DEPARTMENT OF GEOGRAPHY
http://www.uvm.edu/~geograph/

UVM’s Geography major equips students with analytical and conceptual skills, as well as an understanding of the spatial dimensions of physical, environmental, and human phenomena. Students develop a broad, international, interdisciplinary and comparative perspective, along with valuable technical skills.

Introductory offerings include courses on the geography of race and ethnicity, skills-based “geotechniques,” weather and climate, space and society, and world regional geography. Intermediate classes include political geography, water resources, cultural ecology, biogeography, geography and gender, climatology, international development and political ecology, urban geography, GIS and remote sensing, and regional courses. At the advanced level, classes include spatial analysis, research methods, social geography, climate and hazards, and global economic restructuring. These offerings take students conceptually around the world, and some include international field experiences.
