department of Medicine-Vascular Biology; PHD, University of Vermont

Kerr, David E.; Associate Professor, Department of Animal Science; PHD, University of Saskatchewan

Krag, David Nielsen; Professor, Department of Surgery-Oncology; MD, Loyola University Chicago

Landry, Christopher C.; Professor, Department of Chemistry; PHD, Harvard University

Li, Dawei; Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, Shanghai Jiao Tong University

Lidofsky, Steven D.; Professor, Department of Medicine-Gastroenterology; MD, Columbia University

Lord, Matthew J.; Associate Professor, Department of Molecular Physiology and Biophysics; PHD, University of Oxford
THE UNIVERSITY OF VERMONT

2014-2015 Catalogue

Lounsbury, Karen M.; Professor, Department of Pharmacology; PHD, University of Pennsylvania
Matthews, Dwight E.; Professor, Department of Chemistry; PHD, Indiana University Bloomington
Miller, Mark Stuart; Research Associate, Department of Molecular Physiology and Biophysics; PHD, University of Vermont
Mintz, Keith Peter; Associate Professor, Department of Microbiology and Molecular Genetics; PHD, University of Vermont
Morielli, Anthony D.; Associate Professor, Department of Pharmacology; PHD, University of California Berkeley
Morrical, Scott Walker; Professor, Department of Biochemistry; PHD, University of Wisconsin Madison
Nelson, Mark Tuxford; Professor, Department of Pharmacology; PHD, Washington University in St Louis
Pederson, David Scott; Professor, Department of Microbiology and Molecular Genetics; PHD, University of Rochester
Poynter, Matthew E.; Associate Professor, Department of Medicine-Pulmonary; PHD, University of Utah
Preston, Jill C.; Assistant Professor, Department of Plant Biology; PHD, University of Missouri
Radermacher, Michael; Professor, Department of Molecular Physiology and Biophysics; PHD, University of Munich
Rincon, Mercedes Rincon; Professor, Department of Medicine-Immunobiology; PHD, Autonomous University of Madrid
Ruiz, Teresa; Associate Professor, Department of Molecular Physiology and Biophysics; PHD, Brandeis University
Sarkar, Indra N.; Assistant Professor, Department of Microbiology and Molecular Genetics; MLIS, Syracuse University
Shen, Aimee; Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, Harvard University
Shukla, Arti; Associate Professor, Department of Pathology; PHD, Institute of Medical Science
Shukla, Girja Shanker; Associate Professor, Department of Surgery-Oncology; PHD, Lucknow University
Silveira, Jay R.; Assistant Professor, Department of Biochemistry; PHD, University of Vermont
Spees, Jeffrey L.; Associate Professor, Department of Medicine-Vascular Biology; PHD, University of California Davis
Stein, Gary; Professor and Chair, Department of Biochemistry; PHD, University of Vermont
Stein, Janet; Professor, Department of Biochemistry; PHD, Princeton University
Stumpff, Jason K.; Assistant Professor, Department of Molecular Physiology and Biophysics; PHD, University of Colorado
Suratt, Benjamin Tate; Associate Professor, Department of Medicine-Pulmonary; MD, Columbia University
Taatjes, Douglas Joseph; Professor, Department of Pathology; PHD, University of Basel
Teuscher, Cory; Professor, Department of Medicine-Immunobiology; PHD, University of New Mexico
Thali, Markus Josef; Professor, Department of Microbiology and Molecular Genetics; PHD, University of Zurich
Tierney, Mary Laurreta; Associate Professor, Department of Plant Biology; PHD, Michigan State University
Toth, Michael J.; Associate Professor, Department of Medicine-Cardiology; PHD, University of Maryland College Park
Tracy, Paula Babiarz; Professor, Department of Biochemistry; PHD, Syracuse University
Tracy, Russell P.; Professor, Department of Pathology; PHD, Syracuse University
Trybus, Kathleen M.; Professor, Department of Molecular Physiology and Biophysics; PHD, University of Chicago
Van der Vliet, Albert; Professor, Department of Pathology; PHD, University of Amsterdam
Van Houten, Judith Lee; Professor, Department of Biology; PHD, University of California Berkeley
Vigoreaux, Jim Osvaldo; Professor, Department of Biology; PHD, University of Oklahoma
Wallace, Susan Scholes; Professor, Department of Microbiology and Molecular Genetics; PHD, Weill Cornell Medical College
Ward, Gary E.; Professor, Department of Microbiology and Molecular Genetics; PHD, University of California San Diego
Wargo, Matthew; Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, Dartmouth College
Warshaw, David Michael; Professor, Department of Molecular Physiology and Biophysics; PHD, University of Vermont
Weiss, Daniel Jay; Professor, Department of Medicine-Pulmonary; MD, Mount Sinai School of Medicine
Wellman, George C.; Professor, Department of Pharmacology; PHD, University of Vermont
Wright, Andre-Denis G.; Professor, Department of Animal Science; PHD, University of Guelph

Biochemistry Courses

BIOC 205. Biochemistry I. 3 Credits.
Introduction to chemistry and structure of biological macromolecules; examination of mechanisms of chemical processes in biological systems including enzyme catalysis, biosynthesis, regulation, and information transfer. Prerequisite: CHEM 142 or CHEM 144. Cross-listed with: CHEM 205 and MMG 205.

BIOC 206. Biochemistry II. 3 Credits.
Continuation of Biochemistry I. Biochemistry of nucleic acids; nucleic acid based processes, such as replication and transcription; cellular information transfer, genomics, and proteomics. Prerequisite: BIOC 205. Cross-listed with: CHEM 206, MMG 206.

BIOC 207. Biochemistry Lab. 2 Credits.
Introduction to biochemical tools, including spectrometry, chromatography, and electrophoresis; natural and recombinant enzyme isolation; assays of DNA-modifying enzymes; computer-based structure/function exercises. Co-requisite: BIOC 205 or BIOC 206. Cross-listed with: CHEM 207, MMG 207.

BIOC 212. Biochemistry of Human Disease. 3 Credits.
Molecular approach to genetic, metabolic, and infectious diseases; recombinant DNA technology and medicine; molecular biology of cancer. Prerequisites: CHEM 042 or CHEM 141.
BIOC 240. Macromol Struct Prot&Nucl Acid. 3 Credits.
Introduction to structural biology and macromolecular structure with an emphasis on protein-protein and protein-nucleic acids interactions. Prerequisites: BIOL 001, BIOL 002; Organic Chemistry; Junior standing recommended. Cross-listed with: MMG 240. Alternate years.

BIOC 301. General Biochemistry. 0 or 3 Credits.
Survey for science majors. Chemistry, structure, metabolism, and function of proteins, carbohydrates, lipids; enzymes, bioenergetics and respiratory processes. Prerequisites: CHEM 141, CHEM 142 or CHEM 143, CHEM 144, and Department permission.

BIOC 302. General Biochemistry. 3 Credits.
Survey for science majors. Amino acids, nucleic acids, protein synthesis, cellular and physiological control mechanisms. Prerequisites: CHEM 141, CHEM 142 or CHEM 143, CHEM 144, and Department permission.

BIOC 305. Medical Biochemistry. 3 Credits.
A survey course in human biochemistry, with particular emphasis on medical applications. Prerequisite: For medical students only.

BIOC 306. Medical Biochemistry. 3 Credits.
A survey course in human biochemistry, with particular emphasis on medical applications. Prerequisite: For medical students only.

BIOC 307. Special Topics in Biochemistry. 1-3 Credits.
Areas of biochemistry not treated in concurrent advanced course offerings. Prerequisites: BIOC 301, BIOC 302.

BIOC 308. Special Topics in Biochemistry. 1-3 Credits.
Areas of biochemistry not treated in current advanced course offerings. Prerequisites: BIOC 301, BIOC 302 or Department permission.

BIOC 309. Laboratory Research Rotations. 3 Credits.
Two sequential research projects in Departmental faculty laboratories, composed of experimental work, an oral presentation, and a written report. First semester.

BIOC 310. Laboratory Research Rotations. 3 Credits.
Two sequential research projects in Departmental faculty laboratories, composed of experimental work, an oral presentation and a written report. Second semester.

BIOC 325. Data Analysis&Presentation I. 2 Credits.
Develop graduate level skills in data analysis, reading, writing, teaching and presenting your own work and that of others (Part 1 or 2). Prerequisites: Graduate standing; Enrollment in BIOC 301 and CLBI 301.

BIOC 326. Data Analysis&Presentation II. 2 Credits.
Develop graduate level skills in data analysis, reading, writing, teaching and presenting your own work and that of others (Part 2 of 2). Prerequisites: Graduate standing; Enrollment in BIOC 301 & CLBI 301.

BIOC 351. Proteins I: Structure&Function. 3 Credits.
Special Topics: Introduction to concepts in protein structure and chemistry as well as exploration of ideas in a 'hands on' fashion using computational resources. Prerequisites: BIOC 301, BIOC 302 or Department permission. Alternate years.

BIOC 352. Protein: Nucleic Acid Interact. 3 Credits.
Structure of DNA and RNA, and the structure and assembly of nucleoprotein complexes will be described using examples from prokaryotes, yeast, viruses, and mammalian cells in culture. Prerequisites: MMG 211 or equivalent; AGBI 201 or BIOC 301; BIOC 302 or equivalent. Cross-listed with: MMG 352. Alternate years.

BIOC 353. Proteins II: Enzymology. 3 Credits.
General consideration of enzyme nomenclature, purification, assay, kinetics, mechanisms, cofactors, active sites, subunit structure, allosteric and regulatory properties, and control of multienzyme systems. Prerequisites: BIOC 301, BIOC 302, and CHEM 162; Department permission. Alternate years.

BIOC 354. Nucleic Acids II. 3 Credits.
The study of structure, composition, organization, function, synthesis, and metabolism of nucleic acids and nucleoprotein particles and matrices in eukaryotic organisms. Prerequisites: BIOC 301, BIOC 302.

BIOC 370. Physical Biochemistry. 3 Credits.
Protein interaction, solubility and fractionation, electrophoresis, sedimentation, phase rule study, diffusion, viscosity, spectrophotometry, and related topics. Prerequisites: BIOC 301, BIOL 302 and CHEM 162, or Department permission.

BIOC 372. Cancer Biology. 3 Credits.
Overview of cancer biology for health science students. Foundation for cancer research. Lecture format; interdisciplinary viewpoint; outside lectures. Prerequisite: BIOC 301, BIOC 302, or Department permission.

BIOC 381. Seminar. 1 Credit.
A review of recent developments and current literature in the various fields of biochemistry. Prerequisite: Department permission.

BIOC 391. Master’s Thesis Research. 1-12 Credits.
Credit as arranged.

BIOC 392. Independent Literature Rsch. 1-12 Credits.
Reading and literature research culminating in a paper on a topic of current interest in biochemistry.

BIOC 395. Special Topics. 1-12 Credits.
BIOC 396. Special Topics. 1-12 Credits.
BIOC 491. Doctoral Dissertation Research. 1-12 Credits.
Credit as arranged.

Cell Biology Courses
CLBI 295. Special Topics. 1-8 Credits.
See Schedule of Courses for specific titles. Credit as arranged.
CLBI 301. Cell Biology. 3 Credits.
Advanced survey of cell organelles, their composition, origin, and the relationship between their structure and function. Emphasis on recent literature and current controversies. Prerequisite: CHEM 142; Graduate standing in Biology or Instructor permission. Cross-listed with: BIOL 301, PBIO 301.

CLBI 302. Spec Cells & Cell Processes. 3 Credits.
Current issues and research in the field of plant, invertebrate, mammalian cell, and molecular biology. Prerequisite: CLBI 301. Cross-listed with: BIOL 302.

CLBI 381. Seminar. 1 Credit.
One hour.

CLBI 391. Master’s Thesis Research. 1-12 Credits.
Credit as arranged.

CLBI 395. Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Credit as arranged.

CLBI 396. Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Credit as arranged.

CLBI 491. Doctoral Dissertation Research. 1-12 Credits.
Credit as arranged.

Microbiology Molecular Genetics Courses

MMG 201. Molecular Cloning Lab. 3 Credits.
Intensive advanced laboratory course in the fundamentals of recombinant DNA technology through the isolation and characterization of a unique gene. Prerequisite: MMG 104 or BIOC 207 or Instructor permission. Fall.

MMG 203. Mamm Cell Cult:Molecular Biol. 0 or 4 Credits.
The basic principles and techniques of mammalian cell culture, as well as cell and mammalian molecular genetics. Prerequisite: BCOR 103 or MMG 104, Permission of Coordinator. Alternate years. Spring.

MMG 205. Biochemistry I. 3 Credits.
Introduction to chemistry and structure of biological macromolecules; examination of mechanisms of chemical processes in biological systems, including enzyme catalysis, biosynthesis, regulation, and information transfer. Prerequisite: CHEM 142 or CHEM 144. Cross-listed with: BIOC 205, CHEM 205. Fall.

MMG 206. Biochemistry II. 3 Credits.
Continuation of Biochemistry I. Biochemistry of nucleic acids; nucleic acid based processes, such as replication and transcription; cellular information transfer, genomics, and proteomics. Prerequisite: MMG 205. Cross-listed with: BIOC 206, CHEM 206. Spring.

MMG 207. Biochemistry Lab. 2 Credits.
Introduction to biochemical tools, including spectrometry, chromatography, and electrophoresis; natural and recombinant enzyme isolation; assays of DNA-modifying enzymes; computer-based structure/function exercises. Co-requisites: MMG 205 or MMG 206. Cross-listed with: BIOC 207 and CHEM 207.

MMG 211. Prokaryotic Molecular Genetics. 3 Credits.
The organization, replication, and expression of genes in prokaryotes, focusing on the genetics of Escherichia coli and its viruses. Prerequisite: Introductory microbiology, biochemistry, genetics, and/or cell biology courses. Fall.

MMG 220. Environmental Microbiology. 3 Credits.
The activities of microorganisms, primarily bacteria, in air, soil, and water. Prerequisites: MMG 101 and Organic Chemistry Alternate years.

MMG 222. Clinical Microbiology I. 0 or 4 Credits.
Comprehensive study of human pathogenic microorganisms and their disease states in humans, which includes pathogenic bacteriology and medical mycology. Laboratory sessions provide practical experience in handling and identifying these pathogens. Prerequisites: MMG 065 or MMG 101 or equivalent or Instructor permission. Alternate years. Spring.

MMG 223. Immunology. 3 Credits.
Analysis of the immune response with respect to structure and function of immunoglobulins and the T-cell receptor, tolerance, innate and adaptive immunity, the Major Histocompatibility Complex, hypersensitivity states, transplantation, cancer, and AIDS. Prerequisite: Instructor permission. Alternate years, Spring.

MMG 225. Eukaryotic Virology. 3 Credits.
An in-depth analysis of eukaryotic virus-mammalian cell interactions emphasizing mechanisms by which viruses modulate gene expression in infected cells. Prerequisite: MMG 101 or MMG 104 or equivalent. Alternate years. Fall.

MMG 231. Programming for Bioinformatics. 3 Credits.
Introductory course on computing (including scripting, database, and statistical analysis) for developing bioinformatics applications. Particular emphasis is given to comparative genomics and systems biology scenarios. Prerequisites: STAT 151, STAT 153, or Instructor permission. Cross-listed with: CS 231. Alternate Years. Spring.

MMG 232. Methods in Bioinformatics. 3 Credits.
This course provides a methodological survey of bioinformatics. Particular emphasis is given to algorithms associated with sequential analysis, comparative genomics, structural biology, and systems biology. Prerequisites: STAT 151, STAT 153, or Instructor permission. Cross-listed with: CS 232. Alternate Years. Spring.

MMG 233. Genetics and Genomics. 3 Credits.
Integrated entry into both genome science and modern genetic analysis. Students will develop skills needed to access, organize and interpret emerging genomic information. Prerequisite: Junior/Senior/Graduate standing in biological or computational sciences.

MMG 295. Advanced Special Topics. 1-6 Credits.
Supervised investigations in microbiology or molecular genetics. Prerequisite: Instructor permission. Credit as arranged.

MMG 296. Advanced Special Topics. 1-6 Credits.
Supervised investigations in microbiology or molecular genetics. Prerequisite: Instructor permission. Credit as arranged.
MMG 310. Current Topics in MMG. 2 Credits.
Seminar to focus on specific issues at the forefront of current research in molecular genetics. Meetings will involve student presentation and discussion of research articles. Prerequisite: Permission of Coordinator.

MMG 312. Eukaryotic Molecular Genetics. 3 Credits.
The use of lower eukaryotes, such as the yeasts Saccharomyces cerevisiae and Schizosaccharomyces pombe, as model genetic systems to answer questions of basic biological importance. Prerequisites: Instructor permission; MMG 233 and CLBI 301, or equivalent.

MMG 320. Cellular Microbiology. 4 Credits.
Utilizes primary literature to explore the cellular and molecular basis of microbial pathogenesis caused by viruses, pathogenic bacteria and protozoan parasites. Alternate years. Spring.

MMG 332. Critical Reading. 1 Credit.
Students will participate in group discussions to critically evaluate and interpret the experimental data from one assigned paper from the scientific literature per week. Prerequisite: Permission of Coordinator. Fall.

MMG 352. Protein:Nucleic Acid Interact. 3 Credits.
Structure of DNA and RNA, and the structure and assembly of nucleoprotein complexes will be described using examples from prokaryotes, yeasts, viruses, and mammalian cells in culture. Prerequisite: MMG 211 or equivalent; AGBI 201 or BIOC 301; BIOC 302 or equivalent. Cross-listed with: BIOC 352. Alternate years. Spring.

MMG 391. Master's Thesis Research. 1-18 Credits.

MPBP 301. Human Physiology & Pharm I. 4 Credits.
An integrated examination of the physiology and pharmacology of the peripheral nervous, muscle and cardiovascular systems in the human body. Pre/co-requisites: CHEM 032 and CHEM 042 or equivalent, two semesters general physics, and two semesters calculus. May not be taken for credit with MPBP 306.

MPBP 302. Human Physiology & Pharm II. 4 Credits.
An integrated examination of the physiology and pharmacology of the endocrine, digestive, renal and respiratory systems in the human body. Pre/co-requisites: CHEM 032 and CHEM 042 or equivalent; two semesters general physics, two semesters calculus, MPBP 301 or Instructor permission. May not be taken for credit with MPBP 306.

MPBP 303. Critical Reading. 1 Credit.
Critical reading of the current literature, team taught by the faculty in the Dept. of Molecular Physiology & Biophysics, giving broad exposure to the expertise present in the department.

MPBP 306. Medical Physiology. 8 Credits.
Function in the whole human organism, and at the cellular, tissue, and organ levels, considered biologically and physically. Pre/co-requisite: Permission of Department Chair. May not be taken for credit with MPBP 301 or MPBP 302.

MPBP 308. Biometrics & Applied Statistic. 3 Credits.
The rationale and application of biostatistical methods in the biological, health and life sciences with emphasis on interpreting and reporting results. Prerequisite: STAT 141 or equivalent. Cross-listed with: BIOS 308, STAT 308.

MPBP 310. Molecular Control of the Cell. 3 Credits.
Examines the fundamental molecular mechanisms that control dynamic cellular processes. Advanced topics in cell biology will be explored from the single molecule to the whole tissue level with an emphasis on the coordination of complex molecular systems. Prerequisites: MPBP 301, BIOC 301, BIOC 302; Instructor permission.

MPBP 323. Biophysical Techniques. 4 Credits.

MPBP 333. 3D Electron Microscopy&Img Prc. 1 Credit.

MPBP 381. Seminar. 1 Credit.
Presentation and discussion by advanced students, staff, and invited speakers, of current topics in physiology. Prerequisite: Department permission.

MPBP 391. Master's Thesis Research. 1-18 Credits.

MPBP 395. Special Topics in MPBP. 1-4 Credits.
Topics of interest to Graduate students beyond the scope of existing courses.

MPBP 491. Doctoral Dissertation Research. 1-18 Credits.

NSCI 225. Human Neuroanatomy. 0-3 Credits.
Functional anatomy of the human nervous system and its cells. Focus on both peripheral and central nervous system. Lectures and laboratory (gross and microscopic anatomy). Prerequisite: Instructor permission.
NSCI 302. Neuroscience. 4 Credits.
This course examines the structure and functions of the human nervous system, provides laboratory experience with dissected specimens and incorporates clinical information. Prerequisites: Open to graduate students in Physical Therapy and others with Instructor permission.

NSCI 306. Techniques in Neurobiology. 3 Credits.
Discussion of techniques used to study the nervous system. Experience with light, fluorescence, electron microscopy; microsurgical procedures; electrophysiological stimulating, recording techniques; neuronal tracing techniques. Prerequisite: Permission of the Instructor.

NSCI 320. Developmental Neurobiology. 3 Credits.
Provides fundamental knowledge of cell-to-cell interactions necessary for proper development and organization of the nervous system. Topics include pattern formation, neuronal differentiation, axon guidance, and target interactions. Prerequisite: Permission of the Instructor. Alternate years.

NSCI 323. Neurochemistry. 3 Credits.
Biochemistry of the nervous system. Topics include ion channels, synaptic function, neurotransmitters and neuropeptides, signal transduction, and hormones in brain function. Prerequisite: Permission of the Instructor.

NSCI 326. Basic Sci-Neurologic Disease. 1 Credit.
In-depth examination of basic mechanisms and clinical aspects of one neurological disease per year. Disease examined changes every year. Prerequisite: Advanced Graduate Students, Neuroscience Faculty and Residents in Neurology, Neurosurgery and Psychology.

NSCI 327. Resp Conduct in Biomed Rsch. 1 Credit.
Topics in Scientific Integrity surrounding responsible conduct and practices in biomedical research. Prerequisites: Advanced Graduate students, postdoctoral fellows and assistant professors in the biological or biomedical sciences.

NSCI 328. Techniques in Microscopy. 3 Credits.
Topics shall include practical background in microscopy, including brightfield, epifluorescence, confocal, multi-photon, deconvolution, atomic force and electron microscopy. Prerequisite: Instructor permission.

NSCI 329. Topics in Excitable Membranes. 2 Credits.
This course is a graduate course designed to introduce the fundamentals of cellular electrophysiology through independent student reading and faculty-led group discussions of journal articles. Prerequisite: Instructor permission.

NSCI 330. Comparative Neurobiology. 2 Credits.
This course is designed to introduce students to the cellular mechanisms that underlie selective motor and sensory abilities that have evolved in various species. Pre/co-requisite: Instructor permission.

NSCI 381. Seminar in Neuroscience. 1 Credit.
Research presentations and critical review of the literature in various areas of anatomical and neurobiological sciences.

NSCI 382. Seminar in Neuroscience. 1 Credit.
Research presentations and critical review of the literature in various areas of anatomical and neurobiological sciences.

NSCI 391. Master’s Thesis Research. 1-18 Credits.
NSCI 395. Special Topics in Neuroscience. 1-3 Credits.
See Schedule of Courses for specific titles. Prerequisite: Instructor permission.

NSCI 491. Doctoral Dissertation Research. 1-18 Credits.

Pharmacology Courses

PHRM 201. Introduction to Pharmacology. 3 Credits.
This course will focus on biochemical and physiological actions of prototype drugs used in the treatment and prevention of human diseases. Prerequisite: Introductory courses in Biology and Organic Chemistry.

PHRM 240. Molecules & Medicine. 3 Credits.
This course conveys an understanding about drug design and the molecular mechanisms by which drugs act in the body. It highlights the importance of medicinal chemistry as it overlaps with the disciplines of chemistry, biochemistry, microbiology, cell biology, and pharmacology. Prerequisites: Intro to Organic Chemistry, Intro to Biology; Permission.

PHRM 272. Toxicology. 3 Credits.
This course is intended to provide an understanding of the chemical, biochemical and physiological factors that determine the pathological effects of chemicals in living systems. Prerequisites: Organic chemistry, background in Biology, or Instructor permission.

PHRM 290. Topics Molecular&Cell Pharm. 3 Credits.
Focuses on basic principles, drug interactions with receptors, membranes, synapses, neurotransmitters, macromoles, cytoskeleton, ion channels and pumps, and mechanisms of drug resistance. Prerequisite: Introductory course in organic chemistry, background in physiology or health sciences.

PHRM 301. Medical Pharmacology. 6 Credits.
All topics for a conventional course in pharmacology for medical students or health science students. General pharmacokinetic and pharmacodynamic principles, treatment rationales and adverse effects.

PHRM 302. Pharmacological Techniques. 2 Credits.
Experiments conducted under supervision in the areas of drug metabolism, modes of drug action, physicochemical properties of drugs, bioassay, and toxicology.

PHRM 303. Pharmacological Techniques. 2 Credits.
Experiments conducted under supervision in the areas of drug metabolism, modes of drug action, physicochemical properties of drugs, bioassay, and toxicology.

PHRM 305. Milestones in Pharmacology. 2 Credits.
A critical readings class where students read and present landmark pharmacology papers and link them to modern experiments and clinical applications. Co-requisites: PHRM 201 or Graduate standing.
PHRM 372. Special Topics. 1-3 Credits.
Topics of current interest and importance in pharmacology are considered in depth through presentations by staff, students, and visiting scientists. Prerequisite: Instructor Permission. Credit variable.

PHRM 373. Readings in Pharmacology. 2 Credits.
Intensive directed reading in one area of pharmacology. Pharmacology students must choose a topic outside thesis research area. Term paper and seminar on selected topic required. Prerequisite: Instructor Permission.

PHRM 381. Seminar. 1 Credit.
Current developments in pharmacology are presented for discussion by students. Prerequisite: Instructor Permission.

PHRM 391. Master's Thesis Research. 1-12 Credits.

PHRM 491. Doctoral Dissertation Research. 1-12 Credits.
