PUBLIC HEALTH (PH)

Courses

PH 301. Public Health & Health Policy. 3 Credits.
Course focuses on current public health issues, barriers to improving population health, and policy tensions between science, economics, education, politics, government, media, and public health.

PH 302. Epidemiology I. 3 Credits.
Epidemiology is the study of disease distribution and determinants in populations; we will define populations and estimate the distribution of health-related conditions and their determinants. Pre/co-requisites: Bachelor's degree and college-level mathematics course.

PH 303. Biostatistics I: App Rsch in PH. 3 Credits.
Biostatistics I (Applied Research Methods in Public Health) includes biostatistics, research designs, and qualitative approaches, and includes emphasis on evaluating research articles in public health. Pre/co-requisites: Bachelor's degree and college-level mathematics course.

PH 304. Environmental Public Health. 3 Credits.
Explores major areas of environmental public health (EPH), including environmental hazards, exposures, and related health outcomes, including emerging topics in environmental public health.

PH 305. Pol, Org & Finance in Hlth Care. 3 Credits.
This course looks at U.S. health care policies, organizational structures and financing systems and examines key concepts from economic, social, ethical, political and global perspectives.

PH 306. Social&Behavioral Public Hlth. 3 Credits.
This course addresses the behavioral, social and cultural factors related to individual and population health, and health disparities over the life course.

PH 307. Epidemiology 2. 3 Credits.
Exposure to advanced epidemiological concepts, such as effect modifications and modeling using multiple variables, related to establishing causal relationships from observational data. Prerequisite: PH 302, PH 303.

PH 308. Environmental Public Health 2. 3 Credits.
Students explore public health within the context of natural and human-made environments, and examine methods of practice and emerging environmental health topics. Prerequisite: PH 304.

PH 309. Public Health Biostatistics II. 3 Credits.
An advanced applied research methods course with the goal of helping students understand and apply multivariate regression analyses, non-parametric methods, survival analysis and advanced concepts with confounding and effect modification, and interpreting data in public health applications. Prerequisite: PH 303.

PH 310. Public Health Law and Ethics. 3 Credits.
Public health law examines the government's authority, at various jurisdictional levels, to improve the health of the general population within societal limits and norms. Prerequisite: Bachelor's degree.

PH 311. Global Public Health. 3 Credits.
This course explores global public health challenges affecting people primarily in developing or resource-constrained countries. Cultural competency concepts will be embedded. Prerequisite: Bachelor's degree.

PH 312. Food Systems & Public Hlth. 3 Credits.
This course explores food systems' influence on public health, and how technology, policy, biology, epidemiology, and historical knowledge can support a healthier food system. Prerequisite: Bachelor's degree.

PH 313. Public Health & Social Justice. 3 Credits.
Analytical examination of the relationship between health policies and programs and social justice issues in the United States with exemplars from other countries.

PH 314. Environmental Risk & Risk Comm. 3 Credits.
This course explores theory, policy and techniques for environmental risk communication from the viewpoints of government, industry, special interest groups, and the general public.

PH 315. Public Health Surveillance. 3 Credits.
Explores surveillance of infectious and non-infectious diseases, health behaviors and population characteristics, fundamental to nearly all fields of modern public health practice. Prerequisite: PH 302.

PH 317. Mgmt in Hlth Services&Med Care. 3 Credits.
Addresses major issues and challenges faced by health services managers relating to established and evolving social, economic, and professional policies in a context of practical problem assessment and appropriate resolution. Cross-listed with: BSAD 331, PA 312.

PH 318. Improving Hlth in Patients & Pop. 3 Credits.
Principles of epidemiology, health determinants, community resources, and interprofessional collaboration are all used to develop and implement strategies to improve health in patients and populations.

PH 319. Environmental Health Law & Pol. 3 Credits.
Introduces non-lawyers to American law as it relates to the protection of environmental and public health.

PH 321. Controversies in Hlth Economics. 3 Credits.
Covers health economic concepts, principles and theories, as well as the application of these methods to a range of practical scenarios. Examines the advantages and disadvantages of various health economic techniques and health economic evaluation.

PH 322. One Health: Zoonoses. 3 Credits.
Zoonoses and vector-born disease account for the majority of emerging and re-emerging diseases. Students will learn about the drivers that influence infection in animals and humans, tools used for disease monitoring and prevention, and policies and programs aimed at prevention.
PH 324. Public Health Informatics. 3 Credits.
Public health practice relies on timely, thorough and reliable
information from a variety of sources. Informatics is an emerging field
that employs information technology tools and methods to address
public health challenges and to improve public health outcomes.

PH 325. Investigating Disease Outbreaks. 3 Credits.
Investigating disease outbreaks is a fundamental responsibility
of public health. This course covers field epidemiology outbreak
investigation methods, working on an investigatory team, interacting
with relevant agencies, and the selection and implementation of
appropriate interventions.

PH 326. Legal Issues in Health Care. 3 Credits.
Provides an overview of the legal environment related to healthcare.
Using court decisions and other law, explores medical malpractice,
negligence, liability, patient rights, healthcare reform and compliance
with such laws as Medicaid, Medicare, and HIPAA.

PH 392. Culminating Project Experience. 1-6 Credits.
Prepares students to apply knowledge and skills in a culminating
project experience that reflects research and practice needs of actual
populations. Prerequisites: PH 301, PH 302, PH 303, PH 307.

PH 393. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student,
which occurs outside the traditional classroom/laboratory setting
under the supervision of a faculty member, for which credit is
awarded. Offered at department discretion.

PH 395. Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PH 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.
