GRADUATE CATALOGUE

Students at the University of Vermont are responsible for knowing and complying with all requirements for their respective degrees as stated in the catalogue.

The University of Vermont reserves the right to make changes in the course offerings, degree requirements, charges, regulations, and procedures contained herein as educational and financial considerations require, subject to and consistent with established procedures and authorizations for making such changes.

The following programs are currently inactive and thus do not have a listing in the catalogue: Certificate of Graduate Study in Ecological Design, and doctoral programs in Biochemistry, Microbiology and Molecular Genetics, Molecular Physiology and Biophysics, and Pharmacology. Doctoral education in the listed disciplines is available through the interdisciplinary Cellular, Molecular and Biomedical Sciences doctoral program.

COURSES

TO VIEW THE COURSE LIST, SELECT "MENU" AND THEN "COURSE LIST"

The University reserves the right to change course offerings at any time.

A student who lacks the stated prerequisites for a course may be permitted to enroll by the Instructor. Such students must inform the instructor that they lack the prerequisites, and the instructor will make appropriate efforts to ascertain that they are properly qualified. Students enrolled who do not meet the prerequisites of a course may be disenrolled from that course. The instructor will notify the Office of the Registrar of this action.

ABOUT UVM COURSES - INFORMATION FOR GRADUATE STUDENTS

Courses numbered from 001 to 099 are introductory courses. Under no circumstance will graduate credit be allowed for a course numbered below 100.

Courses numbered 100 to 199 are intermediate courses, and may not be taken for graduate credit except upon the recommendation of a student’s Studies Committee and with the authorization of the Dean of the Graduate College prior to enrollment. Graduate programs designed for the Master of Science for Teachers degree (MST) are exempted from this rule. Non-degree students are not permitted to receive graduate credit for courses numbered 100 to 199.

Courses numbered 200 to 299 are advanced courses. An advanced course presents concepts, results, or arguments which are only accessible to students who have taken courses in the discipline (or, occasionally, in a related discipline) at the introductory and intermediate levels. Prior acquaintance with the basic concepts of the subject and with some special areas of the subject will be assumed. An advanced course will always have a minimum prerequisite of three hours of prior study at the intermediate level in the discipline, or in a related discipline, or some specified equivalent preparation. Not all 200-level courses are eligible for graduate credit. Courses numbered 200 to 299 that are not approved for graduate credit may not be taken for graduate credit except upon the recommendation of a student’s Studies Committee and with the authorization of the Dean of the Graduate College prior to enrollment.

Authorization to enroll in courses numbered 100 to 199, or courses numbered 200 to 299 that are not eligible for graduate credit, will be limited to one appropriate course (three credit hours) for a master’s program and two appropriate courses (six credit hours) for a doctoral program. Graduate students may take additional 100-level or 200-level courses beyond those values, but graduate credit will not be allowed for such courses.

The 200-level courses that are eligible for graduate credit are included in the Graduate Catalogue course list. Graduate students enrolled in a 200-level course approved for graduate credit must take the course for graduate credit. To obtain graduate credit, the graduate student generally is expected to meet higher qualitative and/or quantitative expectations than the undergraduate student.

Courses numbered 300 to 399 are generally limited to graduate students unless permission to enroll is given by the appropriate instructor, department or program.

Courses numbered 400 or above are limited to candidates for doctoral degrees.

SPECIAL TOPICS COURSE POLICY - INFORMATION FOR FACULTY MEMBERS

A course offered under the Special Topics course rubric (i.e., X095/ X096) may be presented up to three times within a ten-year period before it must be submitted for review as a permanent course offering listed under a unique course number in the Catalogue.

COURSE LIST

ANATOMY & NEUROBIOLOGY (ANNB)

Courses

ANNB 261. Neurobiology. 3 Credits.
Focus on molecular and cellular aspects of the nervous system. Electrical signaling, synaptic transmission, signal transduction, neural development, plasticity, and diseases. Prerequisite: BIOL 103 or ANPS 019 & ANPS 020.

ANNB 300. Human Gross Anatomy. 6 Credits.
Lectures and detailed regional cadaver dissections emphasize functional anatomy of major systems (e.g. musculoskeletal, cardiovascular, nervous). Physical Therapy students or Instructor permission.

ANNB 301. Medical Gross Anatomy. 8 Credits.
This course includes a complete cadaver dissection by all students and evaluation in embryology as required. Emphasis is placed on individualized laboratory instruction. Prerequisite: Current Medical, Osteopathic, Podiatric and Dental students or Instructor permission.
ANBB 342. Spec Dissections in Gross Anat. 1-12 Credits.
A detailed and independent study of a single anatomical region, utilizing gross, microscopic, and embryologic materials. Prerequisite: Permission of the Instructor.

ANBB 382. Sem in Anatomy & Neurobiology. 1 Credit.
Research presentations and critical review of the literature in various areas of anatomical and neurobiological sciences.

ANBB 391. Master's Thesis Research. 1-18 Credits.
Credit as arranged.

ANBB 396. Special Topics in Neurobiology. 1-3 Credits.
Prerequisite: Permission of the Instructor.

ANBB 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

ANIMAL, NUTRITION & FOOD SCI (ANFS)

Courses

ANFS 313. Food Safety and Public Policy. 3 Credits.
An exploration of issues that impact the development of microbiological food safety policy through analysis of how science and risk assessment are used in establishing policy. Pre/co-requisite: NFS 203 or Pre/co-requisites: NFS 203 or NFS 253 or Instructor permission. Cross-listed with: NFS 313.

ANFS 395. Advanced Special Topics. 1-18 Credits.
Lectures, laboratories, readings, or projects relating to topics in animal, nutrition and food sciences. Pre/co-requisite: Graduate standing.

ANFS 491. Doctoral Dissertation. 1-18 Credits.

ANFS 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

ANIMAL SCIENCES (ASCI)

Courses

ASCI 215. Physiology of Reproduction. 3 Credits.
Fundamental principles of the physiology of reproduction with emphasis on, but not limited to, farm animals. Prerequisite: ASCI 141 or equivalent or Instructor permission.

ASCI 216. Endocrinology. 3 Credits.
Physiology of endocrine and autocrine/paracrine systems and growth factors. Prerequisites: BIOL 001 or BCOR 011 and ASCI 141 or ANPS 019 or ANPS 020.

ASCI 220. Lactation Physiology. 3 Credits.
Physiological mechanisms that control and affect lactation in domestic and laboratory animals with emphasis on dairy cattle. Includes mammary anatomy, development and health, and milk synthesis. Prerequisite: One Chemistry course and one course in Anatomy and Physiology, or Instructor permission.

ASCI 230. Agricultural Policy & Ethics. 3 Credits.
Examines American agriculture and policies from various perspectives - historical, political, ecological, technological, social, economic, and ethical. Emphasis on contemporary issues, policy options, future developments. Prerequisite: Junior standing or permission.

ASCI 263. Clin Top:Companion Animal Med. 3 Credits.
The use of case studies in companion animal medicine to develop clinical, analytical, and diagnostic skills. Prerequisites: ASCI 118, ASCI 141; Junior standing.

ASCI 264. Clin Topics:Livestock Medicine. 3 Credits.
An advanced study of diseases in cattle, sheep, goats, and pigs, emphasizing disease detection, pathobiology, treatment and prevention. Prerequisites: ASCI 118, ASCI 141, Junior standing.

ASCI 272. Adv Top:Zoo,Exotic,Endang Spec. 3 Credits.
An exploration of modern zoo philosophy and ethics and the extent of human intervention necessary for the preservation of endangered species. Prerequisites: ASCI 171 and Instructor permission.

ASCI 297. Advanced Special Topics. 1-18 Credits.
Written courses, seminars or topics beyond the scope of existing offerings. See Schedule of Courses for specific titles. Prerequisite: Department Chair permission. May enroll more than once for maximum of fifteen hours.

ASCI 298. Advanced Special Topics. 1-18 Credits.
Written courses, seminars or topics beyond the scope of existing offerings. See Schedule of Courses for specific titles. Prerequisite: Department Chair permission. May enroll more than once for maximum of fifteen hours.

ASCI 301. ASCI Graduate Journal Club. 1 Credit.
Students learn to critically read and discuss current scientific literature in terms of scientific method and merit. Pre/corequisite: Graduate standing.

ASCI 302. ASCI Graduate Seminar. 1 Credit.
Topics of current faculty and graduate student interest presented in a seminar-discussion format. Pre/corequisite: Graduate standing.

ASCI 303. Research Proposal Writing. 2 Credits.
Students discuss and practice the grant/proposal writing process by developing and writing a research proposal in response to a specific request for proposals. Students practice grant writing and review, and they share their work and review the work of others. Pre/Co-requisites: Graduate standing; recommended be taken prior to/ during the semester of student's first committee meeting.

ASCI 322. One Health: Zoonoses. 3 Credits.
Zoonoses and vector-born disease account for the majority of emerging and re-emerging diseases. Students will learn about the drivers that influence infection in animals and humans, tools used for disease monitoring and prevention, and policies and programs aimed at prevention. Cross-listed with: PH 322.

ASCI 391. Master's Thesis Research. 1-10 Credits.

ASCI 392. Independent Literature Rsch. 1-6 Credits.
Reading and literature research culminating in a paper on a topic of current interest in Animal Sciences.
ASCI 395. Special Topics. 1-6 Credits.
ASCI 396. Advanced Special Topics. 1-6 Credits.
ASCI 491. Doctoral Dissertation Research. 1-12 Credits.
ASCI 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

ANTHROPOLOGY (ANTH)

Courses

ANTH 200. Field Work in Archaeology. 6 Credits.
Methods and techniques of archaeological investigation in field situations and the laboratory analysis of data. Prerequisites: ANTH 024, and one 100-level course in Anthropology or History, or Instructor permission.

ANTH 210. Archaeological Theory. 3 Credits.
Development of archaeology from the 19th century to the present including concepts of form, space and time, intellectual attitudes, current systems theory, and research strategies. Prerequisites: ANTH 024 and one 100-level Anthropology course, or HST 121, HST 122, or HST 149, or HP 201, or graduate standing in Historic Preservation Program.

ANTH 225. Anthropological Theory. 3 Credits.
Schools of anthropological thought examined in relation to data on non-Western societies and the historical and social context in which the anthropologist works. Prerequisites: ANTH 021, one 100-level course.

ANTH 228. Social Organization. 3 Credits.
Examination of the basic anthropological concepts and theories used in the cross-cultural analysis of kinship and marriage. Prerequisites: ANTH 021, one 100-level course.

ANTH 283. Colonialism. 3 Credits.
The concepts, ideologies, and practice(s) of colonialism within a sociocultural and historical context emphasizing the cultures of the colonizer and the colonized and the interaction thereof. Prerequisites: ANTH 021, one 100-level course. Alternate years.

ART HISTORY (ARTH)

Courses

ARTH 282. Seminar in Western Art. 3 Credits.
Selected topics in Western Art. See Schedule of Courses for specific offerings each semester. Prerequisites: Six hours of 100-level Art History, including three hours in the area of the seminar; Minimum Junior standing.

ASTRONOMY (ASTR)

Courses

ASTR 257. Modern Astrophysics. 3 Credits.
Prerequisite: One 100-level course in physical science or Engineering. Cross-listed with PHYS 257.

BIOCHEMISTRY (BIOC)

Courses

BIOC 201. Fundamentals of Biochemistry. 3 Credits.
Provides a broad introduction to the field of biochemistry. Students will explore the molecular basis and chemical principles of biochemistry pertinent to living systems. This course is taught by LCOM faculty and emphasizes the relevance of biochemistry to health, disease, physiology and medicine. Prerequisites: CHEM 026, CHEM 042, CHEM 048, CHEM 142, or equivalent; BIOL 002, BCOR 012, BCOR 103, or equivalent.

BIOC 205. Biochemistry I. 3 Credits.
Introduction to chemistry and structure of biological macromolecules; examination of mechanisms of chemical processes in biological systems including enzyme catalysis, biosynthesis, regulation, and information transfer. Prerequisite: CHEM 048 or CHEM 142 or CHEM 144. Cross-listed with: CHEM 205 and MMG 205.

BIOC 206. Biochemistry II. 3 Credits.
Continuation of Biochemistry I. Biochemistry of nucleic acids; nucleic acid based processes, such as replication and transcription; cellular information transfer, genomics, and proteomics. Prerequisite: BIOC 205, CHEM 205, or MMG 205. Cross-listed with: CHEM 206, MMG 206.

BIOC 207. Biochemistry Lab. 3 Credits.
Introduction to biochemical tools, including spectrometry, chromatography, and electrophoresis; natural and recombinant enzyme isolation; assays of DNA-modifying enzymes; computer-based structure/function exercises. Prerequisite: BIOC 205, CHEM 205, or MMG 205. Cross-listed with: CHEM 207, MMG 207.

BIOC 240. Macromol Struct Prot&Nucl Acid. 3 Credits.
Introduction to structural biology and macromolecular structure with an emphasis on protein-protein and protein-nucleic acids interactions. Prerequisites: BIOL 002 or BCOR 012, and CHEM 142; Junior standing. Cross-listed with: MMG 240. Alternate years.
BIOC 275. **Adv Biochem of Human Disease. 3 Credits.**
The course takes a deep dive into five distinct areas of biochemistry related to a disease or group of diseases primarily through group learning. Key biochemical principles are reviewed and extended. Additionally students will read and discuss a primary literature article with each area. Prerequisites: NSF 183, BIOC 201, or BIOC 205.

BIOC 301. **General Biochemistry. 0 or 3 Credits.**
Survey for science majors. Chemistry, structure, metabolism, and function of proteins, carbohydrates, lipids; enzymes, bioenergetics and respiratory processes. Prerequisite: CHEM 142 or CHEM 144, or Instructor permission.

BIOC 302. **General Biochemistry. 3 Credits.**
Survey for science majors. Amino acids, nucleic acids, protein synthesis, cellular and physiological control mechanisms. Prerequisite: CHEM 142 or CHEM 144, or Instructor permission.

BIOC 305. **Medical Biochemistry. 3 Credits.**
A survey course in human biochemistry, with particular emphasis on medical applications.

BIOC 306. **Medical Biochemistry. 3 Credits.**
A survey course in human biochemistry, with particular emphasis on medical applications.

BIOC 307. **Special Topics in Biochemistry. 1-3 Credits.**
Areas of biochemistry not treated in concurrent advanced course offerings.

BIOC 308. **Special Topics in Biochemistry. 1-3 Credits.**
Areas of biochemistry not treated in current advanced course offerings.

BIOC 309. **Laboratory Research Rotations. 3 Credits.**
Two sequential research projects in Departmental faculty laboratories, composed of experimental work, an oral presentation, and a written report. First semester.

BIOC 310. **Laboratory Research Rotations. 3 Credits.**
Two sequential research projects in Departmental faculty laboratories, composed of experimental work, an oral presentation and a written report. Second semester.

BIOC 325. **Data Analysis&Presentation I. 2 Credits.**
Develop graduate level skills in data analysis, reading, writing, teaching and presenting your own work and that of others (Part 1 of 2). Prerequisites: Graduate standing; Enrollment in BIOC 301 and CLBI 301. Cross-listed with: MPBP 325.

BIOC 326. **Data Analysis&Presentation II. 2 Credits.**
Develop graduate level skills in data analysis, reading, writing, teaching and presenting your own work and that of others (Part 2 of 2). Prerequisites: BIOC 301, CLBI 301; Graduate standing. Cross-listed with MPBP 326.

BIOC 351. **Proteins I: Structure&Function. 3 Credits.**
Special Topics: Introduction to concepts in protein structure and chemistry as well as exploration of ideas in a “hands on” fashion using computational resources. Prerequisite: BIOC 301, or Department permission. Alternate years.

BIOC 352. **Protein: Nucleic Acid Interact. 3 Credits.**
Structure of DNA and RNA, and the structure and assembly of nucleoprotein complexes will be described using examples from prokaryotes, yeast, viruses, and mammalian cells in culture. Prerequisites: MMG 211 or equivalent, and BIOC 302 or equivalent. Cross-listed with: MMG 352. Alternate years.

BIOC 353. **Proteins II: Enzymology. 3 Credits.**
General consideration of enzyme nomenclature, purification, assay, kinetics, mechanisms, cofactors, active sites, subunit structure, allosteric and regulatory properties, and control of multienzyme systems. Prerequisite: BIOC 301, or Department permission. Alternate years.

BIOC 354. **Nucleic Acids II. 3 Credits.**
The study of structure, composition, organization, function, synthesis, and metabolism of nucleic acids and nucleoprotein particles and matrices in eukaryotic organisms. Prerequisite: BIOC 302.

BIOC 370. **Physical Biochemistry. 3 Credits.**
Protein interaction, solubility and fractionation, electrophoresis, sedimentation, phase rule study, diffusion, viscosity, spectrophotometry, and related topics. Prerequisites: BIOL 302 and CHEM 162, or Department permission.

BIOC 372. **Cancer Biology. 3 Credits.**
Overview of cancer biology for health science students. Foundation for cancer research. Lecture format; interdisciplinary viewpoint; outside lectures. Prerequisite: BIOC 302, or Department permission.

BIOC 381. **Seminar. 1 Credit.**
A review of recent developments and current literature in the various fields of biochemistry. Prerequisite: Graduate standing.

BIOC 391. **Master’s Thesis Research. 1-12 Credits.**
Credit as arranged.

BIOC 392. **Independent Literature Rsch. 1-12 Credits.**
Reading and literature research culminating in a paper on a topic of current interest in biochemistry.

BIOC 395. **Special Topics. 1-12 Credits.**
BIOC 396. **Advanced Special Topics. 1-12 Credits.**
BIOC 491. **Doctoral Dissertation Research. 1-12 Credits.**
Credit as arranged.

BIOC 496. **Advanced Special Topics. 1-18 Credits.**
See Schedule of Courses for specific titles.

**BIOENGINEERING (BIOE)**

**Courses**

BIOE 391. **Master’s Thesis Research. 1-18 Credits.**

BIOE 395. **Special Topics. 1-18 Credits.**
See Schedule of Courses for specific titles.

BIOE 396. **Advanced Special Topics. 1-18 Credits.**
See Schedule of Courses for specific titles.
BIOE 491. Doctoral Dissertation Research. 1-18 Credits.
BIOE 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

BIOLOGY (BIOL)

Courses

BIOL 202. Quantitative Biology. 3 Credits.
Topics in quantitative methods in biological research, including statistics and computer-based analysis. Prerequisites: One of BCOR 101, BCOR 102, BCOR 103; MATH 019, MATH 020.

BIOL 203. Population Ecology. 3 Credits.
Analysis of growth, regulation, and interrelations of biological populations in theoretical, laboratory, and natural systems. Prerequisite: BCOR 102.

BIOL 204. Adv Genetics Laboratory. 4 Credits.
Laboratory experiments to provide experience with modern genetic techniques. Bench work and data analysis emphasized. Prerequisite: BCOR 101.

BIOL 205. Adv Genetics & Proteomics Lab. 4 Credits.
Laboratory experiments to provide experience with modern genetic and proteomics techniques. Bench work and data analysis are emphasized. Prerequisites: BCOR 101, BCOR 103.

BIOL 208. Morphology & Evolution Insects. 0 or 4 Credits.
Systematics, morphology, and anatomy of insect taxa, with comparisons to related arthropods. Prerequisite: BCOR 102.

BIOL 209. Field Zoology. 0 or 4 Credits.
Collection, identification, and ecology of arthropods. Substantial field collecting. Prerequisite: BCOR 102.

BIOL 212. Comparative Histology. 0 or 4 Credits.
Anatomy of tissues, chiefly vertebrate. Tissue similarities and specializations of organs among the various groups of animals in relation to function. Prerequisite: BCOR 103.

BIOL 217. Mammalogy. 0 or 4 Credits.
Classification, identification, morphology, evolution, and distribution of mammals. Prerequisite: BCOR 102.

BIOL 219. Compar/Func Vertebrate Anatomy. 4 Credits.
Structure, function, and phylogeny, with evolutionary and functional trends of all chordate groups. Prerequisite: Two courses from BCOR 101, BCOR 102, BCOR 103.

BIOL 223. Developmental Biology. 3 Credits.
An analysis of the cellular, subcellular, molecular, and genetic mechanisms that operate during oogenesis and embryogenesis in invertebrate and vertebrate organisms. Prerequisites: BCOR 101, BCOR 103.

BIOL 225. Physiological Ecology. 3 Credits.
Processes by which animals cope with moderate, changing, and extreme environments. Prerequisites: BCOR 102, BIOL 255.

BIOL 238. Winter Ecology. 3 Credits.
Natural history and winter adaptation of plants and animals of western Maine. Field work during winter break; oral and written report completed during spring semester. Prerequisite: Instructor permission.

BIOL 246. Ecological Parasitology. 1 or 3 Credits.
Parasite-host interactions examined with evolutionary perspective. Topics include the origin of parasites, evolution of virulence, and ecological consequences of parasitism. Laboratory includes original experiments. Prerequisite: BCOR 102.

BIOL 254. Population Genetics. 0-4 Credits.
Methods of detecting and investigating genetic variation, as well as its causes and consequences. Applications from medicine, forensics, and environmental biology are emphasized. Pre/co-requisite: BCOR 101.

BIOL 255. Comparative Physiology. 0 or 4 Credits.
Physiology at the organ, systems, and organismal levels. Capstone course to consolidate biological concepts. Pre/co-requisites: BCOR 101, BCOR 102, BCOR 103.

BIOL 261. Neurobiology. 3 Credits.
Focus on molecular and cellular aspects of the nervous system. Electrical signaling, synaptic transmission, signal transduction, neural development, plasticity, and disease. Prerequisite: BCOR 103 or NSCI 110.

BIOL 262. Neurobiology Techniques. 4 Credits.
Extensive study of laboratory methods used in modern research on the function of the nervous system. Techniques from electrophysiology, cell biology, biochemistry, and genetics. Pre/co-requisites: BCOR 103, BIOL 261.

BIOL 263. Genetics Cell Cycle Regulation. 3 Credits.
Molecular events during the cell cycle; mutants defective in cell cycling; comparison of normal and transformed (cancer) cell cycling. Prerequisite: BCOR 101 or Instructor permission.

BIOL 264. Community Ecology. 3 Credits.
Theoretical and empirical analyses of community structure. Topics include population growth, metapopulation dynamics, competition, predation, species diversity, niches, disturbance succession, island biogeography, and conservation biology. Prerequisite: BCOR 102; at least Junior standing.

BIOL 265. Developmental Molecular Genetics. 3 Credits.
Current topics in developmental genetics explored through lectures and discussions of current literature; emphasis on molecular approaches. Prerequisite: BCOR 101.

BIOL 266. Neurodevelopment. 3 Credits.
Current topics in developmental neurobiology through lectures and discussions of primary literature. The course is designed for advanced undergraduate life science majors and graduate students in the biological sciences. Pre/co-requisites: BCOR 101 and BCOR 103.

BIOL 267. Molecular Endocrinology. 4 Credits.
Study of hormone action at the cellular and molecular level. Prerequisite: BCOR 101.
BIOL 269. Plant-Animal Interactions. 3 Credits.
Ecological and evolutionary interactions among plants and animals. Topics include herbivory, pollination, seed predation, ant-plant interactions, biological control, and anthropogenic effects on plant-animal interactions including the effects of GMOs and global climate change. Prerequisites: BIOL 201 and BIOL 202 or (BCOR 101 and BCOR 102); BCOR 102 recommended.

BIOL 270. Speciation and Phylogeny. 4 Credits.
Contribution of modern research in such fields as genetics, systematics, distribution, and serology to problems of evolutionary change. Prerequisite: BCOR 101; BCOR 102 recommended.

BIOL 271. Evolution. 3 Credits.
Basic concepts in evolution will be covered, including the causes of evolutionary change, speciation, phylogenetics, and the history of life. Pre/co-requisites: BCOR 102 or permission of the Instructor.

BIOL 275. Human Genetics. 3 Credits.
Application of genetic techniques to the study of human biology. Topics include pedigree analysis, linkage analysis, and complex genetic disorders of medical importance. Prerequisite: BIOL 101.

BIOL 276. Behavioral Ecology. 3 Credits.
Adaptive significance of behavior in natural environments. Evolutionary theory applied to behavior and tested with field data. Prerequisite: BCOR 102 or Instructor permission.

BIOL 277. Sociobiology. 3 Credits.
The evolutionary biology of social behavior in animals. Topics include the evolution of sociality, social interactions, and the functional organization of social groups. Prerequisite: BCOR 102.

BIOL 280. Molecular Ecology. 0 or 4 Credits.
Molecular genetic tools and analytical methods used to investigate ecological processes in natural populations of plants and animals. Prerequisite: BCOR 102.

BIOL 286. Forensic DNA Analysis. 3 Credits.
Theory and techniques of modern genetics used to produce and analyze a DNA profile in forensic science. Emphasis on degraded or contaminated DNA samples. Prerequisite: BCOR 101.

BIOL 295. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

BIOL 301. Cell Biology. 3 Credits.
Advanced survey of cell organelles, their composition, origin, and the relationship between their structure and function. Emphasis on recent literature and current controversies. Prerequisite: CHEM 142; Graduate standing in Biology or Instructor permission. Cross-listed with: CLBI 301, PBO 301.

BIOL 302. Specialized Cells & Cell Proc. 3 Credits.
Current issues and research in the field of plant, invertebrate, mammalian cell, and molecular biology. Prerequisite: BIOL 301.

BIOL 352. Evolutionary Computation. 3 Credits.

BIOL 371. Graduate Colloquium. 1 Credit.
Topics of current faculty and graduate student interest presented in a seminar-discussion format. Specific titles for colloquia will be listed in the course schedule.

BIOL 372. Cutting Edge Topics. 2 Credits.
Graduate students will explore cutting edge topics in depth. Students will cross disciplinary lines and learn collaboratively to solve problems. Students will present the outcomes in a talk appropriate for a lay audience. Prerequisite: Graduate standing.

BIOL 381. Special Topics. 0-4 Credits.
Readings with conferences, small seminar groups, or laboratories intended to contribute to the programs of graduate students in phases of zoology for which formal courses are not available. Prerequisite: An undergraduate major in life science.

BIOL 382. Eco Lunch. 0-1 Credits.
Review and discussion of current research. Attendance of BIOL 382 or BIOL 384 required of Biology Graduate students. Pre/co-requisites: Graduate standing and Instructor permission.

BIOL 383. Ecology-Evolution Journal Club. 0-1 Credits.
Review and discussion of current research.

BIOL 384. Cell Lunch. 0-1 Credits.
Review and discussion of current research. Attendance of BIOL 382 or BIOL 384 required of Biology Graduate students. Pre/co-requisite: Graduate standing.

BIOL 385. Biology Seminar. 0-1 Credits.
Review and discussion of current biological research. Attendance required of Biology graduate students. Pre/co-requisite: Graduate standing and Instructor permission.

BIOL 391. Master’s Thesis Rsch. 1-10 Credits.
Credit as arranged.

BIOL 491. Doctoral Dissertation Research. 1-10 Credits.

BIOL 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

BIOMEDICAL & HEALTH SCIENCES (BHSC)

Courses

BHSC 242. Immunology. 3 Credits.
Deals with cells, organs, development, interactions and the functioning (infectious process, immunodeficiency, hypersensitivity reactions, transplantation and tumor immunology) of the innate and the adaptive immune system. Prerequisites: One semester of biochemistry, one semester of organic chemistry.
BHSC 244. Immunology Lab. 1 Credit.
Laboratory experience dealing with cellular and humoral immunity, B cells and T cells, autoimmunity, immunodeficiency. Laboratory covers immunological techniques and applications. Prerequisites: One semester of biochemistry, one semester of organic chemistry. Co-requisites: BHSC 242 or MMG 223.

BHSC 281. Applied Molecular Biology. 3 Credits.
Introduces students to the nucleic acid and protein-based molecular diagnostics technology through class presentation, reading, and discussions. Focuses on diagnostic applications for understanding molecular mechanisms of disease. Prerequisite: CHEM 042 or CHEM 141.

BHSC 282. Applied Molecular Biology Lab. 1 Credit.
Laboratory experiences include practical concepts of molecular applications. Introduces basic methods used in DNA and Protein technology including plasmid isolation, polymerase chain reaction, restriction enzyme use, and related assays. Prerequisite: CHEM 042 or CHEM 141. Co-requisite: BHSC 281.

BHSC 390. Internship. 1-18 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion.

BHSC 392. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.

BIOMEDICAL ENGINEERING (BME)

Courses

BME 227. Biomedical Instrumentation. 3 Credits.
Measurement techniques for biomedical engineering research and industry, and health care institutions. Integrated biomedical monitoring, diagnostic, and therapeutic instrumentation. Prerequisite: EE 100 or EE 004. Co-requisite: EE 120, ANPS 020, or Instructor permission. Cross-listed with: EE 227.

BME 240. Wearable Sensing. 3 Credits.
Covers current state-of-the-art in wearable sensors and the biomechanical and physiological phenomena they are being used to measure. Emphasis will be given to applications related to human health and medicine. Prerequisite: ME 111 or EE 171 or equivalent with Instructor permission.

BME 241. Biomedical Signal Processing. 3 Credits.
Covers several important physiological signals often monitored in biomedical contexts (e.g., EMG, ECG, PPG). Content will include the physiology that generates the signals as well as the signal processing techniques (e.g., LTI filters, empirical mode and wavelet decomposition) and algorithms used for analysis. Prerequisite: ME 111 or EE 171 or equivalent with Instructor permission.

BME 391. Master's Thesis Research. 1-18 Credits.
Credit as arranged.

BME 393. Graduate Seminar. 1 Credit.
Presentation and discussion of advanced problems, research, and current topics in Electrical Engineering by faculty, graduate students, and outside guest speakers. Prerequisite: Graduate Student standing.

BME 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

BME 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

BIOSTATISTICS (BIOS)

Courses

BIOS 200. QR: Med Biostat&Epidemiology. 3 Credits.
Introductory design and analysis of medical studies. Epidemiological concepts, case-control and cohort studies. Clinical trials. Students evaluate statistical aspects of published health science studies. Prerequisites: STAT 111, STAT 141 or STAT 143; or STAT 211. Cross-listed with: STAT 200.

BIOS 211. QR: Statistical Methods I. 3 Credits.
Fundamental concepts for data analysis and experimental design. Descriptive and inferential statistics, including classical and nonparametric methods, regression, correlation, and analysis of variance. Statistical software. Prerequisite: Minimum Junior standing or STAT 141 or STAT 143 and Instructor permission. Cross-listed with: STAT 211.

BIOS 221. QR: Statistical Methods II. 3 Credits.
Multiple regression and correlation. Basic experimental design. Analysis of variance (fixed random and mixed models). Analysis of covariance. Computer software usage. Prerequisite: STAT 143 or STAT 211; or STAT 141 and Instructor permission. Cross-listed with: STAT 221.

BIOS 223. QR: Apld Multivariate Analysis. 3 Credits.
Multivariate normal distribution. Inference for mean vectors and covariance matrices. Multivariate analysis of variance (MANOVA), discrimination and classification, principal components, factor analysis. Prerequisite: Prerequisite: STAT 221; matrix algebra recommended. Cross-listed with: STAT 223.

BIOS 229. QR: Survival/Logistic Regres. 3 Credits.

BIOS 231. QR:Experimental Design. 3 Credits.
Randomization, complete and incomplete blocks, cross-overs, Latin squares, covariance analysis, factorial experiments, confounding, fractional factorials, nesting, split plots, repeated measures, mixed models, response surface optimization. Prerequisites: BIOS 221 or STAT 221; or BIOS 211 or STAT 211 and STAT 201. Cross-listed with: STAT 231.

BIOS 235. QR: Categorical Data Analysis. 3 Credits.
Measures of association and inference for categorical and ordinal data in multiway contingency tables. Log linear and logistic regression models. Prerequisite: BIOS 211. Cross-listed with: STAT 235.
BIOS 241. QR: Statistical Inference. 3 Credits.
Introduction to statistical theory; related probability fundamentals, derivation of statistical principles, and methodology for parameter estimation and hypothesis testing. Pre/co-requisites: BIOS 151, BIOS 153 or BIOS 25; BIOS 141 or equivalent; MATH 121. Cross-listed with: STAT 241.

BIOS 251. QR: Probability Theory. 3 Credits.

BIOS 261. QR: Statistical Theory. 3 Credits.
Point and interval estimation, hypothesis testing, and decision theory. Application of general statistical principles to areas such as nonparametric tests, sequential analysis, and linear models. Pre/co-requisites: STAT 251 or either STAT 151 or STAT 153 with Instructor permission. Cross-listed with: STAT 261.

BIOS 308. Applied Biostatistics. 3 Credits.
The rationale and application of biostatistical methods in the biological, health and life sciences with emphasis on interpreting and reporting. Prerequisite: STAT 141 or equivalent. Cross-listed with: MPBP 308, STAT 308.

BIOS 391. Master's Thesis Research. 1-12 Credits.
Credit as arranged.

BIOS 395. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

BUCKHAM OVERSEAS PROGRAM (BUCK)

Courses
BUCK 995. Buckham Program. 12 Credits.

BUSINESS ADMINISTRATION (BSAD)

Courses
BSAD 222. Human Resource Management. 3 Credits.
Critical examination of contemporary problems in human resource management; including job analysis, recruitment, training and employee development, health and safety, compensation, performance appraisal, and related topics. Prerequisites: BSAD 120; Business Administration major or minor; Master of Accountancy Graduate students; minimum Junior standing.

BSAD 226. Current Iss in Mgmt & Org Thry. 1-3 Credits.
Subjects may include training and development, selection and recruitment, and affirmative action. Prerequisites: BSAD 120; Business Administration major or minor; Minimum Junior standing.

BSAD 230. Tech, Entr & Commercialization. 3 Credits.
Provides future business and technology professionals with insights into the processes of transferring research from the university to the marketplace, and transforming new technologies into sustainable products or services that create new economic, social and environmental value. Prerequisites: BSAD 150 or EMGT 201; Business Administration major or minor; Computer Science and Information Systems major; Engineering Management major; others by permission; minimum Junior standing.

BSAD 235. Entrepreneurial Family Firms. 3 Credits.
Students will learn to work effectively in and with family enterprises - the predominant organizational form in the world. By understanding their unique advantages and challenges, students will learn to develop strategic solutions to improve the family and business performance. Prerequisites: BSAD 120; Business Administration, Engineering Management major; Business Administration minor; minimum Junior standing.

BSAD 246. Taxation of Social Enterprises. 3 Credits.
Explores the balance that organizations try to achieve between the for-profit (business) and nonprofit (charitable) separation of the tax world. Prerequisites: BSAD 161 or BSAD 180; Business Administration majors, Business Administration or Accounting minors, Master of Accountancy Graduate Students; Senior standing.

BSAD 251. Marketing Research. 3 Credits.
The role of research in a marketing information framework. Emphasis on survey research, data collection, and analysis. Experimental designs also examined. Prerequisites: BSAD 150; Business Administration major or minor; Senior or Graduate standing.

BSAD 252. Marketing Research Practicum. 3 Credits.
Market research field project. Students design survey instruments, collect and analyze data, and present results to clients in a business environment. Prerequisites: BSAD 150; Prerequisites: BSAD 251; Business Administration major or minor; Instructor permission; Minimum Junior standing.

BSAD 256. Retail Management. 3 Credits.
Provides an overview of retail management. Key perspectives that shape the field including strategic planning, merchandising, and competitive advantage are emphasized. Prerequisites: BSAD 150; Business Administration major or minor; Master of Accountancy Graduate Students; minimum Junior standing.

BSAD 258. D2: Int’l Market Analysis. 3 Credits.
Examines the cultural, economic, historic, and political factors that affect the analysis of foreign markets. Specific attention is given to the processes by which market entry decisions are developed and implemented. Prerequisites: BSAD 150, Business Administration major or minor; Minimum Junior standing.

BSAD 260. Financial Statement Analysis. 3 Credits.
Study of the concepts and techniques underlying corporate financial statement analysis, with an emphasis on equity valuation models. Prerequisites: BSAD 180; Business Administration major or minor; Senior standing.
BSAD 263. SU:Environmntl & Social Rprtng. 3 Credits.
An examination of voluntary and mandatory reporting of issues related to corporate social responsibility including environmental, social and governance. Knowledge is gained through readings, written assignments and discussion. Coverage includes GRI, SASB and integrated reporting guidelines and standards. Prerequisites: BSAD 161 or BSAD 180; Senior or Graduate student standing or Instructor permission.

BSAD 264. Corporation Taxation. 3 Credits.
A survey of the tax consequences for C corporations and their shareholders of womb-to-tomb transactions, which might include formations, acquisitions, divisions, consolidations, and international operations as well as the reporting of book/tax differences. Prerequisites: BSAD 161; Senior standing; Business Administration major, Master of Accountancy student, Business Administration minor, Accounting minor.

BSAD 265. Accounting Information Systems. 3 Credits.
Examination of how accounting information is collected, stored and made available to decision makers with an emphasis on internal control implementation. Prerequisites: BSAD 161 or BSAD 180; Senior standing; Business Administration major, Master of Accountancy student, Business Administration minor, Accounting minor.

BSAD 266. Advanced Accounting. 3 Credits.
Focuses on accounting for business combinations and developing consolidated financial statements. Includes accounting for foreign currency transactions, foreign subsidiaries, governmental entities, and not-for-profit organizations. Pre/co-requisite: BSAD 162.

BSAD 267. Auditing. 3 Credits.
Examination of auditing theory and practice. Topics include standards, ethics and legal responsibilities of the profession, audit planning, internal control, audit evidence, and auditor communications. Prerequisites: BSAD 162, BSAD 265; Senior standing; Business Administration major, Master of Accountancy student, Business Administration minor, Accounting minor.

BSAD 268. Adv Topics in Management Acctg. 3 Credits.
Emphasizes use of internal and external information in management decision making; includes cost of inventory, business activities, strategic use of information, long-range planning. Prerequisites: BSAD 161 or BSAD 180; Senior standing; Business Administration major, Master of Accountancy student, Business Administration minor, Accounting minor.

BSAD 269. Gov’t and NFP Accounting. 3 Credits.
Provides a study of the theory and practical application of accounting principles and auditing standards to governmental entities and not-for-profit organizations. Prerequisites: BSAD 161; Business Administration major or minor, Accounting minor, Master of Accountancy Graduate student; minimum Junior standing.

BSAD 270. Quant Anyl for Managerial Dec. 3 Credits.
Application of management science methods to managerial decision making, emphasizing modeling and use of solution results. Topics include mathematical programming, waiting-line analysis, and computer simulation. Prerequisites: BSAD 030, BSAD 173; Business Administration major or minor; Engineering Management major, Master of Accountancy Graduate students; other majors or minors by Instructor permission; minimum Junior standing.

BSAD 271. Current Topics Fin Reporting. 3 Credits.
Focuses on the development and use of two sets of financial reporting standards: International Financial Reporting Standards (IFRS) and US generally accepted accounting principles (GAAP). Prerequisites: BSAD 161, BSAD 162; Business Administration majors and minors, Accounting minors, Master of Accountancy Graduate students; Senior standing.

BSAD 273. Supply Chain Management. 3 Credits.
Explores how firms can organize supply chains to more effectively align supply with the demand for products. Prerequisites: BSAD 173; Business Administration major or minor; Engineering Management major, or Graduate Master of Accountancy student; minimum Junior standing or graduate standing; other majors or minors by Instructor permission.

BSAD 281. Fixed Income Security Analysis. 3 Credits.
Focuses on the valuation and analysis of fixed income securities and the management of fixed income investment portfolios. Prerequisites: BSAD 181; Business Administration major or minor, Master of Accountancy Graduate student; minimum Junior standing.

BSAD 282. Security Val & Portfolio Mgmt. 3 Credits.
Examination of theories and evidence on the investment decision process including operations of equity securities markets, market efficiency, financial asset prices, and portfolio management. Prerequisites: BSAD 181; Business Administration major or minor; Minimum Junior standing. Co-requisite: BSAD 280.

BSAD 285. Options and Futures. 3 Credits.
Financial derivatives - options, futures, and swaps. Topics include: structures of the markets for exchange traded and over-the-counter derivatives, identification and exploitation of arbitrage opportunities, use and misuse of derivatives to hedge risk in both financial and product markets. Prerequisites: BSAD 180; Minimum Junior standing; Business Administration major or minor.

BSAD 288. Wall Street Seminar. 3 Credits.
Application of financial theory to stock/bond valuation, credit analysis, security underwriting, or risk management. Students will complete projects assigned by major financial service firms. Prerequisites: BSAD 181; Business Administration major or minor or Instructor permission; minimum Junior standing.

BSAD 289. Real Estate Finance. 3 Credits.
This course is an introduction of real estate finance and investments. Topics include urban economics, appraisal, investment value analysis, financing, and development. Prerequisites: BSAD 180; Business Administration major or minor; minimum Junior standing.
BSAD 293. QR: Integrated Product Dev. 3 Credits.
Project-based course focusing on the entire product life cycle. Team dynamics, process and product design, quality, materials, management, and environmentally-conscious manufacturing. Prerequisite: Senior standing. Cross-listed with: ME 265, STAT 265.

BSAD 295. Special Topics. 1-18 Credits.
Advanced courses on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles and prerequisites. Prerequisite: Senior Business Administration major or minor.

BSAD 305. Sustainable Marketing. 3 Credits.
Accelerated course on sustainable marketing principles and theory which focuses on how enterprises respond to the twin global challenges of global poverty and environmental sustainability. Prerequisite: Graduate student standing.

BSAD 306. Fundamentals of Accounting. 3 Credits.
Introduction to basic concepts for developing and interpreting financial statements. Introduction to use of accounting information for planning, cost behavior, control, and decision making. Prerequisite: Graduate Business Administration student.

BSAD 307. Organization & Mgmt Studies. 3 Credits.
A survey course of the principles of management and organization behavior. The fundamentals of planning, organizing, leading, staffing, and controlling are covered. Particular attention is given to organization theory and behavior, including topics such as motivation, group behavior and decision making. All areas are covered in an international context. Prerequisite: Graduate Business Administration student.

BSAD 308. Finance for Sustainable Enterp. 3 Credits.
An introduction to financial decision making in sustainable enterprises. Decisions related to acquisition and allocation of funds are examined and practiced through cases and problems. Prerequisite: Graduate student standing.

BSAD 309. Political Envir of Business. 3 Credits.
Explore the rationale for government interaction with business. Analyze (1) business, and the broader society’s demand for public policy, as well as (2) the political institutions that supply public policy in both domestic and international contexts. Prerequisite: Graduate Business Administration student.

BSAD 310. Professional Communications. 3 Credits.
Addresses different components of professional communications key to accounting career success. Clear business writing, strong interpersonal skills, effective presentations and group meeting communications are emphasized and illustrated through a variety of assignments. Prerequisite: Master of Accountancy Graduate standing or Instructor permission.

BSAD 311. Mgmt in Hlth Services & Med Care. 3 Credits.
Addresses major issues and challenges faced by health services managers relating to established and evolving social, economic, and professional policies in a context of practical problem assessment and appropriate resolution. Prerequisite: Graduate Business Administration student. Cross-listed with: PA 312, PH 317.

BSAD 335. Entrepreneurial Family Bus. 3 Credits.
Long-lived family firms that sustain over generations of leaders, economic and industry life cycles, embrace transgenerational entrepreneurship and innovation as part of their culture. This course focuses on the unique dynamics and dilemmas of these family businesses. Prerequisite: Graduate student standing.

BSAD 338. Int Sustain New Business Model. 3 Credits.
Entrepreneurial activities have a significant impact on individual lives and careers as they enable the growth and sustainability of organizations. This course focuses on developing an environmentally and socially responsible business model to assess the viability of an innovative idea. Prerequisite: Graduate student standing.

BSAD 340. Green Oper. and Supply Chains. 3 Credits.
Study of the foundational concepts in supply chain and operations management in sustainable enterprises. Design, planning, and control are examined, with emphasis on managerial analysis and decision making that will help the enterprise succeed responsibly and sustainably. Prerequisite: Graduate student standing.

BSAD 345. Management Information Systems. 3 Credits.
An introduction to the design and implementation of management information systems. A theoretical framework is developed and applied by students to an information system. Prerequisite: Graduate Business Administration student.

BSAD 352. Business to Business Marketing. 3 Credits.
Exploration and analysis of the marketing of goods and services to organizations. Topics include organizational buying, market segmentation, positioning, pricing, communication, physical distribution and customer services, and sales management. Prerequisite: Graduate Business Administration student.

BSAD 357. Analysis for Mktg Planning. 3 Credits.
A post-introductory MBA marketing course that combines managerial and analytic approaches to gaining insight into customer attitudes and behaviors and improving market decision-making. Prerequisite: Graduate Business Administration student.

BSAD 360. Contemporary Financial Acctg. 3 Credits.
Focuses on contemporary issues in financial accounting and reporting under both U.S. generally accepted accounting principles and International Reporting Standards; impact of regulatory agencies. Prerequisite: Master of Accountancy student.

BSAD 361. Accounting Rsch, Reg & Ethics. 3 Credits.
Students will research current financial reporting issues and regulatory requirements. Cases will emphasize the ethical responsibilities of professional accountants. Prerequisite: Master of Accountancy student.

BSAD 362. CPA Law. 3 Credits.
Provides Masters of Accountancy students with exposure to the major areas of U.S. law emphasized on the uniform CPA exam. MBA students will also benefit from the course. Prerequisite: Master of Accountancy student.
BSAD 363. Accounting & Reporting for ESG. 3 Credits.
Combines an introduction to financial and managerial accounting and reporting with the most recent standards used by entities worldwide to report on their environmental, social and governance (ESG) activities. Prerequisite: Graduate student standing.

BSAD 364. Ind Readings & Rsch for MAcc. 1-3 Credits.
Allows a student to pursue independent research under the direction of a faculty member. Normally, course includes a research paper. Prerequisite: Master of Accountancy student.

BSAD 365. Managerial Accounting. 3 Credits.
Study of use of company information in internal strategic and operational decision making. Topics include product costing, incentive compensation, and performance measurement. Prerequisite: Master of Accountancy student.

BSAD 366. Adv Topics in Corp Acct.&Rept. 3 Credits.
Advanced topics in corporate accounting and reporting; focuses on accounting for business combinations and developing consolidated financial statements. Includes accounting for foreign currency transactions, foreign subsidiaries, segment, interim, and SEC reporting. Prerequisite: Master of Accountancy major.

BSAD 367. Tax Research. 3 Credits.
Uses various research techniques to analyze federal tax principles governing individuals and business entities and emphasizes the effective communication of technical analyses. Prerequisite: Master of Business Administration or Master of Accountancy Graduate student.

BSAD 368. Pass-Through Entities. 3 Credits.
A study of the tax consequences of using partnerships, S corporations, and limited liability companies for business operations, with an examination of the tax aspects of choice-of-entity, operational, and divestment decisions for small and family-owned businesses. Prerequisite: Master of Business Administration, Master of Accountancy, or other Graduate standing.

BSAD 369. Fraud Examination. 3 Credits.
Covers all of the major methods employees use to commit occupational fraud. Students will learn how and why occupational fraud is committed, how fraudulent conduct can be deterred, and how allegations of fraud should be investigated. Prerequisite: BSAD 162.

BSAD 370. Organization Theory. 3 Credits.
Organization theories examined for insights into behaviors of organizations and their members. Open systems perspective. Identification of contingencies in organization design based on human, structural, technological, environmental variables. Prerequisites: BSAD 307; Graduate Business Administration student.

BSAD 371. Mgmt of Change in Organization. 3 Credits.
Applied behavioral science perspective adopted to identify conceptual issues, develop diagnostic skills, examine alternative intervention strategies relevant to accomplishment of planned changes in organizational systems. Prerequisites: BSAD 307; Graduate Business Administration student.

BSAD 372. Advanced Special Topics. 1-18 Credits.
Topics and material that may develop later into a regular course. Normally, the course will include a research paper. Offered at department discretion.

BSAD 373. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.

BSAD 374. Independent Readings & Research. 1-3 Credits.
Allows a student to pursue independent research under the direction of a faculty member. Normally, the course will include a research paper. Prerequisite: Graduate Business Administration student.

BSAD 375. Advanced Special Topics. 1-18 Credits.
Topics and material that may develop later into a regular course offering; in addition, it may include topics and material offered only once. Prerequisite: Graduate Business Administration student.

BSAD 376. Leading Sustainable Enterprise. 3 Credits.
Integrative, capstone course concerned with issues and decisions facing individuals directing sustainable enterprises. Students develop analytical skills surrounding industry analysis, strategy formulation, organizational design, and competitive dynamics. Prerequisites: BSAD 305, BSAD 340, BSAD 363; Graduate student standing.

CELL BIOLOGY (CLBI)

Courses

CLBI 295. Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Credit as arranged.

CLBI 301. Cell Biology. 3 Credits.
Advanced survey of cell organelles, their composition, origin, and the relationship between their structure and function. Emphasis on recent literature and current controversies. Prerequisite: CHEM 142; Graduate standing in Biology or Instructor permission. Cross-listed with: BIOL 301, PBIO 301.

CLBI 381. Seminar. 1 Credit.
One hour.
CLBI 391. Master's Thesis Research. 1-12 Credits.
Credit as arranged.

CLBI 394. Science Communication. 3 Credits.
Develop effective oral and written communication skills for a range of audiences from academia to industry, organizations, news, policymakers, and the general public.

CLBI 395. Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Credit as arranged.

CLBI 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Credit as arranged.

CLBI 401. Critical Reading & Analysis. 2 Credits.
Runs concurrently with CLBI 301 and utilizes primary literature and an active, discussion-based approach to provide intensive study in the logic, critical thinking, and experimental design & interpretation. Co-requisite: CLBI 301.

CLBI 402. Biomedical Data Analysis. 2 Credits.
Introduction to qualitative, quantitative and statistical analysis for cell, molecular, and biomedical sciences. The practical philosophy underlying data presentation and interpretation will be emphasized via problem solving in and outside of class time. Prerequisite: Doctoral student or Instructor permission.

CLBI 491. Doctoral Dissertation Research. 1-12 Credits.
Credit as arranged.

CLBI 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

CHEMISTRY (CHEM)

Courses

CHEM 205. Biochemistry I. 3 Credits.
Introduction to chemistry and structure of biological macromolecules; examination of mechanisms of chemical processes in biological systems including enzyme catalysis, biosynthesis, regulation, and information transfer. Prerequisite: CHEM 048 or CHEM 142 or CHEM 144. Cross-listed with: BIOC 205 and MMG 205.

CHEM 206. Biochemistry II. 3 Credits.
Continuation of Biochemistry I. Biochemistry of nucleic acids; nucleic acid based processes, such as replication and transcription; cellular information transfer, genomics, and proteomics. Prerequisite: BIOC 205, CHEM 205, or MMG 205. Cross-listed with: BIOC 206 and MMG 206.

CHEM 207. Biochemistry Lab. 3 Credits.
Introduction to biochemical tools, including spectrometry, chromatography, and electrophoresis; natural and recombinant enzyme isolation; assays of DNA-modifying enzymes; computer-based structure/function exercises. Prerequisite: BIOC 205, CHEM 205, or MMG 205. Cross-listed with: BIOC 207 and MMG 207.

CHEM 214. Polymer Chemistry. 3 Credits.
Polymer synthesis and characterization. Kinetic models for polymerization and copolymerization. Physical properties, characterization of polymers in the solid state and in solution. Prerequisite: CHEM 048 or CHEM 142 or CHEM 144, and CHEM 165.

CHEM 221. Instrumental Analysis. 3 Credits.
Systematic survey of modern methods of chemical analysis. Fundamental principles and applications of spectroscopy, electrochemistry, and separation techniques. Prerequisite: CHEM 121. Credit for or concurrent enrollment in CHEM 165 strongly recommended.

CHEM 223. Mass Spectrometry. 3 Credits.
An in-depth treatment of modern mass spectrometry, instrumentation, and techniques with discussion of biological and chemical applications. Prerequisites: CHEM 048 or CHEM 142 or CHEM 144; CHEM 221; or Instructor permission.

CHEM 225. Electroanalytical Chemistry. 3 Credits.
Principles and techniques of modern electroanalytical and applications to redox chemistry. Heterogeneous effects; voltammetry; electron-transfer processes and reactions. Prerequisite: CHEM 221.

CHEM 226. Analytical Spectroscopy. 3 Credits.

CHEM 227. Topics in Analytical Chemistry. 1-3 Credits.
Selected topics of current interest in analytical chemistry. New techniques and methodologies, especially in chemical instrumentation. See Schedule of Courses for specific titles. May be repeated for credit with different content. Prerequisite: CHEM 221.

CHEM 231. Advanced Inorganic Chemistry. 3 Credits.
Molecular symmetry and group theory with an emphasis on applications (vibrational and electronic spectra, bonding and reactivity); introduction to transition metal processes; bioinorganic chemistry. Prerequisite: CHEM 165; CHEM 047, CHEM 141, or CHEM 143.

CHEM 234. Organometallic Chemistry. 3 Credits.
Synthesis, structure, bonding, properties, reactions, and applications of organometallic systems; mechanisms of organometallic reactions including oxidative addition and insertion reactions with applications in catalysis. Prerequisite: CHEM 131 or CHEM 231.

CHEM 236. Physical Inorganic Chemistry. 3 Credits.
Determination of molecular and electronic structure of inorganic complexes using spectroscopic techniques. Introduction to magnetism. Interpretation of spectroscopic data within the frameworks of group theory and electronic structure calculations. Prerequisites: CHEM 131 and CHEM 165; or CHEM 231.

CHEM 237. Topics in Inorganic Chemistry. 1-3 Credits.
Areas of current interest involving inorganic systems, particularly catalysis, solid state chemistry, and bioinorganic chemistry. See Schedule of Courses for specific titles. May be repeated for credit with different content. Prerequisite: CHEM 231.
CHEM 241. Advanced Organic Chemistry 1. 3 Credits.
Stereochemistry, conformational analysis, stereoelectronic effects, transition state theory, molecular orbital theory, and reactivity criteria are discussed in regards to reaction mechanisms and functional group manipulations. Prerequisite: CHEM 142 or CHEM 144.

CHEM 242. Advanced Organic Chemistry 2. 3 Credits.
Modern synthetic organic methods and approaches to multi-step synthesis are discussed. Selected total syntheses are reviewed to highlight important concepts including diastereoselective and enantioselective processes. Prerequisite: CHEM 241.

CHEM 251. Physical Organic Chemistry. 3 Credits.
Experimental and computational techniques for determining and interpreting structure, properties, and reactivity of organic molecules, with an emphasis on the mechanisms of organic reactions. Prerequisites: CHEM 048 or CHEM 142 or CHEM 144; CHEM 165; or Instructor permission.

CHEM 257. Topics in Organic Chemistry. 1-3 Credits.
Advanced level discussion of specific topics in organic chemistry of current interest such as photochemistry, carbenes, bioorganic chemistry, magnetic resonance, etc. See Schedule of Courses for specific titles. May be repeated for credit with different content. Prerequisite: CHEM 241.

CHEM 260. Advanced Physical Chemistry. 3 Credits.
Builds on the concepts from Introductory Physical Chemistry (CHEM 165). The three major areas of quantum chemistry, thermodynamics, and kinetics are extended in greater depth, and at a higher level of mathematical rigor. Prerequisite: CHEM 165. Corequisites: CHEM 167 or MATH 121.

CHEM 262. Chemical Thermodynamics. 3 Credits.
Classical and statistical thermodynamics. Systematic study of applications of thermodynamics to chemical problems. Prerequisites: CHEM 260.

CHEM 264. Adv Quantum & Spectroscopy. 3 Credits.
In-depth theoretical discussion of molecular states, their symmetry, and transition probabilities. Explicit treatment of vibrations, electronic states, and vibronic spectroscopy. Prerequisites: CHEM 260 and MATH 121.

CHEM 267. Topics in Physical Chemistry. 1-3 Credits.
Selected topics of current interest in physical chemistry. See Schedule of Courses for specific titles. May be repeated for credit with different content. Prerequisite: CHEM 260.

CHEM 285. Special Topics. 1-3 Credits.
Selected topics of current interest that do not fall into one of the traditional areas of chemistry.

CHEM 286. Special Topics. 1-3 Credits.
Selected topics of current interest that do not fall into one of the traditional areas of chemistry.

CHEM 318. Current Topics in Chemistry. 0 or 1 Credits.
Survey of current topics in the chemistry literature.

CHEM 380. Chemical Investigations. 1 Credit.
Current problems and literature.

CHEM 381. Grad Seminar. 1 Credit.
Current problems and literature.

CHEM 384. Advanced Topics in Chemistry. 2 Credits.
Comprehensive independent study in chemistry.

CHEM 391. Master’s Thesis Research. 1-18 Credits.

CHEM 395. Independent Lit Rsch Project. 1-12 Credits.
Reading and literature research culminating in the preparation of a comprehensive and critical review of a topic of current interest in chemistry.

CHEM 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

CHEM 484. Advanced Topics in Chemistry. 2 Credits.
Comprehensive independent study in chemistry.

CHEM 488. Rsch Prob Conception&Solution. 1 Credit.
Independent origination of research problems and the methods of their solution.

CHEM 491. Doctoral Dissertation Research. 1-18 Credits.

CHEM 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

CIVIL & ENVIRONMENTAL ENGR (CE)

Courses

CE 201. Sustainable Eng Materials. 3 Credits.
Introduces the fundamentals of materials with a focus on sustainable engineering, including structure and bond, interatomic potential, metals, fracture, strength testing, cement chemistry, aggregates, composites, reinforced concrete, asphalt, bamboo and wood. Prerequisite: CE 100, ME 014, or Instructor permission.

CE 211. Sustainable Eng. Materials. 3 Credits.
Introduces the fundamentals of materials with a focus on sustainable engineering, including structural bonding, metals, fracture, strength testing, cement chemistry, aggregates, composites, reinforced concrete, asphalt, bamboo, wood, and bio-inspired materials and structures. Prerequisites: CE 100 or ME 014 or Instructor permission.

CE 218. Numerical Methods for Engineer. 3 Credits.
Foundational concepts of numerical integration, numerical differentiation, and numerical approximation and solution of differential and partial differential equations of the type encountered in the analysis of engineering problems and data processing. Prerequisites: MATH 271, CS 020; MATH 122 or MATH 124. Cross-listed with: ME 218.

CE 220. Intro to Finite Element Anyl. 3 Credits.
Introduction to finite element analysis: applications in solid mechanics, hydrodynamics, and transport: analysis of model behavior: Fourier analysis. Computer project required. Prerequisites: CS 020; MATH 122 or MATH 124.
CE 238. Design/Planning for Bikes/Peds. 3 Credits.
Interdisciplinary introduction to design/planning concepts for bikes/pedestrians from a systems view. Examines current best practices on how effectively they address social, environmental, economic, and health related transportation issues. Prerequisite: Minimum Senior standing.

CE 241. Traffic Operations & Design. 3 Credits.
Advanced concepts of traffic engineering and safety; human, vehicle and environment factors; simulation and statistical analysis software; transportation design manuals. Prerequisite: CE 133.

CE 243. Transportation Demand Models. 3 Credits.
Study of specific methods used to analyze travel demand, travel behavior and network flows; process of travel demand modeling; collection, analysis and expansion of survey data and travel data; mathematical methods common to travel modeling. Prerequisite: CE 133.

CE 245. Intelligent Transportation Sys. 3 Credits.
Introduction to Intelligent Transportation Systems (ITS), ITS user services, ITS applications, the National ITS architecture, ITS evaluation, and ITS standards. Prerequisite: CE 133. Cross-listed with: CSYS 245.

CE 250. Fate/Transport Organic Chem. 3 Credits.
Chemical transfers between environmental media; molecular structure-reactivity models; chemical, photochemical and biochemical transformation rates; emphasis on predicting environmental concentrations and risk. Graduate student independent modeling project. Prerequisites: CHEM 031, CHEM 032, CE 132.

CE 251. Envr Facility Dsgn/Wastewater. 3 Credits.
Design of wastewater conveyance and treatment facilities; sewage treatment plant design; equipment selection. Prerequisite: CE 151.

CE 253. Transportation & Air Quality. 3 Credits.
Air pollution sources, measurement methods, legislation, vehicle emissions formation, control and transport processes. Emphasis on emission factor and dispersion multi-scale modeling using latest modeling tools. Prerequisites: CE 132, CE 133.

CE 254. Environmental Quantitive Anyl. 0 or 4 Credits.
Course focuses on chemical, biochemical and physical processes; diffusion, equilibria, reaction kinetics, acids/bases, colloids, air/water exchange; laboratories demonstrate standard environmental engineering techniques. Prerequisites: CHEM 032, CE 132, STAT 143.

CE 255. Phys/Chem Proc Water/Wastewater. 0 or 3 Credits.
Theory of physical/chemical processes for treating waters and wastewaters; reactor dynamics, mass transfer, adsorption, ion exchange, precipitation. Prerequisite: CE 151.

CE 256. Biol Proc Water/Wastewater Tr. 0 or 3 Credits.
Theory and application of biological processes for treating industrial and domestic wastewaters and contaminated ground water; microbiological considerations; aerobic and anaerobic processes; reactor design, in-site bioremediation; bench-scale and pilot-scale experimentation. Prerequisite: CE 151.

CE 259. Msmt of Airborne Contaminants. 3 Credits.
Quantifying airborne contaminants from processes and ambient levels. Laboratories demonstrate calibration and measurement, stack sampling and ambient air monitoring, and specific contaminant generation and measurement. Prerequisite: CE 132.

CE 260. Hydrology. 3 Credits.
Theory of precipitation, run-off, infiltration, and ground water; precipitation and run-off data; and application of data for use in development of water resources. Pre/Co-requisite: CE 160.

CE 261. Open Channel Flow. 3 Credits.
Application of the laws of fluid mechanics to flow in open channels, design of channels and transition structures, modeling, uniform and gradually-varied flows. Prerequisite: CE 160.

CE 262. Advanced Hydrology. 3 Credits.
Introduces computer modeling of hydrological systems and involves a semester-long design project. Simple overland flow, flood routing, water quality, and groundwater models are developed using finite difference techniques. Stochastic hydrology and hydrologic time series analysis are also introduced. Prerequisite: CE 260.

CE 265. Ground Water Hydrology. 3 Credits.
Principles of ground water hydraulics, well characteristics, aquifers, and use of numerical methods to solve ground water flow problems. Prerequisite: CE 160.

CE 271. Advanced Structural Analysis. 3 Credits.
Virtual work, energy theorems, analysis of structures by the displacement method and the finite element method, non-linear structural analysis. Prerequisite: CE 170.

CE 272. Structural Dynamics. 3 Credits.
Vibrations, matrices, earthquake engineering, stability and wave propagation. Prerequisites: Senior standing in Engineering or Physical Sciences or Instructor permission. Cross-listed with: ME 270.

CE 273. Structural Design - Wood. 3 Credits.
Analysis and design of solid and glue laminated timber members and structural systems including tension members, beams, columns, beam-columns, diaphragms, shear walls, and connections; LRFD and ASD design methods; application of IBC for timber systems; current developments in wood design/construction. Prerequisite: CE 170.

CE 281. Geotechnical Design. 3 Credits.
Subsurface explorations; bearing capacity, lateral earth pressures, slope stability; analysis and design of shallow and deep foundations, retaining structures, and slopes. Prerequisite: CE 180.

CE 284. Site Characterization. 3 Credits.
A comprehensive approach to subsurface site characterization for geotechnical and environmental designs and a systems approach for integrating the two. Prerequisites: CE 160, CE 180.

CE 285. Geo-energy Systems. 3 Credits.
An introduction to Geoenergy technologies for subsurface energy extraction (shallow and deep geothermal systems, enhanced oil recovery, shale gas extraction) and secure storage of byproducts of energy production (carbon dioxide and nuclear wastes). Prerequisite: CE 180.
CE 286. Foundation Design. 3 Credits.
Subsurface explorations; geotechnical analysis, design, construction, preservation, remediation, and monitoring aspects of shallow and deep foundations. Prerequisite: CE 180.

CE 287. Design of Earth Structures. 3 Credits.
Soil and rock properties using laboratory, field and in-situ testing; analysis and design of slopes, embankments and retaining structures. Prerequisite: CE 180.

CE 290. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.

CE 295. Special Topics. 1-18 Credits.
Content is dictated by expanding professional interest in newly developing, or recently developed, technical areas in which there is particular need or opportunity. Prerequisite: Minimum Senior standing.

CE 304. Adv Engineering Analysis I. 3 Credits.
Analytical methods for the solution of partial differential equations in engineering mechanics and physics, including: eigenfunction expansions; Fourier series; Sturm-Liouville theory and special functions. Prerequisites: Graduate standing in engineering, mathematics, or physical sciences. Cross-listed with: ME 304.

CE 305. Adv Engineering Analysis II. 3 Credits.
Advanced analytical techniques for problems in engineering mechanics and physics, including: integral transform methods, Green's functions, perturbation methods, and variational calculus. Prerequisites: ME 304; Graduate standing in engineering, mathematics, or physical science. Cross-listed with: ME 305.

CE 312. Sustainability & Transportn. 3 Credits.
Introduction to the complex interconnection of engineering, policy, science and social science that characterize transportation systems, mobility problems and solutions. Interdisciplinary teams conduct case studies. Prerequisite: Instructor permission required. Cross-listed with: PA 342, TRC 312.

CE 314. Risk/Behavior in Transportn. 3 Credits.
In-depth examination of human, environmental and vehicle factors in transportation crashes. Students develop safety research proposals and statistical measurements of risk and rates. Prerequisite: Instructor permission.

CE 321. Engr Computations on Adv Arch. 3 Credits.
Engineering computations using multiprocessors, concurrent processing, algorithms for numerical approximation of differential equations, linear systems. Programming projects required. Prerequisites: Graduate standing in engineering, mathematics or physical science.

CE 359. Appld Artificial Neural Ntwrks. 1-3 Credits.
Introduction to artificial neural networks. A broad range of example algorithms are implemented in MATLAB. Research applications to real data are emphasized. Prerequisites: CS 020, STAT 223 or equivalent. Cross-listed with: CSYS 359.

CE 360. Advanced Hydrology. 3 Credits.
Application of statistics to engineering hydrology; concept, use of instantaneous unit hydrograph; study of runoff models; flow through porous media; design techniques for water resources projects. Prerequisites: CE 260, MATH 271. Offered as occasion warrants.

CE 361. Fluvial Forms & Processes. 3 Credits.
Advanced topics in fluvial forms and processes; focus on river and stream restoration and design; includes journal readings, discussion, field trips and group design project. Prerequisite: CE 160.

CE 365. Contaminant Hydrogeol&Remediat. 3 Credits.
Practical, theoretical aspects of contaminant hydrogeology; advances in technologies, mass transport and transformation in saturated and vadose zones; movement, distribution, and remediation of nonaqueous-phase liquids. Prerequisite: CE 265.

CE 366. Numerical Method/Surface Water. 3 Credits.
The fundamental equations describing fluid flow and mass transport in subsurface systems are developed from first principles. Prerequisite: CE 265.

CE 368. Groundwater Modeling. 3 Credits.
The fundamental theory of groundwater hydrology is combined with concepts in numerical methods to provide the technology needed to study a real-world groundwater problem. Prerequisites: CE 265, and CE 218 or CE 220.

CE 369. Applied Geostatistics. 3 Credits.
Introduction to the theory of regionalized variables, geostatistics (kriging techniques): special topics in multivariate analysis; Applications to real data subject to spatial variation are emphasized. Prerequisites: STAT 223 or STAT 225; CS 020 or CS 021; or Instructor permission. Cross-listed with: CSYS 369, STAT 396.

CE 370. Reliability of Eng. Systems. 3 Credits.
Modeling and simulation of functions of random variables and random processes, propagation of uncertainties in engineering systems, analytical and computational methods for reliability analysis of engineering systems and components, Bayesian methods to update reliability estimates based on operational data. Prerequisite: STAT 151 or equivalent.

CE 380. Advanced Soil Mechanics. 3 Credits.
Stress-strain-strength of soils, introduction to constitutive modeling, critical state concepts, applications of limit analysis and limit equilibrium methods in analyzing stability problems in geotechnical engineering, such as foundations, slopes and embankments and retaining structures. Prerequisite: CE 180.

CE 390. Adv Topics in Civil & Envr Eng. 1-6 Credits.
Special topics to intensify the programs of graduate students in civil and environmental engineering. Hours and credits to be arranged.
CE 391. Master Thesis Rsch. 1-12 Credits.
CE 392. Master's Project. 1-6 Credits.
Independent project related to civil and environmental engineering under the supervision of a Civil & Environmental Engineering faculty member, concluding with a written technical report and an oral presentation to a committee of two Civil & Environmental Engineering faculty members. Prerequisite: Permission of Civil & Environmental Engineering Graduate Coordinator or Civil & Environmental Engineering Department Chair.

CE 393. CEE Graduate Seminar. 0 Credits.
Presentation and discussion of advanced problems, research, and current topics in Civil & Environmental Engineering by faculty, graduate students, and outside guest speakers. Prerequisite: Graduate student in Civil & Environmental Engineering.

CE 395. Advanced Special Topics. 1-18 Credits.
Advanced topics in recently developed technical areas. Hours and credits as arranged.

CE 491. Doctoral Dissertation Research. 1-18 Credits.

CE 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

CLASSICS (CLAS)

Courses

CLAS 295. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

CLAS 296. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

CLINICAL&TRANSLATIONAL SCIENCE (CTS)

Courses

CTS 200. Introduction to CTS I. 3 Credits.
Teaches the principles of human subjects research for those pursuing a path as research assistants or coordinators.

CTS 201. Introduction to CTS II. 3 Credits.
Teaches the principles of human subjects research for those pursuing a path as research assistants or coordinators. Prerequisite: CTS 200.

CTS 301. Design Clin&Translational Res. 3 Credits.
Seminar emphasizing the skills for designing and executing clinical and translational research. Prerequisite: Graduate standing, or Instructor permission.

CTS 302. Quality in Healthcare. 3 Credits.
Introduces students to the principles and practices of health care quality and quality improvement. Principles in the design and management of continual improvement activities will be presented and applied. Prerequisite: Graduate standing. Cross-listed with: GRNS 328.

CTS 305. Cell To Society I. 2 Credits.
A two-semester seminar that addresses a medical issue from molecule to market. CTS students must take both semesters. Non-CTS students may take either semester independently. Prerequisite: Graduate standing, or Instructor permission.

CTS 306. Cell To Society II. 2 Credits.
A two-semester seminar that addresses a medical issue from molecule to market. CTS students must take both semesters. Non-CTS students may take either semester independently. Prerequisite: Graduate standing, or Instructor permission.

CTS 310. Conduct Clin&Translational Res. 3 Credits.
Seminar emphasizing the ethics and mechanics of clinical and translational research. Pre/co-requisite: Prerequisite: Graduate standing, or Instructor permission.

CTS 315. Report Clin&Translational Res. 3 Credits.
Seminar emphasizing communication skills for writing, editing and presenting science. Pre/co-requisite: Prerequisite: Graduate standing, or Instructor permission.

CTS 320. Analyze Clin&Translational Res. 3 Credits.
Seminar emphasizing basic and analytical skills for clinical and translational research. Pre/co-requisites: Prerequisite: Graduate standing, or Instructor permission.

CTS 325. Multi Analysis Clin&Trans Res. 3 Credits.
Introduction to multivariate regression; models that account for effects of multiple predictors on a single outcome, including linear and logistic regression and survival analysis. Prerequisite: Graduate standing, or Instructor permission.

CTS 330. Intro Secondary Data Analysis. 1 Credit.
Course that orients students to broad issues of clinical research while providing specific skills in statistical analysis of large data set using specialized programs. Prerequisite: Graduate standing, or Instructor permission.

CTS 382. CTS Seminar. 0.5 Credits.
Presentation and discussion of current research. Mandatory attendance for all CTS Masters and Doctoral students. Prerequisite: Masters and Doctoral CTS students.

CTS 385. Independent Study in CTS. 1-6 Credits.
Individual work on a topic selected by student in consultation with Faculty member. The independent study may involve original research, project, and readings with conferences and will provide specialized knowledge relating to an area in which an appropriate course is not offered. Prerequisite: Approval from Program Advisor.

CTS 391. Master's Thesis Research. 1-18 Credits.
Master's Thesis Research.

CTS 392. Master's Research Internship. 1-6 Credits.
Requirement for the Master's in Clinical and Translational Science Research Management; includes experiential education in a research laboratory under the direction of a Research Mentor.

CTS 395. Advanced Special Topics. 1-18 Credits.
Special topics in Clinical and Translational Research. Prerequisite: Graduate standing, or Instructor permission.
CTS 491. Doctoral Dissertation Research. 1-18 Credits.
Doctoral Dissertation Research.

CTS 493. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.

CTS 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

COMM SCIENCES & DISORDERS (CSD)

Courses

CSD 208. Cognition & Language. 3 Credits.
Study of cognition and language in terms of mental representation models; contemporary models of memory, as well as capacity theories of language comprehension and production. Prerequisite: CSD 101.

CSD 271. Introduction to Audiology. 3 Credits.
Survey of hearing and the nature and causes of hearing impairment. Includes an orientation to assessment procedures and rationales, hearing screening and counseling considerations. Prerequisites: CSD 101, CSD 199.

CSD 272. Hearing Rehabilitation. 3 Credits.
Examination of the impact of hearing loss on development and its overall effects on communication. Survey of management considerations, sensory devices, speech reading, and auditory training. Prerequisite: CSD 271.

CSD 274. D2: Culture of Disability. 3 Credits.
Focus on theoretical questions of how societies understand disability and its consequences for social justice, by examining the biological, social, cultural, political, and economic determinants in the societal construction of disability. Prerequisite: Junior/Senior/Graduate Prerequisite: Junior, Senior, or Graduate standing. Cross-listed with: EDSP 274.

CSD 287. D2: Mindfulness & Helping Skills. 3 Credits.
This course introduces the students to key elements of mindfulness practice, basic listening and counseling skills, and how to apply them in work and life. Prerequisite: Any 100-level (or above) course in any human services or human communication-related field, such as: Communication Sciences and Disorders or any other College of Nursing and Health Sciences program, Psychological Science, Social Work, Education, Special Education, Linguistics, Larner College of Medicine or other 100-level courses as approved by the Instructor.

CSD 296. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Undergraduate only.

CSD 299. Autism Spect Dis: Assess & Interv. 3 Credits.
Discusses knowledge/research regarding assessment of and interventions for individuals with ASD related to and use of evaluation tools, and implementation of communication, social interaction and play skills. Prerequisite: Minimum Junior standing.

CSD 311. Intrdsc Sem Neurodev Disabil I. 3 Credits.
Seminar with focus on cultural competence and family-centered care, interdisciplinary collaborative teaming, policy and health disparities related to children and families affected by neurodevelopmental and related disabilities, including ASD. Prerequisite: Instructor permission. Cross-listed with: GRNS 380.

CSD 312. Intrdsc Sem Neurodev Disabil II. 3 Credits.
Seminar exploring interdisciplinary process, collaborative teaming, teaching, cultural competence and family-centered care as they relate to children and families affected by neurodevelopmental and related disabilities, including ASD. Prerequisite: Instructor permission. Cross-listed with: GRNS 381.

CSD 313. Augmentative Communication. 3 Credits.
An introduction to development and selection of augmentative/alternative communication strategies and systems for persons with severe communication challenges. Prerequisite: Graduate standing in Communication Sciences & Disorders or Instructor permission.

CSD 314. Collab Intervntn Schl Settings. 3 Credits.
Introduction to a transdisciplinary approach to collaborative, curriculum-based assessment and intervention for students with special needs in school settings. Prerequisites: Graduate standing in Communication Sciences & Disorders.

CSD 315. Early Lang & Communicatn Interv. 3 Credits.
Research in normal and disordered language, cognition, and social development is applied to interventions for children, birth to age 5, with language and communication problems. Prerequisite: Graduate standing in Communication Sciences & Disorders.

CSD 320. Clinic Preparation & Management. 3 Credits.
Principles of behavioral observation, analysis and modification as they apply to the assessment and remediation of communication disorders. Prerequisite: Graduate standing.

CSD 321. Clinic Practicum Study 1. 1 Credit.
Supervised practicum experiences with children and adults presenting disorders of speech, hearing, and language. Pre/Corequisites: CSD 320 or concurrent enrollment; Graduate standing in Communication Sciences & Disorders.

CSD 322. Clinic Practicum Study 2. 2 Credits.
Supervised practicum experiences with children and adults presenting disorders of speech, hearing, and language. Prerequisites: CSD 320; Graduate standing in Communication Sciences & Disorders.

CSD 323. Clinic Practicum Study 3. 3 Credits.
Supervised practicum experiences with children and adults presenting disorders of speech, hearing, and language. Prerequisite: Graduate standing in Communication Sciences & Disorders.

CSD 324. Clinic Practicum Study 4. 2 Credits.
Supervised practicum experiences with children and adults presenting disorders of speech, hearing, and language. Prerequisite: Graduate standing in Communication Sciences & Disorders.

CSD 325. Clinic Practicum Study 5. 3 Credits.
Supervised practicum experiences with children and adults presenting disorders of speech, hearing, and language. Prerequisite: Graduate standing in Communication Sciences & Disorders.
CSD 326. Clinic Practicum Stdy Winter 6. 1 Credit.
Supervised practicum experiences with children and adults presenting disorders of speech, hearing, and language. Prerequisites: CSD 320, CSD 321; Graduate standing in Communication Sciences & Disorders.

CSD 327. School Based Issues for SLPs. 1 Credit.
An overview of topics necessary for employment as a school based SLP. Specific topics will be covered related to federal and state special education regulations. Prerequisites: CSD 320; Graduate standing. Co-requisite: CSD 322.

CSD 330. Assessment of Stuttering. 1 Credit.
Study of adult and child fluency disorders which focuses upon symptomatology, etiology, and diagnosis of people with stuttering disorder. Prerequisites: Graduate standing Prerequisite: Graduate standing in Communication Sciences & Disorders.

CSD 331. Treatment of Stuttering. 2 Credits.
Study of adult and child fluency disorders which focuses on rehabilitation of people with stuttering disorder. Prerequisite: Graduate standing in Communication Sciences & Disorders.

CSD 340. Spch Snd Disorders in Children. 3 Credits.
Etiology, diagnosis, pathology, and habilitation and rehabilitation of articulation of speech. Prerequisite: Graduate standing in Communication Sciences & Disorders.

CSD 341. Language Disorders. 3 Credits.
Identification, evaluation, and rehabilitation procedures for children with language disabilities. Prerequisite: Graduate standing in Communication Sciences & Disorders.

CSD 342. Seminar Lang/Lrng Disabilities. 3 Credits.
LLD assessment and intervention; oral language-literacy connections. Reading and written language disorders; related challenges. Role of the SLP; evidence-based approaches. Prerequisite: Graduate Student standing in Communication Sciences and Disorders or Instructor permission.

CSD 350. Swallowing Disorders. 3 Credits.
Introduction to normal and disordered swallowing function across the life span including etiologies, signs/symptoms of dysphagia, diagnostic procedures and treatment within an interdisciplinary model. Prerequisite: Graduate standing in Communication Sciences & Disorders.

CSD 351. Neurogenic Comm. Disorders 1. 3 Credits.
The study of linguistic and cognitive-communication impairments associated with stroke and other acquired neurogenic communication disorders. Aphasia, Right Hemisphere Communication Disorders (RHD) and communication disorders associated with dementia are explored. Emphasis on the principles and procedures of assessment and intervention are emphasized. Prerequisite: Graduate standing in Communication Sciences & Disorders.

CSD 352. Voice Disorders. 3 Credits.
Study of normal and abnormal laryngeal anatomy and physiology as they relate to diagnoses and treatment of a wide variety of vocal pathologies. Prerequisite: Graduate standing in Communication Sciences & Disorders.

CSD 353. Neurogenic Comm. Disorders 2. 3 Credits.
Covers the study of motor speech disorders associated with damage to the central or peripheral nervous system. Cognitive-communication impairments associated with Traumatic Brain Injury (TBI) and related disorders are also explored. Principles and procedures of assessment and intervention are emphasized. Prerequisite: Graduate standing in Communication Sciences & Disorders.

CSD 360. Rsch Methods Comm Disorders I. 3 Credits.
Empirical research methodology as applied to the study of normal and deficient speech, language, and hearing processes. Students analyze data statistically and write a research proposal. Prerequisite: Graduate standing in Communication Sciences & Disorders or Instructor permission.

CSD 361. Research Methods II. 1 Credit.
Students will critically review the professional literature in preparation for carrying out a systemic review. Prerequisite: Graduate standing or Instructor permission.

CSD 362. Master’s Thesis Research. 1-6 Credits.
CSD 363. Non-thesis Research. 1-6 Credits.
Students complete a systematic review or research project under the direction of faculty. Prerequisite: Graduate standing or Instructor permission.

CSD 381. Advanced Readings. 1-3 Credits.
Readings, with conferences, intended to contribute to the programs of graduate students in phases of communication sciences and disorders for which formal courses are not available. Credit as arranged, up to three hours each semester. Prerequisite: Graduate standing or Instructor permission.

CSD 382. Advanced Readings. 1-3 Credits.
Readings, with conferences, intended to contribute to the programs of graduate students in phases of communication sciences and disorders for which formal courses are not available. Credit as arranged, up to three hours each semester. Prerequisite: Graduate standing or Instructor permission.

CSD 390. Practicum. 1-18 Credits.
A required component of a curriculum that is an on-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded.

CSD 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

COMMUNITY DEVELOPMENT & APPLIED ECONOMICS (CDAE)

Courses

CDAE 205. Rural Comm in Modern Society. 3 Credits.
The changing structure and dynamics of rural social organization in context of modernization and urbanization. Emphasis on rural communities in the U.S. Prerequisite: Six hours of Sociology. Cross-listed with: SOC 205.
CDAE 207. The Real Cost of Food. 3 Credits.
Learn how producers, processors, wholesalers, cooperatives, retailers, consumers, and governments affect the movement of food and fiber products through the production-marketing chain. Prerequisite: CDAE 061 or equivalent.

CDAE 208. Agricultural Policy and Ethics. 3 Credits.
An examination of American agriculture and policies from various perspectives - historical, political, ecological, technological, social, economic, and ethical. Emphasis on contemporary issues, policy options, and future development. Prerequisites: CDAE 102 or equivalent.

CDAE 218. Community Org & Development. 3 Credits.
The roles of forms of community capital, civic engagement, leadership, social and political institutions, and communities of place and interest in a community development context. Pre/co-requisites: Junior standing; CDAE 102 or Instructor permission.

CDAE 237. Economics of Sustainability. 3 Credits.
Economic analysis that integrates natural resource and community planning for sustainable development at local, national, and international levels. Examples include land use, sustainable agriculture, and green business. Prerequisites: CDAE 102 or Instructor permission.

CDAE 238. Ecological Landscape Design. 4 Credits.
Studio course synthesizing work from fields of landscape ecology and landscape design, exploring ecological design alternatives at multiple scales, and developing multifunctional landscape solutions. Pre/co-requisites: PSS 137 or one course in ecology plus one course in design or drawing; minimum Junior standing. Cross-listed with: PSS 238, ENV 238, NR 238.

CDAE 253. Macroeconomics for Appl Econ. 3 Credits.
Explore macroeconomic principles and concepts as they affect individuals and businesses in local, regional, national, and global economics. Prerequisites: CDAE 102 or equivalent.

CDAE 254. Microeconomics for Appl Econ. 3 Credits.
The study of economic choices of individuals and firms, and the analysis of competitive and noncompetitive markets. Emphasis on application of intermediate microeconomic theory. Prerequisites: CDAE 102 or equivalent.

CDAE 260. Smart Resilient Communities. 3 Credits.
Focus on social ecological systems integration framework to determine community resilience, enable smart design processes at the nexus of food, energy and water systems and learn practical skills, such as early warning systems, ubiquitous computing and interactive scenario planning techniques. Prerequisite: CDAE 102 or Graduate standing. Cross-listed with: PA 260.

CDAE 266. Dec Making:Comm Entrepreneurs. 3 Credits.
Quantitative decision-making methods and applications for community entrepreneurs. Major topics include linear programming, risk and uncertainty, inventory decisions, and e-commerce. Prerequisites: CDAE 166, MATH 019, and CALS 085 or CS 002.

CDAE 267. Strat Plan:Comm Entrepreneurs. 4 Credits.
Applications of marketing, finance, and management strategies. Drafting a real working business plan for community entrepreneurs and economic development. Prerequisites: One of the following: CDAE 166, CDAE 167, CDAE 168, or equivalent course; Senior standing only.

CDAE 272. Int’l Economic Development. 3 Credits.
International trade, finance, investment, and development theories and policies for community development. Prerequisite: CDAE 102 or EC 100-172.

CDAE 273. Project Development & Planning. 3 Credits.
National, community, and private sector project development. Focus on planning methods and policy instruments, sectoral linkages, and contributions to the economy as a whole. Pre/co-requisites: CDAE 102 or Instructor permission.

CDAE 276. Community Design Studio. 3 Credits.
Problem-based community design studio course with research on existing conditions, needs assessment, sense of place, and development of sustainable and integrative design solutions and processes. Prerequisites: CDAE 015, CDAE 001, or equivalent.

CDAE 286. Adv Sust Dev Sm Island States. 4 Credits.
This course is an advanced course in problems of sustainable development on small island developing states utilizing a case study of St. Lucia, West Indies. Prerequisites: CDAE 186 and Instructor permission required.

CDAE 287. Spatial Analysis. 3 Credits.

CDAE 295. Special Topics. 1-18 Credits.
Lectures or readings on contemporary issues in Community Development and Applied Economics. Enrollment may be more than once, up to twelve hours.

CDAE 321. Econ of Sustainable Food Syst. 3 Credits.
Utilizes common economic tools, ideas and applications to analyze issues concerning the sustainability of food using a combination of readings, lectures and discussions. Prerequisite: Graduate standing. Cross-listed with: FS 321.

CDAE 326. Community Economic Development. 3 Credits.
Examines how rural and urban communities address poverty, unemployment and other economic problems through job creation and retention, workforce training and support, and other development strategies. Cross-listed with: PA 326.

CDAE 335. Qualitative Research Methods. 3 Credits.
Provides an overview of qualitative research methods and an opportunity to apply such research methods for topics focusing on food systems and health. Prerequisite: Graduate Student standing. Cross-listed with: FS 335.

CDAE 351. Research & Evaluation Methods. 0 or 3 Credits.
Conceptualization, collection and analysis of primary and secondary data; interpretation, and communication of results of applied research and/or evaluation studies for decision makers. Separate lab required. Prerequisite: Three hours of Statistics.
CDAE 354. Advanced Microeconomics. 3 Credits.
Principles and applications of advanced microeconomics: consumer and market demand, firm and market supply, perfect and imperfect markets, partial and general equilibrium, and policy analysis. Prerequisite: Graduate student standing.

CDAE 359. Applied Econometrics. 3 Credits.
Presents common econometric methods to perform regression analysis on empirical data. Upon completion, students will understand and apply econometric methods to conduct rigorous regression analysis. Students will also better read, interpret and discern research papers' quality using econometric methods.

CDAE 376. Communicating Science. 3 Credits.
Advanced exploration, application of science communication theories, contexts, practices. Examine the relationship between science & society while learning communication skills that promote respect and shared understandings of science among researchers, extension professionals, journalists, public relations specialists, policy officials, and public. Prerequisite: Graduate standing.

CDAE 377. Practicum in Extension Educ. 1-12 Credits.

CDAE 391. Master's Thesis Research. 1-18 Credits.

CDAE 392. Graduate Seminars. 1 Credit.
Report and discuss research projects and findings of graduate students and faculty, and offer workshops on selected topics in community development and applied economics. May enroll more than once for up to three credits. Prerequisite: Graduate standing.

CDAE 395. Advanced Special Topics. 1-18 Credits.
Lectures or readings on contemporary issues in Community Development and Applied Economics at the graduate level. Prerequisite: Graduate standing.

COMPLEX SYSTEMS (CSYS)

Courses

CSYS 213. Systems & Synthetic Biology. 3 Credits.
Applying engineering tools to the design and analysis of biomolecular processes, gene regulatory networks, nonlinear dynamics in molecular biology, biological circuit design, biological signal processing. Prerequisite: Background required: Differential Equations, Linear Algebra, Programming. Cross-listed with: ME 213, EE 213.

CSYS 221. QR:Dtrministic Mods Oper Rsch. 3 Credits.
The linear programming problem. Simplex algorithm, dual problem, sensitivity analysis, goal programming. Dynamic programming and network problems. Prerequisites: MATH 122 or MATH 124; MATH 121 recommended. Cross-listed with: MATH 221.

CSYS 226. Civil Engineering Systems Anyl. 3 Credits.
Linear programming, dynamic programming, network analysis, simulation; applications to scheduling, resource allocation routing, and a variety of civil engineering problems. Pre/co-requisites: Minimum Senior standing in CEE or Instructor permission. Cross-listed with: CE 226.

CSYS 245. Intelligent Transportation Sys. 3 Credits.
Introduction to Intelligent Transportation Systems (ITS), ITS user services, ITS applications, the National ITS architecture, ITS evaluation, and ITS standards. Pre/co-requisites: CE 140 or equivalent; Instructor permission. Cross-listed with: CE 245.

CSYS 251. QR: Artificial Intelligence. 3 Credits.
Introduction to methods for realizing intelligent behavior in computers. Knowledge representation, planning, and learning. Selected applications such as natural language understanding and vision. Prerequisites: CS 103 or CS 123; CS 104 or CS 124; STAT 153 or equivalent. Cross-listed with: CS 251.

CSYS 253. QR:Apl Time Series&Forecasting. 3 Credits.
Autoregressive moving average (Box-Jenkins) models, autocorrelation, partial correlation, differencing for nonstationarity, computer modeling. Forecasting, seasonal or cyclic variation, transfer function and intervention analysis, spectral analysis. Prerequisites: CE 211 or CE 225; or CE 141 or CE 143 with Instructor permission. Cross-listed with: STAT 253.

CSYS 256. QR: Neural Computation. 3 Credits.
Introduction to artificial neural networks, their computational capabilities and limitations, and the algorithms used to train them. Statistical capacity, convergence theorems, backpropagation, reinforcement learning, generalization. Prerequisites: MATH 122 or MATH 124 or MATH 271; STAT 143 or STAT 153 or equivalent; CS 110. Cross-listed with: STAT 256, CS 256.

CSYS 266. QR: Chaos,Fractals & Dynmcal Syst. 3 Credits.
Discrete and continuous dynamical systems, Julia sets, the Mandelbrot set, period doubling, renormalization, Henon map, phase plane analysis, and Lorenz equations. Prerequisite: MATH 122 or MATH 124. CS 020 or CS 021 recommended. Cross-listed with: MATH 266.

CSYS 268. QR: Mathematical Biology & Ecol. 3 Credits.
Mathematical modeling in the life sciences. Topics include population modeling, dynamics of infectious diseases, reaction kinetics, wave phenomena in biology, and biological pattern formation. Prerequisites: MATH 122 or MATH 124 or MATH 230 or Instructor permission. Cross-listed with: MATH 268.

CSYS 300. Principles of Complex Systems. 3 Credits.
Introduction to fundamental concepts of complex systems. Topics include: emergence, scaling phenomena and mechanisms, multi-scale systems, failure, robustness, collective social phenomena, complex networks. Students from all disciplines welcomed. Pre/co-requisites: calculus and statistics required; Linear algebra, differential equations, and computer programming recommended but not required. Cross-listed with: MATH 300.

CSYS 302. Modeling Complex Systems. 3 Credits.
CSYS 303. Complex Networks. 3 Credits.
Detailed exploration of distribution, transportation, small-world, scale-free, social, biological, organizational networks; generative mechanisms; measurement and statistics of network properties; network dynamics; contagion processes. Students from all disciplines welcomed. Pre/co-requisites: MATH 301/CSYS 301, calculus, and statistics required. Cross-listed with: MATH 303.

CSYS 312. Adv Bioengineering Systems. 3 Credits.
Advanced bioengineering design and analysis for current biomedical problems spanning molecular, cell, tissue, organ, and whole body systems including their interactions and emergent behaviors. Cross-listed with: ME 312.

CSYS 350. Multiscale Modeling. 3 Credits.

CSYS 352. Evolutionary Computation. 3 Credits.

CSYS 355. Statistical Pattern Recogntn. 3 Credits.
Analysis of algorithms used for feature selection, density estimation, and pattern classification, including Bayes classifiers, maximum likelihood, nearest neighbors, kernels, discriminants, neural networks, and clustering. Prerequisite: STAT 241 or STAT 251 or Instructor permission. Cross-listed with: STAT 355, CS 355.

CSYS 359. Appld Artificial Neural Ntwrks. 1-3 Credits.
Introduction to artificial neural networks. A broad range of example algorithms are implemented in MATLAB. Research applications to real data are emphasized. Pre/co-requisites: STAT 223, CS 016/CE 011, or Instructor permission. Cross-listed with: CE 359.

CSYS 360. Applied Geostatistics. 3 Credits.
Introduction to the theory of regionalized variables, geostatistics (kriging techniques): special topics in multivariate analysis; Applications to real data subject to spatial variation are emphasized. Pre/co-requisites: STAT Prerequisites: STAT 223 or STAT 225; CS 020 or CS 021; or Instructor permission. Cross-listed with: CE 369, STAT 369.

Masters thesis research under the supervision of a graduate faculty member. Prerequisite: Instructor permission.

CSYS 392. Masters Project. 1-6 Credits.
Masters Project under the supervision of a graduate faculty member. Prerequisite: Instructor permission.

CSYS 395. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

CSYS 491. Doctoral Dissertation Research. 1-18 Credits.
CSYS 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

COMPUTER INFORMATION SYSTEMS (CIS)

COMPUTER SCIENCE (CS)

Courses

CS 201. QR: Operating Systems. 0 or 3 Credits.
Supervisory and control software for multiprogrammed computer systems. Processes synchronization, interprocess communication, scheduling, memory management, resource allocation, performance evaluation, object-oriented systems, case studies. Prerequisites: CS 121 and CS 124.

CS 204. QR: Database Systems. 3 Credits.
Techniques for processing very large collections of data. Secondary storage. Database design and management. Query languages and optimization. Database recovery. Prerequisite: CS 124.

CS 205. QR: Software Engineering. 3 Credits.
Treatment of software engineering problems and principles, including documentation, information hiding, and module interface specification syntax and semantics. Requires participation in a team project. Prerequisite: CS 124.

CS 206. QR: Evolutionary Robotics. 3 Credits.
Exploration of the automated design of autonomous machines using evolutionary algorithms. Coursework involves reading of research papers, programming assignments and a final project. Prerequisites: Junior standing and programming experience, or Instructor permission.

CS 222. QR: Computer Architecture. 3 Credits.
Architecture of computing systems. Control unit logic, input/output processors and devices, asynchronous processing, concurrency, parallelism, and memory hierarchies. Prerequisite: CS 121.

CS 224. QR: Algorithm Design & Analysis. 3 Credits.
Comprehensive study of algorithms including greedy algorithms, divide and conquer, dynamic programming, graph algorithms and network flow. Computational intractability. Approximation, local search and randomization. Prerequisite: CS 124. Pre/co-requisites: Recommended: CS 125; STAT 143, STAT 151, or CS 128.

CS 225. QR: Programming Languages. 3 Credits.
The principles of programming language design and fundamental implementation concepts. Syntax, semantics, and static program analysis for various paradigms. Programming language metatheory, including confluence and type safety. Stack-based implementation and memory management issues. Prerequisites: CS 124, CS 125.

CS 228. QR: Human-Computer Interaction. 3 Credits.
The design, implementation, and evaluation of user interfaces for computers and other complex, electronic equipment. Includes a significant project. Pre/co-requisites: Programming experience and Junior standing or Instructor permission.
CS 231. QR: Programming for Bioinform. 3 Credits.
Introductory course on computing (including scripting, database, and statistical analysis) for developing bioinformatics applications. Particular emphasis is given to comparative genomics and systems biology scenarios. Prerequisites: STAT 151, STAT 153 or Instructor permission. Cross-listed with: MMG 231.

CS 232. QR: Methods in Bioinformatics. 3 Credits.
This course provides a methodological survey of bioinformatics. Particular emphasis is given to algorithms associated with sequence analysis, comparative genomics, structural biology, and systems biology. Prerequisites: STAT 151, STAT 153, or Instructor permission. Cross-listed with: MMG 232.

CS 237. QR: Intro to Numerical Analysis. 3 Credits.
Error analysis, root-finding, interpolation, least squares, quadrature, linear equations, numerical solution of ordinary differential equations. Prerequisites: Math 121; MATH 122 or MATH 124 or MATH 271; CS 020 or CS 021. Cross-listed with: MATH 237.

CS 243. QR: Theory of Computation. 3 Credits.
Reducibility and decidability, recursion theory, time and space complexity, P, NP, NP-completeness, PSPACE, PSPACE-completeness, L and NL, advanced topics in computability and complexity. Prerequisites: CS 124 and CS 125.

CS 251. QR: Artificial Intelligence. 3 Credits.
Introduction to methods for realizing intelligent behavior in computers. Knowledge representation, planning, and learning. Selected applications such as natural language understanding and vision. Prerequisites: CS 124; CS 128 or STAT 151 or STAT 143. Cross-listed with: CSYS 251.

CS 253. QR: Reinforcement Learning. 3 Credits.
Students will program agents that learn to optimize a reward function using Reinforcement Learning; Markov Decision Processes with discrete states, Value Iteration, Policy Iteration, Q-learning and SARSA, methods for value function approximation in complex domains using linear and non-linear methods. Prerequisites: CS 064 or MATH 052; STAT 151 or STAT 251; CS 110. Pre/co-requisites: Recommended: MATH 122 or MATH 124; CS 125.

CS 254. QR: Machine Learning. 3 Credits.
Introduction to machine learning algorithms, theory, and implementation, including supervised and unsupervised learning; topics typically include linear and logistic regression, learning theory, support vector machines, decision trees, backpropagation artificial neural networks, and an introduction to deep learning. Prerequisites: STAT 151 or STAT 251; MATH 122 or MATH 124.

CS 256. QR: Neural Computation. 3 Credits.
Introduction to artificial neural networks, their computational capabilities and limitations, and the algorithms used to train them. Statistical capacity, convergence theorems, backpropagation, reinforcement learning, generalization. Prerequisites: MATH 122 or MATH 124 or MATH 271; CS 128 or STAT 143 or STAT 151; CS 110. Cross-listed with: STAT 256, CSYS 256.

CS 260. QR: Parallel Computing. 3 Credits.
Taxonomy of parallel computers, basic concepts for parallel computing, effectiveness and scalability, parallel algorithms for variety of problems, distributed memory and shared memory paradigms. Prerequisite: CS 124.

CS 265. QR: Computer Networks. 3 Credits.
Introduction to the theoretical and pragmatic principles and practices of computer networking. Topics include: the Internet; wired and wireless communications protocols; network security protocols. Prerequisites: CS 110; CS 121.

CS 266. QR: Network Secrty&Cryptography. 3 Credits.

CS 274. QR: Computer Graphics. 3 Credits.
Graphical representation of two- and three-dimensional objects on color raster displays. Line generation, region filling, geometric transformations, hidden line and surface removal, rendering techniques. Prerequisites: CS 104 or CS 124; MATH 122 or MATH 124 or MATH 271 recommended.

CS 275. QR: Mobile App Development I. 3 Credits.
A projects-based course focusing on software development for mobile devices, including the concepts of event-driven programming, GUI design and implementation, utilization of hardware sensors, and client/server applications. Prerequisite: CS 120, Senior standing. Pre/co-requisites: Recommended: CS 148 or CS 204.

CS 287. QR: Data Science I. 3 Credits.
Data harvesting, cleaning, and summarizing. Working with non-traditional, non-numeric data (social network, natural language textual data, etc.). Scientific visualization using static and interactive "infographics." A practical focus on real datasets, and developing good habits for rigorous and reproducible computational science. Prerequisites: CS 020 or CS 021; STAT 141 or STAT 143 or STAT 211. Pre/co-requisites: Recommended: CS 110; Math 122 or Math 124. Cross-listed with: STAT 287.

CS 288. QR: Statistical Learning. 3 Credits.
Statistical learning methods and applications to modern problems in science, industry, and society. Topics include: linear model selection, cross-validation, lasso and ridge regression, tree-based methods, bagging and boosting, support vector machines, and unsupervised learning. Prerequisites: STAT 143, STAT 183 or STAT 211. Cross-listed with: STAT 288.

CS 294. Undergraduate Research. 1-18 Credits.
Undergraduate student work on individual or small team research projects under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.

CS 295. Special Topic: Computer Science. 1-18 Credits.
See Schedule of Courses for specific titles. Subject will vary from year to year. May be repeated for credit with instructor permission.
CS 302. Modeling Complex Systems. 3 Credits.

CS 332. Data Mining. 3 Credits.
Analytical and empirical techniques for analysis of large volumes of data. Topics include association analysis, classification, clustering, pattern discovery in sequential data, and Bayesian networks. Prerequisites: CS 128 or STAT 143 or STAT 151.

CS 352. Evolutionary Computation. 3 Credits.

CS 355. Statistical Pattern Recognizn. 3 Credits.
Analysis of algorithms used for feature selection, density estimation, and pattern classification, including Bayes classifiers, maximum likelihood, nearest neighbors, kernels, discriminants, neural networks, and clustering. Prerequisite: STAT 241 or STAT 251 or Instructor permission. Cross-listed with: BIOL 352, CSYS 355.

CS 381. Seminar. 1 Credit.
Presentations by students, faculty, and guest speakers on advanced topics in Computer Science. May be repeated up to three times for credit.

CS 387. Data Science II. 3 Credits.
Advanced data analysis, collection, and filtering. Statistical modeling, monte carlo statistical methods, and in particular Bayesian data analysis, including necessary probabilistic background material. A practical focus on real datasets and developing good habits for rigorous and reproducible computational science. Prerequisite: STAT 287 or CS 287 or Instructor permission. Cross-listed with: STAT 355, CSYS 355.

CS 391. Master's Thesis Research. 1-18 Credits.
Prerequisite: Department permission.

CS 395. Advanced Special Topics. 1-18 Credits.
Subject will vary from year to year. May be repeated for credit with Instructor permission.

CS 491. Doctoral Dissertation Research. 1-18 Credits.
Credit as arranged.

CS 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

COUNSELING (EDCO)

EDCO 201. Special Topics in Counseling. 0-18 Credits.
Special issues in counseling, administration and planning, social work or higher education not appropriate to content of existing courses. Courses reflect the social services orientation of the Department of Integrated Professional Studies.

EDCO 300. Research Methods in Counseling. 3 Credits.
Designed for counseling students to develop the skills of being critical consumers of research epistemology, methods, qualitative and statistical analysis, needs assessment, and program evaluation. This course has been structured according to CACREP standards.

EDCO 320. Dev. Perspectives in CNSLNG. 3 Credits.
Survey of major theories of human development and application of theoretical concepts from a counseling perspective. Prerequisite: Counseling major or Instructor permission.

EDCO 340. Development Guidance in Schls. 3 Credits.
An introduction to the role of the school counselor including developmental guidance program planning and implementation, consultation, crisis intervention, parent education and ethical issues. Prerequisite: Counseling majors or Instructor permission.

EDCO 341. Diagnosis in School Counseling. 1 Credit.
This course outlines the more commonly used psychological diagnostic categories used to describe youth with developmental and psychological challenges.

EDCO 342. Assessment in School. 1 Credit.
This course is designed to provide students with information related to the role of assessment in the practice of school counseling.

EDCO 344. Modalities: Couns Child & Adol. 3 Credits.
Study of the practice of counseling children and adolescents using behavioral and cog-behavior theory, narrative theory and practice, and play therapies. Prerequisites: Counseling majors and concurrent with internship or Instructor permission.

EDCO 345. Diagnosis in Counseling. 1-3 Credits.
Etiology and diagnosis of mental disorders in children, adolescents, and adults according to DSM. Includes intake, evaluation, treatment planning, and clinical documentation skills. Prerequisite: Counseling majors or Instructor permission.

EDCO 350. Prof Issues in Counseling. 3 Credits.
A seminar in which professional, ethical, and legal issues facing counselors in schools and mental health settings are addressed through reading, research, presentation, and discussion. Prerequisite: Graduate standing or Instructor permission.

EDCO 352. Assessment in Counseling. 1-3 Credits.
Provides students with knowledge about common assessment tools and processes used in school counseling and clinical mental health practice. Prerequisites: EDCO 220, EDCO 350, EDCO 374, EDCO 375, and EDCO 377; Counseling majors or Instructor permission.

EDCO 361. Practice of Mental Hlth Cnslng. 3 Credits.
Introduction to issues, needs, models and sociopolitical factors present in community and private-practice mental health counseling, with an emphasis on prevention and wellness. Prerequisite: Graduate standing or Instructor permission.
EDCO 363. Counseling Practicum. 3 Credits.
Introductory supervised experience in counseling in a field setting. Includes 100 hours working as a counselor with a minimum of 40 direct service hours. Prerequisites: Counseling Majors only and EDCO 220, EDCO 350, EDCO 374, EDCO 375, EDCO 340, and EDCO 361.

EDCO 374. Counseling Theory & Practice. 3 Credits.
Theoretical and practical approach to understanding the counseling process. Refinement of personal philosophy, theory of counseling, and implementation in practice. Prerequisite: Graduate standing or Instructor permission.

EDCO 375. Lab Experience in Counseling. 3 Credits.
Students learn and practice basic counseling skills and techniques. Videotaped practice sessions are supervised by course instructor. Prerequisite: EDCO 374. Counseling majors only.

EDCO 376. Addictions Counseling. 3 Credits.
Development and culturally responsive treatment of addictions, e.g., Motivational Interviewing, family systems, Cognitive Behavioral Therapy (CBT) techniques, recovery maintenance, and an integrative approach to treatment. Prerequisite: Counseling majors or Instructor permission.

EDCO 377. Diversity & Intersectionality. 3 Credits.
Designed to assist students in recognizing and acknowledging diversity in society, and developing the knowledge and skills to recognize, interrupt and redress inequity within their spheres of influence. Prerequisite: Graduate Students in the Counseling Program or Instructor permission.

EDCO 378. Counsel/Career/Lifestyle Dev. 3 Credits.
An exploration of the theories, assessment instruments, counseling techniques, and issues most relevant in counseling for career and lifestyle development. Prerequisite: EDCO 374, EDCO 375; Graduate standing or Instructor permission.

EDCO 387. Therapeutic Psychopharmacology. 3 Credits.
Introduction to neuroanatomy, neurophysiology, and pharmacology as they pertain to mental health counseling. Course also covers commonly prescribed medications, ethical issues and the referral process. Prerequisite: EDCO 360 or program permission.

EDCO 388. Family and Couples Counseling. 3 Credits.
Theory and process of counseling with families and couples including family theory and family therapy orientations and intervention skills. Includes practice of counseling interventions. Prerequisites: EDCO 220, EDCO 374, EDCO 375, EDCO 377, EDCO 392, or Instructor permission.

EDCO 389. Counseling Internship. 1-3 Credits.
A supervised experience in counseling in a field (school or mental health) setting. Prerequisites: Counseling majors only and EDCO 220, EDCO 350, EDCO 374, EDCO 375, EDCO 392, EDCO 363, EDCO 340, and EDCO 361.

EDCO 391. Master’s Thesis Research. 1-18 Credits.
Thesis topic must be approved by a faculty committee.

EDCO 392. Group Counseling Experience. 1 Credit.
Encounter group experiences for prospective clinical mental health and school counselors providing increased awareness of self and models relating to others. Prerequisite: Graduate standing.

EDCO 393. Adv Group:Theory and Practice. 0 or 3 Credits.
Group leadership skills are developed, practiced, and refined through in-class and laboratory experiences that focus on live group supervision, theory, feedback exchange, and ethical issues. Prerequisites: EDCO 220, EDCO 374, EDCO 375, EDCO 377, EDCO 392 and permission of the Instructor.

EDCO 394. Special Topics in Counseling. 1-18 Credits.
Special issues in counseling, administration and planning, social work, higher education not appropriate to content of existing courses. Prerequisite: Instructor permission. Variable credit.

EDCO 397. Independent Study. 1-6 Credits.
Individual work on a research problem selected by the student in consultation with a staff member. Prerequisite: Twelve hours in education and related areas; endorsement by a sponsoring faculty member.

CURRICULUM & INSTRUCTION (EDCI)

Courses
EDCI 200. Contemporary Issues. 0-6 Credits.
Designed so that its content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Pre/co-requisite: twelve hours in Education and related areas.

EDCI 238. Teach‘g w/Global Perspective. 3 Credits.
Approaches to teaching global and multicultural issues; justice and human rights, peace, and the environment. Development of curriculum materials. Links between local and global concerns. Prerequisite: Twelve hours of Education and related areas.

EDCI 245. Computer Apps in Elem&Sec Curr. 3 Credits.
For elementary, secondary educators with experience in simple programming. Design of instructional procedures, integrating computers into school curriculum. Use of computer software to teach basic skills, reasoning, thinking skills. Prerequisites: CS 003 or equivalent; Instructor permission.

EDCI 261. Current Direction in C&I. 3 Credits.
Current trends, issues, literature, programs, and organizational activities in fields of curriculum and instruction emphasizing areas of individual concern. Focus on elementary and secondary school levels. Prerequisite: Twelve credits in Education or equivalent.

EDCI 295. Laboratory Experience in Educ. 1-6 Credits.
Supervised fieldwork designed to give students experience in specialized areas for their professional development. Prerequisite: Permission of the Coordinator of Professional Laboratory Experiences.

EDCI 296. Laboratory Experience in Educ. 1-6 Credits.
Supervised fieldwork designed to give students experience in specialized areas for their professional development. Prerequisite: Permission of the Coordinator of Professional Laboratory Experiences.
EDCI 321. Learning, Design & Technology. 3 Credits.
This course examines the relationship between learning theory and technology integration in K-12 classrooms and integrates backward design in standards-based units of study. Prerequisite: Teaching experience.

EDCI 322. Differentiation & Technology. 3 Credits.
This course enables educators to develop and utilize instructional frameworks based on current research related to differentiating instruction, universal design for learning and assistive technology.

EDCI 323. Inquiry and Technology. 3 Credits.
This course examines how technology can promote a student-centered active learning classroom environment that promotes problem-solving and critical thinking skills. Prerequisite: Prior teaching experience.

EDCI 324. Assessment and Technology. 3 Credits.
Students will cover assessment basics, the role of technology in education, information & knowledge management, and methods for integrating technology into assessment practice.

EDCI 325. Leadership and Technology. 3 Credits.
This course explores leadership and the role of the Integration Specialist and/or teacher leader in the context of educational technology integration planning.

EDCI 331. Society, Stress and the Brain. 3 Credits.
Explores brain development and the learning process under complex social conditions such as poverty, instability, and fear. Students study the effects of stress on learning and consider methods of instruction and interaction that address developmental needs of children and families from diverse contexts.

EDCI 333. Curr Concepts/Planning/Develop. 3 Credits.
Overview of conceptions of curriculum for elementary and secondary education; examination of contemporary curriculum trends, issues; processes for initiating, planning, developing curriculum activities and programs. Prerequisite: Twelve hours of Education or Instructor permission.

EDCI 334. Social Studies in Elem Schools. 3 Credits.
Study of literature, research, and problems in teaching social studies in the elementary school. Prerequisite: Twelve hours in Education and related areas.

EDCI 356. Methods & Materials in Math. 3 Credits.
Evolution of mathematical concepts, notations. Meaning of numbers, number-systems. Theory underlying fundamental operations, metric measurements, analysis of modern approach to mathematics. Manipulative approach to teaching mathematics. Prerequisite: Twelve hours in Education and related areas.

EDCI 363. Analysis of Curr & Instruct Sem. 3 Credits.
A case study of the design, implementation, and evaluation of selected curricular and instructional improvements. Prerequisite: Ed.D. students have priority.

EDCI 380. Professional Problems in Ed. 3 Credits.
Designed to cover selected educational problems in depth. The major emphasis will be on intensive and critical analysis of the literature and practice in a given area.

EDCI 391. Master's Thesis Research. 1-12 Credits.
Thesis topic must be approved by a faculty committee. Credit as arranged.

EDCI 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

EDCI 397. Problems in Education. 1-6 Credits.
Individual work on a research problem selected by the student in consultation with a staff member. Pre/co-requisites: Twelve hours in Education and related areas; endorsement by a sponsoring faculty member.

DOCTOR OF PHYSICAL THERAPY (DPT)

Courses

DPT 401. Health Systems I - Policy. 2 Credits.
Explores U.S. health systems including the role of public and private sectors. Federal and state health policy and legislation are examined in relationship to physical therapy. Examine mechanisms of health care delivery in the US in comparison to international systems. Prerequisites: ANNB 301, DPT 410, DPT 450; Doctor of Physical Therapy student.

DPT 402. Health Sys II-Quality Improvmt. 2 Credits.
Principles and practices of health care quality, quality improvement, and design and management of continual improvement activities. Topics will include quality measurement, management, and patient safety and their application in a variety of health care delivery settings and organizations. Prerequisites: DPT 421, DPT 423, DPT 426, DPT 452, DPT 492; Doctor of Physical Therapy student.

DPT 403. Health Sys III-Business Mgt. 2 Credits.
Physical therapist practice management including evidence-based business and financial management, administration, and health informatics. Topics will incorporate business management from a physical therapist perspective, while expanding knowledge on health systems and the role of physical therapist in various practice settings. Prerequisites: DPT 402, DPT 422, DPT 424, DPT 427, DPT 460, DPT 493; Doctor of Physical Therapy student.

DPT 404. Health Sys IV-Health Promotion. 3 Credits.
Fundamental concepts of health behavior, health education, and health promotion. Examination of health promotion programs at the level of policy, community, social spheres, and individuals. Experiential learning through health promotion in consideration of health behavior science and evidence-based practice. Prerequisites: DPT 402, DPT 422, DPT 424, DPT 427, DPT 460, DPT 493; Doctor of Physical Therapy student.

DPT 405. Clinical Medicine. 4 Credits.
Foundational knowledge and application of pathophysiology as it pertains general health and systemic disease and its relationship to the role of the physical therapist as a movement system expert and a primary care practitioner. Prerequisites: ANNB 301, DPT 410, DPT 450; Doctor of Physical Therapy student.
DPT 406. Exercise Science. 3 Credits.
Principles and applications of exercise assessment/testing, prescription and progression of the exercise program, including response to exercise. Course will emphasize understanding and application of the ACSM guidelines to exercise testing and prescription to individuals across the lifespan. Prerequisites: ANNB 301, DPT 410, DPT 450; Doctor of Physical Therapy student.

DPT 407. Pharmacology and Nutrition. 1 Credit.
Foundational knowledge of pharmacology and nutrition pertinent to physical therapist practice. Introduction to pharmacokinetics, pharmacodynamics, mechanisms of action of various drugs, and adverse reactions. Topics will also include nutrition in relation to primary, secondary, and tertiary prevention. Prerequisites: DPT 401, DPT 405, DPT 406, DPT 411, DPT 414, DPT 415; Doctor of Physical Therapy student.

DPT 408. Fundamentals Critical Inquiry. 3 Credits.
In-depth application of scientific inquiry inclusive of research design, statistical methods, research question development, critical appraisal and interpretation of evidence related to clinical practice are explored. Diagnostic, intervention, and prognostic studies are used in the application of the inquiry process. Prerequisites: DPT 401, DPT 405, DPT 406, DPT 411, DPT 414, DPT 415; Doctor of Physical Therapy student.

DPT 410. Fundamentals of Clinical Pract. 3 Credits.
Fundamental skills for physical therapists including patient/client management principles and practices such as examination techniques, history taking and interviewing skills, fundamental patient handling skills, clinical documentation and patient handling skills. Prerequisite: Doctor of Physical Therapy student.

DPT 411. Movement System I. 3 Credits.
Application of kinesiology and biomechanical principles to the analysis and management of human movement, posture, joint structure and function, and gait. Examination of mechanical properties of tissue with respect to lifespan, injury and healing, and principles of diagnostic imaging. Prerequisites: ANNB 301, DPT 410, DPT 450; Doctor of Physical Therapy student.

DPT 412. Movement System II. 4 Credits.
Motor control/learning and development across the lifespan, and a theoretical framework to develop intervention strategies. Principles of examination and evaluation of normal and dysfunctional movement will be discussed, including posture, gait, reach and grasp. Electrodiagnostic testing will also be covered. Prerequisites: DPT 401, DPT 405, DPT 406, DPT 411, DPT 414, DPT 415; Doctor of Physical Therapy student.

DPT 413. Movement System III. 4 Credits.
Utilize a movement systems approach to address the management of patients with multi-system involvement. Focus on the role of the physical therapist as primary care practitioner including emergency scenarios across the lifespan. Prerequisites: DPT 403, DPT 404, DPT 416, DPT 425, DPT 453, DPT 494; Doctor of Physical Therapy student.

DPT 414. Clinical Reasoning. 2 Credits.
Fundamental clinical-decision making frameworks in contemporary physical therapy practice, using the International Classification of Functioning, Disability and Health (ICF) and the Hypothesis Oriented Algorithm for Clinicians within the context of patient/client management model. Prerequisites: ANNB 301, DPT 410, DPT 450; Doctor of Physical Therapy student.

DPT 415. Psychsoc Aspects Hlth Wellbeing. 3 Credits.
Psychosocial dimensions of health, illness, and disability across the lifespan and in consideration of diverse perspectives. Consideration of physical therapy implications for management of common mental health conditions and integrate patient and family-centered communication skills in simulated clinical situations. Prerequisites: ANNB 301, DPT 410, DPT 450; Doctor of Physical Therapy student.

DPT 416. Rehabilitation Technology. 3 Credits.
Evaluation, prescription, and patient/client education of rehabilitation technology used in physical therapy management of individuals to address or enhance movement across the lifespan. Topics will include prescription of and training with technology, devices, and environmental modifications. Prerequisites: DPT 402, DPT 422, DPT 424, DPT 427, DPT 460, DPT 493; Doctor of Physical Therapy student.

DPT 420. Musculoskeletal Management I. 4 Credits.
Screening, examination, evaluation, diagnosis, prognosis, management and outcomes for patients with musculoskeletal dysfunction of the extremities are covered. Topics include pathophysiology, risk appraisal, medical and surgical management, and biopsychosocial considerations in the management of these conditions across the lifespan. Prerequisites: DPT 401, DPT 405, DPT 406, DPT 411, DPT 414, DPT 415; Doctor of Physical Therapy student.

DPT 421. Musculoskeletal Management II. 4 Credits.
Screening, examination, evaluation, diagnosis, prognosis, management and outcomes for patients with musculoskeletal dysfunction of the spine are covered. Topics include pathophysiology, risk appraisal, medical and surgical management, and biopsychosocial considerations in the management of these conditions across the lifespan. Prerequisites: DPT 407, DPT 408, DPT 412, DPT 420, DPT 451, NSCI 302; Doctor of Physical Therapy student.

DPT 422. Musculoskeletal Management III. 3 Credits.
Screening, examination, evaluation, diagnosis, prognosis, intervention and outcomes for patients with complex musculoskeletal system dysfunction are covered. Case management as movement system experts of patient/client populations with complex primary or underlying conditions across the lifespan are explored. Prerequisites: DPT 421, DPT 423, DPT 426, DPT 452, DPT 492; Doctor of Physical Therapy student.
DPT 423. Neurological Management I. 4 Credits.
Focus on movement system dysfunction among individuals with neuromuscular conditions across the lifespan. Introduction to the principles and components of neurological examination and interventions emphasizing body structure/function with neuropathology considerations will be discussed. Prerequisites: DPT 407, DPT 408, DPT 412, DPT 420, DPT 451, NSCI 302; Doctor of Physical Therapy student.

DPT 424. Neurological Management II. 3 Credits.
Screening, examination, diagnosis, prognosis, management and outcomes for individuals with neurological impairments across the life span are covered. Evaluation and interventions of the movement system deficits considering pathophysiology and biopsychosocial framework will be addressed through case-based learning. Prerequisites: DPT 421, DPT 423, DPT 426, DPT 452, DPT 492; Doctor of Physical Therapy student.

DPT 425. Neurological Management III. 3 Credits.
Incorporate advanced clinical decision making in the plan of care of complex patients across the lifespan. Consideration of differential diagnosis, patient environment and case management will be discussed. Prevention, risk reduction strategies and continuum of care will be emphasized. Prerequisites: DPT 402, DPT 422, DPT 424, DPT 427, DPT 460, DPT 493; Doctor of Physical Therapy student.

DPT 426. Cardiovasc and Pulmonary Mgt. 3 Credits.
Screening, examination, evaluation, diagnosis, prognosis, management and outcomes for patients with cardiovascular and pulmonary conditions are covered. Topics include pathophysiology, risk appraisal, medical and surgical management, and biopsychosocial considerations in the management of these conditions across the lifespan. Prerequisites: DPT 407, DPT 408, DPT 412, DPT 420, DPT 451, NSCI 302; Doctor of Physical Therapy student.

DPT 427. Integmnt, Endocrine, Multi Sys. 3 Credits.
Screening, examination, evaluation, diagnosis, prognosis, management and outcomes for patients with integumentary, endocrine, lymphatic, oncology, autoimmune and multisystem conditions are covered. Topics include pathophysiology, risk appraisal, medical and surgical management, and biopsychosocial considerations across the lifespan. Prerequisites: DPT 421, DPT 423, DPT 426, DPT 452, DPT 492; Doctor of Physical Therapy student.

DPT 450. Professional Form-/Leadership I. 1 Credit.
Introduces professionalism, leadership, ethics, cultural competence, interprofessional education-practice and teaching-learning within the role of a doctoring professional, physical therapist contemporary practice and the healthcare environment. Prerequisite: Doctor of Physical Therapy student.

DPT 451. Prof Formation-/Leadership II-ICE. 2 Credits.
Advanced study of professional formation and personal leadership development within the role of a doctoring professional. Focuses on role identity, professional practice expectations within ethical/legal standards of practice, teaching-learning, supervision/delegation, and introduces IPE role within Integrated Clinical Experiences (ICE). Prerequisites: DPT 401, DPT 405, DPT 406, DPT 411, DPT 414, DPT 415; Doctor of Physical Therapy student.

DPT 452. Prof Formatn-/Leadrshp III-ICE. 2 Credits.
Advanced concepts of professional formation and personal leadership development within the role of a doctoring professional. Focuses on collaborative practice expectations within ethical/legal standards of practice, teaching-learning, supervision/delegation, and IPE. Prepares for assuming responsibilities within Integrated Clinical Experiences (ICE). Prerequisites: DPT 407, DPT 408, DPT 412, DPT 420, DPT 451, NSCI 302; Doctor of Physical Therapy student.

DPT 453. Prof Form-/Leadrshp IV-ICE/IPE. 2 Credits.
Integrates professional formation and leadership development as a doctoring professional. Emphasizes interprofessional practice, education and support of health and well-being of others. Justifies ethical/legal decisions, social responsibility and advocacy. Expands Integrated Clinical Experiences (ICE) to community engagement and health promotion. Prerequisites: DPT 402, DPT 422, DPT 424, DPT 427, DPT 428, DPT 452, DPT 460, DPT 493; Doctor of Physical Therapy student.

DPT 460. Clinical Edu Experience I. 2 Credits.
Eight week supervised clinical experience in one of the following settings: outpatient, inpatient, or specialty clinics. Experience will include safe, effective, and comprehensive patient care. Students will demonstrate proficiency with skills applying foundational knowledge associated with patient care and management. Prerequisites: DPT 423, DPT 421, DPT 426, DPT 452, DPT 493, DPT 422, DPT 427, DPT 424, DPT 402, DPT 494; Doctor of Physical Therapy student.

DPT 461. Clinical Edu Experience IIIA. 2 Credits.
Six week supervised clinical experience in one of the following settings: outpatient, inpatient, or specialty clinics. Experience will include safe, effective, and comprehensive patient care. Students will demonstrate proficiency with skills applying foundational knowledge associated with patient care and management. Prerequisites: DPT 413; Doctor of Physical Therapy student.

DPT 462. Clinical Edu Experience IIIB. 2 Credits.
Six week supervised clinical experience in one of the following settings: outpatient, inpatient, or specialty clinics. Experience will include safe, effective, and comprehensive patient care. Students will demonstrate proficiency with skills applying foundational knowledge associated with patient care and management. Prerequisites: DPT 413, DPT 461; Doctor of Physical Therapy student.

DPT 463. Clinical Edu Experience III. 4 Credits.
Twelve week supervised clinical experience in one of the following settings: outpatient, inpatient, or specialty clinics. Experience will include safe, effective, and comprehensive patient care. Students will demonstrate proficiency with skills applying foundational knowledge associated with patient care and management. Prerequisites: DPT 462; Doctor of Physical Therapy student.
DPT 491. Dissertation Research. 1-18 Credits.

DPT 493. Doctoral Research Project I. 1 Credit.
Advanced research methods, including development of a research question (PICO), research design, proposal and IRB submission. Research questions might be systematic reviews, intervention, diagnostic, or prognostic studies and may use qualitative, quantitative, or mixed-methods design. Prerequisites: DPT 407, DPT 408, DPT 412, DPT 420, DPT 451, NSCI 302; Doctor of Physical Therapy student.

DPT 494. Doctoral Research Project II. 2 Credits.
Implementation of research proposal including data collection and analysis. Research question might be systematic reviews, intervention, diagnostic, or prognostic studies; and may utilize qualitative, quantitative, or mixed-methods design. Prerequisites: DPT 421, DPT 423, DPT 426, DPT 452, DPT 493; Doctor of Physical Therapy student.

DPT 495. Doctoral Research Project III. 2 Credits.
Completion of research project inclusive of comprehensive analysis, synthesis of findings based on research question, implications to practice and dissemination of finding via manuscript and presentations. This project fulfills a component of the Doctoral Capstone project. Prerequisites: DPT 402, DPT 422, DPT 424, DPT 427, DPT 460, DPT 494; Doctor of Physical Therapy student.

DPT 496. Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

EARLY CHILDHOOD PRE K-3 (EDEC)

Courses
EDEC 397. Problems in Education. 1-6 Credits.

EARLY CHILDHOOD SPECIAL EDUC (ECSP)

Courses
ECSP 200. Contemporary Issues. 1-6 Credits.

ECSP 202. D2:EI for Infants and Toddlers. 3 Credits.
An introduction to the field of Early Intervention for supporting infants and toddlers with and at risk for developmental delay or disability and their families. Stresses a routines-based and family-centered approach within the natural environment. Prerequisites: Early Childhood Special Education undergraduate or graduate students or Instructor permission.

ECSP 210. Curriculum in ECSP. 3-4 Credits.
Designing and implementing services and supports for young preschool-age children with diverse abilities. Topics include IEPs, embedding instruction, specialized instruction, and inclusion. Three credits, four credits with 30-hour field experience. Prerequisites: Early Childhood Special Education undergraduate students or with Instructor permission.

ECSP 211. Assessment in EI/ECSE. 3-4 Credits.
Overview of the strengths and limitations of traditional and nontraditional assessments; legal responsibilities, eligibility, family, and cultural aspects. Three credits, four credits for Early Childhood Special Education majors with 30-hour field experience. Prerequisites: Early Childhood Special Education undergraduate students or with Instructor permission. Pre/Corequisites: Early Childhood Special Education major; instructor permission required for Special Education minors.

ECSP 295. Lab Experience in Education. 1-6 Credits.
Undergraduate only.

ECSP 310. Curriculum in ECSP. 3-4 Credits.
Designing and implementing services and supports for young preschool-age children with diverse abilities. Topics include IEPs, embedding instruction, specialized instruction, and inclusion. Three credits, four credits with 30-hour field experience. Pre/Corequisites: Special Education Graduate student; Praxis Core requirement fulfilled.

ECSP 311. Assessment in EI/ECSE. 3 Credits.
Overview of the strengths and limitations of traditional and nontraditional assessments; legal responsibilities, eligibility, family, and cultural aspects. Prerequisite: Special Education Graduate student.

ECSP 319. Intern Specialized Personnel. 1-6 Credits.
Undergraduate only.

ECSP 320. Seminar in EI/ECSE. 3 Credits.
This seminar accompanies the student teaching or internship experiences. Students will create a variety of evidence-based products and complete their portfolios for licensure. Co-requisite: ECSP 386. Cross-listed with: ECSP 220. For undergraduates only.

ECSP 355. Implementation Science in ECSP. 3 Credits.
This course will focus on increasing the quantity and quality of ECI practitioners who can meet the diverse needs of children and families by increasing their knowledge of evidence-based strategies for addressing barriers to implementing EBPs in home and school.

ECSP 386. Internship: EI/ECSE. 3-9 Credits.
Internship in an early intervention and/or early childhood special education setting. Pre/co-requisites: ECSP 202, ECSP 310, ECSP 311; Praxis Core requirement fulfilled; minimum GPA of 3.0 or higher.

ECSP 391. Master’s Thesis Research. 1-12 Credits.

ECSP 397. Problems in Education. 1-12 Credits.

ECONOMICS (EC)

Courses
EC 222. QR: Adv Macroeconomic Theory. 3 Credits.
Tools and lessons of advanced macroeconomic theory with a focus on programming in Mathematica to simulate the predictions of advanced theoretical models. Prerequisites: EC 170 or STAT 141, EC 171, EC 172.
EC 237. Economy as a Complex System. 3 Credits.
Enhances understanding of the application of simulation methods to economics. Topics include problems from micro and macroeconomics; game theory and general equilibrium; cellular automata, and agent-based modeling with learning and evolution. Prerequisites: EC 170 and EC 171 and EC 172.

EDUCATION (EDSS)

Courses

EDSS 200. Contemporary Issues. 0-6 Credits.
Designed so that its content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Prerequisite: Twelve hours in Education and related areas.

EDSS 208. The Mass Media as Educator. 3 Credits.
Analysis and assessment of the mass media’s teachings about reality and worth and how to live our lives individually and collectively. Appropriate for non-education students. Pre/co-requisites: Junior standing for undergraduates; also can be taken for Graduate credit.

EDSS 248. Educational Media. 3 Credits.
Modern instructional aids, theory and practice, educational media related to psychology of teaching and learning. Prerequisite: Twelve hours in Education and related areas.

EDSS 295. Internship. 1-18 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion. Prerequisite: Permission of the Coordinator of Professional Laboratory Experiences.

EDSS 309. Interdisciplinary Seminar. 3 Credits.
Introduction to interdisciplinary study; the field of policy analysis and social change. Core academic experience for Interdisciplinary Majors. Prerequisite: Interdisciplinary majors; others by Instructor permission.

EDSS 313. Stat Meth Ed & Social Services. 3 Credits.
Basic concepts of descriptive and inferential statistics. Topics: frequency distributions; measures of central tendency, dispersion; correlation, hypothesis testing. Application of concepts to educational situations.

EDSS 319. Internship. 1-6 Credits.
Students will undertake an approved internship in an institution which reflects the particular area of interest and needs of the student. Prerequisite: Instructor permission.

EDSS 321. School Improvement:Thry & Prac. 4-6 Credits.
Analysis of research and practices pertinent to improvement of American schools. Student assignments include synthesis papers and site-specific research projects derived from course studies. Prerequisite: Twelve hours of Graduate study in education.

EDSS 336. Professional Writing. 3 Credits.
Problems in writing faced by professionals in educational and human service settings. Students write reports, critiques, reviews; analyze examples of published work; receive detailed critiques of their work.

EDSS 343. The Study of Teaching. 3 Credits.
Study of the art and science with emphasis on students’ own teaching. Current research on teaching and self-study are major foci. Prerequisite: Twelve hours of education; teaching experience.

EDSS 349. Quasi-Experiment in Ed & SS. 3 Credits.
Quasi-experimental designs are analyzed, compared, and contrasted with "true experiments." Strategies for addressing threats to the validity of quasi-experiments are studied. Design exemplars are evaluated. Prerequisite: EDSS 313, PSYC 340, STAT 211, or equivalent.

EDSS 380. Professional Problems in Ed. 3 Credits.
Designed to cover selected educational problems in depth. The major emphasis will be on intensive and critical analysis of the literature and practice in a given area.

EDSS 382. Teaching Internship. 3-12 Credits.
Supervised teaching experiences on a full-time basis, with related seminars in teaching subject. Prerequisite: Permission of coordinator of Professional Laboratory Experiences.

EDSS 391. Master's Thesis Research. 1-6 Credits.
Thesis topic must be approved by a faculty committee.

EDSS 397. Problems in Education. 1-6 Credits.
Individual work on a research problem selected by the student in consultation with a staff member. Prerequisite: Twelve hours in education and related areas; endorsement by a sponsoring faculty member.

EDUCATION FOR CULTURAL AND LINGUISTIC DIVERSITY (ECLD)

Courses

ECLD 396. Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

ELECTRICAL ENGINEERING (EE)

Courses

EE 209. Transmission Line Analysis. 3 Credits.
Fourier-Laplace transform analysis of steady-state and transient phenomena on transmission lines. Phasor representation and complex variable analysis. Prerequisite: MATH 271.

EE 210. Control Systems. 3 Credits.
Analysis and design of continuous and discrete-time control systems; stability, signal flow, performance criteria, classical and state variable methods, simulation design tools, computer-based realizations. Credit not given for more than one of the courses EE 110, EE 210. Prerequisite: EE 171 or ME 111. Cross-listed with: ME 210.

EE 211. Real-Time Control Systems. 3 Credits.
Digital control systems analysis and design. Techniques for system analysis and controller design, e.g., system identification, linearization, gain scheduling, and control of systems with saturation and time delays. State space models and discretization of continuous-time systems. Prerequisites: EE 110 or EE 210 or ME 210.
EE 212. Computer Vision. 3 Credits.
Introduction to computer vision systems for interactive and industrial applications using both hard/software computational approaches. Pre/co-requisites: CS 110; MATH 122 (preferred) or MATH 124 or MATH 271.

EE 213. Systems & Synthetic Biology. 3 Credits.
Applying engineering tools to the design and analysis of biomolecular processes; gene regulatory networks; nonlinear dynamics in molecular biology; biological circuit design; biological signal processing. Prerequisites: Background required: Differential Equations, Linear Algebra, Programming. Cross-listed with: CSYS 213, ME 213.

EE 215. Electric Energy Systems Analysis. 3 Credits.
Transmission line, generator, transformer modeling and control, per-unit conversion, power flow calculations and software, symmetric components and fault analysis, protection/relaying, stability analysis, smart grid. Prerequisite: EE 113. Co-requisite: MATH 122 (preferred) or MATH 124.

EE 217. Smart Grid. 3 Credits.
Smart Grid: Using information/communication technology to modernize electric power/energy systems, including generation, transmission, distribution and consumption. Electricity physics/economics/policy; renewable energy; energy storage; demand response; energy efficiency; distributed generation; advanced metering infrastructure; distribution automation; microgrids; synchrophasors; HVDC and FACTS systems. Prerequisite: EE 113 or Graduate standing. Co-requisite: EE 215 recommended.

EE 221. Digital VLSI Circuit Design. 0 or 3 Credits.
Design of VLSI circuits using a modular approach with industrial grade software: schematic capture; circuit design languages (HDL); full-custom layouts; mixed signals; synthesis. Laboratory. Prerequisites: EE 120. Pre/co-requisites: EE 131.

EE 222. Analog VLSI Circuit Design. 0 or 3 Credits.
The design, layout, and simulation of VLSI analog circuits. Emphasis on small signal models and circuits used in operational amplifiers. Prerequisites: EE 121; Instructor permission.

EE 224. Principles VLSI System Design. 3 Credits.
Survey of VLSI design. Architecture and partitioning of functions. Design for testability. Simulation including timing. Design verification; manufacturing interface. Required team project and report. Prerequisite: EE 221 or Instructor permission.

EE 227. Biomedical Instrumentation. 3 Credits.
Measurement techniques for biomedical engineering research and industry, and health care institutions. Integrated biomedical monitoring, diagnostic, and therapeutic instrumentation. Prerequisite: EE 100 or EE 004. Co-requisites: EE 120, ANPS 020, or Instructor permission. Cross-listed with: BME 227.

EE 228. Sensors. 3 Credits.
Sensor design, interrogation, and implementation. A wide variety of electrical, electronic, optical, mechanic, and cross-disciplinary devices. System designs, measurement techniques, and methodologies. Prerequisite: Senior standing in Engineering or Physics.

EE 231. Digital Computer Design I. 3 Credits.
Hardware organization and realization, hard-wired and microprogrammed control units, interrupt and I/O systems. Hardware design language introduced and used for computer design. Prerequisites: EE 131; EE 134 or CS 121.

EE 232. Digital Computer Design II. 3 Credits.
Memory designs, error control, high-speed addition, multiplication, and division, floating-point arithmetic, CPU enhancements, testing and design for testability. Prerequisite: EE 231.

EE 233. Microprocessor Systems & Appl. 0 or 4 Credits.
Basic principles of mini/microcomputers; A/D; D/A; channels, magnetic devices, display devices, mechanical devices; interface designs of analog systems to mini/microcomputers; principles of microprogramming; bit-slice-based microcomputers. Prerequisite: Department permission; CS 101 desirable.

EE 241. Electromagnetic Wave Theory. 3 Credits.
Electromagnetic radiation and wave propagation in complex media and systems: angular spectrum of plane waves, dispersive pulse propagation, applications to communications, imaging and remote sensing. Prerequisite: EE 141 or equivalent.

EE 245. Quantum Electronics. 3 Credits.
A theoretical description of light-matter interactions in photon emitting resonant cavities. A practical understanding of laser design and operation. Prerequisite: EE 141.

EE 247. Physical Optics. 3 Credits.

EE 261. Semiconductor Materials/Device. 3 Credits.
Energy band theory, effective mass, band structure and electronic properties of semiconductors. Transport of electrons and holes in bulk materials and across interfaces. MOSFETs, BJTs, pn junctions, and Schottky barriers. Prerequisite: EE 120 or Graduate Student standing.

EE 262. Solid-State Materials&Devices. 3 Credits.
Multijunction and interface devices. Heterostructure and optical devices. Dielectric and optical properties solids. High-frequency and high-speed devices. Novel materials and devices. Prerequisite: EE 120 or Graduate Student standing.

EE 266. Science & Tech Integrated Cir. 3 Credits.
Science and technology of integrated circuit fabrication. Interaction of processing with material properties, electrical performance, economy, and manufacturability. Prerequisite: EE 120.

EE 272. Information Theory. 3 Credits.
Introduction to probability concepts of information theory; entropy of probability models; theoretical derivations of channel capacity; coding methods and theorems, sampling theorems. Prerequisite: STAT 151.

EE 273. Digital Communications. 3 Credits.
Digital modulation/demodulation methods and BER performance; source entropy and channel capacity; optimal detection; convolutional codes and decoding algorithms. Pre/co-requisites: EE 174 and STAT 151.
EE 275. Digital Signal Processing. 3 Credits.
Sampling and reconstruction of signals. DFT, FFT and the z-transform. FIR and IIR filter design. Speech coding. Accompanying lab: EE 289. Pre/co-requisites: EE 171; Instructor permission.

EE 276. Image Processing & Coding. 3 Credits.
Image enhancement techniques by point and spatial operations. Data compression techniques to include scalar quantization, entropy coding, transform and sub-band coding. Labs on PC hardware; PC and Unix-based software. Prerequisite: EE 275.

EE 277. Image Anyl&Pattern Recognition. 3 Credits.
Image, shape, and texture analysis. Statistical pattern recognition methods. Pattern recognition and computer vision techniques for machine parts recognition and automatic visual inspection. Prerequisite: EE 275 or Graduate Student standing or Instructor permission.

EE 278. Wireless Communication. 3 Credits.
Modern wireless systems, including cellular design, propagation modeling, multiple access and equalization techniques. Pre/co-requisites: EE 174, STAT 151.

EE 279. Wireless Sensor Networks. 3 Credits.
Applications of and technologies behind wireless sensor networks. A systems-level perspective that integrates wireless networking, antennas, radio frequency circuitry, sensors, digital signal processing, embedded systems, and energy. Term project. Prerequisite: EE 171 or Instructor permission.

EE 281. Materials Science Seminar. 1 Credit.
Presentation and discussion of advanced electrical engineering problems and current developments. Prerequisite: Senior or Graduate Engineering enrollment.

EE 295. Special Topics. 1-18 Credits.
Special topics in developing areas of Electrical Engineering. Prerequisite: Senior or Instructor permission.

EE 301. System Theory. 3 Credits.

EE 302. Stochastic Processes. 3 Credits.
Probability theory, random variables and stochastic processes. Response of linear systems to random inputs. Applications in engineering. Prerequisites: EE 171 or ME 111; and STAT 151 or STAT 143.

EE 310. Multivariable Feedback Systems. 3 Credits.
Linear feedback control systems. Builds on undergraduate frequency domain methods and graduate-level state-variable methods in order to develop feedback design concepts for linear multivariable systems. Focus on approaches leveraged by practicing engineers. Prerequisite: EE 110 or EE 210 or ME 210 or EE 301 or Instructor permission.

EE 312. Intro Optimum Control Systems. 3 Credits.
Optimal control problem formulation and solution; including the calculus of variations, Pontryagin’s maximum principle, Hamilton-Jacobi theory, dynamic programming, and computational methods. Prerequisite: EE 210.

EE 314. Nonlinear System Theory. 3 Credits.
Basic nonlinear methods including computational and geometrical techniques for analysis of nonlinear systems. Describing function methods and bifurcation and catastrophe theory. Sensitivity and stability considerations. Prerequisite: MATH 230 or MATH 271. Pre/Co-requisites: EE 301 recommended.

EE 338. Semiconductor Dev Model&Simul. 3 Credits.
Analysis and application of computer models for semiconductor process and device simulation. Strategies for development of device models for circuit simulation. Prerequisites: EE 262; Instructor permission.

EE 341. ST:Electromagnetic Field Thry. 3 Credits.
For advanced students in the field of electromagnetism. Topics selected from special interests of staff with lectures and readings from current literature.

EE 352. Adv Semicond Device Phys & Des. 3 Credits.
MOSFET, bipolar, and CMOS device parameters, their characterization, and their relation to process technology. Description and use of computer-aided process and device models. Prerequisite: EE 262.

EE 354. MOS Analog Intergrtd Circ Dsgn. 3 Credits.
Analysis and design of MOS analog integrated circuits. Each student will design, layout, test, and document an analog integrated circuit using computer-aided-design techniques. Prerequisites: EE 338.

EE 365. Optoelectronic Devices. 3 Credits.
Optical and electro optical properties of semiconductors. Applications to photodetectors, solar cells, light emitting diodes and lasers. Prerequisites: EE 142, EE 241.

EE 366. Solid State & Semicond Thry. 3 Credits.

EE 371. Estimation Theory. 3 Credits.

EE 373. Adv Topics in Communications. 3 Credits.
Advanced topics of current interest in communication systems. Topics may include channel coding/decoding, software radio, ad-hoc networks, wireless systems, etc. Prerequisite: EE 273 or Instructor permission.

EE 391. Master's Thesis Research. 1-18 Credits.
EE 392. Master's Project. 1-3 Credits.
Master’s Project.
Courses

EMGT 201. Engineering Project Management. 3 Credits.
Principles of project management on designing, building/ manufacturing engineering facilities, processes, products and structures; metrics for managing quality, schedule, and financial performance of projects; services and product procurement; project financial management; legal and insurance aspects. Prerequisites: Minimum Senior standing in Engineering.

EMGT 391. Master’s Thesis Research. 1-18 Credits.

EMGT 392. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.

EMGT 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

ENGLISH (ENGS)

Courses

ENGS 201. Sem Engl Lang or Critical Thry. 3 Credits.
Recent topics: "Origins and Development of the English Language;" "Re-disciplining the History of Literature and the Literature of History." Prerequisites: ENGS 100; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for graduate students.

ENGS 202. Sem Engl Lang or Critical Thry. 3 Credits.
Recent topics: "Origins and Development of the English Language;" "Re-disciplining the History of Literature and the Literature of History;" "Women’s Texts." Prerequisites: ENGS 100; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for graduate students.

ENGS 211. Seminar in Writing. 3 Credits.
Recent topics: "Writing the New Yorker;" "Writing Vermont Life;" "Editing and Publishing. Prerequisites: ENGS 100; ENGS 050 or ENGS 051 or ENGS 053; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for Graduate students.

ENGS 212. Seminar in Writing. 3 Credits.
Recent topics: "Writing the New Yorker;" "Writing Vermont Life;" "Editing and Publishing. Prerequisites: ENGS 100; ENGS 050 or ENGS 051 or ENGS 053; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for Graduate students.

ENGS 221. Seminar in Literature to 1800. 3 Credits.
Recent topics: "Women in 17th Century English Poetry;" "Dante and the Experience of Reading;" "Orality and Textuality in Middle English Literature." Prerequisites: ENGS 100; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for graduate students.
ENGS 222. Seminar in Literature to 1800. 3 Credits.
Recent topics: "Women in 17th Century English Poetry;" "Dante and the Experience of Reading;" "Orality and Textuality in Middle English Literature." Prerequisites: ENGS 100; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for graduate students.

ENGS 241. Seminar in 19th Century Lit. 3 Credits.
Recent topics: "Dickens;" "Reader, I Married Him: The Brontes;" "Love, Marriage, and Literary Criticism: Jane Austen;" "Reading Serially: The Victorian Novel;" "Invisible Man and 19th Century American Literature;" "The Gothic." Prerequisites: ENGS 100; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, ENGS 027 and ENGS 028; Instructor permission for graduate students.

ENGS 242. Seminar in 19th Century Lit. 3 Credits.
Recent topics: "Dickens;" "Reader, I Married Him: The Brontes;" "Love, Marriage, and Literary Criticism: Jane Austen;" "Reading Serially: The Victorian Novel;" "Invisible Man and 19th Century American Literature;" "The Gothic." Prerequisites: ENGS 100; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for graduate students.

ENGS 251. Seminar in 20th Century Lit. 3 Credits.
Recent topics: "The Beat Generation;" "Literature and Society in Modern Ireland;" "Dostoevsky's Influence on 20th Century American Literature." Prerequisites: ENGS 100; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for graduate students.

ENGS 252. Seminar in 20th Century Lit. 3 Credits.
Recent topics: "The Beat Generation;" "Literature and Society in Modern Ireland;" "Dostoevsky's Influence on 20th Century American Literature." Prerequisites: ENGS 100; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for graduate students.

ENGS 281. Sem Lit Themes,Genres,Folklore. 3 Credits.
Recent topics: "Spiritual Journeys;" "Murder, He Said: Detective Fiction;" "Chekhov to Cheever: The Short Story." Prerequisites: ENGS 100; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for graduate students.

ENGS 282. Sem Lit Themes,Genres,Folklore. 3 Credits.
Recent topics: "Spiritual Journeys;" "Murder, He Said: Detective Fiction;" "Chekhov to Cheever: The Short Story." Prerequisites: ENGS 100; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for graduate students.

ENGS 289. Sem Prospective Tchrs of Engl. 3 Credits.
Approaches to teaching composition, literature, and the English language in secondary school. Prerequisites: ENGS 100; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for graduate students.

ENGS 295. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Prerequisites: ENGS 100; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for graduate students.

ENGS 296. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Prerequisites: ENGS 100; and one of the following pairs of courses: ENGS 021 and ENGS 022, ENGS 023 and ENGS 024, or ENGS 027 and ENGS 028; Instructor permission for graduate students.

ENGS 320. Seminar:Major Author. 3 Credits.
In-depth study of the works, critical reception, and context of an author writing in English. Representative topics: Chaucer; Shakespeare; Milton; Austen; Dickinson; Morrison.

ENGS 330. Seminar:Literary Period. 3 Credits.
Advanced survey of authors, themes, genres, and/or cultural context in a British or American literary period. Representative topics: British Renaissance; Restoration and Eighteenth Century; Victorian; American Renaissance.

ENGS 340. Studies in Rhetoric & Comp. 3 Credits.
Introduction to current issues in the field. Representative topics: Rhetorical theory; gender, class, and composing: writing across the curriculum; collaborative learning, literature and composition.

ENGS 345. Practicum in Teaching Writing. 3 Credits.
Introduces new graduate teaching assistants in English to best practices in teaching college composition and provides support for their first semester teaching ENGS 001. Prerequisites: Admission to English Graduate program; appointment to a Graduate teaching assistantship; permission of Instructor or English department Graduate advisor.

ENGS 350. Surv of Lit Theory & Criticism. 3 Credits.
Theory and Criticism.

ENGS 360. Seminar:Special Topics. 3 Credits.
Topic varies, based on faculty research. Representative topics: orality and literacy in medieval literature; feminist theory; anthropological approaches to literature; narrative theory and Victorian novels.

ENGS 370. Principles of Literary Rsch. 3 Credits.
Methods of literary study, research, and scholarship, including bibliographic, manuscript, and archival work.

ENGS 391. Master's Thesis Research. 1-6 Credits.

ENGS 392. Seminar Paper Review. 0 Credits.

ENGS 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

ENGS 397. Special Readings & Research. 1-6 Credits.
Directed individual study of areas not appropriately covered by existing courses. Permission of Graduate Director.
ENGS 398. Teaching Practicum Continued. 3 Credits.
Continued mentoring and professional development for Graduate Teaching Assistants who have completed ENGS 345. May be repeated once for credit. Prerequisite: ENGS 345; admission to English Graduate program; appointment to a Graduate teaching assistantship.

ENVIRONMENTAL STUDIES (ENVS)

Courses

ENVS 212. SU: Advanced Agroecology. 0-4 Credits.
An in-depth overview of research and application in the field of agroecology, including ecological and social dynamics in agricultural landscapes in Vermont and abroad. Pre/co-requisites: PSS 021 and one semester of ecology at the 100-level or above or Instructor permission. Cross-listed with: PSS 212.

ENVS 238. Ecological Landscape Design. 4 Credits.
Studio course synthesizing work from fields of landscape ecology and landscape design, exploring ecological design alternatives at multiple scales, and developing multifunctional landscape solutions. Pre/co-requisites: Minimum Junior standing, PSS 137 or one course in ecology plus one course in design or drawing. Cross-listed with: CDAE 238, PSS 238, NR 238.

ENVS 267. Environmental History Seminar. 3 Credits.
Advanced reading and research on the role and influence of nature on human history and how people and cultures have influenced the natural world. Prerequisites: ENVS 151; six credits in History. Cross-listed with: HST 267.

ENVS 291. Internship. 1-18 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion. Prerequisite: ENVS 002; Junior standing.

ENVS 292. Env Conflict Resolution. 3 Credits.
Explores the causes of conflicts involving environmental concerns and the role of environment as a factor in conflict development and mediation. Prerequisites: ENVS 002; Junior standing.

ENVS 293. Environmental Law. 3 Credits.
Principles of environmental law, including legal research methods, threshold issues, case law, trial procedure, and international comparisons in aspects of air, land, and water law. Prerequisites: ENVS 142 or NR 153; Junior standing.

ENVS 294. Environmental Education. 3 Credits.
Philosophy, concepts, and strategies of environmental education, emphasizing integration of environmental concerns into formal and nonformal educational programs for youth and adults. Prerequisite: Junior standing.

ENVS 295. Advanced Special Topics. 1-18 Credits.
Advanced courses of current areas of interest which may vary each semester. Topics have included environmental health, energy, regional planning, international studies, literature, ethics, and natural area management. Prerequisite: Junior standing.

FOOD SYSTEMS (FS)

Courses

FS 321. Econ of Sustainable Food Syst. 3 Credits.
Utilizes common economic tools, ideas and application to analyze issues concerning the sustainability of food systems, using a combination of readings, lectures and discussions. Prerequisite: Graduate standing. Cross-listed with: CDAE 321.

FS 335. Qualitative Research Methods. 3 Credits.
Provides an overview of qualitative research methods and an opportunity to apply such research methods for topics focusing on food systems and health. Prerequisite: Graduate Student standing. Cross-listed with: CDAE 335.

FS 340. Food Systems, Science & Policy. 3 Credits.
This course examines key questions being asked about our contemporary food system by examining natural and life sciences scholarship and the applications for public policy.

FS 345. Food Systems, Soc & Policy. 3 Credits.
This course examines key questions being asked about our contemporary food systems by examining social science and humanities scholarship and the applications for public policy.

FS 350. Food Systems Application Sem. 3 Credits.
This problem-based course uses current issues in Vermont's food system to explore systems complexity, emergence and interdependence. Pre/co-requisites: FS 340, FS 345.

FS 351. Professional Development Sem.. 1 Credit.
This seminar will prepare students to successfully navigate the graduate school experience.

FS 352. Research Design Seminar. 1 Credit.
The Research Design Seminar will develop the students' abilities to conduct academic research and formulate a relevant study design with an emphasis on mixed-methods.

FS 355. Ethics and the Food System. 3 Credits.
Focus on certain food ethics issues. The in-depth consideration of these issues will build philosophical skills as well as knowledge as to the interdependence and interconnection of the food system. Prerequisite: Instructor permission only.

FS 360. Dissertation Writing Seminar. 1 Credit.
This seminar will prepare students to successfully navigate the dissertation process. The course serves as a PhD competency.

FS 390. Internship. 1-18 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion.

FS 391. Master's Thesis Research. 1-18 Credits.
FS 392. Master's Project Research. 1-4 Credits.
Food Systems Professional Track students are required to complete a final project. Students will design a project that must be approved by the Project Faculty Committee.
FS 393. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.

FS 395. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

FS 396. Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

FS 490. Internship. 1-18 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion.

FS 491. Doctoral Dissertation Research. 1-12 Credits.
Research requirement (up to 30 research credits) for Food Systems PhD students.

FS 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

FORESTRY (FOR)

Courses

FOR 222. Advanced Silviculture. 0 or 3 Credits.
Scientific basis and contemporary status of silviculture practices. Prerequisite: FOR 223. Alternate years, 2000-01.

FOR 225. Tree Structure & Function. 3 Credits.
Basic anatomy and physiology of trees and other woody plants, emphasizing their unique structural and physiological adaptations to the environment. Prerequisite: Instructor permission.

FOR 228. Ecosystems Ecology. 3 Credits.
Examination of the structure and function of terrestrial ecosystems focusing on carbon and nutrient cycles. Laboratory sessions involve spatial modeling and data analysis. Prerequisites: NR 103, BCOR 102, PSS 161, or Graduate student standing. Cross-listed with: NR 228.

FOR 235. Forest Ecosystem Health. 4 Credits.
Forest health is a broadly defined, emerging discipline in forestry and ecology that examines the agents and processes affecting tree and forest decline. Prerequisites: NR 103, BIOL 001 and BIOL 002 or PBO 004, FOR 021.

FOR 272. Sustain Mgmt Forest Ecosys. 0 or 4 Credits.
Principles of long-term planning and plan implementation in support of sustainable forestry; Adaptive management; biodiversity and ecosystem health; major management planning project. Prerequisites: FOR 122, NR 205, FOR 223.

FOR 385. Selected Problems in Forestry. 1-6 Credits.
Advanced readings, or a special investigation dealing with a topic beyond the scope of existing formal courses.

FOR 390. Internship. 1-18 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion.

FOR 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

FOUNDATIONS (EDFS)

Courses

EDFS 200. Contemporary Issues. 3 Credits.
Designed so that its content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Prerequisite: Twelve hours in Education and related areas.

EDFS 203. Soc, Hst & Phil Found of Educ. 3 Credits.
Critical examination of central educational/social issues and values with special emphasis on the struggle for justice and equality. Themes include schooling and social class, race, and gender; the purposes of education; and the responsibilities of teachers. Prerequisite: Enrollment in teacher licensing program.

EDFS 204. Sem in Educational History. 3 Credits.
Selected topics in history of education. Education in democratic and authoritarian social orders. Topics: education of women, black heritage, American higher education in transition. Prerequisite: Twelve hours in Education and related areas or Instructor permission.

EDFS 205. History of American Education. 3 Credits.
Educational principals and practices in the U.S. as they relate to the main currents of social history. Key ideas of historic and contemporary significance. Prerequisite: Twelve hours in Education and related areas or Instructor permission.

EDFS 206. D2:Comparative Education. 3 Credits.
Examines educational challenges confronting countries around the world. Explores issues related to sustainable development, diversity, citizenship, and justice in formal and nonformal educational contexts. Prerequisite: Twelve hours in Education and related areas.

EDFS 207. Traditionalist Education. 3 Credits.
Perspectives on schooling at all levels directed at preserving and extending a heritage (cultural, racial, ethnic, religious, regional, national), or promoting individual freedom, character, or academic excellence. Selected topics, Instructor choice. Prerequisite: Junior standing. Also for Graduate credit.

EDFS 209. Intro to Research Methods. 3 Credits.
Seminars and research projects. Methods of historical, descriptive, experimental, quasi-experimental, field studies, and survey research.

EDFS 255. School as Social Institution. 3 Credits.
Examination of the school and related social institutions, focus on themes, including: social class, race, ethnicity, socialization, role of the family, social change. Prerequisite: Twelve hours of Education and related areas.

EDFS 295. Internship. 1-18 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion. Prerequisite: Permission of the Coordinator of Professional Laboratory Experiences.

EDFS 302. Philosophy of Education. 3 Credits.
Critical examination of key beliefs and values in current philosophies of helping, e.g. phenomenological, behavioral, holistic, as practiced in a variety of educational and social service institutions. Prerequisite: Twelve hours in Education and related areas.
EDFS 303. Ethics Helping Relationships. 3 Credits.
Clarification of ethical dimensions of professional rights and obligations for educators, counselors, administrators, other helping professionals. Examination of selected ethical controversies currently facing the helping professionals. Prerequisite: Twelve hours in education and related areas.

EDFS 304. Religion, Spirituality & Ed. 3 Credits.
A narrative approach to thinking about religion and spirituality and theoretical and practical implications for policy making, pedagogy, curriculum development, and educational leadership.

EDFS 309. Schol Pers Narr Writing:ED&SS. 3 Credits.
A workshop for educational writers of theses, dissertations, and scholarly articles. Students will be introduced to critical theory, postmodern, feminist, and narrativist conceptions of educational writing.

EDFS 314. Modes of Inquiry. 3 Credits.
A critical analysis of the various conceptual and methodological foundations of theory and practice in education and the human services. Prerequisite: Twelve hours in education and related areas.

EDFS 320. Technology, Schooling, Society. 3 Credits.
This course explores influences of technology on schooling and society. Using sociological, historical, and philosophical frameworks, participants examine equity, cultural diversity, student empowerment, and community.

EDFS 322. D1:Chall Multicult/Ed&Soc Inst. 3 Credits.
Critical analysis of social, historical, and philosophical dimensions of multiculturalism. Examination of identity, empowerment, and justice and their relationships to educational/social policies and practices. Prerequisite: Twelve hours in education and related areas.

EDFS 347. Qualitative Research Methods. 3 Credits.
Introduces students to qualitative methods as a research paradigm and develops skills in ethnographic techniques of field observation, interviewing, and data analysis. Out-of-class fieldwork required. Prerequisite: Master's or doctoral level standing or Instructor permission.

EDFS 348. Analyze & Write Qualitative Rsch. 3 Credits.
This course extends students’ knowledge of and experience with qualitative research analysis and writing. Students must come with data collected previous to the start of the course. Prerequisite: EDFS 347 or Instructor Permission.

EDFS 352. Aesthetic Ed & Social Justice. 3 Credits.
Exploration of art that deepens understanding of educational and social problems. Focus on artists who challenge dominant powers. Incorporates democratic perspectives on art and aesthetics. Prerequisite: Twelve hours in education and related areas.

EDFS 353. Program Evaluation & Assessment. 3 Credits.
Introduction to program evaluation concepts and methods in education; contemporary theory and practice in educational assessment and testing.

EDFS 354. Anth Persp on Ed & Soc Serv. 3 Credits.
Examination of formal and non-formal education as means to produce and alleviate cultural conflict. Incorporates an autobiographical approach to studying socio-cultural implications of schooling and social services. Emphasis on Third World situations. Prerequisite: Twelve hours in education and related areas.

EDFS 355. Appl Data Analysis for Dec Mkng. 3 Credits.
Students will learn to apply quantitative techniques, using commonly available tools, to organizational data so that they can make data-based policy decisions. Prerequisite: Graduate standing.

EDFS 369. Ethics in Ed & Soc Serv Admin. 3 Credits.
Critical examination of theories of ethical decision making. Implications for leadership in educational, social service settings. Ethical investigation utilizing research, scholarship, actual incidents, case studies, role playing. Prerequisite: Ed.D. students have priority.

EDFS 377. Seminar Educational Psychology. 3 Credits.
Personal values, attitudes, beliefs related to learning. Psychological research of the teaching-learning process. Research use in analysis of educational processes. Applications for educational settings. Prerequisite: Twelve hours in education and related areas.

EDFS 380. Professional Problems in Educ. 3 Credits.
Designed to cover selected educational problems in depth. The major emphasis will be on intensive and critical analysis of the literature and practice in a given area.

EDFS 391. Master's Thesis Research. 1-18 Credits.
Thesis topic must be approved by a faculty committee.

EDFS 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

EDFS 397. Problems in Education. 1-6 Credits.
Individual work on a research problem selected by the student in consultation with a staff member. Prerequisite: Twelve hours in education and related areas; endorsement by a sponsoring faculty member.

EDFS 455. Soc Process & Institutional Chg. 3 Credits.
Critical analysis of theory and research related to justice, caring, and change in education and other social institutions. Focus: ideology, diversity, and management of knowledge. Prerequisite: Doctoral level standing.

EDFS 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

FRENCH (FREN)

Courses

FREN 235. Medieval/Renaissance Topics. 3 Credits.
Study of literary and non-literary writings from Medieval and Renaissance France. Texts may deal with questions of otherness, religion, gender, and/or politics. Prerequisites: FREN 141 or FREN 142.

FREN 237. Early French Women Writers. 3 Credits.
Exploration of how women from the Middle Ages through the Revolution spoke of love, education, the place of women, the power of writing and more. Prerequisites: FREN 141 or FREN 142.
FREN 247. Power/Desire in Class Fr Drama. 3 Credits.
How dramatists like Corneille, Moliere and Racine used history, legend and satire to explore questions of tyranny, freedom, passion, generosity, hypocrisy, truthfulness, and more. Prerequisites: FREN 141 or FREN 142.

FREN 256. Enlightenment Society Reimagined. 3 Credits.
How did 18C writers use the representation of social hierarchy, gender relations, the exotic, etc., to (re-)define French culture on the eve of the Revolution? Prerequisites: FREN 141 or FREN 142.

FREN 265. Romanticism and Symbolism. 3 Credits.
Exploration of the idealist tradition in 19th century French poetry and novels. Authors may include Constant, Chateaubriand, Stael, Hugo, Flaubert, Baudelaire, Verlaine, Mallarme. Prerequisites: FREN 141 or FREN 142.

FREN 266. Rev & React in 19th C Narrative. 3 Credits.
Study of the representations of major social issues of the period, such as power, class, money, and women. Representative authors: Balzac, Flaubert, Sand, Stendhal, Zola. Prerequisites: FREN 141 or FREN 142.

FREN 269. La Belle Epoque. 3 Credits.
The aesthetic and moral dilemmas of the turn-of-the-century “decadent” period in French literature, focusing especially on the changing representation of the artist and intellectual. Prerequisites: FREN 141 or FREN 142.

FREN 270. Lyric Poetry: Harmony & Crisis. 3 Credits.
A consideration of the French lyric tradition. Authors may include the troubadours, Ronsard, Dubellay, Hugo, Baudelaire, Mallarme, Rimbaud, Valery, Roubaud. Prerequisites: FREN 141 or FREN 142.

FREN 275. 20-C Lit - Society and Writers. 3 Credits.
A study of twentieth-century French authors who shaped contemporary French culture by challenging traditional ethics and modes of thought. Representative authors include Beauvoir, Camus, and Sartre. Prerequisites: FREN 141 or FREN 142.

FREN 276. Topics in Modern French Lit. 3 Credits.
Selected topics dealing with poetry and/or narrative related either to an historical period or a literary movement. Prerequisites: FREN 141 or FREN 142.

FREN 280. Francophone Crossings. 3 Credits.
Study of works in French that demonstrate multiple cultural influences. Topics may include: exile writings, cultural/linguistic mixing, colonialism and independence movements, human rights, immigration. Prerequisites: FREN 141 or FREN 142.

FREN 285. Quebec Literature. 3 Credits.
A study of contemporary (1960-1985) major works of fiction, poetry, and drama. Authors studied include Anne Hebert, Michel Tremblay, Jacques Godbout, Gaston Miron. Prerequisites: Either FREN 141 or FREN 142, or both.

FREN 289. African Lit: French Express. 3 Credits.
Study of West African poetry, theatre, novel, and civilization as an expression of the Black experience in the language of the French colonizer. Prerequisites: FREN 141 or FREN 142.

FREN 292. Topics in French Culture. 3 Credits.
In-depth study of a major aspect of French culture. See Schedule of Courses for specific offering. Prerequisites: FREN 131 or FREN 132 or Instructor permission.

FREN 293. Quebec Culture. 3 Credits.
Sociocultural study of the Francophone culture of Canada. Prerequisite: FREN 141 or FREN 142.

FREN 294. Topics in French Cinema. 3 Credits.
A topical approach to the study of French cinema and cinematographic aesthetics, from the medium’s beginnings through contemporary films. Prerequisites: FREN 141 or FREN 142.

FREN 295. Advanced Special Topics. 1-18 Credits.
Advanced courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

FREN 296. Advanced Special Topics. 1-18 Credits.
Advanced courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

FREN 297. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion. Permission of Chair required.

FREN 298. Undergraduate Research. 1-18 Credits.
Undergraduate student work on individual or small team research projects under the supervision of a faculty member, for which credit is awarded. Offered at department discretion. Permission of Chair required.

GEOGRAPHY (GEOG)

Courses

GEOG 202. Research Methods. 3 Credits.
A systematic overview of the art and science of geographical inquiry. Examination of key research and methodological approaches in the discipline. Prerequisite: Minimum Junior standing.

GEOG 203. Contemp Geo Thought Context. 3 Credits.
A survey of paradigms and issues in contemporary geography. Attention paid to the social and historical contexts of geographic thought. Prerequisite: Minimum Junior standing.

GEOG 245. Adv Top: Human Env Interactions. 3 Credits.
Advanced offerings on various manifestations of social-environmental relationships. Possible topics include sustainable development, environmental justice, and urban ecology. Prerequisites: Vary with course content; Minimum Junior standing.

GEOG 246. Adv Top: Climate & Water Resource. 3 Credits.
Analysis of regional climatology, paleoclimatology, hydroclimatological hazards, or fluvial geomorphology. Topics include droughts, severe weather, climate change, floods and floodplain management, mountain and lowland rivers. Prerequisites: Vary with course content; minimum Junior standing.
GEOG 272. Adv Top: Space, Power, Identity. 3 Credits.
Advanced offerings on topics related to the spatial regulation and geographic construction of social identity, paying particular attention to race, gender, and sexuality. Prerequisites: Vary with course content; minimum Junior standing.

GEOG 273. Adv Top: Political Econ & Ecology. 3 Credits.
Advanced offerings in political ecology and political economy, particularly at global and regional scales. Possible topics include Third World economic restructurings, globalization, international environmental movements. Prerequisites: Vary with course content; minimum Junior standing.

GEOG 274. Adv Top: Critical Urban & Soc Geo. 3 Credits.
Advanced offerings in urban and critical social geography. Possible topics include social justice and the city, human rights, geographies of social control. Prerequisites: Vary with course content; minimum Junior standing.

GEOG 278. Adv Topic: GIS & Remote Sensing. 3 Credits.
Advanced offerings in GIS or remote sensing focusing on landscape interpretation for decision-making practices. Incorporation of applications from Vermont public and private sectors. Prerequisites: Vary with course content; minimum Junior standing.

GEOG 287. Spatial Analysis. 3 Credits.
Analysis of spatial pattern and interaction through quantitative models; introduction to measurement, sampling, and covariation in a spatial framework. Prerequisite: GEOG 184 or NR 143.

GEOG 295. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

GEOG 296. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

GEOG 297. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.

GEOG 298. Undergraduate Research. 1-18 Credits.
Undergraduate student work on individual or small team research projects under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.

GEOG 300. Graduate Tutorial. 3 Credits.
Readings and research on topics arranged individually by students with instructors; attendance in appropriate undergraduate courses may be required.

GEOG 391. Master's Thesis Research. 1-18 Credits.

GEOL 217. Vermont Field Geology. 4 Credits.
Field observations of rocks and surficial materials across northern Vermont are utilized to decipher the region's geologic history. Readings complement field work. Prerequisite: Graduate student standing.

GEOL 231. Petrology. 4 Credits.
The course covers the scope and methods of igneous, sedimentary and metamorphic petrology, and the geologic environments and processes relevant to the major rock types. Prerequisite: GEOL 110.

GEOL 233. Environmental Isotope Geochem. 3 Credits.
Course focuses on stable isotope geochemistry of low temperature processes occurring on and near the earth surface through lecture, laboratory, and seminar. Prerequisite: CHEM 031.

GEOL 234. Global Biogeochemical Cycles. 3 Credits.
Integrated perspective on biogeochemical cycles describing the transformation and movement of chemical substances in the natural environment, as seen on the global context. Prerequisite: CHEM 031.

GEOL 235. Geochemistry of Natural Waters. 3 Credits.
Basic concepts of chemical equilibria applied to natural waters, including thermodynamics, pH, oxidation-reduction, weathering, and solution equilibria. Prerequisite: Prerequisite: CHEM 032.

GEOL 240. Tectonics. 3 Credits.
Applications of igneous and metamorphic petrology to problems in tectonophysics, including petrochemistry of the earth's crust and upper mantle and the internal structure of orogenic belts. Prerequisites: GEOL 101, GEOL 110.

GEOL 246. X-ray Diffractometry. 3 Credits.
This course focuses on identification and characterization of materials using X-ray diffractometry. The course will include exercises using a modern powder diffractometer. Prerequisite: CHEM 032.

GEOL 260. Structural Geology. 0 or 4 Credits.
Examines processes and problems concerning the mechanical behavior of the Earth's crust and surface. Includes rock deformation stress, strain, and the interpretation of geological structures. Prerequisites: GEOL 101, GEOL 110.

GEOL 263. Geochronology. 3 Credits.
This course will survey the basic concepts of radioactive decay, mass spectrometry, and isotopic systems commonly used to quantify the timing of geologic events. Prerequisite: GEOL 110.

GEOL 265. Geomicrobiology. 3 Credits.
An introduction to microbial control of redox chemistry on Earth's surface, including field techniques and a detailed look at how microbes affect element cycling. Prerequisite: GEOL 135.

GEOL 266. Microstructures. 3 Credits.
This course will focus on deformation of rocks and minerals at the microscopic scale and the practical use of photographic analyses to unravel tectonic histories. Prerequisite: GEOL 260.

GEOL 273. Geology of the Appalachians. 3 Credits.
Origin of mountain belts; the Appalachian mountain system discussed in terms of tectonics and geologic processes active in modern continental margins. Prerequisites: GEOL 101, GEOL 110.
GEOL 295. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

GEOL 296. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

GEOL 302. Intro Graduate Studies Geology. 1 Credit.
For first year graduate students in Geology. Includes orientation to faculty, abstract and grant writing, comprehensive exams, talk preparation and scientific method in the Geosciences. Prerequisite: Graduate standing in Geology.

GEOL 335. Aqueous Environmental Geochem. 3 Credits.
This course focuses on the chemical equilibrium and kinetics principles governing water chemistry, including water interaction with the atmosphere, microbes and minerals. Prerequisite: Graduate standing.

GEOL 345. Critical Writing in Science. 3 Credits.
Learn how to write better papers, give exciting presentations, and do peer-reviews. Write and review abstracts, articles, and professional presentations. Refine public science communication techniques including radio interviews and pitching work to the media. Takes a hands-on approach to improving science communication. Prerequisite: Graduate standing in science, natural resources, or engineering.

GEOL 351. Surface Proc & Quaternary Geol. 1-3 Credits.
Discussion and critique of scientific literature pertaining to Earth surface history and processes. Critical examination of author’s methods, data, and assumptions. Student-led discussions. Specific focus changes yearly. Prerequisite: Graduate standing in science, natural resources or engineering.

GEOL 352. Environmental Geology Seminar. 1-3 Credits.
Geologic constraints on environmental problems including: groundwater flow, contaminant transport, slope stability, climate change, sedimentation, deforestation and earthquake hazards. Extensive readings and student-led discussions. Prerequisite: Graduate standing in science, natural resources, or engineering.

GEOL 355. Structural Anyl Deformed Rocks. 4 Credits.
Mechanisms of rock deformation; fracture phenomena and analysis; fault zone characteristics; fold generation analysis. Stress and strain interpretation of deformatonal features in rocks and minerals. Field work. Prerequisite: GEOL 260.

GEOL 360. Structural Deformed Rocks 4 Credits.
Selection of topics in analytical structural geology. Prerequisite: GEOL 260.

GEOL 371. Advanced Readings. 1-3 Credits.
Readings and research problems intended to contribute to the program of graduate students in areas of geology for which formal courses are not available. Prerequisite: Graduate standing in Geology.

GEOL 384. Teaching in the Geosciences. 1 Credit.
A review of the pedagogical underpinnings of introductory geology and its laboratory activities.

GEOL 385. Teaching in the Geosciences. 1 Credit.
A review of the pedagogical underpinnings of introductory geology and its laboratory activities.

GEOL 391. Master's Thesis Research. 1-9 Credits.

GERMAN (GERM)

Courses

GERM 201. Methods Research&Bibliography. 3 Credits.
Introduction to tools and methods of research, including major bibliographical sources, reference works, dictionaries, editions, and journals concerned with German literature, language, and folklore. Prerequisite: Two 100-level courses.

GERM 202. Expository Writing. 3 Credits.
Improvement of writing skills through work with authentic texts from different content areas (literature, media, science, business). Emphasis on stylistic development and sophisticated vocabulary-building. Prerequisite: Two 100-level courses.

GERM 213. History of the German Language. 3 Credits.
Historical and linguistic development of the German language from Indo-European to the present, emphasizing sound shifts, the 16th century, and the modern age. Prerequisite: GERM 155 or GERM 156; one other 100-level course.

GERM 214. Middle Ages. 3 Credits.
Analysis and discussion of several "Minnesang" poets (esp. Walther and Neidhart), the Nibelungenlied, the courtly epics Erec, Parzival, and Tristan, and the satirical epic Helmbrecht. Prerequisite: GERM 155 or GERM 156; one other 100-level course.

GERM 225. Goethe. 3 Credits.
Study of Goethe's accomplishments in poetry, drama, and the novel during major phases of his literary career: "Sturm und Drang," Classicism, and Romanticism. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.

GERM 226. Schiller. 3 Credits.
Major attention will be paid to Schiller's development as a dramatist (from Die Rauber to Wilhelm Tell) as well as to his contributions to German Classicism. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.

GERM 237. 19th-Century Prose. 3 Credits.
Literary and stylistic analysis of prose works by Tieck, Kleist, Stifter, Gotthelf, Droste-Hulshoff, Storm, Keller, and Hauptmann with emphasis on Romanticism, Poetic Realism, and Naturalism. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.

GERM 247. German Lit from 1890 to 1945. 3 Credits.
Naturalism, Symbolism, Expressionism and subsequent trends through readings of authors such as Hauptmann, Rilke, Kaiser, Kafka, Mann, and Brecht. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.
GRADUATE CATALOGUE 2019-20

GERM 248. Contemporary German Literature. 3 Credits.
Literary movements and their major representatives from 1945 to the present, including relevant sociopolitical, intellectual, and cultural aspects. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.

GERM 251. German Folklore. 3 Credits.
Verbal folklore genres (fairy tales, legends, folk songs, and proverbs) treated in their relation to literature, mass media, and popular culture. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.

GERM 263. German Romanticism. 3 Credits.
Study of major works by authors such as Friedrich Schlegel, Novalis, Brentano, Hoffmann, and Eichendorff in their literary, artistic, philosophical, and sociopolitical contexts. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.

GERM 271. Proverbs. 3 Credits.
Diachronic and synchronic survey of German proverbs, proverbial expressions, and wellerisms, emphasizing their use and function in literature, art, mass media, advertisements, and oral communication. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.

GERM 273. German Intellectual Movements. 3 Credits.
A survey of developments in art, music, philosophy, and social thought from the Enlightenment to 1945, with particular attention to their impact on German literature. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.

GERM 275. Fin-de-Siecle. 3 Credits.
Prevalent literary and intellectual movements at the turn of the 20th century in their historical, sociopolitical, and cultural contexts. Study of Nietzsche, Freud, Rilke, Hofmannsthal, Schnitzler, and Mann. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.

GERM 276. Brecht & the Modern Drama. 3 Credits.
Brecht’s revolutionary concept of “epic theatre” in theory and practice and its influence on subsequent dramatists, including Durrenmatt, Frisch, Handke, Hochhuth, Muller, and Weiss. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.

GERM 279. German Short Story after 1945. 3 Credits.
Aesthetic and thematic evolution of the short story and its relation to historical, political, and cultural developments from 1945 to the present. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.

GERM 281. Sem in Lit Genre, Period, Theme. 3 Credits.
Study of a literary genre, period, or theme through close readings of representative texts supplemented by lectures and reports on sociocultural context. May be repeated. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.

GERM 282. Sem on Particular Author. 3 Credits.
Study of author(s) through close readings of representative texts supplemented by lectures and reports on the works' socio-cultural context. May be repeated. Prerequisite: GERM 155 or GERM 156 and one other 100-level course.

GERM 295. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

GERM 296. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

GERM 391. Master's Thesis Research. 1-12 Credits.

GLOBAL AND REGIONAL STUDIES (GRS)

Courses

GRS 297. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion. Prerequisites: Minimum Junior standing and permission of Program Director.

GRS 298. Undergraduate Research. 1-18 Credits.
Undergraduate student work on individual or small team research projects under the supervision of a faculty member, for which credit is awarded. Offered at department discretion. Prerequisites: Minimum Junior standing and permission of Instructor.

GRADUATE (GRAD)

Courses

GRAD 301. Sem College Tchg. 1-12 Credits.

GRAD 395. Advanced Special Topics. 0-3 Credits.

GRAD 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

GRAD 901. Continuous Reg Less Half. 0.25-4 Credits.

GRAD 902. Continuous Reg Half Time. 5-8 Credits.

GRAD 903. Continuous Reg Full Time. 9 Credits.

GRADUATE MEDICAL (GRMD)

Courses

GRMD 353. Medical Fdns of Medicine. 3 Credits.
Fundamental vocabulary, concepts, and methods of molecular genetics, cell physiology, biochemistry and metabolism including cell-cell and cell-environment communication, cell proliferation and cell death. Pre/co-requisite: Graduate standing; permission of the Instructor; six credits coursework, plus two credits lab in Biology, general chemistry, organic chemistry and Physics.

GRMD 354. Medical Human Struc & Finction. 4-8 Credits.
Combination of gross anatomy, histology, embryology, physiology and medical imagine to present an integrated overview of the human body. Pre/co-requisites: Graduate standing; Instructor permission; six credits coursework, plus two credits lab in Biology, general chemistry, organic chemistry and Physics; graduate coursework in Cell Biology or Biochemistry.
GRMD 355. Medical Attacks & Defenses. 4 Credits.
Principles of hematology, immunology, microbiology, toxicology, pathology, pharmacology, and neoplasia as a foundation to pathophysiology and therapeutics. Pre/co-requisite: Graduate standing; Instructor permission; six credits coursework plus two credits lab in Biology, general chemistry, organic chemistry and Physics; graduate coursework in Cell Biology or Biochemistry and Anatomy & Physiology.

GRMD 356. Medical Nutr, Metab, & GI Syst. 5 Credits.
Organizes studies in nutrition, organ systems metabolism and the gastrointestinal and endocrine systems through integrated lessons in cell biology, biochemistry, normal and pathologic anatomy, pharmacology, physiology, pathophysiology and microbiology. Pre/co-requisite: Graduate standing; permission of the Instructor; six credits coursework, plus two credits lab in Biology, Anatomy & Physiology, and an introduction to immunology, microbiology, toxicology, pathology and pharmacology.

GRMD 357. Medical Neural Science. 6 Credits.
Organize study of the human nervous and behavioral system through lessons that integrate cell metabolism, endocrinology, normal and pathologic anatomy, pharmacology, physiology, pathophysiology and psychopathology. Pre/co-requisite: Graduate standing; permission of the Instructor; six credits coursework plus two credits lab in Biology, general chemistry, organic chemistry and Physics; Graduate coursework in Cell Biology or Biochemistry, human anatomy & physiology, and an introduction to immunology, microbiology, toxicology, pathology and pharmacology.

GRMD 358. Medical Connections. 1 Credit.
Introduction to musculoskeletal and integumentary systems that integrates cell metabolism, endocrinology, normal and pathologic anatomy, physiology and pathophysiology, and pharmacology. Pre/co-requisite: Graduate standing; Instructor permission; six credits coursework plus two credits lab in biology, general chemistry, organic chemistry and Physics; graduate coursework in cell biology or biochemistry, human anatomy and physiology, and an introduction to immunology, microbiology, toxicology, pathology, and pharmacology.

GRMD 359. Medical Cardio,Resp, Renal Syst. 6 Credits.
Organizes studies in the cardiovascular, respiratory and renal system through lessons that integrate cell metabolism, endocrinology, normal and pathologic anatomy, pharmacology, physiology and pathophysiology. Pre/co-requisite: graduate standing; permission of the Instructor; six credits coursework plus two credits lab in biology or biochemistry, human anatomy and physiology, and an introduction to immunology, microbiology, toxicology, pathology and pharmacology.

GRMD 360. Medical Generations. 5 Credits.
Organizes studies in reproduction, development and aging through lessons that integrate behavioral development, cell and molecular biology, endocrinology, normal and pathologic anatomy, pharmacology, physiology and pathophysiology. Pre/co-requisite: Graduate standing; permission of the Instructor; six credits coursework plus two credits lab in biology, general chemistry, organic chemistry and Physics; graduate coursework in cell biology or biochemistry, human anatomy and physiology, and an introduction to immunology, microbiology, toxicology, pathology and pharmacology.

GRADUATE NURSING (GRNS)

Courses

GRNS 300. Professional Nursing Issues. 2 Credits.
Issues affecting nursing practice provide framework for examination of and socialization into professional nursing. The historical, legal, ethical, cultural, structural, and economic aspects of nursing practice will be explored. Prerequisite: Admission to DEPN program. Co-requisites: GRNS 301, GRNS 302, GRNS 303. Pre/co-requisite: GRNS 313.

GRNS 301. Pharmacology. 3 Credits.
Pharmacology and pharmacoatherapeutics will be applied to nursing practice with a focus on pharmacodynamics, pharmacokinetics, indications, adverse effect, drug interactions, safe administration and patient education. Prerequisite: Admission to DEPN program. Co-requisites: GRNS 300, GRNS 302, GRNS 303. Pre/co-requisite: GRNS 313.

GRNS 302. Sci of Nsg: Adults & Elders I. 3 Credits.
Identification and treatment of human responses to pathophysiological problems in adults with acute, chronic, or terminal conditions, with principles of general acute nursing practice emphasized. Prerequisite: Admission to DEPN program. Co-requisites: GRNS 300, GRNS 301, GRNS 303. Pre/co-requisite: GRNS 313.

GRNS 303. Practicum: Adults & Elders I. 4 Credits.
An initial experience in the nursing lab will be followed with a supervised clinical nursing practicum of adults with acute, chronic, or terminal conditions. Prerequisite: Admission to the DEPN program. Co-requisites: GRNS 300, GRNS 301, GRNS 302. Pre/co-requisites: GRNS 313.

GRNS 304. Practicum: Adults & Elders II. 1.25 Credit.
80 hour supervised clinical nursing practicum provides an immersion experience in the medical/surgical acute care setting. Prerequisites: GRNS 300, GRNS 301, GRNS 302, GRNS 303, GRNS 313.

GRNS 305. Practicum: Cmplx Nsg Care. 2.5 Credits.
Precepted clinical practice in adult acute care. Students will focus on an area in which more depth is desired. Prerequisite: GRNS 304. Co-requisites: GRNS 306, GRNS 308, GRNS 309, GRNS 310, GRNS 312.
GRNS 306. Sci of Nsg: Mental Health. 3 Credits.

GRNS 307. Practicum: Mental Health. 1.25 Credit.
Faculty guide students in clinical settings to maximize exposure to all aspects of the nursing process with adults having selected psychiatric/mental health problems. Prerequisite: GRNS 305. Pre/Co-requisite: GRNS 306.

GRNS 308. Sci of Nsg: Women & Newborns. 2 Credits.
Focus on healthy maternal-newborn care, and promotion of wellness and family integrity during transition within a family-centered framework. Prerequisite: GRNS 304. Co-requisites: GRNS 305, GRNS 306, GRNS 309, GRNS 310, GRNS 312.

Attention is focused on provision of nursing care to the expectant, laboring, or post-partum mother and to the newborn infant. Prerequisite: GRNS 304. Pre/Co-requisite: GRNS 308.

GRNS 310. Science of Nursing: Children. 3 Credits.
Identification and treatment of human responses to pathophysiological problems in children with acute, chronic, or terminal conditions, with principles of acute nursing care for hospitalized children emphasized. Prerequisites: GRNS 304, GRNS 305, GRNS 306, GRNS 309, GRNS 310, GRNS 312.

GRNS 311. Practicum: Children. 1.25 Credit.
Faculty guide students in clinical settings to maximize exposure to all aspects of the nursing process with children having selected pathophysiological problems. Prerequisite: GRNS 310. Pre/co-requisites: GRNS 307, GRNS 314, GRNS 315.

GRNS 312. Sci of Nsg: Adults & Elders II. 2 Credits.

GRNS 313. Pathophysiology. 3 Credits.
Provides a comprehensive foundation in pathophysiology. Examines the phenomena that result in dysfunction in human physiologic response within a holistic context across the lifespan. Prerequisites: ANPS 019, ANPS 020 or equivalent, MMG 065 or BMT 054 or equivalent, NFS 043 or equivalent. Co-requisites: GRNS 300, GRNS 301, GRNS 302, GRNS 303.

GRNS 314. Public Health Nursing. 2 Credits.
Emphasis on the epidemiological and biostatistical indicators of population health, methods of community health analysis, structure and function of federal, state and local health organizations. Prerequisites: GRNS 310, GRNS 311, GRNS 312. Co-requisite: GRNS 315.

GRNS 315. Practicum: Public Health Nurs. 2 Credits.
Statewide population-focused public health nursing experience involving needs assessment, program development, case management, health promotion, disease prevention, and protection strategies, with opportunities for interdisciplinary collaboration. Prerequisites: GRNS 311, GRNS 312. Co-requisite: GRNS 314.

GRNS 321. Professional Role Development. 3 Credits.
Examination of role development in advanced generalist and advanced nursing practice; including the development of competencies, licensing, and other specialized roles in nursing.

GRNS 322. Org, Deliv & Finance Hlth Care. 3 Credits.
Structure, organization, financing, and delivery of health care through complex systems in the United States. Focus on economic, social, ethical, political, and global structures. Prerequisite: Registered nurse licensure or matriculated graduate nursing student.

GRNS 323. Methods Evid-Based Practice. 3 Credits.
This course prepares students for translation of research into clinical practice through the development of advanced foundational competencies of inquiry, critique, and formulation of evidence-based solutions. Prerequisite: Graduate standing.

GRNS 324. Theoretical Foundation Nsg Sci. 3 Credits.
Exploration of philosophy of science, theory, and development of nursing knowledge. Nursing and non-nursing philosophies and theories relevant to advanced nursing practice will be discussed. Prerequisites: Graduate standing or by faculty permission.

GRNS 325. Genetics for Clinicians. 3 Credits.
This course provides an overview of contemporary human genetics and genomics with application to clinical practice. Prerequisite: Graduate standing. Cross-listed with: PATH 325.

GRNS 326. Hlth Care Eth,Policy,Politics. 3 Credits.
Examination of the processes of policy analysis and development with focus on advocacy. Prerequisite: Registered nurse licensure or matriculated graduate nursing student.

GRNS 327. Adv Topics in Hlth Informatics. 3 Credits.
This course provides an overview of informatics, the transformation of data into information, knowledge, decisions and actions to improve outcomes. This course offers the student an opportunity to study advanced topics in health informatics. Pre/Co-requisites: GRNS 322, GRNS 400.

GRNS 328. Quality in Healthcare. 3 Credits.
Introduces students to the principles and practices of health care quality and quality improvement. Principles in the design and management of continual improvement activities will be presented and applied. Prerequisite: Graduate standing. Cross-listed with: CTS 302.

GRNS 335. Adv Pathophysiology. 3 Credits.
In-depth examination of the biological and physical manifestations of disease as they correlate with pathophysiology to guide clinical decision making of the APRN and CNL. Prerequisites: RN license or completion of DEPN. Pre/Co-requisite: GRNS 404.
GRNS 336. Adv Pharmacology CNL. 2 Credits.
This course will provide an in-depth examination of the pharmacotherapeutics and pharmacodynamics of selected drugs used to manage common health conditions across the lifespan. This course is the first of a two-course sequence in pharmacotherapeutics for clinical nurse leaders. Prerequisite: Instructor permission. Cross-listed with: GRNS 335.

GRNS 337. Adv Neuropharmacology CNL. 2 Credits.
An in-depth examination of the pharmacokinetics and pharmacodynamics of drugs used to treat individuals with acute and chronic pain, neurologic, and psychiatric disorders across the lifespan. This course is part of a two-course sequence for clinical nurse leaders. Prerequisites: GRNS 335, GRNS 336.

GRNS 338. Adv Hlth Assessment CNL. 2 Credits.
History taking and advanced physical examination of children and adults. Symptom analysis will provide direction for focused examinations. Prerequisite: Undergraduate physical assessment course; Pre/Co-requisite: GRNS 335.

GRNS 339. CNL Project & Seminar I. 1 Credit.
This seminar provides structure for the development of the Clinical Nurse Leader Project. Prerequisites: GRNS 321, GRNS 322, GRNS 323, GRNS 335, GRNS 336, GRNS 338. Pre/Co-requisites: GRNS 322, GRNS 337.

GRNS 340. Clinical Practicum for the CNL. 1.5 Credit.
This seminar provides an overview of the role of the Clinical Nurse Leader as a change agent at the point of care. Prerequisites: GRNS 321, GRNS 323, GRNS 324, GRNS 336, GRNS 337, GRNS 338, GRNS 339. Pre/Co-requisite: GRNS 324.

GRNS 341. CNL Project & Seminar II. 2 Credits.
This seminar supports student learning during the clinical immersion practicum. Prerequisites: GRNS 321, GRNS 323, GRNS 324, GRNS 336, GRNS 337, GRNS 338. Pre/Co-requisite: GRNS 334.

GRNS 342. Clinical Immersion Practicum. 2.5 Credits.
This synthesis practicum experience is designed to strengthen student’s point of care leadership. Prerequisites: GRNS 321, GRNS 322, GRNS 323, GRNS 324, GRNS 335, GRNS 336, GRNS 337, and GRNS 338. Pre/Co-requisites: GRNS 340, GRNS 341.

GRNS 380. Intrdsc Sem Neurodev Disabil I. 3 Credits.
Seminar exploring interdisciplinary process, collaborative teaching, cultural competence and family-centered care as they relate to children and families affected by neurodevelopmental and related disabilities. Prerequisite: Instructor permission. Cross-listed with: CSD 311.

GRNS 381. Intrdsc Sem Neurodev Disabil 2. 3 Credits.
Seminar exploring interdisciplinary process, collaborative teaching, cultural competence and family-centered care as they relate to children and families affected by neurodevelopmental and related disabilities. Prerequisite: Instructor permission. Cross-listed with: CSD 312.

GRNS 390. Master’s Project. 1-3 Credits.
Self-designed clinical paper or innovative production pertinent to advanced nursing practice. Prerequisites: GRNS 321, GRNS 322, GRNS 323, GRNS 324; approval of project committee. Pre/Co-requisite: Comprehensive Exam (completed prior to project presentation).

GRNS 391. Master’s Thesis Research. 1-6 Credits.
Prerequisites: GRNS 321, GRNS 322, GRNS 323, GRNS 324; approval of thesis committee. Pre/Co-requisite: Comprehensive Exam (completed prior to thesis defense).

GRNS 395. Independent Study. 1-6 Credits.
Individual work in graduate nursing with a base of theory, research, or advanced practice. Topics of interest to graduate nursing which are based on theory, research or advanced practice. Course content will deal with topics beyond the scope of existing formal courses or thesis research. Prerequisite: Instructor permission.

GRNS 400. Population-Based Hlth for APN. 3 Credits.
The role of advanced practitioners in the care of populations with an emphasis on the U.S. health care system. Prerequisite: Graduate standing.

GRNS 401. Leadership of HlthCare Systems. 3 Credits.
Planning and implementation of programs, projects or systems of health care delivery. Prerequisite: GRNS 322.

GRNS 404. Adv Pharmacology APRN. 3 Credits.
In-depth examination of the pharmacokinetics and pharmacodynamics of select drugs for acute and chronic health conditions. Ethical and legal standards of prescriptive authority explored. Pre/Co-requisite: GRNS 335.

GRNS 405. Adv Neuropsychopharmacology. 3 Credits.
In-depth examination of the pharmacokinetics and pharmacodynamics of drugs used to treat individuals with acute and chronic pain, neurologic and psychiatric illnesses across the lifespan. Prerequisites: GRNS 335, GRNS 404.

GRNS 406. Adv Hlth Assessment. 3 Credits.
Development of advanced knowledge and skills in systematic collection, organization, interpretation, and communication of data necessary for formulation of nursing and medical diagnoses. Lab fee required. Prerequisite: Basic physical examination course. Pre/co-requisite: GRNS 335.

GRNS 407. Opt Hlth & Mgt Com Hlth Issues. 2 Credits.
Assessment and optimization of health of adolescents and adults. Prerequisites: GRNS 335, GRNS 404, GRNS 406. Co-requisites: GRNS 405, GRNS 408.
GRNS 408. Pract: Opt Hlth & Mgt Com Hlt Iss. 1 Credit.

GRNS 409. Pediatric Concepts APRN. 3 Credits.
APN care to children and their families with an emphasis on the developmental, psychosocial, cultural, ethical, and spiritual needs of children and families. Pre/Co-requisites: GRNS 405, GRNS 407, GRNS 408.

GRNS 410. Primary Care Mgmt Child & Adol. 3 Credits.
Application in a clinical setting(s): assessment, evaluation, diagnostic reasoning, and management of common episodic and chronic health conditions in provision of primary care to children and adolescents. Prerequisites: GRNS 405, GRNS 407, GRNS 408, GRNS 409. Co-requisite: GRNS 411.

GRNS 411. Pract: Child & Adolescents. 1 Credit.
Application in a clinical setting(s): assessment, evaluation, diagnostic reasoning, and management of common episodic and chronic health conditions in provision of primary care to children and adolescents. Prerequisites: GRNS 405, GRNS 407, GRNS 408, GRNS 409. Co-requisite: GRNS 410.

GRNS 412. Adv Nsg Prac of Older Adult. 3 Credits.

GRNS 413. Practicum: Nursing Older Adult. 0.5 Credits.
Practice assessment and care coordination skills in a practicum working with older adults in a variety of settings. Prerequisites: GRNS 407, GRNS 408. Co-requisite: GRNS 412.

GRNS 414. Prim Care Acute & Comm Hlt Cond. 3 Credits.
Focus will be on the assessment, evaluation and management of common episodic conditions in primary care FNP & AGNP. Prerequisites: GRNS 407, GRNS 408, GRNS 417, GRNS 418. Co-requisite: GRNS 415.

GRNS 415. Pract: Acute & Common Cond AGNP. 1 Credit.
Practicum experience for assessment, evaluation and management of common episodic conditions in primary care AGNP. Prerequisites: GRNS 407, GRNS 408, GRNS 417, GRNS 418. Co-requisite: GRNS 414.

GRNS 416. Pract: Acute & Common Cond FNP. 1 Credit.

GRNS 417. Mgt Women Gendered Hlt Care. 2.25 Credits.
Advanced nursing practice focusing on the assessment, diagnosis, management, and evaluation of acute and chronic health conditions commonly encountered in the area of women’s health. Prerequisites: GRNS 407, GRNS 408, GRNS 410. Co-requisite: GRNS 418.

GRNS 418. Pract: Women Gender Specialty. 0.75 Credits.

GRNS 419. Prim Care Chron/Complx Hlt Cond. 3 Credits.
Focuses on the refinement diagnostic and therapeutic interventions in the provision of primary health care to individuals and families with chronic and complex health conditions. Prerequisites: GRNS 414, GRNS 415 or GRNS 416 and Comprehensive Exam. Co-requisites: GRNS 420 or GRNS 421.

GRNS 420. Pract: Chronic & Complex Cond AGNP. 2.5 Credits.
Practicum focuses on the refinement diagnostic and therapeutic interventions in the provision of primary health care to individuals and families with chronic and complex health conditions. Prerequisites: GRNS 412, GRNS 414, GRNS 415. Co-requisite: GRNS 419.

GRNS 421. Pract: Chronic & Complex Cond FNP. 2.5 Credits.
Focuses on the refinement diagnostic and therapeutic interventions in the provision of primary health care to individuals and families with chronic and complex health conditions. Practicum. Prerequisites: GRNS 414, GRNS 416. Co-requisite: GRNS 419.

GRNS 422. DNP Project & Seminar I. 1 Credit.
This seminar provides structure for the development of the Doctor of Nursing Practice Project.

GRNS 423. DNP Project Practicum I. 1 Credit.
This practicum guides project initiation including summary tasks and milestones, business plan, identification of resources assigned to tasks, and task interdependencies. Project monitoring, reporting, and management are required. Prerequisites: GRNS 322, GRNS 327. Co-requisite: GRNS 422.

GRNS 424. DNP Project Practicum II. 1 Credit.
Students in this semester will prepare and implement the Doctor of Nursing Practice Project. Prerequisites: GRNS 422, GRNS 423. Co-requisite: GRNS 425.

GRNS 425. DNP Project Practicum II. 1 Credit.
DNP project will be implemented including critical analysis of data and evidence for improving nursing practice. Project monitoring, reporting, and management are required. Prerequisites: GRNS 422, GRNS 423. Co-requisite: GRNS 424.

GRNS 426. DNP Project & Seminar III. 1 Credit.
Provides the structure for Doctor of Nursing Practice Project evaluation. Students in this semester will prepare and discuss the evaluation of the Doctor of Nursing Practice Project. Students will disseminate their findings. Prerequisites: GRNS 424, GRNS 425.

GRNS 427. Ex Nurse Leader Role Transform. 1 Credit.
This individualized practicum focuses on synthesis and application of prerequisite learning in a mentored nurse executive role.

GRNS 428. Executive Nurse Leader Immersi. 2 Credits.
This practicum is a continuation of the role transformation learning experience. Prerequisite: GRNS 427.
GRK 227. Greek Lyric Poetry. 3 Credits.
A study of early Greek personal, elegiac, and choral poetry from Archilochus to Pindar, including Sappho and Alcaeus, Simonides and Bacchylides. Prerequisites: Two years of college Greek or equivalent. Alternate years, as needed.

GRK 295. Advanced Special Topics. 1-18 Credits.
Advanced courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

GRK 296. Advanced Special Topics. 1-18 Credits.
Advanced courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

GREEK & LATIN (GKLT)

Courses

GKLT 381. Seminar. 0 or 3 Credits.
Intensive study at the graduate level of Greek and Latin authors not read in the candidate’s undergraduate program. Prerequisite: 200-level LAT or the equivalent.

GKLT 391. Master’s Thesis Research. 1-6 Credits.

GKLT 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

HEALTH EDUCATION (EDHE)

Courses

EDHE 200. Contemporary Issues. 1-6 Credits.
Designed so that its content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Prerequisite: Twelve hours in Education and related areas.

EDHE 208. School Health Programs. 3 Credits.
Organization of the total school health program. Problems and administration in the area of school environment, health services, health education, and school-community relationship. Prerequisite: EDHE 046 or equivalent.

EDHE 211. Community Health Ed. 3 Credits.
Government and voluntary agencies' sociological, historical, educational, environmental, and medical influences. Role of community health educator in these influences and major American health concerns. Prerequisite: EDHE 046 or equivalent.

EDHE 220. Stress Mgmt Hlth Professionals. 3 Credits.
Physiological, psychological, and sociological aspects of stress. Theory, practices, teaching techniques, and application relevant to teaching students and/or clients. Prerequisite: EDHE 046 or equivalent.

EDHE 295. Lab Experience in Educ. 1-6 Credits.
Supervised field work designed to give students experience in specialized areas for their professional development. Prerequisite: Permission of the Coordinator of Professional Laboratory Experiences.

EDHE 319. Internship Specialized Personnel. 1-12 Credits.
Students will undertake an approved internship in an institution which reflects the particular area of interest and needs of the student. Prerequisite: Instructor permission.
EDHE 380. Prof Problems in Education. 3 Credits.
Designed to cover selected educational problems in depth. The major emphasis will be on intensive and critical analysis of the literature and practice in a given area.

EDHE 382. Teaching Internship. 3-8 Credits.
Supervised teaching experiences on a full-time basis, with related seminars in teaching subject. Prerequisite: Permission of coordinator of Professional Laboratory Experiences.

EDHE 391. Master’s Thesis Research. 1-12 Credits.
Thesis topic must be approved by a faculty committee.

EDHE 397. Problems in Education. 1-6 Credits.
Individual work on a research problem selected by the student in consultation with a staff member. Prerequisite: Twelve hours in education and related areas; endorsement by a sponsoring faculty member.

HEALTH (HLTH)

Courses
HLTH 211. D2: Sustainable Dev Pub Hlth. 3 Credits.
Introduction to development of sustainable public health interventions through service learning. Faculty-led program abroad. Prerequisite: Minimum Junior standing.

HIGHER EDUCATION (EDHI)

Courses
EDHI 200. Contemporary Issues. 1-6 Credits.
Designed so that its content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Prerequisite: Twelve hours in Education and related areas.

EDHI 295. Internship. 1-18 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion. Prerequisite: Permission of the Coordinator of Professional Laboratory Experiences.

EDHI 300. Prgrm Eval & Assess in HESA. 3 Credits.
Focuses on promoting an understanding of assessment and evaluation in student affairs with particular emphasis on the ACPA/NASPA Assessment, Evaluation, and Research professional competency area. Students will learn how to implement an assessment plan and effectively report assessment efforts to broad audiences. Prerequisite: Graduate Student standing or Instructor permission.

EDHI 319. Internship. 1-6 Credits.
Students will undertake an approved internship in an institution which reflects the particular area of interest and needs of the student. Prerequisite: Instructor permission.

EDHI 332. Adult Development & Education. 3 Credits.
Critical examination of research on adult learners in higher education, development theory, and reentry issues facing older students. Analysis and application of proposals for new adult-oriented educational programs.

EDHI 360. Higher Education in America. 3 Credits.
Critical, contemporary overview of the American university. Implications of conflicting value philosophies for theory, practice of higher education.

EDHI 361. The (Un)Changing Academy. 3 Credits.
This course examines the historical trends that have shaped higher education and the tensions around stability and change affecting colleges and universities. Prerequisite: Graduate standing.

EDHI 362. The American College Student. 3 Credits.
Examination of the diversity of college students today, and the developmental issues arising during the college experience.

EDHI 363. Controversies of the Academy. 3 Credits.
Critical and timely look at challenges confronting campus leaders. Implications for administrative practice shape seminar conversations of readings and case studies. Pre/co-requisite: Graduate standing or permission.

EDHI 364. Helping Skills in Stdn Affairs. 3 Credits.
An exploration of studies, techniques, and methods for advising and helping skills in higher education and student affairs administration.

EDHI 375. Social Justice/Inclusion in HE. 3 Credits.
Explores cultural pluralism philosophies, racial identity development, racial incidences, and educational practices related to racism and diversity for implementation in higher education. Prerequisite: Graduate standing.

EDHI 380. Professional Problems in Educ. 3 Credits.
Designed to cover selected educational problems in depth. The major emphasis will be on intensive and critical analysis of the literature and practice in a given area.

EDHI 383. Higher Ed Admin & Organization. 3 Credits.
Introduction to concepts of administration and organization as applied to contemporary higher education setting. Characteristics of organizations, dynamic elements of administration, and theories and processes of change.

EDHI 385. Foundations & Functions of CSP. 3 Credits.
Overview of the work of the student affairs profession, including philosophical base, historical development, current practices, and future trends. Prerequisite: Higher Education and Student Affairs majors.

EDHI 387. Seminar in Higher Education. 1-3 Credits.
Designed for graduate students concentrating in programs in Higher Education. Analysis and discussion of current issues and problems in higher education.

EDHI 391. Master’s Thesis Research. 1-6 Credits.
Thesis topic must be approved by a faculty committee.

EDHI 393. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.
EDHI 395. Lab Experience in Education. 2 Credits.
Practica internships, offered in various University departments and offices, enable students to integrate conceptual knowledge with professional practices. Prerequisite: Graduate standing in HESA.

EDHI 396. Edhi:Eth,Val&Mean/High Ed. 3 Credits.
An applied student affairs seminar featuring ethical problem-solving, appreciation of religious pluralism, and approaches to facilitating the search for moral and spiritual meaning in the American university.

EDHI 397. Problems in Education. 1-6 Credits.
Individual work on a research problem selected by the student in consultation with a staff member. Prerequisite: Twelve hours in education and related areas; endorsement by a sponsoring faculty member.

EDHI 491. Doctoral Dissertation Research. 1-12 Credits.

EDHI 493. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

HISTORIC PRESERVATION (HP)

Courses

HP 200. History American Architecture. 3 Credits.
Study of architectural history to gain fluency in the stylistic terms so essential to historic preservation and to public support for conserving our architectural heritage. Prerequisites: Admission to the Historic Preservation graduate program; or twelve hours of History and minimum Junior standing.

HP 201. History on the Land. 3 Credits.
Identifying and interpreting evidence of the cultural forces - early settlement patterns, transportation, industry, agriculture, planning, conservation - that have shaped our land, buildings, towns, and cities. Prerequisites: Admission to the Historic Preservation graduate program; or twelve hours of History and minimum Junior standing. Cross-listed with: HST 201.

HP 204. Historic Pres: Devlpmt Econ. 3 Credits.
Survey of economic, financial aspects of real estate development pertaining to preservation and adaptive use of historic buildings (market studies, pro-formas). Field trips. Actual proposal development for underutilized properties.

HP 205. Historic Preservation Law. 3 Credits.
Legal issues in conservation of the built environment. Basic legal techniques for protection of historic structures (historic districts, protective legislation, easements, covenants). Study of significant court decisions.

HP 206. Rschg Historic Structure/Sites. 3 Credits.
Methods for researching historic structures and sites using archival and physical evidence, deciphering archaic building technologies, and documenting structures through professional reports, architectural photography, measured drawings.

HP 302. Community Preservation Project. 3 Credits.
Third-semester graduate students apply developed professionals skills to actual community preservation problems. Projects include strategy development, securing and allocating funds, research, advocacy, and implementation. Prerequisite: Historic Preservation major.

HP 303. Grad Internship. 3 Credits.
Participants will devote a semester to preservation within an appropriate institution or agency. Prerequisite: HP 304 or HP 305.

HP 304. Contemp Preservation Plan&Pol. 3 Credits.
This introduction to the professional practice of preservation planning traces the evolution of the historic preservation movement and examines contemporary preservation policy-making issues. Prerequisite: HP 200.

HP 305. Hst Preservation Pract Methods. 3 Credits.
This course introduces students to professional practice methods for conducting historic site and structures surveys. National Register nominations, and rehabilitation investment tax credit application projects. Prerequisites: HP 200, HP 205.

HP 306. Architectural Conservation I. 3 Credits.
An examination of the physical properties of historic building materials, their deterioration mechanisms, and strategies for assessing conditions, conserving and rehabilitating historic resources. Lecture and lab. Prerequisite: HP 206.

HP 307. Architectural Conservation II. 3 Credits.
A continuation of Architectural Conservation I, emphasizing an integrated examination of historic preservation through lectures, seminars, and field and laboratory research projects. Prerequisite: HP 306.

HP 391. Master's Thesis Research. 1-6 Credits.
Total of six hours required.

HP 395. Advanced Special Topics. 1-3 Credits.
Credit as arranged.

HP 397. Special Readings & Research. 1-6 Credits.
Credit as arranged.

HISTORY (HST)

Courses

HST 201. History on the Land. 3 Credits.
Identifying and interpreting evidence of the cultural forces - early settlement patterns, transportation, industry, agriculture, planning, conservation - that have shaped our land, buildings, towns, and cities. Prerequisites: Admission to the Historic Preservation graduate program; or twelve hours of History and minimum Junior standing. Cross-listed with: HP 201.

HST 209. Seminar in Global History. 3 Credits.
Topics examining themes in Global history. May be repeated for credit with different content. Prerequisite: Twelve hours of History; minimum Junior standing.

HST 221. Seminar in Ancient History. 3 Credits.
Topics examining themes in Ancient history. May be repeated for credit with different content. Prerequisites: Twelve hours in History or Classics; minimum Junior standing. Cross-listed with: CLAS 221.

HST 224. Seminar in Medieval Europe. 3 Credits.
Topics examining themes in Medieval European history. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.
HST 225. Seminar in Early Modern Europe. 3 Credits.
Topics examining themes in Early Modern European history. Representative topics: Books & Readers in Europe, 1250-1650. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 226. Seminar in Modern Europe. 3 Credits.
Topics examining themes in Modern European history. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 227. Seminar in Modern Europe. 3 Credits.
Topics examining themes in Modern European history and Holocaust Studies. Representative topics: The Holocaust & Memory; Auschwitz; The Holocaust in Poland. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 228. Seminar in Popular Culture. 3 Credits.
Topics examining themes in the history of popular culture. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 235. Seminar in Islamic History. 3 Credits.
Topics exploring themes in Islamic history. Representative topics: Ottoman History; Women & Gender in Islamic History. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 237. Imperial Russian History. 3 Credits.
Topics examining themes in imperial Russian history. Representative topics: Late Imperial Literature & Film; Nineteenth-century Russian Literature & History; Russian Memoirs of Childhood; Russian Exiles from Herzen to Nabokov. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 238. Seminar in Soviet History. 3 Credits.
Topics examining themes in Soviet history. Representative topics: Stalinist Culture & Society; Early Soviet Cinema; The Great Patriotic War. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 240. D2: Compar Slavery:Hist Persp. 3 Credits.
History of slavery from a comparative perspective, including Classical Antiquity, Islam and the Middle East, Africa, Latin America, and the Southern United States. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 241. Seminar in African History. 3 Credits.
Topics examining African history. Representative topics: The Transatlantic Slave Trade & the African Diaspora; Africa’s Urban Past; Colonialism, Public Health, & Disease in Africa. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 250. D2: Seminar in East Asian Hist. 3 Credits.
Topics examining East Asian history. Representative topics: Postwar Japan; Japan in the World; Modern Japan-China Relations. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 252. D2: Seminar on China. 3 Credits.
Topics examining Chinese history. Representative topics: China under Chairman Mao; 20th-century China; China and the West. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 265. Seminar in Canadian History. 3 Credits.
Topics in Canadian history. May be repeated for credit with different content. Prerequisite: Twelve hours of History; minimum Junior standing.

HST 267. Environmental History Seminar. 3 Credits.
Advanced reading and research on the role and influence of nature on human history and how people and cultures have influenced the natural world. Prerequisites: Twelve hours of History; Junior/Senior/Graduate standing. Cross-listed with: ENVS 267.

HST 271. Seminar in American Social Hist. 3 Credits.
Topics examining themes in American social history. Representative topics: US Social History. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 273. Seminar in Modern US History. 3 Credits.
Topics examining themes in modern US history. Representative topics: War & Culture in America; Growth of the Federal Government. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 275. Seminar in Early American Hist. 3 Credits.
Topics examining themes in early American history. Representative topics: American Slavery; Early Republic. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 280. D2: Queer Lives: LGBT History. 3 Credits.
Advanced readings and research on the diverse history of LGBT peoples in Europe and North America with a focus on case studies, recent scholarship, and major theoretical works. Prerequisites: Twelve hours of History, or GSWS 001 and six additional hours of Gender, Sexuality, & Women’s Studies courses; minimum Junior standing. Cross-listed with: GSWS 280.

HST 284. Seminar in Vermont History. 3 Credits.
Topics exploring themes in Vermont history. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing. Cross-listed with: VS 284.

HST 287. Seminar in Historiography. 3 Credits.
Topics examining themes in contemporary historical writing. May be repeated for credit with different content. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 296. Special Topics Seminar. 1-18 Credits.
See Schedule of Courses for specific titles. Prerequisites: Twelve hours of History; minimum Junior standing.

HST 301. Graduate Historiography. 3 Credits.
Historical methods, philosophy of history, and the history of history writing. Prerequisite: Graduate students only.
HST 391. Master’s Thesis Research. 1-6 Credits.
Required of all candidates for the M.A. who are writing a thesis. Normally arranged for two semesters at three hours each. Prerequisite: Graduate students only.

HST 393. Graduate Internship. 1-6 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member the instructor of record, for which academic credit is awarded. Offered at department discretion. Prerequisite: Instructor permission.

HST 395. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Prerequisite: Graduate standing.

HST 397. Special Readings and Research. 1-6 Credits.
Directed individual study of areas not appropriately covered by existing courses. Prerequisite: Instructor permission.

HUMAN DEVELOPMENT & FAM STDIES (HDFS)

Courses

HDFS 260. Family Ecosystem. 3 Credits.
Family viewed in and as an environment for human development. The family ecological approach applied to practical family concerns. Prerequisites: HDFS 005, HDFS 060, HDFS 161, HDFS 189; Junior standing.

HDFS 263. Advanced Child Development. 3 Credits.
Survey of professional literature in child development with special emphasis on influence of early life experiences throughout the life cycle. Prerequisites: HDFS 005, HDFS 060, HDFS 161, HDFS 189; Junior standing.

HDFS 264. Contemporary Issues Parenting. 3 Credits.
Contemporary cultural factors that influence adult lifestyles and their relationship to successful parenting. Prerequisites: HDFS 005, HDFS 060, HDFS 161, HDFS 189; Junior standing. May be repeated up to six credits.

HDFS 265. Teaching Human Development. 3 Credits.
Prerequisites: HDFS 005, HDFS 060, HDFS 161, HDFS 189; Junior standing.

HDFS 266. Seminar in Human Development. 3 Credits.
Intensive study of issues in human development and their application in a wide variety of professional areas. Prerequisites: HDFS 005, HDFS 060, HDFS 161, HDFS 189; Junior standing. May be taken more than once up to a maximum of 12 hours.

HDFS 267. D2: Adv Gender & Sexual Iden. 3 Credits.
Intensive study of lesbian, gay, bisexual, and/or transgender identities, families, and communities in diverse individual, social, political, and cultural contexts. Prerequisites: HDFS 005, HDFS 060, HDFS 161, HDFS 189; Juniors standing.

HDFS 268. Sem In Close Relationships. 3 Credits.
Causal conditions influencing formation, maintenance, and dissolution of intimate adult relationships. Draws on theory and students’ personal experiences to explicate the nature of close relationships in contemporary American society. Prerequisites: HDFS 005, HDFS 060, HDFS 161, HDFS 189; Junior standing.

HDFS 289. Adv Theories of Human Dev. 3 Credits.
Comparative overview of major theoretical perspectives in the study of human development with particular emphasis on the interplay of method and theory and the applied implications of each theoretical model and theory. Prerequisites: HDFS 005, HDFS 060, HDFS 161, HDFS 189; Junior standing.

HDFS 291. Special Problems. 1-6 Credits.
Reading, discussion, and special field and/or laboratory investigations. Prerequisite: Junior standing. Students may enroll more than once up to twelve hours.

HDFS 295. Special Topics. 1-18 Credits.
Lectures, laboratories, readings, or projects relating to contemporary areas of study. Prerequisites: HDFS 005, HDFS 060, HDFS 161, HDFS 189; Junior standing. Enrollment may be more than once, accumulation up to twelve hours.

HDFS 296. Field Experience. 1-15 Credits.
Professionally-oriented field experience under joint supervision by faculty and community representative, credit arranged up to 15 hours. Prerequisites: HDFS 005, HDFS 060, HDFS 101, HDFS 141, HDFS 161, HDFS 189; Senior standing; Department permission.

HUMAN FUNCTIONING AND REHABILITATION SCIENCE (HFRS)

Courses

HFRS 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

HFRS 401. Topics & Measurement in HFRS. 3 Credits.
Fundamental human function and rehabilitation sciences concepts, principles, equipment, and tools for conducting quantitative research in the areas of human movement, communication, and physical activity.

HFRS 402. Applying the ICF Model to HFRS. 3 Credits.
Application of International Classification of Functioning (ICF) concepts to translational research in human function and rehabilitation science.

HFRS 430. Sem/Pract Teach & Learn HFRS. 3 Credits.
Students will be exposed to and mentored in the fundamentals of health professions teaching and learning and gain applied experience in the university classroom.

HFRS 450. Prof Writing & Grantsmanship. 2 Credits.
Topics include grant selection and approval processes, selection of appropriate publication outlets for a given research study, and report of research results. Prerequisites: Graduate Student standing. Masters level students require Instructor permission.
HFRS 491. Doctoral Dissertation Research. 3-6 Credits.
Directed interprofessional dissertation research in Human Functioning and Rehabilitation Science. Prerequisite: Doctoral candidacy status.

HFRS 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

HUMANITIES (HUMN)

Courses

HUMN 300. Modern Literary Theory. 3 Credits.
A survey of modern literary theory, including Slavic and Anglo-American formalism, marxism, feminism, structuralism, hermeneutics, deconstruction, and new historicism. Prerequisites: Graduate standing at UVM; or an A.B. in some humanities discipline. Alternate years.

HUMN 301. Humanities Graduate Seminar. 3 Credits.
Varying interdisciplinary topics for humanities graduate students. Prerequisites: Graduate standing at UVM; or an A.B. in some humanities discipline.

HUMN 395. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

INTERNSHIP (SINT)

Courses

SINT 290. Internship. 1-18 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member/faculty-staff team with faculty member as instructor of record; academic credit not degree eligible; offered at department discretion. May be crosslisted with departmental internship courses.

LATIN (LAT)

Courses

LAT 203. Republican Prose. 3 Credits.
Extensive reading in Caesar and Sallust, and in the speeches of Cicero. Alternate years, as needed. Prerequisite: LAT 101 or LAT 102 or equivalent.

LAT 204. Roman Epic Poetry. 3 Credits.
Extensive reading in Lucretius, Vergil, Ovid, and others. Alternate years, as needed. Prerequisite: LAT 101 or LAT 102 or equivalent.

LAT 211. Latin Prose Style. 3 Credits.
Readings in literary prose analyzed stylistically and imitated in composition. Required of Latin majors. Prerequisite: LAT 101 or LAT 102 or equivalent. Co-requisite: LAT at the 200-level.

LAT 212. Latin Prose Style. 3 Credits.
Readings in literary prose analyzed stylistically and imitated in composition. Required of Latin majors. Prerequisite: LAT 101 or LAT 102 or equivalent. Co-requisite: LAT at the 200-level.

LAT 227. Roman Lyric Poets. 3 Credits.
Selections from the works of Catullus, Horace, Propertius, and Tibullus. Alternate years, as needed. Prerequisite: LAT 101 or LAT 102 or equivalent.

LAT 251. Roman Letters. 3 Credits.
Letters of Cicero, Horace, and Pliny. Alternate years, as needed. Prerequisite: LAT 101 or LAT 102 or equivalent.

LAT 252. Roman Comedy. 3 Credits.
Two plays of Plautus and Terence. Study of the precursors of this literary form. Alternate years, as needed. Prerequisite: LAT 101 or LAT 102 or equivalent.

LAT 253. Roman Oratory. 3 Credits.
Selections from Cicero’s De Oratore, Orator, Brutus, and from his speeches. Historical development of forensic and other rhetorical canons. Alternate years, as needed. Prerequisite: LAT 101 or LAT 102 or equivalent.

LAT 255. Historians of the Empire. 3 Credits.
Historians of the Empire. Augustus, Res Gestae;Tacitus, Annals, I-IV; selections from Suetonius and Ammianus Marcellinus. Alternate years, as needed. Prerequisite: LAT 101 or LAT 102 or equivalent.

LAT 256. Satire. 3 Credits.
Selections from Horace, Persius, Juvenal, Petronius. Study of the development of this literary form. Alternate years, as needed. Prerequisite: LAT 101 or LAT 102 or equivalent.

LAT 271. Silver Latin. 3 Credits.
Extensive reading of post-Augustan authors not included in other advanced courses. Alternate years, as needed. Prerequisite: LAT 101 or LAT 102 or equivalent.

LAT 295. Advanced Special Topics. 1-18 Credits.
Advanced courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

LAT 296. Advanced Special Topics. 1-18 Credits.
Advanced courses or seminars on topics beyond the scope of existing departmental offerings. See Schedule of Courses for specific titles.

LEADERSHIP AND POLICY STUDIES (EDLP)

LIBRARY SCIENCE (EDLI)

Courses

EDLI 200. Contemporary Issues. 1-6 Credits.
Designed so that its content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Prerequisite: Twelve hours in education and related areas.

EDLI 275. Dev Sch Libr Media Ctr Collect. 3 Credits.
Evaluating and selecting books, periodicals, audiovisuals, software, and other materials for full range of student ages and ability levels. Maintaining collection, weeding, using interlibrary loan, and dealing with censorship. Prerequisite: EDLI 272 or equivalent.

EDLI 295. Lab Experience in Educ. 1-6 Credits.
Supervised field work designed to give students experience in specialized areas for their professional development. Prerequisite: Permission of the Coordinator of Professional Laboratory Experiences.
EDLI 371. Children’s/YA Literature. 3 Credits.
Designed as a survey of the context and merit of children’s and young adult literature, that is, books written for and read by readers from ages Pre K-Grade 12. Prerequisites: Twelve hours in education and related areas.

EDLI 372. Manage Schl Library Media Ctrs. 3 Credits.
Examines the fundamental principles and issues of school librarianship in contemporary educational communities. Overview of administrative issues, including development of policies and procedures, budget preparation, personnel administration, and public relations. Prerequisite: Twelve hours in education and related areas or Instructor permission.

EDLI 373. Dev/Org Schl Libr Collections. 3 Credits.
Principles for developing and organizing physical and virtual library collections, including evaluation, selection, and acquisition of resources appropriate for students, staff and other patrons; methods used to access library collections, standard cataloging practices, and selection of integrated library systems (ILS). Prerequisites: EDLI 372 or equivalent.

EDLI 374. Design Learning in Libr/Med Ct. 3 Credits.
Explores theories and best practice for teaching and learning in today’s library/media learning centers. It also examines the school librarians role as teacher and instructional collaborator with an emphasis on curriculum design, inquiry learning, and information literacy standards. Prerequisite: EDLI 372 or equivalent.

EDLI 376. Information Sources & Services. 3 Credits.
Focuses on the librarian’s role in curating, using, teaching, evaluating, and providing service with multimedia reference materials for the physical and virtual library learning spaces to meet the needs of a diverse learning community. Prerequisite: EDLI 372 or equivalent.

EDLI 377. Info Tech Schl Libr Media Ctrs. 3 Credits.
Designed to provide both a theoretical and a pragmatic understanding of information technology in the modern school library with a focus on the integration of technology within teaching and learning. Prerequisite: EDLI 372 or equivalent.

EDLI 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

LINGUISTICS (LING)

Courses

LING 280. Memory & Language Learning. 3 Credits.
Explores the role of memory in the acquisition, processing and use of a second language. We will assess and critique different tests that have been used to measure memory capacity. Prerequisites: LING 080 or equivalent; LING 185 or LING 277 or graduate standing in TESOL and Applied Linguistics.

LITERACY (EDLT)

Courses

EDLT 200. Contemporary Issues. 1-6 Credits.
EDLT 222. Cltvate Chil Lit in El/Mid Sch. 3 Credits.
Contemporary research and practice related to the development of strategic, motivated, and independent readers and writers. Emphasis on integrating reading and writing within collaborative environments. Prerequisite: Twelve hours in Education and/or related areas including an introductory course in reading or Instructor permission.

EDLT 223. Read Pgms in Sec Schl & Col. 3 Credits.
Relationship of reading to learning study or organization, instructional procedures, and materials for developing reading improvement programs for secondary and college students; reading in content areas. Prerequisite: Twelve hours in Education and/or related areas or Instructor permission.

EDLT 228. Lit in Jr/Sr High Schl Curr. 3 Credits.
Literacy Criticism for Teachers.

EDLT 234. Lit & Lang for Chil & Youth. 3 Credits.
Characteristics, interests, reading habits of children and youth; selection, evaluation of literature. Organizing book units for teaching literature, for content areas. Emphasis on development of oral, written expression. Prerequisite: Twelve hours in Education and related areas or Instructor permission.

EDLT 236. Multicultural Children’s Lit. 3 Credits.
Current research in multicultural education and literacy informs examination of representation and perspective in literature for children and youth. Perspectives include religion, race, gender, SES.

EDLT 295. Laboratory Experience in Educ. 1-6 Credits.

EDLT 319. Internship for Spec Pers in Ed. 1-18 Credits.

EDLT 375. Lit Assmt:Understand Indiv Dif. 3 Credits.
Designing and using assessment strategies to improve and adapt instruction. Identify, evaluate, and document literacy development, characteristics, interests, reading habits of children and youth. Emphasis on the development of individual learners. Prerequisite: EDLT 222 or Instructor permission.

EDLT 376. Clin/Tut Appr for Lit Intrvntn. 3-6 Credits.
Approaches for prevention, correction of reading and written language difficulties. Supervised teaching of individuals and/or small groups experiencing reading and language problems. Apprenticeships in reading instructional program. Pre/co-requisite: Three graduate credits in Reading/Language Arts or Instructor permission.

EDLT 378. Adv Stdy/Rsch in Read/Rel LArt. 3 Credits.
Survey of research, comparison and evaluation of emerging programs design and development of projects in reading. Prerequisite: Fifteen hours in Education including nine hours in the field of reading and language education; Instructor permission.

EDLT 379. Seminar in Reading Instruction. 3 Credits.
Study of reading relative to total curriculum. Significant trends, concepts related to specific problems, programs in reading and language arts instruction; role of supervisor and reading consultant. Prerequisite: Fifteen hours of Education including nine hours in the field of reading and language education; Instructor permission.
MBA 300. Business Fundamentals. 1 Credit.
Provides an introduction to the basic definitions and business language of all of the functional areas of business administration. Prerequisite: MBA standing.

MBA 301. Foundations of Management. 0 or 10 Credits.
Provides background on sustainable business practices and offer tools to analyze a business and structure a business opportunity, including how to: develop/defend competitive advantage, perform financial analysis, implement marketing strategy, organize a firm, and manage technological innovation. Prerequisite: MBA standing.

MBA 302. Building a Sustainable Enterprise. 0 or 9 Credits.
Provides students with the tools for starting and building a sustainable business. Topics include: public policy, value creation, assessments under market uncertainty, the meaning of sustainability and CSR, triple bottom line reporting, ethics for entrepreneurs, and mindfulness. Prerequisite: MBA standing.

MBA 303. Growth of Sust Enterprise. 0 or 9 Credits.
Provides tools for managing the growth of a sustainable business. Topics include: entrepreneurial leadership, systems tools for sustainability, business law, negotiations, financing an innovative venture, and sustainable operations/green supply chains. Students will frame and research their practicum project. Prerequisite: MBA standing.

MBA 304. Focusing on Sustainability. 0 or 9 Credits.
Provides students with an understanding of how to run a responsible/sustainable business within the constraints of finite physical resources and legal frameworks. Students will explore how management approaches, creativity, and technology can find opportunities within those constraints. Prerequisite: MBA standing.

MBA 305. Sustainable Entrepreneurship in Action. 0 or 7 Credits.
Provides a meaningful hands-on experience through the development of a business plan for a new sustainable venture. Students will spend three months conceptualizing, designing, and presenting a business case for a new sustainable venture. Prerequisite: MBA standing.

MBA 306. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific title.

MATERIALS SCIENCE (MATS)

Courses

MATS 391. Master's Thesis Research. 1-18 Credits.
MATS 396. Advanced Special Topics. 1-18 Credits.
MATS 399. Doctoral Dissertation Research. 1-18 Credits.
MATS 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

MATHMATICS FOR EDUCATORS (MAED)

Courses

MAED 205. Math as a Second Language. 3 Credits.
Deep conceptual understanding of the operations of arithmetic and interrelationships among arithmetic, algebra, and geometry; applications to the K-8 classroom. Prerequisite: Teacher license.

MAED 210. Functions/Algebra for Teaching. 3 Credits.
Functions, graphs, inverse functions, linear functions, straight lines, linear equations and inequalities, and applications; applications to the K-8 classroom. Prerequisite: MAED 205.

MAED 215. Trig/Algebra for Teachers II. 3 Credits.
Similar triangles, trigonometric functions, applications to measurement, periodic phenomena; quadratic functions; applications to the K-8 classroom. Prerequisites: MAED 205 and MAED 210.

MAED 220. Measure/Probabil for Teachers. 3 Credits.
Measurement (length, area and volume), probability, application to problem solving, and the ways in which these concepts develop across the K-12 curriculum. Prerequisites: MAED 205, MAED 210, and MAED 215.

MAED 225. Number Theory for Teachers. 3 Credits.
Division algorithm, prime numbers, fundamental theorem of arithmetic, factors and multiples, number bases, arithmetic progressions; emphasis on how number theory is taught in grades K-8. Prerequisites: MAED 205, MAED 210, and MAED 215.

MAED 230. Alg/Geom for Teachers III. 3 Credits.
Exponents, compound interest, exponential functions, logarithms, the base e, growth and decay, research in mathematics education and K-8 curriculum projects. Prerequisites: MAED 205, MAED 210, and MAED 215.

MAED 235. Calculus for Teachers I. 3 Credits.
MAED 240. Calculus for Teachers II. 3 Credits.
Continued study of calculus and its relationship to the K-8 curriculum. Topics include infinite series, calculating area, the definite integral, Fundamental Theorem of Calculus. Prerequisite: MAED 235.

MAED 300. Statistics & Research I. 3 Credits.
Introduction to statistics with emphasis on research in K-8 education. Representing and summarizing data, measures of relationship between variables, inference from sample data to population. Prerequisites: MAED 205, MAED 210, and MAED 215.

MAED 305. Statistics & Research II. 3 Credits.
Error bars in graphs, margins of error in surveys, and confidence intervals; interpret and critique educational research studies; analysis of school assessment data activities. Prerequisite: MAED 300.

MAED 310. Statistics & Research III. 3 Credits.
Regression, chi-square analysis, design of research studies, reading of research on K-8 instructional practice, design action research project. Pre/co-requisites: MAED 305, or Prerequisite: MAED 305.

MAED 315. Capstone VMI Experience. 3 Credits.
This course concludes the VMI’s school-based-research component. Teachers synthesize their coursework and field experiences and revisit key mathematical concepts from arithmetic through calculus. Prerequisite: 30 hours MAED courses.

MAED 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

MATHEMATICS (MATH)

Courses
MATH 207. QR: Probability Theory. 3 Credits.
Distributions of random variables and functions of random variables. Expectations, stochastic independence, sampling and limiting distributions (central limit theorems). Concepts of random number generation. Prerequisites: MATH 121; STAT 151 or STAT 153 recommended. Cross-listed with: STAT 251, BIOS 251.

MATH 221. QR: Deterministic Models Oper Rsch. 3 Credits.
The linear programming problem. Simplex algorithm, dual problem, sensitivity analysis, goal programming, Dynamic programming and network problems. Prerequisites: MATH 122 or MATH 124; MATH 121 desirable. Cross-listed with: CSYS 221.

MATH 222. QR: Stochastic Models: Oper Rsch. 3 Credits.
Development and solution of some typical stochastic models. Markov chains, queueing problems, inventory models, and dynamic programming under uncertainty. Prerequisite: MATH 207, STAT 151.

MATH 230. QR: Ordinary Differntl Equation. 3 Credits.
Solutions of linear ordinary differential equations, the Laplace transformation, and series solutions of differential equations. Prerequisite: MATH 121. Corequisite: MATH 122 or MATH 124. Credit not granted for more than one of the courses MATH 230 or MATH 271.

MATH 235. QR: Mathematical Models & Analysis. 3 Credits.
Techniques of Undergraduate calculus and linear algebra are applied for mathematical analysis of models of natural and human-created phenomena. Students are coached to give presentations. Prerequisites: MATH 121; MATH 122 or MATH 124 or MATH 230 or MATH 271.

MATH 236. QR: Calculus of Variations. 3 Credits.

MATH 237. QR: Intro to Numerical Analysis. 3 Credits.
Error analysis, root-finding, interpolation, least squares, quadrature, linear equations, numerical solution of ordinary differential equations. Prerequisites: MATH 121; MATH 122 or MATH 124 or MATH 271; CS 020 or CS 021. Cross-listed with: CS 237.

MATH 238. QR: Applied Computational Methods. 3 Credits.
Direct and iterative methods for solving linear systems; numerical solution of ordinary and partial differential equations. Focus will be on application of numerical methods. Prerequisites: MATH 121; MATH 122 or MATH 124 or MATH 271.

MATH 240. QR: Fourier Series & Integral Trans. 3 Credits.
Fourier series, orthogonal functions, integral transforms and boundary value problems. Prerequisite: MATH 230 or MATH 271.

MATH 241. QR: Anyl in Several Real Vars I. 3 Credits.
Properties of the real numbers, basic topology of metric spaces, infinite sequences and series, continuity. Prerequisites: MATH 052 or Math 141 or MATH 151; MATH 121; MATH 122 or MATH 124.

MATH 242. QR: Anyl in Several Real Vars II. 3 Credits.
Differentiation and integration in n-space, uniform convergence of functions, fundamental theorem of calculus, inverse and implicit function theorems. Prerequisite: MATH 241.

MATH 251. QR: Abstract Algebra I. 3 Credits.
Basic theory of groups, rings, fields, homomorphisms, and isomorphisms. Prerequisites: MATH 052 or MATH 141 or MATH 151; MATH 122 or MATH 124.

MATH 252. QR: Abstract Algebra II. 3 Credits.
Modules, vector spaces, linear transformations, rational and Jordan canonical forms. Finite fields, field extensions, and Galois theory leading to the insolvability of quintic equations. Prerequisite: MATH 251.

MATH 255. QR: Elementary Number Theory. 3 Credits.
Divisibility, prime numbers, Diophantine equations, congruence of numbers, and methods of solving congruences. Prerequisite: MATH 052 or MATH 054.

MATH 257. QR: Topics in Group Theory. 3 Credits.
Topics may include abstract group theory, representation theory, classical groups, Lie groups. Prerequisite: MATH 251.
MATH 259. QR: Cryptography. 3 Credits.
A survey of classical and modern cryptography. The strengths and weaknesses of various cryptosystems are discussed. Topics include specific public-key and private-key cryptosystems such as RSA, ElGamal, and elliptic curve cryptosystems, as well as digital signatures and key exchange. Prerequisite: MATH 052 or CS 064; any 100-level MATH course.

MATH 260. QR: Foundations of Geometry. 3 Credits.
Geometry as an axiomatic science; various non-Euclidean geometries; relationships existing between Euclidean plane geometry and other geometries; invariant properties. Prerequisite: MATH 022 and either MATH 052 or MATH 054.

MATH 264. QR: Vector Analysis. 3 Credits.
Gradient, curl and divergence, Green, Gauss, and Stokes Theorems, applications to physics, tensor analysis. Prerequisites: MATH 121; MATH 122 or MATH 124 or MATH 271.

MATH 266. QR: Chaos, Fractals & Dynamical Syst. 3 Credits.
Discrete and continuous dynamical systems, Julia sets, the Mandelbrot set, period doubling, renormalization, Henon map, phase plane analysis and Lorenz equations. Prerequisite: MATH 122 or MATH 124. CS 020 or CS 021 recommended. Cross-listed with: CSYS 266.

MATH 268. QR: Mathematical Biology & Ecol. 3 Credits.
Mathematical modeling in the life sciences. Topics include population modeling, dynamics of infectious diseases, reaction kinetics, wave phenomena in biology, and biological pattern formation. Prerequisite: MATH 122 or MATH 124; MATH 230 or MATH 237 recommended. Cross-listed with: CSYS 268.

MATH 271. QR: Adv Engineering Mathematics. 3 Credits.
Differential equations, Laplace transforms, matrix theory, and systems of differential equations; brief introduction to Fourier series. Examples from engineering and physical sciences. Credit not granted for both MATH 230 and MATH 271. No credit for Mathmatics majors. Prerequisite: MATH 121.

MATH 272. QR: Applied Analysis. 3 Credits.
Basics of Fourier series, partial differential equations of mathematical physics, functions of a complex variable, Cauchy’s theorem, integral formula. Prerequisites: MATH 230 or MATH 271.

MATH 273. QR: Combinatorial Graph Theory. 3 Credits.
Paths and trees, connectivity, Eulerian and Hamiltonian cycles, matchings, edge and vertex colorings, planar graphs, Euler’s formula and the Four Color Theorem, networks. Prerequisite: MATH 052 or MATH 054.

MATH 274. QR: Numerical Linear Algebra. 3 Credits.
Direct and iterative methods for solving linear equations, least square factorization methods, eigenvalue computations, ill-conditioning and stability. Prerequisite: MATH 237.

MATH 295. Special Topics. 1-18 Credits.
For advanced students in the indicated fields. Lectures, reports, and directed readings on advanced topics. Credit as arranged. Offered as occasion warrants.

MATH 300. Principles of Complex Systems. 3 Credits.
Introduction to fundamental concepts of complex systems. Topics include: emergence, scaling phenomena, and mechanisms, multiscale systems, failure, robustness, collective social phenomena, complex networks. Students from all disciplines welcomed. Pre/co-requisites: Calculus and statistics required; Linear Algebra, Differential Equations, and Computer programming recommended but not required. Cross-listed with: CSYS 300.

MATH 303. Complex Networks. 3 Credits.
Detailed exploration of distribution, transportation, small-world, scale-free, social, biological, organizational networks; generative mechanisms; measurement and statistics of network properties; network dynamics; contagion processes. Students from all disciplines welcomed. Pre/co-requisites: MATH 300/CSYS 300, Calculus, and Statistics required. Cross-listed with: CSYS 303.

MATH 305. Adv Ordinary Diff Equations. 3 Credits.
Linear and nonlinear systems, approximate solutions, existence, uniqueness, dependence on initial conditions, stability, asymptotic behavior, singularities, self-adjoint problems. Prerequisite: MATH 230.

MATH 306. Theory of Func of Complex Var. 3 Credits.
Complex functions, differentiation and the Cauchy-Riemann equations, power and Laurent series, integration, calculus of residues, contour integration, isolated singularities, conformal mapping, harmonic functions. Prerequisite: MATH 242.

MATH 312. Approximation Theory. 3 Credits.
Interpolation and approximation by interpolation, uniform approximation in normed linear spaces, spline functions, orthogonal polynomials. Least square, and Chebychev approximations, rational functions. Prerequisites: MATH 122 or MATH 124; MATH 237.

MATH 333. Thry Functions Real Variables. 3 Credits.
Lebesgue measure and integration theory, Monotone and Dominated Convergence Theorems and applications, product measures, basic theory of LP-spaces. Prerequisite: MATH 242.

MATH 335. Advanced Real Analysis. 3 Credits.
L2-spaces, LP-spaces; Hilbert, Banach spaces; linear functionals, linear operators; completely continuous operators (including symmetric); Fredholm alternative; Hilbert-Schmidt theory; unitary operators; Bochner’s Theorem; Fourier-Plancherel, Watson transforms. Prerequisites: MATH 333 and MATH 335.

MATH 336. Advanced Real Analysis. 3 Credits.
L2-spaces, LP-spaces; Hilbert, Banach spaces; linear functionals, linear operators; completely continuous operators (including symmetric); Fredholm alternative; Hilbert-Schmidt theory; unitary operators; Bochner’s Theorem; Fourier-Plancherel, Watson transforms. Prerequisite: MATH 333 and MATH 335.

MATH 337. Numerical Diff Equations. 3 Credits.
Numerical solution and analysis of differential equations: initial-value and boundary-value problems; finite difference and finite element methods. Prerequisites: MATH 121; MATH 122 or MATH 124; MATH 230 or MATH 271 or MATH 237 recommended.
MATH 339. Partial Differential Equations. 3 Credits.
Classification of equations, linear equations, first order equations, second order elliptic, parabolic, and hyperbolic equations, uniqueness and existence of solutions. Prerequisite: MATH 230; MATH 242.

MATH 349. Nonlinear Partial Diff Eqs. 3 Credits.
This course covers modern mathematical theories and numerical methods for nonlinear partial differential equations. Topics include: inverse scattering transform; solitons; bilinear method; Darboux transformation; solitary waves; Vakhitov-Kolokolov stability criterion; transverse instability; virial theorem; wave collapse; pseudo-spectral method; split-step method. Prerequisites: MATH 330 (or equivalent), MATH 339 (or equivalent), or Instructor permission.

MATH 351. Topics in Algebra. 3 Credits.
Topics will vary each semester and may include algebraic number theory, algebraic geometry, and the arithmetic of elliptic curves. Repeatable for credit with Instructor permission. Prerequisite: MATH 252.

MATH 353. Point-Set Topology. 3 Credits.
Topological spaces, closed and open sets, closure operators, separation axioms, continuity, connectedness, compactness, metrization, uniform spaces. Prerequisite: MATH 241.

MATH 354. Algebraic Topology. 3 Credits.
Homotopy, Seifert-van Kampen Theorem; simplicial, singular, and Čech homology. Prerequisite: MATH 241 or MATH 353.

MATH 373. Topics in Combinatorics. 3 Credits.
Topics will vary each semester and may include combinatorial designs, coding theory, topological graph theory, cryptography. Prerequisite: MATH 251 or MATH 273.

MATH 382. Seminar. 1 Credit.
Topical discussions with assigned reading. Required of M.S. degree candidates.

MATH 391. Doctoral Dissertation Research. 1-18 Credits.
Subject will vary from year to year. May be repeated for credit.

MATH 395. Advanced Special Topics. 1-18 Credits.
Topics will vary each semester and may include combinatorial designs, coding theory, topological graph theory, cryptography. Prerequisite: MATH 251 or MATH 273.

ME 206. Biomechanics of Human Motion. 3 Credits.
Biomechanics of Human Motion will describe the typical processes-from small scale protein interactions to large scale joint torques-that result in human locomotion. Clinical problems and athletic performance will be discussed. Students will learn about musculoskeletal tissues related to force generation/transmission and will perform kinematic/kinetic analyses. Prerequisites: Senior or Graduate Student standing in Engineering. Instructor permission.

ME 207. Intro Biomedical Engineering. 3 Credits.
Introduction to bioengineering science including biomechanics, biomaterials, biomedical imaging, rehabilitation engineering, biomedical computing, biomedical instrumentation, and transport phenomena. Prerequisite: Senior standing in all engineering majors other than Biomedical Engineering, Graduate Student standing with Instructor permission. Cross-listed with: EE 207.

ME 208. Biomechanics: Tissue Engr. 3 Credits.
Solid biomechanics including structure, function and mechanical properties of biological tissues. Tissue engineering involving cell mechanics, scaffold materials, and signaling. Current literature topics are covered. Pre/co-requisites: Senior/Graduate standing in Engineering; Instructor permission.

ME 209. Biomechanics: Transport Proc. 3 Credits.
Transport and kinetic processes to vascular biology, respiratory mechanics and medicine. Steady and unsteady laminar flow, pulse wave reflections, curved and collapsible tube flow, turbulence. Pre/co-requisites: Senior/Graduate standing in Engineering; Instructor permission.

ME 210. Control Systems. 3 Credits.
Analysis and design of continuous and discrete-time control systems; stability, signal flow, performance criteria, classical and state variable methods, simulation design tools, computer-based realizations. Credit not given for more than one of the courses EE 110, ME 210. Prerequisites: EE 171 or ME 111. Cross-listed with: EE 210.

ME 213. Systems & Synthetic Biology. 3 Credits.
Applying engineering tools to the design and analysis of biomolecular processes; gene regulatory networks; nonlinear dynamics in molecular biology; biological circuit design; biological signal processing. Prerequisite: Background required: Differential Equations, Linear Algebra, Programming. Cross-listed with: CSYS 213, EE 213.

ME 218. Numerical Methods for Engineer. 3 Credits.
Foundational concepts of numerical integration, numerical differentiation, and numerical approximation and solution of differential and partial differential equations of the type encountered in the analysis of engineering problems and data processing. Prerequisites: MATH 271, CS 020; MATH 122 or MATH 124. Cross-listed with: CE 218.

ME 230. Astrodynamics. 3 Credits.
Motion of spacecraft in a central gravitational field. Two and restricted three-body problems; Kepler's equation; orbital maneuvers and rendezvous; interplanetary and lunar trajectories. Prerequisite: ME 111.
ME 234. Mechanical Vibrations. 3 Credits.
Analysis, measurement, and control of mechanical vibrations; SDOF, MDOF, and rotating systems, forced, free, and random vibrations. Prerequisite: ME 111 or Senior/Graduate standing in engineering or physical sciences.

ME 235. Turbomach Vibration Anyl/Tstng. 2 Credits.
Vibration in rotating machines; vibration measurement techniques; machinery condition and degradation; condition monitoring and predictive maintenance; industrial vibration techniques including proximity probes, accelerometers, FFT analyzer. Prerequisite: ME 244.

ME 237. Turbulence. 3 Credits.
Description of turbulent flows; statistical and modeling of turbulent flows; Navier Stokes as a dynamical system; experimental and numerical approaches. Prerequisite: ME 143.

ME 238. Energy Systems Engineering. 3 Credits.
Engineering assessment of both potentially sustainable and unsustainable practical primary energy systems. Examination of options of meeting demand and impacts on the environment. Prerequisite: ME 042.

ME 239. Rocket Propulsion. 3 Credits.
Flight mechanics and propulsion requirements for atmospheric and space flight. Thermochemistry of fuels and propellants. Operating principles of chemical, electrical and nuclear propulsion systems. Pre/co-requisites: ME 143/ME 240 recommended or permission of the Instructor.

ME 240. Compressible Flow. 3 Credits.
Theory of compressible flow. Normal and oblique shocks; expansion waves; unsteady wave motion; method of characteristics; linearized external flows; conical and 3D flows. Prerequisite: ME 143 or equivalent.

ME 241. Combustion Processes. 3 Credits.
Combustion thermodynamics; chemical kinetics; laminar flames, premixed and diffusion; turbulent flames; ignition, explosion, and detonation; droplet combustion; flame spread; large scale fires; rocket combustion. Prerequisite: Senior/Graduate standing.

ME 242. Adv Engr Thermodynamics I. 3 Credits.
Foundations of statistical mechanics. Gases and crystals. Chemical equilibrium. Irreversible processes. Prerequisite: Senior/Graduate standing or permission.

ME 243. Incompressible Flow. 3 Credits.
Intermediate treatment of incompressible fluid flow; Navier-Stokes equations; two-dimensional potential flows; wing theory; vorticity and vortex structures; laminar and turbulent boundary layers. Prerequisites: ME 143 or equivalent.

ME 244. Intro to Turbomachinery Anyl. 2 Credits.
Fundamental turbomachinery principles of fluid mechanics, thermodynamics, and structural analysis; basic equations and computational techniques for analysis and design to model and evaluate turbomachinery. Prerequisite: ME 243, MATH 271.

ME 245. Advanced Heat Transfer I. 3 Credits.
Analytical methods for multidimensional steady and transient heat conduction; phase change and moving boundaries. Thermal radiation exchange in enclosures; view factors; emitting/absorbing gases. Prerequisites: ME 144 or equivalent, or by Instructor permission.

ME 246. Centrifugal Compressors. 2 Credits.
Fluid dynamic and thermodynamic principles of centrifugal compressor design and design practice; limits of stable operation and instability prediction and control. Prerequisite: ME 244.

ME 247. Centrifugal Pumps. 2 Credits.
Centrifugal pump design principles and practice; performance limits; cavitation; design tools and pump design optimization. Prerequisite: ME 244.

ME 248. Turbomachinery Special Topics. 1 or 2 Credit.
Content in axial fans/compressors; axial, radial, or steam turbines; CFD, dynamics/rotordynamics, or materials for turbo-machinery; power plant or refrigeration cycle developments; turbocharged and compound IC-engines. Prerequisite: ME 244.

ME 249. Computational Fluids Engr. 0 or 3 Credits.
Computational methods for solving the Navier-Stokes equations and combined thermo-fluid flows; finite-differences and finite-volume techniques; use of standard commercial CFD software. Prerequisite: ME 143 or equivalent.

ME 252. Mechanical Behavior Materials. 3 Credits.
Isotropic and anisotropic elasticity; theory of plasticity; deformation mechanisms in crystalline solids; dislocation theory; creep behavior; advanced fatigue and fracture mechanisms. Prerequisites: ME 101; Instructor permission.

ME 253. Corrosion of Materials. 3 Credits.

ME 255. Adv Engineering Materials. 3 Credits.
Advanced material processing; physical and mechanical principles of high-temperature alloys, light-weight materials, thin films, nanomaterials, and biomedical materials; elements of computational materials design. Prerequisites: Senior/Graduate standing; or Instructor permission.

ME 257. Composite Materials. 3 Credits.

ME 259. Computational Solid Mechanics. 3 Credits.
Computational methods using the finite element analysis (FEA) applied to linear elastic and non-linear problems in the mechanics of deformable solids and structures, contact mechanics, and fracture mechanics. Hands-on computational experience using a commercial FEA software. Prerequisites: ME 014, MATH 124, and MATH 271, or equivalent.
ME 265. QR: Integrated Product Dev. 3 Credits.
Project-based course focusing on the entire product life cycle. Team dynamics, process and product design, quality, materials, management, and environmentally-conscious manufacturing. Prerequisite: Senior standing. Cross-listed with: BSAD 293, STAT 265.

ME 270. Structural Dynamics. 3 Credits.
Vibrations, matrices, earthquake engineering, stability and wave propagation. Prerequisites: Senior/Graduate standing in Engineering or physical sciences, or Instructor permission. Cross-listed with: CE 272.

ME 271. Micro and Nano Systems. 3 Credits.
Operating principles, fabrication and design of engineered systems with submillimeter dimensions. Prerequisites: Senior/Graduate standing in Engineering or physical sciences.

ME 281. Seminar. 1 Credit.
Presentation and discussion of advanced mechanical engineering problems and current developments. Prerequisite: Senior/Graduate engineering enrollment.

ME 282. Seminar. 1 Credit.
Presentation and discussion of advanced mechanical engineering problems and current developments. Prerequisite: Senior/Graduate engineering enrollment.

ME 283. Lab Techniques Turbomach Dev. 2 Credits.
Instruments and transducers for performance, flow, and structural measurements in turbo-machinery; the role of test data in design and development; experimental data acquisition and processing. Prerequisite: ME 244.

ME 285. Biomedical Engineering Seminar. 1 Credit.
Presentation and discussion of advanced biomedical engineering problems and current research developments. Prerequisite: Senior/Graduate engineering enrollment.

ME 295. Advanced Special Topics. 1-18 Credits.
Content is dictated by expanding professional interest in newly developing, or recently developed, technical areas in which there is particular need or opportunity. Prerequisite: Senior/Graduate standing.

ME 304. Adv Engineering Analysis I. 3 Credits.
Analytical methods for the solution of partial differential equations in engineering mechanics and physics, including: eigenfunction expansions; Fourier series; Sturm-Liouville theory and special functions. Prerequisites: Graduate standing in engineering, mathematics, or physical sciences or Instructor permission. Cross-listed with: CE 304. Cross-listed with: CE 304.

ME 305. Adv Engineering Analysis II. 3 Credits.
Advanced analytical techniques for problems in engineering mechanics and physics, including: integral transform methods Green's functions, perturbation methods, and variational calculus. Prerequisites: ME 304 or equivalent. Cross-listed with: CE 305.

ME 312. Adv Bioengineering Systems. 3 Credits.
Advanced bioengineering design and analysis for current biomedical problems spanning molecular, cell, tissue, organ, and whole body systems including their interactions and emergent behaviors. Cross-listed with: CSYS 312.

ME 320. Special Problems in Elasticity. 3 Credits.
Advanced topics in the theory of elasticity in which there is a particular student and staff interest.

ME 321. Special Problems in Fluid Mech. 3 Credits.
Advanced topics in fluid mechanics in which there is a particular student and staff interest.

ME 322. Special Problems in Dynamics. 3 Credits.
Advanced topics in dynamics in which there is a particular student and staff interest.

ME 323. Special Prob in Thermodynamics. 3 Credits.
Advanced topics in thermodynamics in which there is a particular student and staff interest.

ME 324. Spec Problems in Heat Transfer. 3 Credits.
Advanced topics in heat transfer in which there is a particular student and staff interest.

ME 325. Special Problems in Materials. 3 Credits.
Advanced topics in behavior of materials in which there is a particular student and staff interest.

ME 330. Matrix Meth in Struct Dynamics. 3 Credits.
Matrices, eigenvalue problems, forced vibration, wave propagation.

ME 332. Engineering Elasticity. 3 Credits.
Tensors, complex variables, variational methods.

ME 333. Stress Analysis. 3 Credits.
Theory and experimental method of measuring static and dynamic stress and strain.

ME 336. Continuum Mechanics. 3 Credits.
Tensors, conservation laws, field equations for solids and fluids.

ME 338. Advanced Dynamics. 3 Credits.

ME 342. Advanced Combustion. 3 Credits.
Equations of reacting mixtures; modeling of steady and unsteady combustion, homogeneous/heterogeneous systems; ignition, explosions, detonations; combustion aerodynamics: turbulence, swirl, and sprays. Prerequisite: ME 241 or equivalent.

ME 343. Advanced Fluid Dynamics. 3 Credits.
Stress in continuum; kinematics, dynamics; potential fields; Wing theory; Navier-Stokes equation; hydrodynamic stability; turbulence; laminar, turbulent boundary layer theory; transient flows; free laminar, turbulent flows; mixing.

ME 344. Adv Eng Thermodynamics II. 3 Credits.
Microscopic thermodynamics; Maxwell-Boltzmann, Bose-Einstein, Fermi-Dirac statistics; kinetic theory of gases; transport properties, compressed gases, liquids, solid states; chemical systems; irreversible processes; fluctuations.
ME 345. Advanced Heat Transfer II. 3 Credits.
Advanced treatment of forced and free convection; thermal boundary layers; analytical and approximate solution methods. Phase change heat transfer. Micro/nano-scale heat transfer. Prerequisite: ME 245 or equivalent.

ME 346. Advanced Gas Dynamics. 3 Credits.
Transonic flows; hypersonic flows and shock relations; boundary layer interactions; high-temperature gases and aerothermodynamics; rarefied flows; computational methods. Prerequisite: ME 240 or equivalent.

ME 350. Multiscale Modeling. 3 Credits.

ME 371. Adv Engr Des Anyl&Synthesis I. 4 Credits.
Application of fundamental concepts, principles of advanced mathematics, physics, mechanics, electricity, thermodynamics, fluid dynamics, heat transfer, and decision-making processes to design, analysis, synthesis of complex engineering systems.

ME 372. Systems Engineering. 3 Credits.
Advanced course in systems engineering; reliability, maintainability, safety, and human factors engineering. Case studies. Prerequisites: ME 371 or Instructor permission.

ME 373. Integr Mechanism Design Anyl. 3 Credits.
Application of system analysis, rigid body dynamics, finite elements, fatigue analysis and structural dynamics to an integrated approach to mechanisms design. Prerequisites: ME 371 or Instructor permission.

ME 391. Master's Thesis Research. 1-18 Credits.
ME 395. Advanced Special Topics. 1-18 Credits.
Advanced topics in recently developed technical areas. Prerequisites: three hours with Instructor permission.

ME 491. Doctoral Dissertation Research. 0-18 Credits.
ME 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

MEDICINE (MED)

Courses
MED 395. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific title.

MED 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific title.

MICROBIOLOGY & MOLECULAR GENETICS (MMG)

Courses
MMG 201. Molecular Cloning Lab. 4 Credits.
Intensive advanced laboratory course in the fundamentals of recombinant DNA technology through the isolation and characterization of a unique gene. Prerequisite: MMG 104 or BIOC 207 or Instructor permission. Fall.

MMG 203. Mamm Cell Cult:Molecular Biol. 0 or 4 Credits.
The basic principles and techniques of mammalian cell culture, as well as cell and mammalian molecular genetics. Prerequisite: BCOR 103 or MMG 104, Permission of Coordinator. Alternate years. Spring.

MMG 205. Biochemistry I. 3 Credits.
Introduction to chemistry and structure of biological macromolecules; examination of mechanisms of chemical processes in biological systems, including enzyme catalysis, biosynthesis, regulation, and information transfer. Prerequisite: CHEM 048 or CHEM 142 or CHEM 144. Cross-listed with: BIOC 205, CHEM 205. Fall.

MMG 206. Biochemistry II. 3 Credits.
Continuation of Biochemistry I. Biochemistry of nucleic acids; nucleic acid based processes, such as replication and transcription; cellular information transfer, genomics, and proteomics. Prerequisite: MMG 205. Cross-listed with: BIOC 206, CHEM 206. Spring.

MMG 207. Biochemistry Lab. 3 Credits.
Introduction to biochemical tools, including spectrometry, chromatography, and electrophoresis; natural and recombinant enzyme isolation; assays of DNA-modifying enzymes; computer-based structure/function exercises. Prerequisite: BIOC 205 or CHEM 205 or MMG 205. Cross-listed with: BIOC 207, CHEM 207.

MMG 211. Prokaryotic Molecular Genetics. 3 Credits.
The organization, replication, and expression of genes in prokaryotes, focusing on the genetics of Escherichia coli and its viruses. Prerequisite: Introductory microbiology, biochemistry, genetics, and/or cell biology courses. Fall.

MMG 220. Environmental Microbiology. 3 Credits.
The activities of microorganisms, primarily bacteria, in air, soil, and water. Prerequisites: MMG 101 and Organic Chemistry Alternate years.

MMG 222. Advanced Medical Microbiology. 0 or 4 Credits.
Comprehensive study of human pathogenic bacteria and their disease states in humans. Laboratory sessions provide practical experience in handling and identifying these pathogens. Alternate years. Spring. Prerequisites: MMG 065 or MMG 101 or equivalent or Instructor permission.

MMG 223. Immunology. 3 Credits.
Analysis of the immune response with respect to structure and function of immunoglobulins and the T-cell receptor, tolerance, innate and adaptive immunity, the Major Histocompatibility Complex, hypersensitivity states, transplantation, cancer, and AIDS. Prerequisite: Instructor permission. Alternate years, Spring.

MMG 225. Eukaryotic Virology. 3 Credits.
An in-depth analysis of eukaryotic virus-mammalian cell interactions emphasizing mechanisms by which viruses modulate gene expression in infected cells. Prerequisite: MMG 101 or MMG 104 or equivalent. Alternate years. Fall.
MMG 231. QR:Prgrmmng for Bioinformatics. 3 Credits.
Introductory course on computing (including scripting, database, and statistical analysis) for developing bioinformatics applications. Particular emphasis is given to comparative genomics and systems biology scenarios. Prerequisites: STAT 151, STAT 153, or Instructor permission. Cross-listed with: CS 231. Alternate Years. Spring.

MMG 232. QR:Methods in Bioinformatics. 3 Credits.
This course provides a methodological survey of bioinformatics. Particular emphasis is given to algorithms associated with sequential analysis, comparative genomics, structural biology, and systems biology. Prerequisites: STAT 151, STAT 153, or Instructor permission. Cross-listed with: CS 232. Alternate Years. Spring.

MMG 233. Genetics and Genomics. 3 Credits.
Integrated entry into both genome science and modern genetic analysis. Students will develop skills needed to access, organize and interpret emerging genomic information. Fall. Prerequisite: Junior/ Senior/Graduate standing in biological or computational sciences.

MMG 295. Advanced Special Topics. 1-18 Credits.
Supervised investigations in microbiology or molecular genetics. Prerequisite: Instructor permission. Credit as arranged.

MMG 296. Advanced Special Topics. 1-18 Credits.
Supervised investigations in microbiology or molecular genetics. Prerequisite: Instructor permission. Credit as arranged.

MMG 310. Current Topics in MMG. 2 Credits.
Seminar to focus on specific issues at the forefront of current research in molecular genetics. Meetings will involve student presentation and discussion of research articles. Prerequisite: Permission of Coordinator.

MMG 312. Eukaryotic Molecular Genetics. 3 Credits.
The use of lower eukaryotes, such as the yeasts Saccharomyces cerevisiae and Schizosaccharomyces pombe, as model genetic systems to answer questions of basic biological importance. Prerequisites: Instructor permission; MMG 233 and CLBI 301, or equivalent.

MMG 320. Cellular Microbiology. 4 Credits.
Utilizes primary literature to explore the cellular and molecular basis of microbial pathogenesis caused by viruses, pathogenic bacteria and protozoan parasites. Alternate years. Spring.

MMG 330. Emerging Infectious Disease. 3 Credits.
Interdisciplinary approach to understanding the emergence, and re-emergence, of infectious diseases in a rapidly changing global environment. Historical, cultural, environmental and biological perspectives are incorporated into the analysis of emerging bacterial, viral and protozoal pathogens. Prerequisite: Introductory undergraduate course in Microbiology. Course in virology is recommended.

MMG 332. Critical Reading. 1 Credit.
Students will participate in group discussions to critically evaluate and interpret the experimental data from one assigned paper from the scientific literature per week. Prerequisite: Permission of Coordinator. Fall.

MMG 333. Genetics and Genomics. 3 Credits.
Integrated entry into both genome science and modern genetic analysis. Together, genetic and genomic information provide unprecedented insights into biological functions, pathways and systems. Emphasizes skills needed to access, organize and interpret emerging genomic information. Graduate students only. Prerequisite: Graduate enrollment in a program within the biomedical or biological sciences.

MMG 352. Protein: Nucleic Acid Interact. 3 Credits.
Structure of DNA and RNA, and the structure and assembly of nucleoprotein complexes will be described using examples from prokaryotes, yeast, viruses, and mammalian cells in culture. Prerequisite: MMG 211 or equivalent; AGBI 201 or BIOC 301; BIOC 302 or equivalent. Cross-listed with: BIOC 352. Alternate years. Spring.

MMG 391. Master's Thesis Research. 1-18 Credits.

MMG 393. Graduate Teaching Practicum. 3 Credits.
Required practicum for all Microbiology and Molecular Genetics Masters Students. Students will be exposed to and mentored in the fundamentals of undergraduate teaching and learning in the laboratory setting.

MMG 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

MMG 491. Doctoral Dissertation Research. 1-18 Credits.

MMG 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

MIDDLE LEVEL TEACHER EDUCATION (EDML)

Courses
EDML 207. Adole Lrng&Beh&Cog Perspect. 3 Credits.
In-depth examination of cognitive learning theory and its background in behavioral and other learning theories, with application to teaching in a middle or secondary setting. Prerequisite: Acceptance to Master of Arts in Teaching or EDML 171 or Instructor permission.

EDML 260. Teaching Young Adolescents. 3-6 Credits.
Focus on understanding and reflecting on an integrative and developmental approach to the design of middle level curriculum, as well as teaching in one area of specialization.

EDML 261. Mid Lev Teaching Practicum II. 3 Credits.
Teaching practicum on middle level team in one of two areas of academic concentration, acquiring knowledge of and skills in curriculum, pedagogy, and assessment. Pre/Co-requisite: Admission to Middle Level Professional Program.

EDML 270. Middle School Org & Pedagogy. 3-6 Credits.
Focuses on exploring theory and practice in responsive school organization for young adolescents, including interdisciplinary/ partner teaming, block scheduling, and teacher advisories, as well as teaching lessons in one area of specialization. Pre/co-requisite: EDML 024, EDML 056.
EDML 285. Middle Level Student Teaching. 9-12 Credits.
Full-time supervised student teaching internship as a member of a middle school team. Development of a professional portfolio as stipulated in the Middle Level Program Handbook. Pre/co-requisite: EDML 260, EDML 261, EDML 270, and Instructor permission.

EDML 286. Internship Support Seminar. 3 Credits.

EDML 287. Content Literacy in Mid Grades. 3 Credits.
Focus on the use of content and disciplinary literacy strategies, including multiliteracies, in middle level content areas. Pre/co-requisite: Minimum Junior standing.

MOLECULAR PHYSIOLOGY & BIOPHYSICS (MPBP)

Courses
MPBP 301. Human Physiology & Pharm I. 4 Credits.
An integrated examination of the physiology and pharmacology of the peripheral nervous, muscle and cardiovascular systems in the human body. Pre/co-requisites: CHEM 032 and CHEM 042 or equivalent, two semesters general physics, and two semesters calculus. May not be taken for credit with MPBP 306.

MPBP 302. Human Physiology & Pharm II. 4 Credits.
An integrated examination of the physiology and pharmacology of the endocrine, digestive, renal and respiratory systems in the human body. Pre/co-requisites: CHEM 032 and CHEM 042 or equivalent; two semesters general physics, two semesters calculus, MPBP 301 or Instructor permission. May not be taken for credit with MPBP 306.

MPBP 303. Critical Reading. 1 Credit.
Critical reading of the current literature, team taught by the faculty in the Dept. of Molecular Physiology & Biophysics, giving broad exposure to the expertise present in the department.

MPBP 306. Medical Physiology. 8 Credits.
Function in the whole human organism, and at the cellular, tissue, and organ levels, considered biologically and physically. Pre/co-requisite: Permission of Department Chair. May not be taken for credit with MPBP 301 or MPBP 302.

MPBP 308. Biometrics & Applied Statistic. 3 Credits.
The rationale and application of biostatistical methods in the biological, health and life sciences with emphasis on interpreting and reporting results. Prerequisite: STAT 141 or equivalent. Cross-listed with: BIOS 308, STAT 308.

MPBP 310. Molecular Control of the Cell. 3 Credits.
Examines the fundamental molecular mechanisms that control dynamic cellular processes. Advanced topics in cell biology will be explored from the single molecule to the whole tissue level with an emphasis on the coordination of complex molecular systems. Prerequisites: MPBP 301, BIOC 301, BIOC 302; Instructor permission.

MPBP 323. Biophysical Techniques. 4 Credits.

MPBP 325. Data Analysis & Presentation I. 2 Credits.
Develop graduate level skills in data analysis, reading, writing, teaching and presenting your own work and that of others (Part 1 of 2). Prerequisites: Graduate standing; Enrollment in BIOC 301 and CLBI 301. Cross-listed with: BIOC 325.

MPBP 326. Data Analysis & Presentation II. 2 Credits.
Develop graduate level skills in data analysis, reading, writing, teaching and presenting your own work and that of others (Part 2 of 2). Prerequisites: BIOC 301, CLBI 301; Graduate standing. Cross-listed with: BIOC 326.

MPBP 330. Biomedical Grantsmanship. 2 Credits.
Introduces graduate students in the biomedical life sciences to process of writing competitive research proposals for funding from federal and private agencies such as the National Institutes of Health (NIH).

MPBP 333. 3D Electron Microscopy & Img Prc. 1 Credit.

MPBP 381. Seminar. 1 Credit.
Presentation and discussion by advanced students, staff, and invited speakers, of current topics in physiology. Prerequisite: Department permission.

MPBP 390. Medical Master's Capstone. 2 Credits.
Students advance their fundamental knowledge in biochemistry, pharmacology, and physiology by addressing therapeutic applications in a discussion format. Students will choose and research current clinical problems and will communicate new molecular strategies through formal presentations. Prerequisites: Graduate Student standing in the Medical Science program; BIOC 301, MPBP 301, or Instructor permission.

MPBP 391. Master's Thesis Research. 1-18 Credits.

MPBP 395. Advanced Special Topics. 1-18 Credits.
Topics of interest to Graduate students beyond the scope of existing courses.

MPBP 491. Doctoral Dissertation Research. 1-18 Credits.

MPBP 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

MUSIC (MU)

See Schedule of Courses for specific titles.
Courses

MU 211. Senior Music History Project. 1 Credit.
Directed readings and research. Research project. Prerequisites: Music History concentration; Senior standing; Instructor permission.

MU 231. A & B Jazz Combos. 1-6 Credits.
Small groups (a rhythm section and three to five solo instruments) in which students improve their improvisational skills while learning jazz repertory.

MU 295. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

MU 296. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

NATURAL RESOURCES (NR)

Courses

NR 220. Landscape Ecology. 3 Credits.
The course examines the critical role of landscape pattern in determining ecological process and dynamics, as well as human-ecological interactions. Includes field labs. Prerequisites: NR 103 or BCOR 102; Senior/Graduate standing.

NR 228. Ecosystems Ecology. 3 Credits.
Examination of the structure and function of terrestrial ecosystems focusing on carbon and nutrient cycles. Laboratory sessions involve spatial modeling and data analysis. Prerequisites: NR 103, BCOR 102, PSS 161, or Graduate student standing. Cross-listed with: FOR 228.

NR 235. Legal Aspects Envir Planning. 3 Credits.
Comparison of environmental planning law at local, state, and national levels. Case studies in environmental and natural resource planning and land use controls. Prerequisite: Senior Standing.

NR 238. Ecological Landscape Design. 4 Credits.
Studio course synthesizing work from fields of landscape ecology and landscape design, exploring ecological design alternatives at multiple scales, and developing multifunctional landscape solutions. Prerequisites: Junior standing; PSS 137 or one course in ecology plus one course in design or drawing. Cross-listed with: CDAE 238, ENVS 238, PSS 238.

NR 242. Adv Geospatial Techniques. 1-3 Credits.
Advanced course encompassing a wide range of topics in GIS, remote sensing, GPS, modeling, and visualization designed to provide technical expertise in geospatial techniques. Prerequisite: NR 143, GEOG 184, NR 343, NR 146, NR 346, or GEOG 185.

NR 243. GIS Practicum. 3 Credits.
An applied course in geospatial technology with a focus on ESRI’s ArcGIS software suite. Prerequisite: NR 143 or NR 343.

NR 245. Integrating GIS & Statistics. 3 Credits.
Advanced approaches in integrating Geographic Information Systems (GIS) and statistical methods to analyze quantitatively spatial patterns and relationships. Prerequisites: Senior/Graduate standing; Either NR 143, GEOG 184, or NR 343 and either STAT 111, STAT 141, NR 140, or STAT 211.

NR 250. Limnology. 0 or 4 Credits.
Ecology of lakes and reservoirs, including their origin, physics, chemistry and biology, and the effects of anthropogenic perturbations. Field and laboratory experience. Prerequisites: BIOL 001 and BIOL 002 or BCOR 011 and BCOR 012, and CHEM 023 and CHEM 026 or CHEM 031 and CHEM 032, and NR 103 or BCOR 102.

NR 254. Adv Natural Resource Policy. 3 Credits.
Advanced seminar in environmental and natural resource policy. Prerequisites: NR 153 or ENVS 142 or POLS 130 or Graduate standing.

NR 255. Field Mthds in Water Resources. 3 Credits.
Techniques used in field assessment of water quality in rivers and lakes. Case studies on the LaPlatte River and Lake Champlain. Sampling strategies, field measurements, and data evaluation. Extensive field work. Prerequisite: NR 102.

NR 260. Wetlands Ecology & Mgmt. 3 Credits.
Structure, dynamics and values of natural and artificial wetlands; wetlands management and issues. Prerequisites: BIOL 001 and BIOL 002 or BCOR 011 and BCOR 012, and NR 103 or BCOR 102.

NR 262. Int’l Problems in NR Mgmt. 3 Credits.
Discussion of problems associated with the management of natural resources which have international implications. Topics may include deforestation, desertification, fisheries, wildlife, refuges, fuelwood, pollution. Prerequisite: Senior standing.

NR 265. Environment & Human Behavior. 3 Credits.
Applies social psychological frameworks--attitudes, exchange theory, symbolic interaction, group processes, social cognition, discourse theory--to help understand environmentally related behaviors, conflict, and management. Prerequisite: Junior standing.

NR 268. Soil Ecology. 0 or 4 Credits.
Underlying concepts and theory of modern soil ecology will be reviewed including spatial and temporal distributions, sampling methods, biogeochemical cycles, and ecological functions of soil. Prerequisites: BCOR 102 or NR 103, Prerequisites: BCOR 102 or NR 103, and PSS 161. Cross-listed with: PSS 268.

NR 270. Toxic&Hazrd Subst in Srf Water. 3 Credits.
The fate of toxic and hazardous pollutants, including trace elements and organics, in surface waters; effects on human health and aquatic biota. Prerequisites: BIOL 001, and CHEM 023 and CHEM 042, or CHEM 102; Senior standing.

NR 275. NR Planning: Theory & Methods. 3 Credits.
Studies planning methods appropriate to protection and use of scenic, recreational, forest, agriculture, and historic resources and ecologically sensitive areas. Prerequisite: Senior standing.

NR 276. Water Quality Anlys & Interp. 0 or 3 Credits.
Selected aspects of water chemistry and bioassay as related to surface and ground waters. Laboratory analysis of water quality parameters and data interpretation. Prerequisite: Senior standing.
NR 279. Watershed Management Hydrology. 0 or 3 Credits.
Fundamental elements of hydrology and contaminant transport in watersheds. Application of dynamic simulation techniques. Discussion of new technologies for watershed management. Prerequisites: NR 170; Senior standing.

NR 280. Stream Ecology. 0 or 4 Credits.
Ecology of streams including hydrodynamics, morphology, sediment transport, chemistry, biology and human impacts. Field and laboratory experience. Prerequisites: BIOL 001 and BIOL 002 or BCOR 011 and BCOR 012, and CHEM 023 and CHEM 026 or CHEM 031 and CHEM 032, and NR 103 or BCOR 102.

NR 288. Ecol Design & Living Technol. 3 Credits.
The course explores the potential for ecological design to shape a sustainable future. It analyzes living technologies for food production, waste management and environmental restoration. Prerequisite: Junior standing.

NR 289. Advanced Ecological Design. 3 Credits.
A problem-based, cross-disciplinary design course in which existing conditions are integrated with the redesign of place and system in alignment with ecological design principles. Prerequisite: NR 288.

NR 306. Envisioning a Sust Future. 2 Credits.
Seminar orienting graduate students to RSENPR and providing frameworks for collaborative leadership, whole systems thinking, and intercultural competency.

NR 311. Leadership for Sustainability. 3 Credits.
Provides an experiential and theoretical orientation to foundational practices, principles, and skills of sustainability leadership with an emphasis on ecological/systems thinking, sustainability, and leadership.

NR 312. Power Privlge & Catalyz Change. 3 Credits.
Focuses on leadership skills and systems frameworks for engaging with issues of diversity, power, and privilege and the implications of these topics on leaders’ capacity. Designed to meet the RSENPR graduate diversity requirement. Prerequisite: NR 311.

NR 329. Ecology for Sustainability. 3 Credits.
Graduate ecology course for students without a prior background in ecology. Course covers basic ecological concepts that inform policy, planning, analysis, and decision-making.

NR 333. Professional Writing Essential. 1 Credit.
Basics of good writing, essay and report writing, as published in both popular and professional journals in the environment and natural resources. Prerequisite: Graduate standing. Cross-listed with: PBIO 333.

NR 334. Professional Writing AdvTopics. 1 Credit.
Writing workshop that explores essay and report writing, as published in both popular and professional journals that examine the natural world and its resources. Prerequisite: Graduate standing. Cross-listed with: PBIO 334.

NR 341. Ecological Economic Theory. 3 Credits.
A transdisciplinary study of the economic system as embedded and interdependent on social institutions and environmental systems. Prerequisite: Graduate standing.

NR 342. Ecosystem Services. 3 Credits.
Examines the economic and other benefits nature provides to people. Covers the ecological foundations of quantifying ecosystem services, the economics of valuing them, and the practical issues involved with putting them to work for conservation. Prerequisites: Graduate standing. Instructor permission.

NR 343. Fndmtls of Geog Info Systems. 0 or 3 Credits.
Concepts and methods in Geographic Information Systems (GIS) presented at an accelerated pace for Graduate students using ArcGIS software. Prerequisite: Graduate standing.

NR 346. Digital Image Processing. 2 Credits.
Principles and applications of digital image processing of remotely sensed imagery. Hands-on analyses of satellite imagery will address environmental issues using ERDAS Imagine software. Prerequisite: Graduate standing.

NR 351. Ecological Economics Methods. 3 Credits.
A survey of frameworks and tools used to analyze and understand linked social and natural systems. Prerequisite: Graduate standing.

NR 352. Ecological Economics Practice. 3 Credits.
An applied field course drawing from Ecological Economics theory and methods to help solve real-world problems at the interface among ecological, social, and economic systems. Prerequisite: Graduate standing.

NR 354. Seminar:Envrmntl Policy & Mgmt. 3 Credits.
Seminar examining contemporary environmental policy at local, state, national, and international levels; policy formulation, implementation and design relative to current environmental problems. Prerequisite: Graduate standing.

NR 356. Conservation, Systems&Sustain. 3 Credits.
Conservation concepts and practice, viewed through the lens of history, systems, and sustainability. From site to landscape scale, with case studies and practitioner interviews. Prerequisite: Graduate standing.

NR 360. Environmental Sociology. 3 Credits.
An in-depth exploration of how sociologists understand the relationship between a) the physical environment’s effects on society, and b) society’s effects on the natural environment. Prerequisite: Graduate standing. Fall. Alternate years.

NR 361. Politic:Landscape,Place,Nature. 2 Credits.
Seminar exploring the social and political construction of nature, emphasizing how natural resources and environment are defined through social relationships in particular landscapes and places. Prerequisite: Graduate standing.

NR 362. Leadership Relevancy 21st Cent. 3 Credits.
Perspectives and tools for working on 21st challenges and opportunities. Targets public land managers. Week-long course in Vermont followed by online presentations, readings, online discussions. Part of NPS Graduate Certificate. Prerequisite: Graduate standing.
NR 375. NR Planning: Laboratory. 1 Credit.
Experiential laboratory applying natural resource planning theory and methods to local or regional issues. Students conduct a planning exercise for a town or region. Co-requisite: Concurrent enrollment in NR 275.

NR 376. Graduate Teaching Practicum. 2 Credits.
Natural Resource teaching practicum for doctoral students in the Rubenstein School. Course is required if students are following the academic option. Should be taken concurrently or one semester in advance of completion of the doctoral teaching requirement. Prerequisite: Doctoral standing.

NR 377. Land Use Policy & Economics. 3 Credits.
Economic and social forces that drive urban and suburban land use patterns, such as urban sprawl, and the policy mechanisms designed to intervene in those processes. Prerequisite: Graduate standing. Cross-listed with: FOR 382.

NR 378. Integrating Analyses NR Issues. 3 Credits.
Comparison of epistemologies and ontologies of natural resource disciplines. Applications from fields such as ecology, policy, sociology, economics, engineering, and ethics. Prerequisite: Graduate standing.

NR 380. Seminar in Natural Resources. 0.5-2 Credits.
Presentation and discussion of advanced problems, research, and current topics in natural resources by faculty, graduate students, and outside guest speakers.

NR 382. Seminar in Research Planning. 1 Credit.
Discussions of the planning and activities associated with Graduate student projects and research. Prerequisite: Graduate standing. Cross-listed with: FOR 382.

NR 384. Independent Study in NR. 1-18 Credits.
Readings, with conferences, to provide graduate students with backgrounds and specialized knowledge relating to an area in which an appropriate course is not offered.

NR 387. Education for Sustainability Sem. 3 Credits.
Focuses on creating conditions for learning our way toward a more sustainable future. Offers tangible skills, pedagogical approaches and theoretical frameworks that can immediately be applied in schools and other learning environments.

NR 388. Ecological Leadership Seminar. 3 Credits.
Explores emerging topics and themes related to the theory and practice of ecological leadership. Can be taken in successive semesters (up to 2 times), as learning module topics will change.

NR 389. Ecological Leadership Practicum. 3 Credits.
An advanced exploration of ecological/systems thinking, sustainability, leadership skills, and leveraging change; offering students the opportunity to integrate these concepts and skills through an applied leadership practicum. Prerequisite: NR 388.

NR 390. Internship. 1-18 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion.

NR 391. Master's Thesis Research. 1-18 Credits.
NR 392. Master's Project Research. 1-18 Credits.
NR 395. Advanced Special Topics. 1-18 Credits.
Graduate topics and material that may eventually develop into a regular course offering.

NR 491. Doctoral Dissertation Research. 1-18 Credits.
NR 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

NEUROSCIENCE (NSCI)

Courses
NSCI 222. Cellular Neurophysiology. 3 Credits.
Fundamentals of cellular neurophysiology through lecture, independent student reading and faculty-led group discussions of journal articles. Prerequisites: NSCI 110 or, NSCI 111 and NSCI 112, or Instructor permission.

NSCI 225. Human Neuroanatomy. 0 or 3 Credits.
Functional anatomy of the human nervous system and its cells. Focus on both peripheral and central nervous system. Lectures and laboratory (gross and microscopic anatomy). Prerequisite: Instructor permission.

NSCI 230. Comparative Neurobiology. 3 Credits.
Examination of the cellular mechanisms that underlie selective motor and sensory abilities, and unique behaviors that have evolved in various species. Discussion and student presentations. Prerequisite: ASCI 141 or BIOL 106 or NSCI 111 or PSYS 115 or Instructor permission.

NSCI 280. Glia: Not Just Neuron Glue. 3 Credits.
Interdisciplinary course in which students engage in a focused, in-depth exploration of how glial cells contribute to neurological and psychiatric disorders. Prerequisites: NSCI 111; Course director approval. Pre/Co-requisites: NSCI 111; Course Director permission.

NSCI 300. Intro Functional Neuroimaging. 3 Credits.
Functional neuroimaging may be the most exciting recent development in cognitive neuroscience. Students will learn about neuroimaging, and work in small groups to develop experiments, acquire and analyze functional MRI data an MRI scanner.

NSCI 302. Neuroscience. 3 Credits.
Functional anatomy of the human nervous system. Lectures and laboratory providing learning experience with dissected specimens, gross and microscopic anatomy. Incorporates clinical information from physician-scientists. Prerequisite: Physical Therapy major or Instructor permission.

NSCI 306. Techniques in Neurobiology. 3 Credits.
Discussion of techniques used to study the nervous system. Experience with light, fluorescence, electron microscopy; microsurgical procedures; electrophysiological stimulating, recording techniques; neuronal tracing techniques. Prerequisite: Permission of the Instructor.
**Nursing & Health Sciences (NH)**

**NCF 320. Developmental Neurobiology. 3 Credits.**
Provides fundamental knowledge of cell-to-cell interactions necessary for proper development and organization of the nervous system. Topics include pattern formation, neuronal differentiation, axon guidance, and target interactions. Prerequisite: Permission of the Instructor. Alternate years.

**NCF 323. Neurochemistry. 3 Credits.**
Biochemistry of the nervous system. Topics include ion channels, synaptic function, neurotransmitters and neuropeptides, signal transduction, and hormones in brain function. Prerequisite: Permission of the Instructor.

**NCF 326. Basic Sci-Neurologic Disease. 3 Credits.**
In-depth examination of basic mechanisms and clinical aspects of a related subset of neurological disorders, e.g. neurodegenerative disease or disorders of neurotransmission. Disease group changes every year. Prerequisite: Advanced Graduate Students, Neuroscience Faculty and Residents in Neurology, Neurosurgery and Psychology.

**NCF 327. Resp Conduct in Biomed Rsch. 1 Credit.**
Topics in Scientific Integrity surrounding responsible conduct and practices in biomedical research. Prerequisites: Advanced Graduate students, postdoctoral fellows and assistant professors in the biological or biomedical sciences.

**NCF 328. Techniques in Microscopy. 3 Credits.**
Topics shall include practical background in microscopy, including brightfield, epifluorescence, confocal, multi-photon, deconvolution, atomic force and electron microscopy. Prerequisite: Instructor permission.

**NCF 329. Topics in Excitable Membranes. 2 Credits.**
This course is a graduate course designed to introduce the fundamentals of cellular electrophysiology through independent student reading and faculty-led group discussions of journal articles. Prerequisite: Instructor permission.

**NCF 381. Seminar in Neuroscience. 1 Credit.**
Research presentations and critical review of the literature in various areas of anatomical and neurobiological sciences.

**NCF 382. Seminar in Neuroscience. 1 Credit.**
Research presentations and critical review of the literature in various areas of anatomical and neurobiological sciences.

**NCF 391. Master's Thesis Research. 1-18 Credits.**
See Schedule of Courses for specific titles. Prerequisite: Instructor permission.

**NCF 491. Doctoral Dissertation Research. 1-18 Credits.**
See Schedule of Courses for specific titles.

**NCF 496. Advanced Special Topics. 1-18 Credits.**
See Schedule of Courses for specific titles.

**NUTRITION AND FOOD SCIENCES (NFS)**

**Courses**

**NFS 203. Food Microbiology. 3 Credits.**
Desirable and undesirable activities of bacteria in foods. Mechanisms of food-borne infection and intoxication. Laboratory methods to enumerate and identify microorganisms associated with food. Prerequisite: NFS 153 or Instructor permission. Co-requisite: NFS 213.

**NFS 205. Functional Foods/Prncpl & Tech. 3 Credits.**
Examines the constituents that make food products functional and provides laboratory techniques needed to create a functional food. Prerequisites: NFS 153, NFS 154, or Instructor permission.

**NFS 223. Nutrition Educ & Counseling. 3 Credits.**
Use of appropriate education theory, techniques, and media in nutrition education and counseling theories and negotiation, interviewing and counseling skills in individual and group counseling. Prereq/requisites: NFS Prerequisites: NFS 043, NFS 053, NFS 054, NFS 143.

**NFS 243. Advanced Nutrition. 3 Credits.**
Study of nutrients and their specific functions in metabolic process integrating cellular physiology, biochemistry, and nutrition. Prerequisites: NFS 043, ANFS 019, NFS 183 or PBIO 185; minimum Junior standing. Spring.

**NFS 244. Nutr in Hlth & Disease Prvntn. 3 Credits.**
Examination of dietary planning, nutrition assessment, genetics, drug-nutrient interactions, CAM therapies and nutrition related to health and prevention of disease. Pre/co-requisites: NFS 053, NFS 054, NFS 143; minimum Junior standing.

**NFS 250. Foodservice Systems. 4 Credits.**
Emphasis on the foodservice system model for understanding quality control; food procurement, production, and marketing; management and evaluation of foodservice facilities, human and financial resources. Prerequisites: BSAD 060 or CDAE 158; BSAD 120; minimum Junior standing; Dietetics or Nutrition and Food Sciences, and Dietetics, Nutrition and Food Sciences majors only.
NFS 253. Food Regulation. 3 Credits.
Comprehensive examination of U.S. food laws and regulations and their relationships to the safety of the U.S. food supply. Focus on how food-related laws and regulations are enacted and enforced, through detailed examination of selected food regulation topics. Prerequisite: NFS 153 or equivalent course/training with Instructor permission.

NFS 260. Diet and Disease. 3 Credits.
Examination of the physiologic, biochemical, and psychosocial basis of several disease states and the application of medical nutrition therapy in treatment. Prerequisite: NFS 053, NFS 143, NFS 243; Senior standing.

NFS 262. Community Nutrition. 3 Credits.
Study of U.S. public health nutrition policies, programs and practices. Emphasis on community nutrition program planning including needs assessment, intervention development and evaluation. Prerequisite: Minimum Junior or Graduate standing. Spring.

NFS 263. Nutritional Biochemistry. 3 Credits.
Comprehensive study of metabolism of carbohydrates, lipids, and protein emphasizing diet induced, hormone mediated alterations in metabolism (e.g. starvation and obesity). Prerequisite: NFS 243 or Instructor permission. Spring.

NFS 295. Advanced Special Topics. 1-18 Credits.
Lectures, laboratories, readings, or projects relating to contemporary areas of study. Credits negotiable. Enrollment may be more than once, maximum of twelve hours in NFS 195 and NFS 295 combined. Prerequisite: Department permission.

NFS 296. Internship. 1-18 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion. Prerequisite: Departmental permission.

NFS 300. MSD Journal Club. 1 Credit.
In-depth critical evaluation of original scientific literature in content area. Class will meet to discuss current journal articles and literature reviews prepared by students. Prerequisite: NFS 290, Pre/co-requisites: NFS 253, MS D student.

NFS 360. Rsch Meth Nutr & Food Sciences. 3 Credits.
Advanced research methods, including grant preparation, IRB requirements, data analysis and presentation, and selected topics in advanced nutritional and food sciences. Pre/Co-requisite: Instructor permission.

NFS 390. Master's Project Research. 1-18 Credits.
Final project under the direction of a graduate faculty mentor. Prerequisite: Nutrition and Food Sciences non-thesis Graduate Student, Instructor permission.

NFS 391. Master's Thesis Research. 1-18 Credits.
Prerequisite: Master of Science in Dietetics student.

NFS 392. Evidence-based Practice Prjct. 1-2 Credits.
On site identification, review of literature for background and possible solutions data collection and analysis, and writing and presenting the results and conclusions of a research problem. Pre/co-requisites: NFS 360, Pre/co-requisites: NFS 360, MS D student.

NFS 395. Special Topics. 1-18 Credits.

NFS 396. Advanced Special Topics. 1-18 Credits.

OBSTETRICS & GYNECOLOGY (OBGY) Courses

OBGY 200. Understanding Human Pregnancy. 3 Credits.
Healthy pregnancy outcome depends on a confluence of sexual, social and biological processes. Explores the female sexual response, how a child is conceived (or not), maternal gestational physiology and embryology, and medical management of common diseases. Prerequisite: ANPS 019 and ANPS 020, or ASCI 141, or BIOL 255 or Instructor permission.

OBGY 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

ORTHOPEDIC SURGERY (ORTH) Courses

ORTH 381. Rdgs & Rsch:Musc Biomechanics. 1 Credit.
Intended for Graduate Students doing thesis or dissertation work in Biomechanics. Class will meet to discuss current journal articles and literature reviews prepared by students. Prerequisite: Instructor Permission.

ORTH 382. Rdgs & Rsch:Musc Biomechanics. 1 Credit.
Intended for Graduate Students doing thesis or dissertation work in biomechanics. Class will meet to discuss current journal articles and literature reviews prepared by students. Prerequisite: Instructor Permission.
ORTH 383. Rdgs & Rsch:Musc Biomechanics. 1 Credit.
Intended for Graduate Students doing thesis or dissertation work in biomechanics. Class will meet to discuss current journal articles and literature reviews prepared by students. Prerequisite: Instructor Permission.

ORTH 384. Rdgs & Rsch:Musc Biomechanics. 1 Credit.
Intended for Graduate Students doing thesis or dissertation work in biomechanics. Class will meet to discuss current journal articles and literature reviews prepared by students. Prerequisite: Instructor Permission.

ORTH 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PARKS, RECREATION AND TOURISM (PRT)

Courses
PRT 235. Outdoor Recreation Planning. 3 Credits.
Planning large land areas for outdoor recreation use. Emphasis on the planning process relative to the leisure time use of natural resources. Prerequisites: Junior standing; Parks, Recreation and Tourism major or minor.

PRT 240. Park and Wilderness Management. 3 Credits.
History, philosophy, and management of wilderness, national parks, and related areas. Prerequisites: Junior standing; Parks, Recreation and Tourism major or minor.

PRT 255. Environmental Interpretation. 3 Credits.
Philosophy, principles, and techniques of communicating environmental values, natural history processes, and cultural features to recreation visitors through the use of interpretive media. Prerequisites: Junior standing; Parks, Recreation and Tourism major or minor.

PATHOLOGY (PATH)

Courses
PATH 295. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PATH 303. Translational Pathology. 3 Credits.
A course providing an introduction to anatomic and clinical pathology, classes and hands-on training in essential pathology translational research techniques and exposure to their clinical laboratory applications. Prerequisites: Instructor approval.

PATH 304. Human Molecular Genetics. 3 Credits.
Advanced survey of hereditary and molecular genetics and genomics in human health and disease. Prerequisite: Graduate standing; or minimum Junior standing and BIOL 212.

PATH 305. Molecular Mech Environ Disease. 3 Credits.
Introductory course on molecular and cellular pathways of disease induction and development. Emphasis on environmental diseases. For graduate students and postdoctoral fellows and undergraduates with permission of course director. Alternate years.

PATH 306. Pathobiology of Disease. 1 Credit.
Computer-assisted basic pathology series with emphasis on skin, lung, brain, and digestive tract. Alternate years with PATH 305.

PATH 325. Genetics for Clinicians. 3 Credits.
Provides an overview of contemporary human genetics and genomics with application to clinical practice. Prerequisite: Graduate standing. Cross-listed with: GRNS 325.

PATH 330. Pathology Rotations. 3-9 Credits.
Laboratory practicum for Pathology Master's students. Engages students in clinical and anatomic pathology laboratory rotations under supervision of attending physicians and senior residents in the University of Vermont Medical Center Pathology Department.

PATH 391. Master's Thesis Research. 1-18 Credits.

PATH 395. Advanced Special Topics. 1-18 Credits.
Special Topics in Pathology. Prerequisites: Graduate Students, Department Permission Immunology (MMG 223) desirable. Alternate year course with PATH 305.

PHARMACOLOGY (PHRM)

Courses
PHRM 200. Medical Cannabis. 3 Credits.
An introduction to the pharmacology underlying recreational and medicinal uses of Cannabis. Focuses on Cannabis taxonomy, chemistry of cannabinoids, physiological effects, and emerging therapeutic applications. Discusses historical, political and socio-economic influences on medical marijuana legislation. Prerequisite: BCOR 103, NSCI 110, NSCI 111 or PHRM 201, or Instructor permission.

PHRM 201. Introduction to Pharmacology. 3 Credits.
This course will focus on biochemical and physiological actions of prototype drugs used in the treatment and prevention of human diseases. Prerequisite: Introductory courses in Biology and Organic Chemistry.

PHRM 240. Molecules & Medicine. 3 Credits.
This course conveys an understanding about drug design and the molecular mechanisms by which drugs act in the body. It highlights the importance of medicinal chemistry as it overlaps with the disciplines of chemistry, biochemistry, microbiology, cell biology, and pharmacology. Prerequisites: Intro to Organic Chemistry, Intro to Biology; Permission.

PHRM 272. Toxicology. 3 Credits.
This course is intended to provide an understanding of the chemical, biochemical and physiological factors that determine the pathological effects of chemicals in living systems. Prerequisites: Organic chemistry, background in Biology, or Instructor permission.

PHRM 290. Topics Molecular&Cell Pharm. 3 Credits.
Focuses on basic principles, drug interactions with receptors, membranes, synapses, neurotransmitters, macromoles, cytoskeleton, ion channels and pumps, and mechanisms of drug resistance. Prerequisite: Introductory course in organic chemistry, background in physiology or health sciences.
PHRM 301. Medical Pharmacology. 6 Credits.
All topics for a conventional course in pharmacology for medical students or health science students. General pharmacokinetic and pharmacodynamic principles, treatment rationales and adverse effects.

PHRM 302. Pharmacological Techniques. 1-4 Credits.
Experiments conducted under supervision in the areas of drug metabolism, modes of drug action, physicochemical properties of drugs, bioassay, and toxicology. Thesis masters students limited to three credits.

PHRM 305. Milestones in Pharmacology. 2 Credits.
A critical readings class where students read and present landmark pharmacology papers and link them to modern experiments and clinical applications. Co-requisites: PHRM 201 or Graduate standing.

PHRM 306. Integrative Physiol. & Pharm.. 3 Credits.
Intended for students pursuing careers in basic scientific research or health-related fields, designed to combine general physiological principles with examples of disease-based pathophysiology and targeted pharmacological approaches. Case studies will emphasize the impact of these processes on human function. Pre/Co-requisites: Two semesters of chemistry, two semesters of physics, and a background in biology/physiology or health sciences.

PHRM 372. Special Topics. 1-3 Credits.
Topics of current interest and importance in pharmacology are considered in depth through presentations by staff, students, and visiting scientists. Prerequisite: Instructor Permission. Credit variable.

PHRM 373. Readings in Pharmacology. 2 Credits.
Intensive directed reading in one area of pharmacology. Pharmacology students must choose a topic outside thesis research area. Term paper and seminar on selected topic required. Prerequisite: Instructor Permission.

PHRM 381. Seminar. 1 Credit.
Current developments in pharmacology are presented for discussion by students. Prerequisite: Instructor Permission.

PHRM 390. Medical Master's Capstone. 2 Credits.
Students advance their fundamental knowledge in biochemistry, pharmacology, and physiology by addressing therapeutic applications in a discussion format. Students will choose and research current clinical problems and will communicate new molecular strategies through formal presentations. Prerequisites: Graduate Student standing in Medical Science program; BIOC 301, MPBP 301, or Instructor permission.

PHRM 391. Master's Thesis Research. 1-12 Credits.

PHRM 396. Advanced Special Topics. 1-18 Credits.
See schedule of courses for specific titles.

PHRM 397. Advanced Pharmacology Research. 1-18 Credits.
Student work on individual or small team research projects under the supervision of a faculty member, for which credit is awarded.

PHRM 491. Doctoral Dissertation Research. 1-12 Credits.

PHRM 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PHILOSOPHY (PHIL)

Courses

PHIL 217. Philosophy of Language. 3 Credits.
Philosophical study of the nature of language. May be repeated for credit with different content. Prerequisite: One course in Philosophy at the 100-level. Recommended: PHIL 013.

PHIL 221. D2: Topics in Chinese Phil. 3 Credits.
Detailed examination of a classical Chinese philosophical text or school. Prerequisite: PHIL 121.

PHIL 235. Topics in Phil of Religion. 3 Credits.
Advanced study of such issues as the metaphysics of religion, the epistemology of religious belief, philosophy and faith, religion and science, and religion and ethics. May be repeated for credit with different content. Prerequisite: PHIL 101, PHIL 102, or PHIL 135.

PHIL 240. Contemporary Ethical Theory. 3 Credits.
In-depth study of metaethics, emphasizing recent work. Topics include moral objectivity, moral language, moral epistemology, and the relationship between morality and reasons. May be repeated for credit with different content. Prerequisite: One course in Philosophy at the 100-level.

PHIL 241. Contemp Social&Political Phil. 3 Credits.
The ideas of leading contemporary philosophers concerning freedom, tolerance, economic justice, international relations, and the relationship between the individual, the community and the state. May be repeated for credit with different content. Prerequisite: PHIL 140, PHIL 142, or PHIL 144.

PHIL 295. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PHIL 296. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PHIL 297. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion. Prerequisite: an appropriate 200-level course in Philosophy.

PHIL 298. Undergraduate Research. 1-18 Credits.
Undergraduate student work on individual or small team research projects under the supervision of a faculty member, for which credit is awarded. Offered at department discretion. Prerequisite: an appropriate 200-level course in Philosophy.

PHYSICAL EDUCATION-PROF (EDPE)

Courses

EDPE 200. Contemporary Issues. 1-6 Credits.
Designed so that its content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Prerequisite: Twelve hours in education and related areas.
EDPE 201. Admin of Athletic Programs. 3 Credits.
Background for effective administration of the athletic program of schools. Include scheduling, budgeting, management, equipment, policy, public relations, and education justification. Prerequisite: Twelve hours of education and Psychology.

EDPE 203. Principles of Physical Ed. 3 Credits.
Principles basic to sound philosophy of physical education for appraisal of historical development; relationship to health education, recreation, and other areas; foundation and functions of physical education. Prerequisite: Admission to the program and Instructor permission.

EDPE 220. Sport in Society. 3 Credits.
Examines sport as a social institution, emphasizing interrelationships between sport and the social context in which it exists; analyzes functions and dysfunctions of sport in contemporary society.

EDPE 241. Sem in Phys Educ & Athletics. 2-4 Credits.
Examination and analysis of contemporary issues and trends in physical education and athletics not especially appropriate within the boundaries of an existing course. Prerequisite: Twelve hours in physical education and related areas.

EDPE 266. Ex Prescrip:Sprt,Hlth,Fit,Perf. 3 Credits.
Course covers basic concepts of exercise prescription and exercise program design. Particular attention is paid to individualization of exercise program to meet participant needs.

EDPE 267. Sci Strength Training&Condtng. 3 Credits.
Course focuses on physiology of muscle adaptation following resistance or aerobic training. Particular attention is paid to specificity of metabolic adaptation for individual sports.

EDPE 295. Lab Experience in Education. 1-12 Credits.
Supervised field work designed to give students experience in specialized areas for their professional development. Prerequisite: Permission of the Coordinator of Professional Laboratory Experiences.

EDPE 391. Master’s Thesis Research. 1-12 Credits.
Thesis topic must be approved by a faculty committee.

EDPE 397. Problems in Education. 1-6 Credits.
Individual work on a research problem selected by the student in consultation with a staff member. Prerequisite: Twelve hours in education and related areas; endorsement by a sponsoring faculty member.

PHYSICAL THERAPY (PT)

Courses

PT 303. Hlth Promotion & Disease Prvnt. 3 Credits.
Examines the value of and barriers to health promotion, health protection, and disease prevention, factors that influence personal health decisions, and preventive interventions. Prerequisite: Doctor of Physical Therapy students only.

PT 307. Pro Sem 2: Prep for PT Practice. 1 Credit.
Examines selected professional topics including the development of reflective practices and self-assessment skills. Health literacy is also explored in preparation for clinical practice. Prerequisite: PT 306 or Instructor permission; Doctor of Physical Therapy students and APTA members only.

PT 308. Pro Sem3: Ethics & Career Prep. 1 Credit.
Utilizes frameworks to analyze ethical issues in healthcare. Topics also include preparation for the national PT examination, professional license issues, continuing competence expectations and career planning. Prerequisite: PT 307 or Instructor permission; Doctor of Physical Therapy students and APTA members only.

PT 329. Knowl Imp Trans & Exch of EBPT. 1 Credit.
Develops skills to disseminate evidence from the scientific literature to facilitate knowledge transfer and exchange. The field of implementation science will also be introduced. Prerequisite: PT 322 or PT 328 or equivalent.

PT 330. Psychosocial Issues in Health. 3 Credits.
Psychosocial dimensions of health, illness and disability will be examined from lifespan and multicultural perspectives. Pre/co-requisites: Psychology course; enrolled as DPT student.

PT 331. Hlth Care Plcy & Pract Mgmt PT. 3 Credits.
Explores the structure and function of physical therapy practice management and health care policy and strategies for changing at state and national levels. Pre/co-requisite: Doctor of Physical Therapy student.

PT 344. Patient Mgmt Musculoskeletal 1. 8 Credits.
Lecture/Lab experiences in which students will apply fundamental biomechanical and kinesiology principles of the trunk, spine, and extremities. Prerequisites: PT 305, PT 318, PT 340; Doctor of Physical Therapy student.

PT 345. Patient Mgt-Neuromuscular 1. 6 Credits.
Lecture and laboratory experiences re evidence-based medical and physical therapy management of adults with neuromuscular conditions including stroke, multiple sclerosis, and spinal cord injury. Prerequisites: NSCI 302, PT 305, PT 319; Doctor of Physical Therapy student.

PT 346. Patient Mgt-Neuromuscular 2. 5 Credits.
Lecture and laboratory experiences re evidence-based medical and physical therapy management of children with neuromuscular conditions such as cerebral palsy and adults with developmental disabilities. Prerequisites: PT 345; Doctor of Physical Therapy student.

PT 347. Patient Mgt:Cardiopulmonary. 4 Credits.
Explores disease risk and prevention, as well as medical, surgical, pharmacological, psychological, and physical therapies in the management of individuals with cardiopulmonary related diseases. Prerequisites: PT 305, PT 340; Doctor of Physical Therapy student.

PT 348. Patient Mgt:Medical/Surgical. 4 Credits.
Explores medical, surgical, pharmacological, psychological, and physical therapies in the management of individuals with vascular, integumentary, lymphatic disorders and cancer. Pre/co-requisites: PT 305, PT 347; DPT student.
PT 349. Patient Mgt: Musculoskeletal 2. 4 Credits.
Lecture/lab applying foundational and advanced biomechanical, neurophysiological, kinesiological, and anatomical principles of the trunk, TMJ, spine, and extremities. Pre/co-requisites: PT 242; Enrolled as DPT student.

PT 360. Integrated Patient Mgmt Sem. 1 Credit.
Integrates information learned in prior clinical and foundational science courses, as well as contemporary research findings, into a comprehensive model of physical therapy for individuals with complex and multi-system conditions. Pre/co-requisites: DPT student standing; successful completion of all previous DPT courses.

PT 371. Clinical Internship 2. 5 Credits.
Full-time (ten weeks) Clinical Education Internship in various practice settings including outpatient, acute care, rehabilitation, home health, pediatric, long term care and specialty practices. Pre/co-requisite: Completion of all academic courses in DPT curriculum.

PT 372. Clinical Internship 3A. 2 Credits.
Full-time (four weeks) Clinical Education Internship in various practice settings including outpatient, acute care, rehabilitation, home health, pediatric, long term care and specialty practices. Pre/co-requisite: Completion of all academic courses in DPT curriculum.

PT 373. Clinical Internship 3B. 1 Credit.
Full-time (two weeks) Clinical Education Internship in various practice settings including outpatient, acute care, rehabilitation, home health, pediatric, long term care and specialty practices. Pre/co-requisite: Completion of all academic courses in DPT curriculum.

PT 374. Clinical Internship 3C. 2 Credits.
Full-time (four weeks) Clinical Education Internship in various practice settings including outpatient, acute care, rehabilitation, home health, pediatric, long term care and specialty practices. Pre/co-requisite: Completion of all academic courses in DPT curriculum.

PT 375. Clinical Internship 4. 5 Credits.
Full-time (ten weeks) Clinical Education Internship in various practice settings including outpatient, acute care, rehabilitation, home health, pediatric, long term care and specialty practices. Pre/co-requisite: Completion of all academic courses in DPT curriculum.

PT 422. Research Proj- Systematic Rvw. 2 Credits.
Develops advanced skills in critically analyzing research literature, including systematic reviews and clinical practice guidelines. Students analyze clinical data and apply results to clinical decision-making. Prerequisite: PT 420.

PT 428. Research Pro- Non systematic rvw. 2 Credits.
Students work with faculty member to assist in research, applying previously learned skills in critical appraisal, library searches, research methods and writing. Prerequisite: PT 420. Co-requisite: Doctor of Physical Therapy student.

PT 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific title.

PHYSICS (PHYS)

Courses

PHYS 201. Experimental Physics I. 3 Credits.
Experiments in classical and modern physics. Prerequisites: PHYS 128; MATH 121; Junior standing.

PHYS 202. Experimental Physics II. 3 Credits.
Experiments in classical and modern physics. Prerequisites: PHYS 128; MATH 121; Junior standing.

PHYS 211. Classical Mechanics. 3 Credits.
Newtonian dynamics of particles and systems of particles, with applications to problems of special importance, such as driven and coupled harmonic oscillators and central field trajectories. Prerequisites: PHYS 152, MATH 121.

PHYS 213. Electricity & Magnetism. 3 Credits.
Fundamental principles of electricity and magnetism; electrostatic fields, and magnetic fields of steady currents. Electric and magnetic properties of matter and electromagnetic energy. Prerequisites: PHYS 152 or PHYS 125 and MATH 121. Credit not given for more than one of PHYS 213 or EE 141.

PHYS 214. Electromagnetism. 3 Credits.
Introduction to time dependent electromagnetic fields. Maxwell’s equations in vacuum and in matter. Electromagnetic waves and radiation. Prerequisite: PHYS 213. Credit not given for more than one of PHYS 214 or EE 241.

PHYS 222. Biological Physics. 3 Credits.
Physical laws, processes, and interactions pertaining to biological systems. Prerequisites: PHYS 012 or PHYS 152, MATH 121.

PHYS 242. Intro to Solid State Physics. 3 Credits.
Introduction to crystal structures, reciprocal lattices, lattice vibrations. Thermal properties of solids and free electron theory of metals and semiconductors. Elementary band theory and introduction to electronic transport theory. Prerequisite: PHYS 128.

PHYS 257. Modern Astrophysics. 3 Credits.
Stellar structure and evolution, compact objects, the interstellar medium, galactic structure, gravitational theory, and cosmology, the formation of our solar system and terrestrial life. Prerequisite: One 100-level course in physical science or engineering. Cross-listed with: ASTR 257.

PHYS 258. Relativity. 3 Credits.
Development of Einstein’s theory of special relativity. Lorentz transformation, time dilation, length contraction, mass variation, relative velocities. Introduction to four-dimensional space. Concepts of general relativity. Applications selected from astrophysics, elementary particles, etc. Prerequisite: PHYS 128.

PHYS 264. Nuclear & Elem Particle Physic. 3 Credits.
Introduction to theoretical and experimental aspects of nuclear and elementary particle physics. Prerequisite: PHYS 128; Junior standing.

PHYS 265. Thermal & Statistical Physics. 3 Credits.
Thermodynamics, kinetic theory, statistical mechanics. Prerequisites: PHYS 152 or PHYS 125 and MATH 121.
PHYS 273. Quantum Mechanics I. 3 Credits.
Introduction to nonrelativistic quantum mechanics. Schrödinger equation and applications to simple systems. Prerequisite: PHYS 128, PHYS 211.

PHYS 274. Applications of Quantum Mechanics. 3 Credits.
Applications of Quantum Mechanics including Quantum Statistical Mechanics, Time-Independent and Time-Dependent Perturbation Theory, WKB Approximation, Variational Principle and Scattering. Prerequisite: PHYS 273.

PHYS 295. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PHYS 296. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PHYS 301. Mathematical Physics. 3 Credits.
Introduction to basic mathematical methods of theoretical physics; vector and tensor analysis, partial differential equations, orthogonal functions, complex variables and variational techniques. Prerequisites: PHYS 211, PHYS 214. Alternate years.

PHYS 305. Teaching of College Physics. 1 Credit.
Instructional strategies and techniques with application to the teaching of laboratories and recitations. Prerequisites: Undergraduate degree in Physics; Instructor permission.

PHYS 311. Advanced Dynamics. 3 Credits.
Classical mechanics presented as the basis of the concepts and methods of modern physics. Variational, Lagrangian, and Hamiltonian formulations, canonical transformations, continuous systems. Prerequisite: PHYS 211. Alternate years.

PHYS 313. Electromagnetic Theory. 3 Credits.
Development of Maxwell’s theory of electromagnetism emphasizing its physical basis and the modes of mathematical description. Prerequisite: PHYS 214. Alternate years.

PHYS 321. Theoretical Physics. 1-6 Credits.
For research students interested in pursuing topics of general and departmental research interest in theoretical physics. Prerequisite: Instructor permission. Offered as occasion warrants.

PHYS 322. Contemporary Physics. 0-6 Credits.
Topics of current interest in physics to be offered as student and faculty interest warrants. May be repeated for credit with department approval. Prerequisite: Instructor permission.

PHYS 331. Biological Physics. 1-3 Credits.
For research students in the field of biological physics. Lectures, reports, and directed readings related to the research of the Department and the field generally. May be repeated for credit with departmental approval. Prerequisite: Instructor permission. Offered as occasion warrants.

PHYS 341. Solid State Physics. 3 Credits.
Introduction to crystal symmetry and the reciprocal lattice. Crystal binding and lattice vibrations. Thermal, electrical, and magnetic properties of solids, free electron theory of metals, and band theory. Prerequisites: PHYS 214, PHYS 265, PHYS 273 or their equivalents; Instructor permission.

PHYS 345. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PHYS 351. Seminar: Physics of Materials. 1-3 Credits.
For research students in the field of the physics of materials. Lectures, reports, and directed readings related to the research for the department and the field generally. May be repeated for credit with departmental approval. Prerequisite: Instructor permission. Offered as occasion warrants.

PHYS 356. Computational Physics II. 3 Credits.
Advanced computational physics methods including classical and ab-initio molecular dynamics, classical and quantum Monte Carlo, variational methods, density functional theory, and others. May also include other topics such as high-performance computing and parallelization with MPI/OpenMP and GPUs. Prerequisites: PHYS 256, PHYS 265, PHYS 273.

PHYS 362. Quantum Mechanics II. 3 Credits.
Mathematical and physical foundations of nonrelativistic quantum mechanics from the unifying point of view of Dirac. Symmetry operations and the algebraic structure of quantum mechanics are emphasized. Prerequisite: PHYS 273. Alternate years.

PHYS 365. Statistical Mechanics. 3 Credits.
Following a review of thermodynamics, we study the fundamentals of classical and quantum statistical mechanics including ensembles, identical particles, Bose and Fermi statistics, phase-transitions and critical phenomena, renormalization group, irreversible processes and fluctuations. Prerequisites: PHYS 265 or equivalent.

PHYS 391. Master's Thesis Research. 1-12 Credits.

PHYS 491. Doctoral Dissertation Research. 1-12 Credits.

PLANT BIOLOGY (PBIO)

Courses

PBIO 209. Biology of Ferns. 3 Credits.
Evolutionary biology; a survey of New England ferns and discussion of their phylogenetic relationships; current research emphasizing morphological, biogeographical, genetic, and phytochemical aspects of speciation. Prerequisite: PBIO 108 (BCOR 101 recommended). Alternate years.

PBIO 223. Fundamentals of Field Science. 3 Credits.
Pattern and process in natural systems. Weekly discussion of unifying questions in science. Field labs teach sampling and analysis of vegetation, soils, and animals. Prerequisite: Graduate standing or several university courses in earth sciences, life sciences, and chemistry.

PBIO 226. Environmental Problem Solving. 1-3 Credits.
Students negotiate a contract, work as a team, and map and inventory forested natural areas as they apply problem solving skills to Vermont environmental project. Prerequisite: Instructor permission. One to three hours.

PBIO 232. Botany Field Trip. 1 Credit.
Trips to selected environments outside Vermont, led by faculty members representing different fields of botany. Overall, integrated approach to ecology, structure, and function. Prerequisite: Instructor permission.
PBIO 241. Tropical Plant Systematics. 3 Credits.
Principles and methods of angiosperm phylogeny. Recent systematic and evolutionary research on flowering plants; survey of tropical flowering plant families. Student presentations on recent research. Prerequisite: PBIO 109. Alternate years.

PBIO 261. Plant Growth & Development. 3 Credits.

PBIO 275. Global Change Ecology. 3 Credits.
Survey of global climate change including its causes, mechanisms, and ecological and societal impacts. Prerequisite: Graduate standing. Cross-listed with: NR 238.

PBIO 281. Botany Seminar. 0 Credits.
Presentations of personal research by faculty, graduate students, and outside guest speakers. Attendance required of plant biology Graduate students and Seniors in botanical research programs. Without credit.

PBIO 282. Botany Seminar. 0 Credits.
Presentations of personal research by faculty, graduate students, and outside guest speakers. Attendance required of plant biology Graduate students and Seniors in botanical research programs. Without credit.

PBIO 294. Ecological Modeling. 3 Credits.
Provide an introduction to the modeling of ecological processes and data, emphasizing likelihood and Bayesian approaches to data modeling and analytical and computational models of ecological process. Uses R, Python, and Wolfram programming languages. Prerequisite: BCOR 102 or equivalent.

PBIO 295. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PBIO 301. Cell & Molecular Biology. 3 Credits.
Advanced survey of cell organelles, their composition, origin, and the relationship between their structure and function. Emphasis on recent literature and current controversies. Prerequisites: CHEM 142, Graduate standing in Biology or Instructor permission. Cross-listed with: BIOL 301, CLBI 301.

PBIO 311. Field Naturalist Practicum. 0-3 Credits.
Landscape analysis; planning and designing field projects; integrated problem solving. Prerequisite: Enrollment in the Field Naturalist program. Variable hours up to three.

PBIO 333. Professional Writing Essential. 1 Credit.
Basics of good writing, essay and report writing, as published in both popular and professional journals in the environment and natural resources. Prerequisite: Graduate standing. Cross-listed with: NR 333.

PBIO 334. Professional Writing AdvTopics. 1 Credit.
Writing workshop that explores essay and report writing, as published in both popular and professional journals that examine the natural world and its resources. Prerequisite: Graduate Standing. Cross-listed with: NR 334.

PBIO 369. Field Botany for NR Profession. 3 Credits.
Identification of flowering plants and ferns; survey of prominent Vermont plant families; natural communities, ecological determinants of plant distribution, especially soils; preparation of herbarium specimens. Prerequisite: Graduate Standing; Instructor Permission.

PBIO 381. Adv Topics in Plant Biology. 1-4 Credits.
Subject matter varies. Topics will stress current graduate student and faculty research interests in a journal review or presentation-discussion format. Prerequisite: Instructor permission.

PBIO 382. Adv Topics in Plant Biology. 1-4 Credits.
Subject matter varies. Topics will stress current graduate student and faculty research interests in a journal review or presentation-discussion format. Prerequisite: Instructor permission.

PBIO 391. Master's Thesis Research. 1-10 Credits.
Credit as arranged.

PBIO 392. Master's Project Research. 0-3 Credits.
Credit as arranged.

PBIO 491. Doctoral Dissertation Research. 1-15 Credits.
Credit as arranged.

PBIO 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PLANT & SOIL SCIENCE (PSS)

Courses

PSS 209. Diversified Farm Operations. 6 Credits.
An experiential course in sustainable, diversified vegetable production that includes soil fertility, weed, insect and disease control, crop planning and farm management skills. Prerequisites: PSS 021 and one 100-level PSS course, equivalent experience, or Instructor permission.

PSS 212. SU: Advanced Agroecology. 0 or 4 Credits.
An in-depth overview of research and applications in the field of agroecology, including current ecological and social dynamics in agricultural landscapes in Vermont and abroad. Prerequisites: PSS 021 or one semester ecology at the 100-level or above or Instructor permission. Cross-listed with: ENV 212.

PSS 232. Biological Control. 3 Credits.
Describes theory and application of biological control of insects, disease, and weeds. Discuss ecological factors that contribute to the success of classical, augmentative, and conservation approaches to biological control. Approved for Graduate credit. Prerequisite: Course in entomology, ecology, or relevant experience.

PSS 238. Ecological Landscape Design. 4 Credits.
Studio course synthesizing work from fields of landscape ecology and landscape design, exploring ecological design alternatives at multiple scales, and developing multifunctional landscape solutions. Prerequisites: Junior standing; PSS 137 or one course in ecology plus one course in design or drawing. Cross-listed with: CDAE 238, ENV 238, NR 238.
PSS 261. Soil Morph Class & Land Use. 0 or 3 Credits.
Field techniques that describe soil properties, formation, and classification. The principles and processes of soil genesis, land use classification systems, and land use challenges. Prerequisite: PSS 161 or Instructor permission. Alternate years.

PSS 264. Chemistry of Soil & Water. 0 or 4 Credits.
An environmentally oriented study of the colloidal chemistry of soil and its interfaces with roots, water, and air. Prerequisites: PSS 161, two semesters Chemistry or Instructor permission. Alternate years.

PSS 266. Soil Water Movement. 3 Credits.
Mathematical modeling and physical principles of the soil-water-plant interaction and its relationship to environmental and agricultural issues. Prerequisites: PSS 161, one semester of Physics or Instructor permission. Alternate years.

PSS 268. Soil Ecology. 0 or 4 Credits.
Underlying concepts and theory of modern soil ecology will be reviewed including spatial and temporal distributions, sampling methods, biogeochemical cycles, and ecological functions of soil. Prerequisites: PSS 161 or Instructor permission. Alternate years.

PSS 269. Soil/Water Pollution/Bioremed. 3 Credits.
Examines key issues in pollution of soil and water. Topics include type of pollutants, their reactions in soil and water, pollution prevention and bioremediation. Prerequisites: PSS 161 or Instructor permission. Alternate years.

PSS 295. Advanced Special Topics. 1-18 Credits.
Lectures, laboratories, readings, field projects, surveys, or research designed to provide specialized experience in horticulture, agronomy, soils, entomology, and integrated pest management. Prerequisite: Instructor permission.

PSS 296. Advanced Special Topics. 1-18 Credits.
Lectures, laboratories, readings, field projects, surveys, or research designed to provide specialized experience in horticulture, agronomy, soils, entomology, and integrated pest management. Prerequisite: Instructor permission.

PSS 298. Undergraduate Research. 1-18 Credits.
Undergraduate student work on individual or small team research projects under the supervision of a faculty member, for which credit is awarded. Offered at department discretion. Prerequisite: Instructor permission. More than a total of six credits per semester requires Chair permission.

PSS 301. Professional Skills Colloquium. 1 Credit.
Presentation and peer review of oral and written communication. Professional development skills including technical writing, literature review, mentorship, scientific integrity, grant proposals, and job market.

PSS 311. Introduction to Agroecology. 3 Credits.
In-depth overview of research and applications in the field of agroecology, with a focus on providing the student with conceptual and analytical content. Prerequisite: Graduate standing or Instructor permission.

PSS 312. Ecological Foundations of Agro. 3 Credits.
Examines the ecological foundations of Agroecology, largely from a biophysical perspective. Over the course of three sequential modules, students will explore the fundamental principles of ecology and their application to agricultural systems and landscapes. Prerequisite: One semester biological science at the 100-level or Instructor permission.

PSS 313. PAR & Transdiscip Agroecology. 3 Credits.
Introduces students to Participatory Action Research (PAR) in the context of agroecology, and examines how the integration of PAR and transdisciplinary approaches can serve to deepen our collective understanding of complex problems/issues. Prerequisite: PSS 311.

PSS 314. Agroecol, Food Sov. & Soc Mov.. 3 Credits.
Investigates social, political, and economic elements of the global food system from multiple perspectives, considering the ability to scale-up agroecology, and the potential intersection between agroecology, food sovereignty and government policies. Prerequisite: Graduate standing.

PSS 315. Agroecology Grad Capstone. 3 Credits.
The capstone designed for the application of newly developed knowledge and skills in a culminating experience/project that addresses an agroecological topic relevant to the individual student. Prerequisites: PSS 311, PSS 312, PSS 313, PSS 314.

PSS 381. Graduate Special Topics. 1-3 Credits.
Advanced readings and discussion of horticulture, crops, or soils research literature.

PSS 391. Master’s Thesis Research. 1-18 Credits.
PSS 393. Seminar Series. 1 Credit.
Presentations of personal research by faculty, Graduate students and outside guest speakers. Attendance and oral presentations are required of Graduate students in Plant and Soil Science. Repeatable 2 times for M.S. students and 4 times for Ph.D. students.

PSS 394. Seminar Series. 1 Credit.
Presentations of personal research by faculty, Graduate students, and outside guest speakers. Attendance and oral presentations are required of Graduate students in Plant and Soil Science. Repeatable 2 times for M.S. students and 4 times for Ph.D. students.

PSS 395. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PSS 491. Doctoral Dissertation Research. 1-18 Credits.
PSS 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PSYCHOLOGICAL SCIENCE (PSYS)
Courses
PSYS 211. Learning. 3 Credits.
Analysis of theory and research on the basic learning process and behavior. Prerequisites: PSYS 053 and PSYS 111.

PSYS 212. Cognition. 3 Credits.
Research and theories on the major areas within cognition: perception, attention, pattern recognition, memory, knowledge representations, mnemonic strategies, problem-solving and neurocognition. Prerequisites: PSYS 054 and PSYS 111.
PSYS 213. Motivation. 3 Credits.
Theory and research on motives, including hunger, fear, sex drive, and addiction, their influence on behavior, relationship to other psychological processes, and biological correlates. Prerequisites: PSYS 053; PSYS 111 or PSYS 115.

PSYS 215. Physiological Psychology. 0 or 4 Credits.
Structure and function of mammalian nervous system, emphasizing neurological correlates of sensory experience and perception. Individual laboratory experience. Prerequisites: PSYS 053; PSYS 115 or NSCI 111.

PSYS 216. Psychopharmacology. 3 Credits.
Effects of drugs (both medical and recreational) on behavior. Topics such as drug effects on learning, memory, motivation, perception, emotions, and aggression. Prerequisites: PSYS 053; PSYS 115 or NSCI 111.

PSYS 217. Animal Behavior. 3 Credits.
Behavior of animals under controlled experimental conditions and in their natural environments. Consideration of evolution, development, function, and control of behavior. Prerequisites: PSYS 053; PSYS 115 or NSCI 111.

PSYS 218. Hormones and Behavior. 3 Credits.
A study of the involvement of hormones in cognition, emotion, the stress response, circadian and homeostatic mechanisms that affect mental state, psychopathology, and reproductive behavior. Prerequisites: PSYS 053; PSYS 115 or NSCI 110 or NSCI 111.

PSYS 219. Sel Topics Behavioral Neurosci. 3 Credits.
Selected topics examining the role of the central nervous system in determining behavior, including innate behaviors, arousal, motivation, learning, and memory. Prerequisites: PSYS 053; PSYS 115 or NSCI 111.

PSYS 230. Advanced Social Psychology. 3 Credits.
In-depth discussion of select topics centering on how situations influence individuals' thoughts, feelings, and behaviors. Prerequisite: PSYS 053 and PSYS 130.

PSYS 232. Self and Social Cognition. 3 Credits.
An advanced course in social psychology that covers theory and research on the self and social cognition. Prerequisites: PSYS 053 and PSYS 130.

PSYS 240. Organizational Psychology. 3 Credits.
Study of the psychological impact of macro and micro features of organizations upon leadership, decision making, workforce diversity, group process, conflict, and organizational performances. Prerequisite: PSYS 053; and PSYS 111 or PSYS 130 or PSYS 150 or PSYS 170.

PSYS 252. Emotional Devlmt & Temperament. 3 Credits.
Development of emotion and temperament from infancy through middle childhood, including links between these topics and physiology, and context (e.g. attachment, parenting, family conflict). Prerequisites: PSYS 053 and PSYS 150.

PSYS 253. Cognitive Development. 3 Credits.
Examination of research and theory concerning developmental changes in the human processing of information from infancy to adulthood centered around the work of Piaget. Prerequisites: PSYS 053 and PSYS 150.

PSYS 254. Social Development. 3 Credits.
Examination of theory and research concerning interpersonal development in humans from infancy through adulthood. Emphasizes relationships among language, cognition, and social development. Prerequisites: PSYS 053 and PSYS 150.

PSYS 256. Infant Development. 3 Credits.
Biological, cognitive, and social aspects of infant development in context; opportunities to evaluate and design research and apply knowledge to parenting, prevention, and social policy. Prerequisites: PSYS 053 and PSYS 150.

PSYS 257. Adolescence. 3 Credits.
Analysis of current theory and research in adolescent development. Covers biological, cognitive, and social changes; family, peer, and school influences; and normative and problematic development. Prerequisites: PSYS 053 and PSYS 150.

PSYS 270. Behav Disorders of Childhood. 3 Credits.
An overview of theory, research, and practice in developmental psychopathology from infancy through adolescence. The major disorders of social and emotional development reviewed. Prerequisites: PSYS 053; and PSYS 150 or PSYS 170.

PSYS 271. Intro to Clinical Psychology. 3 Credits.
Study of basic principles of interviewing, testing, assessment from life situations, and report writing. Examination of the most common approaches to psychotherapy. Prerequisites: PSYS 053 and PSYS 170.

PSYS 300. History of Psychology. 3 Credits.
Review of major theoretical and empirical developments in psychology, including schools of psychology that have influenced contemporary models of psychology. Prerequisite: Psychology graduate standing only.

PSYS 301. Faculty Seminar. 0 Credits.
Introduction to specialized areas of psychology. Prerequisite: Psychological Science Graduate standing.

PSYS 303. Seminar in Psyc Research Meth. 3 Credits.
Topics may include but are not limited to: factor analysis, discriminant function analysis, multivariate analysis of variance, advanced experimental design, and computer application in data collection and analysis. Prerequisites: Psychology graduate standing and PSYS 304.

PSYS 304. Adv Statistical Methods I. 3 Credits.
Statistical methods for evaluating psychological data. Emphasizes exploring data with respect to research hypotheses. Critical study of hypothesis tests on means, chi-square, and correlational techniques. Prerequisite: Psychological Science or Neuroscience Graduate standing only.
PSYS 305. Adv Statistical Methods II. 3 Credits.
Continuation of PSYS 304. In-depth study of the analysis of variance and multiple regression. Further study of analysis and interpretation of data from the behavioral sciences. Prerequisites: Psychology or Neuroscience graduate standing and PSYS 304.

PSYS 306. Analysis of Longitudinal Data. 3 Credits.
Statistical methods for the analysis of data collected over time, with an emphasis on linear mixed models (LMMs) in applied psychological research. Prerequisites: Psychology or Neuroscience graduate standing; and PSYS 304 and PSYS 305.

PSYS 307. Structural Equation Modeling. 3 Credits.
Introduction to confirmatory factor analysis, path analysis, and structural equation methods, with an emphasis on applied psychological research. Prerequisites: Psychology graduate standing; and PSYS 304 and PSYS 305.

PSYS 311. Seminar in Learning Theory. 3 Credits.
Review and analysis of contemporary theories of associative learning. Prerequisite: Psychology graduate standing only.

PSYS 312. Cognitive Neuroscience. 3 Credits.
Exploration of the neural bases of complex cognitive functions in humans, including memory, attention, executive functions, and consciousness, through a survey of recent journal articles. Prerequisite: Psychology or Neuroscience graduate standing only.

PSYS 313. Emotion. 3 Credits.
Analysis of research and theory on emotion from biological, psychological, cognitive, and psychosocial perspectives. Research literature considering clinical disorders of emotion will also be considered. Prerequisite: Psychology graduate standing only.

PSYS 315. Biobehavioral Proseminar. 3 Credits.
Advanced survey and analysis of behavioral and biological psychology, with special emphasis on learning theory and behavioral neuroscience. Prerequisite: Psychology and Neuroscience graduate standing only.

PSYS 316. Neuropsychopharmacology. 3 Credits.
Explores the foundations of behavior by examining the role of neurotransmitters, neuromodulators, and drugs in the production of normal and abnormal behavior. Prerequisite: Psychology or Neuroscience graduate standing only.

PSYS 319. Neurobio of Learning & Memory. 3 Credits.
Exploration of the neural bases of learning and memory, using a brain systems approach, through a survey of recent journal articles. Prerequisite: Psychology or Neuroscience graduate standing only.

PSYS 320. Animal Minds. 3 Credits.
Examination of historical and modern scientific research literature on cognition as it is represented in the behavior of animals. Considers evolutionary, behavioristic, and cognitive perspectives. Prerequisite: Psychology or Neuroscience graduate standing only.

PSYS 330. Proseminar in Exp Social Psych. 3 Credits.
Advanced analysis of experimental social psychology, including examination of social psychological theories, methods, and key research findings. Prerequisite: Psychology graduate standing only.

PSYS 332. Cognition in Social Behavior. 3 Credits.
Examination of social attribution, interpersonal set, perspectives in social encounter, and the formulation of interpersonal strategies. Prerequisite: Psychology graduate standing only.

PSYS 350. Developmental Proseminar. 3 Credits.
This seminar focuses on key issues in developmental psychology, including an examination and critique of psychological theories, methods, and research in child and adolescent development. Prerequisite: Psychology graduate standing only.

PSYS 351. Advanced Developmental Psyc. 3 Credits.
Critical analysis of selected topics in developmental psychology with emphasis on research and theory in areas such as moral development, infancy, and early conceptual development. Prerequisite: Psychology graduate standing only.

PSYS 352. Emotional Dev & Temperament. 3 Credits.
Development of emotion and temperament from infancy through middle childhood, including links between these topics and physiology and context (e.g., attachment, parenting, family conflict). Prerequisites: Graduate standing; Psychological Science major.

PSYS 354. Social Development. 3 Credits.
This course will include an examination and critique of psychological theories, methods, and research about social development from infancy through young adulthood. Prerequisite: Psychology graduate standing only.

PSYS 355. Psychology of Gender. 3 Credits.
Advanced survey of psychological theories, methods, and research about gender. Focuses on gender similarities and differences in affect, cognition, and behavior. Prerequisite: Psychology graduate standing only.

PSYS 361. Developmental Psychopathology. 3 Credits.
Provides an overview of theoretical, methodological, and analytic approaches in developmental psychopathology. Prerequisite: Psychology graduate standing only.

PSYS 370. Child Psychopathology. 3 Credits.
An advanced course dealing with models of classification, diagnosis, epidemiology of behavior disorders in children. Prerequisite: Psychology graduate standing only.

PSYS 371. Adult Psychopathology. 3 Credits.
An advanced course dealing with models of classification, diagnosis, epidemiology of behavior disorders in adults. Prerequisite: Psychology graduate standing only.

PSYS 372. Child & Adolescent Psyc Assess. 0 or 3 Credits.
Interviewing, intelligence testing, behavioral assessment, social cognition, family environments, specific disorders of childhood. Supervised assessment practicum (100 hours) in in-patient and out-patient mental health settings and schools. Prerequisite: Psychology graduate standing only.

PSYS 373. Adult Psychological Assessment. 0 or 3 Credits.
Theories and strategies of psychological intervention. Supervised service delivery (150 hours) at University Counseling and Testing Center including individual and group therapy and crisis intervention. Prerequisite: Psychology graduate standing only.
PSYS 374. Behavior Therapy: Children. 3 Credits.
Review of literature relating to theory, practice, research. Emphasis on the evaluation of a variety of procedures applied to behavior disorders in children. Prerequisite: Psychology graduate standing only.

PSYS 375. Adult Cognitive & Behav Thrpy. 3 Credits.
Review of literature relating to theory, practice, research. Emphasis on the evaluation of a variety of procedures applied to behavior disorders in adults. Prerequisite: Psychology graduate standing only.

PSYS 376. Cross Culture Clin Interv/Rsrc. 3 Credits.
Issues for psychologists regarding clinical intervention and research with Black, Latino/a, Native American, Asian American, and international populations of color with an eye toward cultural competence. Prerequisite: Psychology graduate standing only.

PSYS 377. Clinical Human Neuropsychology. 3 Credits.
Clinical seminar on effects on human behavior of neocortical dysfunction. Review of theoretical, clinical approaches to brain function, emphasis on recent developments in diagnostic techniques, ensuing theoretical developments. Prerequisite: Psychology graduate standing only.

PSYS 378. Dialectic Behavior Therapy. 3 Credits.
Examines the theoretical perspectives, empirical foundations, and treatment strategies of Dialectical Behavior Therapy (DBT). DBT is a treatment specifically designed for chronically suicidal patients. Prerequisite: Psychology graduate standing only.

PSYS 380. Professional Affairs & Ethics. 3 Credits.
The origins of professions and of psychology in particular. Accreditation, laws affecting psychology, organization of the profession, licensing certification, and the code of ethics for psychology. Prerequisite: Psychology graduate standing only.

PSYS 385. Advanced Clinical Practicum. 0 or 1 Credits.
Year-long, 20 hours/week supervised service delivery involving psychological intervention assessment and consultation. May be repeated for credit. Prerequisite: Psychology graduate standing only.

PSYS 389. Internship in Clinical Psyc. 0 Credits.
Clinical psychology internship experience. Prerequisite: Psychology graduate standing only.

PSYS 390. Contemporary Topics. 3 Credits.
Selected topics in depth; emphasis on critical analysis of original literature. Prerequisite: Psychology graduate standing only.

PSYS 391. Master's Thesis Research. 0.5-18 Credits.
Research leading toward completion of the master's thesis. Prerequisite: Psychology graduate standing only.

Discussion of current research and student research presentation in areas of concentration (“clusters”). Prerequisite: Psychology graduate standing only.

PSYS 395. Advanced Readings/Research. 1-6 Credits.
Readings, with conferences, to provide graduate students with background and specialized knowledge relating to an area in which an appropriate course is not offered. Prerequisite: Psychology graduate standing only.

PSYS 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Prerequisites: Psychology Graduate Standing Only; Instructor permission.

PSYS 491. Doctoral Dissertation Research. 1-18 Credits.
Research leading toward completion of the doctoral dissertation. Prerequisite: Psychology graduate standing only.

PSYS 496. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PUBLIC ADMINISTRATION (PA)

Courses
PA 206. Intro Cont Public Affairs. 3 Credits.
Contemporary policy issues including government and the economy, the role of leadership, ethical and moral issues in public policy, and other contemporary issues impacting society. Prerequisites: CDAE 100 level course.

PA 260. Smart Resilient Communities. 3 Credits.
Focus on social ecological systems integration framework to determine community resilience, enable smart design processes at the nexus of food, energy and water systems and learn practical skills, such as early warning systems, ubiquitous computing and interactive scenario planning techniques. Prerequisites: CDAE 102 or Graduate standing. Cross-listed with: CDAE 260.

PA 295. Advanced Special Topics. 1-18 Credits.
Current issues and new developments in public policy and public administration. Prerequisite: Permission.

PA 296. Advanced Special Topics. 1-18 Credits.
Current issues and new developments in public policy and public administration. Prerequisite: Permission.

PA 301. Foundations of Public Admin. 3 Credits.
Survey of major elements of management in the public and nonprofit sectors with special attention given to problems arising from political imperatives generated by a democratic society.

PA 302. Org Theory & Behavior. 3 Credits.
Examination of basic classical and contemporary theory, research on human relations, internal structures, environments, types, diverse workplaces, general properties of complex organizations and bureaucracies.

PA 303. Research & Evaluation Methods. 0 or 3 Credits.
Conceptualization, collection and analysis of primary and secondary data; interpretation, and communication of results of applied research and/or evaluation studies for decision makers. Separate lab required.

PA 305. Public and Nonprofit Budgeting. 3 Credits.
A focus on the budget as the primary policy and planning document in public and nonprofit organizations.

PA 306. Policy Systems. 3 Credits.
The study and application of system-level public policy frameworks, theories and models to contemporary policy problems and solutions.

PA 307. Administrative Ethics. 0 or 3 Credits.
Administrative behavior with a focus on ethical dilemmas that arise in the bureaucracy. An examination of a number of moral issues and ways to resolve them.
PA 308. Decision Making Models. 3 Credits.
A seminar providing hands-on knowledge in policy analysis and program evaluation using case studies of current analysis projects and problems. Specific techniques include planning, survey administration, forecasting, cost benefit analysis, and impact assessment.

PA 311. Policy Analysis & Program Eval. 3 Credits.
A seminar providing hands-on knowledge in policy analysis and program evaluation using case studies of current analysis projects and problems. Specific techniques include planning, survey administration, forecasting, cost benefit analysis, and impact assessment.

PA 312. Mgmt in Hlth Services & Med Care. 3 Credits.
Addresses major issues and challenges faced by health services managers relating to established and evolving social, economic, and professional policies in a context of practical problem assessment and appropriate resolution. Cross-listed with: BSAD 331, PH 317.

PA 313. Public Policy Implementation. 3 Credits.
A seminar considering aspects of the public policy implementation process from initiation to completion and evaluation with regards to system design, policy goals, communication, compliance, and political environment.

PA 314. Administrative Law. 3 Credits.
Examines legal foundations of public administration focusing on legal issues of most importance to present or future administrators.

PA 315. Hlth Srvs & Med Care in US. 3 Credits.
Defines the milieu of issues and challenges faced by managers in the health services setting.

PA 317. Systems Anly & Strategic Mgmt. 3 Credits.
Students will be introduced to systems thinking and network dynamics with a particular focus on managing across organizational and sectoral boundaries, including public-private partnerships, intergovernmental arrangements, and strategic alliances. Tools to undertake strategic analysis and planning will be explored.

PA 318. Admin Theory & Practice. 3 Credits.
Extensive examination of literature pertaining to the practice and theory of public administration. Explores public/private partnerships, intergovernmental management, ethics, and administrators as agents for organizational change.

PA 319. State Administration. 3 Credits.
Elements of public management at the state level i.e. the state/federal relationship regarding control; management within the force field of local conflict and cooperation; and management within the context of inter-agency conflict and cooperation.

PA 320. Local Government Admin. 3 Credits.
This course is a primer on local government administration in the US using the case method to experience the complexity of the challenges one confronts in the field.

PA 321. Negotiation & Mediation. 3 Credits.
Explores the principles of today’s negotiations and mediations through readings, heavy emphasis on practical exercises between students, and case analyses of actual negotiations. Prerequisite: Graduate standing.

PA 323. Non-Profit Administration. 3 Credits.
Course reviews the history of, and managerial challenges inherent to, the non-profit sector in the United States and explores sector's relationship to the governmental and business sectors.

PA 325. Health Care Policy. 3 Credits.
This course addresses policy issues affecting the structure, performance and change in the U.S. health care system, with a specific focus on the role of health care managers. Pre/co-requisite: CDAE 102, CDAE 124, or Instructor permission.

PA 326. Community Economic Development. 3 Credits.
Examines how rural and urban communities address poverty, unemployment and other economic problems through job creation and retention, workforce training and support, and other development strategies. Cross-listed with: CDAE 326.

PA 327. Nonprofit Governance & Devel. 3 Credits.
In-depth exploration of nonprofit governance and fund development, focusing on the responsibility of a board of directors including governing documents, fiduciary responsibilities and revenue development.

PA 334. Organizational Behav & Cultures. 3 Credits.
Introduces sustainability and transportation as factors to be considered in the planning and design of urban areas. The focus is on the relationship between the transportation infrastructure and the economic, social, and environmental needs of the community.

PA 335. Sustainability & Transport. 3 Credits.
Introduction to the complex interconnection of engineering, policy, science and social science that characterize transportation systems, mobility problems and solutions. Interdisciplinary teams conduct case studies. Prerequisite: Instructor permission required. Cross-listed with: CE 312, TRC 312.

PA 342. Sustainability & Transport. 3 Credits.
The course examines the impact of transportation on the environment, economy, and society. It also explores sustainable transportation solutions and policies.

PA 350. Internship. 3-6 Credits.
Supervised administrative experience culminating in a written report. Pre/co-requisites: Core MPA courses either prior to Spring semester or simultaneously.

PA 391. Master's Thesis Research. 1-6 Credits.
Thesis topic must be approved by faculty advisor.

PA 395. Advanced Special Topics. 1-18 Credits.
For advanced students within areas of expertise of the faculty. Varied course offerings. Contemporary topics. Instructor Permission.

PA 397. Readings & Research. 1-6 Credits.
Readings, with conferences, term paper, to provide graduate students with specialized knowledge in an area in which an appropriate course is not offered.

PUBLIC HEALTH (PH)

Courses

PH 301. Public Health & Health Policy. 3 Credits.
Course focuses on current public health issues, barriers to improving population health, and policy tensions between science, economics, education, politics, government, media, and public health.

PH 302. Epidemiology I. 3 Credits.
Epidemiology is the study of disease distribution and determinants in populations; we will define populations and estimate the distribution of health-related conditions and their determinants. Pre/co-requisites: Bachelor's degree and college-level mathematics course.
PH 303. Biostatistics I: App Rsch in PH. 3 Credits.
Biostatistics I (Applied Research Methods in Public Health) includes biostatistics, research designs, and qualitative approaches, and includes emphasis on evaluating research articles in public health. Pre/co-requisites: Bachelor’s degree and college-level mathematics course.

PH 304. Environmental Public Health. 3 Credits.
Explores major areas of environmental public health (EPH), including environmental hazards, exposures, and related health outcomes, including emerging topics in environmental public health.

PH 305. Pol,Org & Finance in Hlth Care. 3 Credits.
This course looks at U.S. health care policies, organizational structures and financing systems and examines key concepts from economic, social, ethical, political and global perspectives.

PH 306. Social & Behavioral Public Hlth. 3 Credits.
This course addresses the behavioral, social and cultural factors related to individual and population health, and health disparities over the life course.

PH 307. Epidemiology 2. 3 Credits.
Exposure to advanced epidemiological concepts, such as effect modifications and modeling using multiple variables, related to establishing causal relationships from observational data. Prerequisite: PH 302, PH 303.

PH 308. Environmental Public Health 2. 3 Credits.
Students explore public health within the context of natural and human-made environments, and examine methods of practice and emerging environmental health topics. Prerequisite: PH 304.

PH 309. Public Health Biostatistics II. 3 Credits.
An advanced applied research methods course with the goal of helping students understand and apply multivariate regression analyses, non-parametric methods, survival analysis and advanced concepts with confounding and effect modification, and interpreting data in public health applications. Prerequisite: PH 303.

PH 310. Public Health Law and Ethics. 3 Credits.
Public health law examines the government's authority, at various jurisdictional levels, to improve the health of the general population within societal limits and norms. Prerequisite: Bachelor’s degree.

PH 311. Global Public Health. 3 Credits.
This course explores global public health challenges affecting people primarily in developing or resource-constrained countries. Cultural competency concepts will be embedded. Prerequisite: Bachelor’s degree.

PH 312. Food Systems & Public Hlth. 3 Credits.
This course explores food systems’ influence on public health, and how technology, policy, biology, epidemiology, and historical knowledge can support a healthier food system. Prerequisite: Bachelor's degree.

PH 313. Public Health & Social Justice. 3 Credits.
Analytical examination of the relationship between health policies and programs and social justice issues in the United States with exemplars from other countries.

PH 314. Environmental Risk & Risk Comm. 3 Credits.
This course explores theory, policy and techniques for environmental risk communication from the viewpoints of government, industry, special interest groups, and the general public.

PH 315. Public Health Surveillance. 3 Credits.
Explores surveillance of infectious and non-infectious diseases, health behaviors and population characteristics, fundamental to nearly all fields of modern public health practice. Prerequisite: PH 302.

PH 317. Mgmt in Hlth Services & Med Care. 3 Credits.
Addresses major issues and challenges faced by health services managers relating to established and evolving social, economic, and professional policies in a context of practical problem assessment and appropriate resolution. Cross-listed with: BSAD 331, PA 312.

PH 318. Improving Health in Population. 3 Credits.
Descriptive and chronic disease epidemiology, health determinants, and community resources will be utilized to develop strategies and interprofessional skills to improve individual and population health. Exploration of roles of health professionals in the care of populations with an emphasis on the US health care system.

PH 319. Environmental Health Law & Pol. 3 Credits.
Introduces non-lawyers to American law as it relates to the protection of environmental and public health.

PH 321. Controversies in Hlth Economics. 3 Credits.
Covers health economic concepts, principles and theories, as well as the application of these methods to a range of practical scenarios. Examines the advantages and disadvantages of various health economic techniques and health economic evaluation.

PH 322. One Health: Zoonoses. 3 Credits.
Zoonoses and vector-born disease account for the majority of emerging and re-emerging diseases. Students will learn about the drivers that influence infection in animals and humans, tools used for disease monitoring and prevention, and policies and programs aimed at prevention. Cross-listed with: ASCI 322.

PH 324. Public Health Informatics. 3 Credits.
Public health practice relies on timely, thorough and reliable information from a variety of sources. Informatics is an emerging field that employs information technology tools and methods to address public health challenges and to improve public health outcomes.

PH 325. Investigating Disease Outbreaks. 3 Credits.
Investigating disease outbreaks is a fundamental responsibility of public health. This course covers field epidemiology outbreak investigation methods, working on an investigatory team, interacting with relevant agencies, and the selection and implementation of appropriate interventions.

PH 326. Legal Issues in Health Care. 3 Credits.
Provides an overview of the legal environment related to healthcare. Using court decisions and other law, explores medical malpractice, negligence, liability, patient rights, healthcare reform and compliance with such laws as Medicaid, Medicare, and HIPAA.
PH 327. Climate Change & Human Health. 3 Credits.
Global climate change is increasing extreme weather events, influencing air and water quality, and shifting vector habitats. Students will explore basic climate science, health, consequences of climate change, and public health approaches to assessment, communication, projection, mitigation, and adaptation.

PH 392. Culminating Project Experience. 1-6 Credits.
Prepares students to apply knowledge and skills in a culminating project experience that reflects research and practice needs of actual populations. Prerequisites: PH 301, PH 302, PH 303, PH 307.

PH 395. Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

PH 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

REHABILITATION & MOVEMENT SCI (RMS)

Courses

RMS 213. Biomechanics of Human Movement. 3 Credits.
Students learn to apply kinesiology and biomechanical principles and concepts to the analysis of human movement, posture, joint structure and function, and gait. Pre/co-requisites: ANPS 019/ANPS 020, and Undergraduate Physics.

RMS 220. Research Methods I. 3 Credits.
Focuses on critical analysis of research literature. Emphasis on critically reading and interpreting published research regarding applicability to the practice of health care professionals. Pre/co-requisite: Undergraduate Statistics.

RMS 351. Exercise in Health and Disease. 3 Credits.
Effects of exercise on physiological function, emphasizing muscular, skeletal, cardiovascular, pulmonary, neurological and endocrine systems, and the relationship of diet/exercise to health/wellness across the lifespan. Prerequisite: DPT major or Graduate standing; Anatomy/Physiology recommended.

RMS 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

RELIGION (REL)

Courses

REL 291. Tpcs in Hist & Phenom of Rel. 1-6 Credits.
Prerequisite: Nine hours in Religion, with six hours at the intermediate level; Junior standing. May be repeated up to six hours.

REL 292. Tpcs in Hist & Phenom of Rel. 1-6 Credits.
Prerequisite: Nine hours in Religion, with six hours at the intermediate level; Junior standing. May be repeated up to six hours.

SECONDARY EDUCATION (EDSC)

Courses

EDSC 200. Contemporary Issues. 3 Credits.
Designed so that its content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Prerequisite: Twelve hours in education and related areas.

EDSC 207. Development:Theory & Applctn. 3 or 4 Credits.
Participants in this class examine adolescent developmental and learning theories. A Service Learning requirement allows students to apply understanding in the context of instructional settings. Prerequisites: EDTE 001 or EDFS 002 or instructor permission.

EDSC 209. Practicum in Teaching. 3 or 4 Credits.
Field-experience in secondary setting. Focus on school culture and student needs while documenting effectiveness in one-on-one teaching. Professional attributes/dispositions are critically assessed. Pre/co-requisite: EDFS 203/EDSC 207.

EDSC 215. Reading in Secondary Schools. 3-4 Credits.

EDSC 216. Curr,Instr&Assmt Sec Schl Tchr. 3 Credits.

EDSC 225. Tchg Science in Sec Schls. 3 Credits.
Consideration of science curricula and instructional strategies for grades 7-12. Topics may include: teaching science as problem solving, research in science teaching, affective education through science. Prerequisite: Twelve hours of education and related areas.

EDSC 226. Teaching Internship. 8-12 Credits.
Collaboration with professional teachers in design and implementation of effective instruction, with special focus on developing programs in a high school setting. Prerequisite: EDSC 203, EDSC 207, EDSC 209, EDSC 215, EDSC 216, and Special Methods.

EDSC 227. Tchng Science in Sec Schls. 3 Credits.
Consideration of science curricula and instructional strategies for grades 7-12. Topics may include: teaching science as problem solving, research in science teaching, affective education through science. Prerequisite: Twelve hours in education and related areas or Instructor permission.

EDSC 230. Teaching for Results. 3 Credits.
EDSC 257. Tchg Math in Sec Schls.  3 Credits.
Contemporary secondary school mathematics curricula and instructional strategies for grades 7-12. Topics may include problem solving, research in mathematics education, use of calculators and computers, manipulatives, and evaluation. Prerequisite: Twelve hours in education and related areas or permission.

EDSC 259. Tchg Foreign Lang in Sec Schls.  3 Credits.
An overview of language teaching methodology. The learning/teaching process as it relates to language learning; techniques used in the teaching and testing of second language skills and culture. Prerequisite: Acceptance into licensure program.

EDSC 295. Lab Experience.  1-6 Credits.
Supervised field work designed to give students experience in specialized areas for their professional development. Prerequisite: Permission of the Coordinator of Professional Laboratory Experiences.

EDSC 297. Problems in Education.  1-6 Credits.
Individual work on a research problem selected by the student in consultation with a staff member. Prerequisite: Twelve hours in education and related areas; endorsement by a sponsoring faculty member.

SOCIAL WORK (SWSS)

Courses

SWSS 200. Contemporary Issues.  1-6 Credits.
Content and structure may accommodate special issues not especially appropriate within the boundaries of an existing course. Prerequisite: Instructor Permission.

SWSS 212. Social Work Practice I.  3 Credits.
A comprehensive introduction to concepts and skills employed by social workers in interactions and interventions with individuals, families, and groups is provided. Prerequisite: MSW standing; or Instructor permission.

SWSS 213. Social Work Practice II.  3 Credits.
Knowledge and skills of social work practice with organizations and communities is emphasized. Prerequisite: Completion of SWSS 212; MSW advanced standing; or Instructor permission.

SWSS 216. Th Found of Hum Beh&Soc Envr I.  3 Credits.
This course introduces students to the biological, psychological, cultural/social, and economic forces that influence human behavior and their implication for social work practice. Prerequisite: MSW standing; or Instructor permission.

SWSS 217. Th Found Hum Beh&Soc Envr II.  3 Credits.
Focus is on theories regarding the nature and functioning of human service organizations and communities in relation to meeting human needs. Prerequisite: SWSS 216 or Instructor permission.

SWSS 220. Soc Welfare Pol & Services I.  3 Credits.
An introduction to history and philosophy of social work and social welfare and the structure of service programs is provided. Prerequisite: MSW standing or Instructor permission.

SWSS 221. Soc Welfare Pol & Services II.  3 Credits.
Focus is on the analysis of the economic, political, and social forces that influence the development and implementation of social welfare policy. Prerequisite: SWSS 220; or Instructor permission.

SWSS 224. Child Abuse & Neglect.  3 Credits.
An MSW foundation elective that considers child abuse and neglect from historical, cultural, sociopolitical and psychological perspectives and examines professional social work responses to them. Prerequisite: Matriculation in the foundation year of Graduate study in Social Work; or Instructor permission.

SWSS 225. Transf Ourselves&Comm:SW Persp.  3 Credits.
An MSW foundation elective that examines systems of oppression and social work strategies to decrease biased practices and create more equitable communities and institutions. Prerequisite: Matriculation in the foundation year of graduate study in Social Work; or Instructor permission.

SWSS 226. Assessment Theory Social Work.  3 Credits.
An MSW foundation elective analyzing competing and complementary assessment theories and their implications in social work in health/mental health and with children and families. Prerequisite: MSW standing or Instructor permission.

SWSS 227. Found of Social Work Research.  3 Credits.
An introduction to qualitative and quantitative methods of applied social research including program evaluation and the evaluation of practice and application to social work is taught. Prerequisite: MSW standing or Instructor permission.

SWSS 228. Aging:A Strength&Hum Right Per.  3 Credits.
An examination of aging for social work policy and practice from the perspectives of strengths, social justice, human rights and critical social constructionism.

SWSS 229. D2:Soc Work&Disability Rights.  3 Credits.
A multi-cultural, age, gender, economic and international exploration of having a disability in terms of language, labeling, rights, social location, legislation, services and personal narratives.

SWSS 280. Perspectives on Social Work.  4 Credits.
Taking a social constructionist stance, students explore guiding concepts of the MSW curriculum and their application to social work practice, policy, human behavior and research. Pre/co-requisite: MSW standing.

SWSS 290. Foundation Yr Field Practicum.  3-4 Credits.
Supervised field-based learning of 15-20 hours per week. Students are placed in human service agencies and organizations and learn the purposeful application of generalist social work theory, ethics, and skills. Prerequisite: Permission of Coordinator of Field Education.

SWSS 296. Social Work in Global Context.  3 Credits.
Study of social work issues in different parts of the world. Located at the University of Lapland in Finland. Prerequisite: Background in human services or social work major; or MSW standing; permission of the Instructor.
SWSS 301. Social Work in Health. 3 Credits.
Based on examinations of current trends with clients of multiple ages, needs, and cultural perspectives, this course examines social work roles in delivering health services. Prerequisites: Completion of foundation coursework; MSW advanced standing; or Instructor permission.

SWSS 302. Social Work in Mental Health. 3 Credits.
Advanced knowledge and skills in working with children with severe emotional disturbances and adults with persistent mental illness. Community-based services are emphasized. Prerequisites: Completion of foundation coursework; MSW advanced standing; or Instructor permission.

SWSS 310. Soc Work W/ Children & Fam I. 3 Credits.
Focus is on families whose major task is child-rearing and child caring. Covers advanced knowledge, concepts, and methods of contemporary child/family services within a family-centered approach. Prerequisites: Completion of foundation coursework; MSW advanced standing; or Instructor permission.

SWSS 311. Soc Work W/Children & Fam II. 3 Credits.
Focus is on families with adolescents, families with no children and families with dependent adults. Advanced analysis of families from an adult member perspective and from a critical view of family ideology and myth. Prerequisites: Completion of foundation coursework; MSW advanced standing; or Instructor permission.

SWSS 314. Transformative Social Work I. 3 Credits.
Advanced practice in transformative social work will focus on developing relational, profound, and generative meanings for change across populations, fields of practice and social issues. Prerequisite: Completion of Foundation Year.

SWSS 315. Transformative Social Work II. 3 Credits.
Advanced practice in Transformative Social Work II will focus on practical applications across populations at risk, field of practice and social issues. Prerequisite: Completion of Foundation Year.

SWSS 316. Integrative Appr Transform SW. 3 Credits.
In this course students will synthesize their exploration of their area of focus in transformative social work through scholarly reading, research and classroom presentations. Prerequisite: Completion of Foundation Year.

SWSS 320. Adv Soc Welf Policy Anyl&Prac. 3 Credits.
In depth analysis of social welfare policy with application to children and families or health and mental health is required. There is an emphasis on the skills of the policy practitioner. Prerequisite: Completion of SWSS 220 and SWSS 221; MSW advanced standing; or Instructor permission.

SWSS 327. Adv Social Work Research. 3 Credits.
An analysis of social work research from methodological and theoretical perspectives is emphasized. The application of research to the student's concentration area is required. Prerequisites: Completion of SWSS 227; a basic statistics course; MSW advanced standing; or Instructor permission.

SWSS 330. Assessment in Social Work. 3 Credits.
An advanced MSW concentration elective that analyzes competing and complementary assessment strategies and their implications in social work in health/mental health and with children and families. Prerequisite: Completion of MSW foundation coursework; or Instructor permission.

SWSS 331. Feminist Social Work Practice. 3 Credits.
An advanced MSW concentration elective that analyzes practice conceptions and dilemmas of feminist social work in a global context and emphasizes professional activism and leadership. Prerequisite: Completion of MSW foundation coursework; or Instructor permission.

SWSS 332. SW w/Battered Women&Children. 3 Credits.
An advanced MSW concentration elective that investigates theoretical and practical issues of social work practice with battered women and their children and develops related recommendations. Prerequisite: Completion of MSW foundation coursework; or Instructor permission.

SWSS 333. Social Work with Groups. 3 Credits.
An advanced MSW concentration elective that integrates professional history, conceptual overviews and direct experience with methods for group work distinctive to social work practice. Prerequisite: Completion of MSW foundation coursework or Instructor permission.

SWSS 334. Intrdsc Sem Neurodev Disabil I. 3 Credits.
Seminar exploring interdisciplinary process, collaborative teaming, cultural competence and family-centered care as they relate to children and families affected by neurodevelopmental and related disabilities. Pre/co-requisites: Permission of Instructor, Graduate standing.

SWSS 335. Intrdsc Sem Neurodev Disabil II. 3 Credits.
Seminar exploring interdisciplinary process, collaborative teaming, cultural competence and family-centered care as they relate to children and families affected by neurodevelopmental and related disabilities. Pre/co-requisite: Graduate standing.

SWSS 336. Addressing Substance Abuse SW. 3 Credits.
In this course, students will investigate the research on the etiological and contributing factors to substance abuse, and study gender specific and culturally responsive treatment strategies, than include trauma-focused, motivational interviewing and cognitive-behavioral approaches. Prerequisites: Social Work majors, Concentration year status (completion of foundation year or having advancing standing status in the MSW program).

SWSS 337. Beyond Medical Models in TSW. 3 Credits.
Examines the roles and impacts of the medical model within social work and the implications for human rights and transformative practices; includes important alternative, multicultural perspectives and approaches for integrating physical, environmental and mental health. Prerequisite: Completion of the first half of the Master of Social Work foundation curriculum.
SWSS 338. TSW Responses to Violence. 3 Credits.
Considers transformative social work with adults' and adolescents' experiences of violence along a continuum from interpersonal to collective. Employs a global, poststructural/constructionist practice stance centered on human rights and social justice, safety and agency. Emphasizes collaborative practices in diverse communities. Prerequisites: Completion of all MSW foundation courses or MSW Advanced Standing status.

SWSS 340. Trans. Change in SW Orgs. 3 Credits.
This course prepares social workers to lead transformative organizational change; change that reorients the way the organization functions through critical questioning of standing organizational discourse and practices. Topics include: futures research, change models, constructivist approaches, & social inequity and difference. Prerequisites: Completion of first year of the MSW program or Advanced Standing status in the MSW program.

SWSS 380. Prof Issues in Social Work. 2-4 Credits.
Designed to cover selected social work issues in depth. Major emphasis on intensive and critical analysis of the literature and practice in a given area. Prerequisite: Instructor Permission.

SWSS 390. Concentration Yr Field Pract. 3-4 Credits.
Supervised field-based learning of 15-20 hours per week. Students are placed in human service agencies and organizations and apply advanced social work practice related to an area of concentration. Prerequisite: Completion of all Foundation Year Graduate Level Coursework; permission of Field Education Coordinator.

SWSS 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

SWSS 397. Independent Study. 1-6 Credits.
Individual work on Social Work issue(s) selected by the student in consultation with a faculty member. Prerequisite: Instructor permission required.

SWSS 398. Final Project. 1-3 Credits.
A written identification and analysis of a social work issue related to the student's concentration is prepared and presented. Prerequisite: Successful completion of foundation coursework and Instructor permission. Variable three credits. Total of three credits required. Fulfills Graduate College comprehensive examination requirement.

SOCIOLOGY (SOC)

Courses

SOC 202. Population Dynamics. 3 Credits.
Analysis of the factors affecting human population growth and distribution, migration patterns, and the relationship between economic activity and population trends. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 205. Rural Communities in Mod Soc. 3 Credits.
The changing structure and dynamics of rural social organization in context of modernization and urbanization. Emphasis on rural communities in the U.S. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing. Cross-listed with: CDAE 205.

SOC 206. Urban Communities in Mod Soc. 3 Credits.
The changing structure and dynamics of urban social organization in context of modernization and urbanization. Emphasis on cities and metropolitan areas in the United States. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 207. Community Org & Development. 3 Credits.
Communities as changing sociocultural organizational complexes within modern society. Special attention given to problems of formulation and implementation of alternative change strategies. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 211. Soc Mvmts & Collective Action. 3 Credits.
Introduction to the sociology of social movements, including examination of central topics such as movement emergence and formation, mobilization and participation, and tactical repertoires, in conjunction with explorations of specific movements both in the past and the present. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 213. Women in Dev in Global South. 3 Credits.
An examination of the meaning and measurement of development, sociodemographic characteristics, sex stratification, and effects of Colonialism and Westernization on women’s issues in the global south. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 214. Delinquency. 3 Credits.
Analysis of the nature and type of juvenile behavior that violates law, the mechanisms for defining such behaviors as delinquent, and their causes and consequences. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing. Declared Law & Society minors may substitute SOC 014 for other prerequisite coursework in Sociology.

SOC 216. Criminal Justice. 3 Credits.
Analysis of social structures and processes in criminal justice arenas, the labeling of criminal offenders, and other issues related to crime, punishment, and justice. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing. Declared Law & Society minors may substitute SOC 014 for other prerequisite coursework in Sociology.

SOC 217. Corrections. 3 Credits.
Analysis of the social structures and processes involved with individuals designated as offenders of criminal law; probation, prison, parole, and programs of prevention and rehabilitation. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing. Declared Law & Society minors may substitute SOC 014 for other prerequisite coursework in Sociology.

SOC 219. D1: Race Relations. 3 Credits.
Examination of American racial subordination in social and historical perspective. Analysis of interracial contacts, racial subcultures and social structures, and responses to racial prejudice and discrimination. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.
SOC 222. Aging & Ethical Issues. 3 Credits.
Analysis of selected ethical issues posed by an aging society and faced by older persons, their families, health care and service providers, and researchers. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum; Junior standing.

SOC 225. Organizations in Mod Society. 3 Credits.
Examination of basic classical and contemporary theory and research on the human relations, internal structures, environments, types, and general properties of complex organizations and bureaucracies. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 229. Family as Social Institution. 3 Credits.
Examination of the institution of the American family in cross-cultural and historical perspective. Theories and research on family continuity, change, and institutional relationships explored. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 232. Social Class & Mobility. 3 Credits.
Comparative and historical analysis of causes, forms, and consequences of structured social inequality in societies. Examination of selected problems in contemporary stratification theory and research. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 240. Political Sociology. 3 Credits.
Examination of the social organizations of power and authority in modern societies and the dynamics and institutional relationships of political institutions, interest groups, parties, and the public. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 243. Mass Media in Modern Society. 3 Credits.
Intensive examination of selected topics in the structure of media organizations and their relationships to and impacts upon the major institutions and publics of contemporary issues. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 250. Sociology of Culture. 3 Credits.
The relations of cultural forms and subjective experience to social structure and power; in-depth applications of interpretive approaches in contemporary sociology. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 254. Sociology of Health & Medicine. 3 Credits.
The social organization and institutional relationships of medicine in society and the role of sociocultural factors in the etiology, definition, identification, and treatment of illness. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 255. Soc of Mental Health. 3 Credits.
Analysis of the social structures and processes involved in the identification, definition, and treatment of mental illness and its sociocultural etiology and consequences. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 258. Sociology of Law. 3 Credits.
Analysis of sociocultural structure of the legal institution and its relationships to other institutions: the social organization of the legal profession, lawmaking, and the courts. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing. Declared Law & Society minors may substitute SOC 014 for other prerequisite coursework in Sociology.

SOC 272. D2: Soc of African Societies. 3 Credits.
Current social, cultural, political, and economic changes occurring in African societies, including issues of development, the state and civil society, social class, ethnonationalism, and democratization. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 274. Qualitative Research Methods. 3 Credits.
Principles of qualitative research design and ethics and data collection, analysis, and presentation. Students will complete a research project over the course of the semester. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 275. Meth of Data Anyl in Soc Rsch. 3 Credits.
Quantitative analysis of sociological data; includes table, regression, and path analysis, scaling and factor analysis, and the analysis of variance emphasizing multivariate techniques. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 279. Contemporary Sociological Thry. 3 Credits.
Critical examination of contemporary functional, conflict, exchange, interactionist, and structural theoretical approaches. A number of other theoretical approaches selected by seminar participants also examined. Prerequisites: SOC 001; SOC 101; minimum Junior standing.

SOC 281. Seminar. 3 Credits.
Presentation and discussion of advanced problems in sociological analysis. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 288. Teaching Assistantship. 1-3 Credits.
Undergraduate student service as a teaching assistant, usually in an introductory level course in the discipline, for which credit is awarded. Offered at department discretion. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing; Instructor permission.

SOC 295. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.

SOC 296. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Prerequisites: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing.
SOC 297. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion. Prerequisite: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing; Instructor permission.

SOC 298. Undergraduate Research. 1-18 Credits.
Undergraduate student work on individual or small team research projects under the supervision of a faculty member, for which credit is awarded. Offered at department discretion. Prerequisite: SOC 001; SOC 090 or SOC 100 or SOC 101; minimum Junior standing; Instructor permission.

SPANISH (SPAN)

Courses

SPAN 246. Reading Cervantes. 3 Credits.
A topical approach to the study of Cervantes, author of Don Quijote de la Mancha, and his works' significance as a reflection of/on Spain's literary-cultural landscape. Prerequisite: SPAN 140.

SPAN 286. Writing Revolution-Latin Amer. 3 Credits.
Topics may include early uprising against Spain, representation of revolutionary figures (Simon Bolivar, Pancho Villa, etc.), contemporary resistance to imperialism, among others. Prerequisite: SPAN 140.

SPAN 287. Early Span Narratives Americas. 3 Credits.
Readings and analysis of late 15th and 16th century narratives. Discussion of European and Native American perspectives, religious disputes, and the "Leyenda Negra (Black Legend). Prerequisite: SPAN 140.

SPAN 289. Hispanic Films in Context. 3 Credits.
Approaching film as reflection and shaper of Hispanic cultures through comparison with texts relevant to cultural context. Includes study of film terminology and analysis. Prerequisite: SPAN 140.

SPAN 290. Early Cultures of Spain. 3 Credits.
A study of the Spanish cultures from earliest times through 1700, emphasizing major intellectual, political, and artistic developments. Prerequisite: SPAN 140.

SPAN 291. Modern Cultures of Spain. 3 Credits.
A study of the cultures of Spain from the Enlightenment to the present, emphasizing the major intellectual, political, and artistic developments. Prerequisite: SPAN 140.

SPAN 292. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Prerequisite: SPAN 140.

SPAN 296. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion. Permission of Chair required. Prerequisite: SPAN 140.

SPAN 298. Undergraduate Research. 1-18 Credits.
Undergraduate student work on individual or small team research projects under the supervision of a faculty member, for which credit is awarded. Offered at department discretion. Permission of Chair required. Prerequisite: SPAN 140.

SPECIAL EDUCATION (EDSP)

Courses

EDSP 200. Contemporary Issues. 1-3 Credits.
Designed so that its content and structure may accommodate special issues outside the boundaries of an existing course. Prerequisite: Twelve hours in Education and related areas.

EDSP 201. D2: Foundations of Special Ed. 3 Credits.
Examination of historical and current trends in the treatment of individuals with disabilities including effects of discrimination, advocacy, litigation, legislation and economic considerations on educational services and community inclusion. Prerequisite: Twelve hours in Education and related areas, or Instructor permission.

EDSP 202. Severe Disabil Char&Intervent. 3 Credits.
Physical, sensory, health, intellectual and behavioral characteristics of developmental disabilities. Educational approaches and supports from various professional disciplines to educate students with severe disabilities. Prerequisite: Permission of Instructor.

EDSP 207. Cooperative Learning. 3 Credits.
Theoretical and experiential instruction in procedures to increase social acceptance and academic achievement of exceptional learners in mainstream settings through cooperative learning. Prerequisites: Instructor permission.

EDSP 216. Curr&Instruct in Special Ed. 3 Credits.
Introduction to curriculum and instruction for individuals who present academic and behavioral challenges. Emphasis on assessment, evaluation, curriculum and instruction, theories of learning and social development. Pre/co-requisite: Instructor Permission.

EDSP 217. Behavior Analysis in SpecialEd. 3 Credits.
Individualized instruction for learners with significant disabilities emphasizing learning principles, behavior analysis, and research based instruction and interventions. Prerequisite: Instructor Permission.

EDSP 221. Family Centered Services. 3 Credits.
An in-depth study of families of children with special needs; family ecology; interaction and life cycle. Development and implementation of family/professional collaboration strategies. Practicum required. Prerequisite: Instructor permission.

EDSP 224. Meeting Inst Needs/ All Stdnts. 3 Credits.
Students apply principles of learning and social development to improve academic and social skills of all individuals with a focus on those who present academic and behavioral challenges. Prerequisite: Instructor permission.

EDSP 228. Adv Methods & Instr Special Ed. 3 Credits.
Students apply advanced principles of behavior analysis in the development and implementation of instructional programs for learners with moderate and severe disabilities. Prerequisite: Instructor permission and introductory behavior analysis course.
EDSP 275. Voc Instr Students W/ Spec Need. 3 Credits.
Development of instructional strategies for including students with disabilities in vocational education. Procedures for developing, implementing, and evaluating individualized vocational plans. Prerequisite: Admission to an approved teacher certification program or Instructor permission.

EDSP 280. Assessment in Special Ed. 3 Credits.
Course covers assessment knowledge and skills essential for special educators, including test selection, administration and scoring, and legal issues related to special education assessment. Prerequisite: Admission to Graduate Program in Special Education or permission of the Instructor.

EDSP 290. Early Lit and Math Curriculum. 3 Credits.
Study of curriculum and technology areas related to development, adaptation, and assessment of early literacy and mathematics instruction for elementary age students with disabilities. Prerequisite: Instructor Permission.

EDSP 295. Laboratory Exp in Education. 1-6 Credits.
Supervised field work designed to give students experience in specialized areas for their professional development. Prerequisite: Permission of the Coordinator of Professional Laboratory Experiences.

EDSP 296. Laboratory Exp in Education. 1-6 Credits.
Credit as arranged.

EDSP 297. Adolescent Lit & Math Curric. 3 Credits.
Development, adaptation and assessment of literacy and mathematics curriculum for adolescent age students with disabilities. Prerequisite: Instructor Permission.

EDSP 298. Special Educ Practicum. 1-6 Credits.
Students provide direct instruction for six learners with learning disabilities, cognitive disabilities, behavior disorders, and/or multidisabilities. Prerequisite: Instructor permission.

EDSP 301. Historic Trend Issues Services. 0 or 3 Credits.
Study treatment of individuals with disabilities, including effects of discrimination, advocacy, litigation, legislation, sociological perspectives and economic considerations in education, vocational, residential service systems. Prerequisite: Instructor permission.

EDSP 302. Phys&Dev Char of Indiv w/Disab. 3 Credits.
Normal development - birth through six years, developmental disorders, disabilities, medical/health considerations. Management of significant disabilities through the employment of such procedures as handling, positioning, and feeding.

EDSP 305. Res Dev&Coll:Fam/Sch/Com/Agncy. 3 Credits.
An overview of collaborative teaming, function assessment and Vermont's System of Care for students with emotional and behavioral disabilities. A practicum experience is included. Prerequisite: BA.

EDSP 306. Emot&Behav Dis/Child&Adolesc. 3 Credits.
This course provides an overview of emotional disorders (e.g., depression, anxiety, ADHD, conduct disorder) experienced by youth and relevant assessment tools for an educational setting. Prerequisite: BA.

EDSP 307. Prev&Interv Strategy: Students. 3 Credits.
This course covers effective prevention and intervention strategies with, or at-risk, for emotional and behavioral disorders. It covers such topics as classroom management, social skills training, anger management, internalizing disorders. Prerequisite: BA in Education/related field.

EDSP 310. Curr & Tech Spec Ed: Literacy. 3 Credits.
Curricular and assessment areas essential to literacy development for students with disabilities. Development, adaptation of curricula and assessment in elementary and secondary education for students with mild, moderate, and severe disabilities. Prerequisite: Special Education Graduate Student or Instructor permission.

EDSP 311. Curr & Tech Spec Ed: Math. 0 or 3 Credits.
Curricular and assessment areas essential to math development for students with disabilities. Development, adaptation of curricula and assessment in elementary and secondary education for students with mild, moderate, and severe disabilities. Prerequisite: Special Education Graduate Student or Instructor permission.

EDSP 312. Adv Behavior Prin in Spec Ed. 3 Credits.
A survey on behavior theory and research applications for learners with learning disabilities, mental retardation, behavior disorders, and multidisabilities. Prerequisite: Acceptance to M.Ed. program or Instructor permission.

EDSP 313. Adv Behavior Prin in Spec Ed. 0 or 3 Credits.
A survey on behavior theory and research applications for learners with learning disabilities, mental retardation, behavior disorders, and multidisabilities. Prerequisite: Acceptance to M.Ed. program or Instructor permission.

EDSP 316. Research Sem in Spec Educ. 3 Credits.
Research which addresses key issues in special education is reviewed and evaluated. Students write and present a research review with attention to practitioner needs. Prerequisite: EDSP 301, EDSP 310, EDSP 312; a course in quantitative research design.

EDSP 317. Dsgn & Eval of Ed/Sey Handcpdp. 3 Credits.
Students analyze, adapt curricula for severely disabled, utilizing knowledge of normal, abnormal motor development, feeding techniques, adaptive, prosthetic devices, medical aspects, parent professional partnership, socialization, normalization, legal aspects. Prerequisite: Instructor permission.

EDSP 319. Intern Sp Personnel in Spec Ed. 1-6 Credits.
Students will undertake an approved internship in an institution which reflects the particular area of interest and needs of the student. Prerequisite: Permission for special education services. Prerequisite: Instructor permission.

EDSP 320. Lab Exp: Ed Prgmng/Sey Handcppd. 3 Credits.
Students identify, evaluate severely disabled learners, demonstrate competency in handling, positioning, feeding. Current skill levels assessed, educational programs designed, including objectives, teaching/learning procedures, evaluation, measurement. Prerequisite: Master's degree or equivalent; Instructor permission.
EDSP 322. Intern: Triadic Model Consult. 1-6 Credits.
Competency-based instruction in oral and written communication, consultation, and workshop level training is provided. Students apply the consultation model in an educational setting. Prerequisite: EDSP 310, EDSP 312, or Instructor permission.

EDSP 323. Intern: Systems Development. 1-6 Credits.
Competency-based instruction in planning for system level development and change. Students apply systems theory in an educational setting. Prerequisite: EDSP 310, EDSP 312, or Instructor permission.

EDSP 330. The Trauma Lens. 3 Credits.
Provides students with the theoretical foundation and conceptual frameworks that relate to building resilience for children, youth and families who have experienced trauma and adversity. For in-service and pre-service professionals in child welfare, health/mental health, and education.

EDSP 332. Resilience & Trauma-Informed Practic. 3 Credits.
An inter-professional approach to trauma-informed and resiliency based approaches that aim to enhance well-being for children, youth, families, and their own selves. In-service and pre-service students from across professions (child welfare, health/mental, education) will build toolkit of strategies. Prerequisite: EDSP 330 or EDSP 331 or Instructor permission.

EDSP 333. Trauma Informed System Change. 3 Credits.
Focus on trauma informed system change in schools and human service organizations; designed to provide a conceptual framework addressing the strategic process of managing change that is trauma responsive and encourages collaborative learning climate for its employees. Prerequisites: EDSP 330 or EDSP 331; EDSP 332, or Instructor permission.

EDSP 334. Trauma-Responsive Prac w/Child. 3 Credits.
Introduction to evidence-informed interventions aimed at improving social-emotional well being for children and youth who have experienced trauma and adversity. Students will leave with a toolbox of knowledge, practice and skills they can apply to their practice. Prerequisites: EDSP 330 or EDSP 331; EDSP 332, or Instructor permission.

EDSP 380. Professional Problems in Educ. 3 Credits.
Designed to cover selected educational problems in depth. The major emphasis will be on intensive and critical analysis of the literature and practice in a given area.

EDSP 382. Teaching Internship. 3-8 Credits.
Supervised teaching experiences on a full-time basis, with related seminars in teaching subject. Prerequisite: Permission of coordinator of Professional Laboratory Experiences.

EDSP 384. Intern: Course Dev & Implement. 6 Credits.
Instruction in developing competency-based courses in special education for inservice teacher training. Practicum involves team teaching with University special education faculty. Prerequisite: Certification as a Consulting Teacher/Learning Specialist and Instructor permission.

EDSP 385. Intern: Adv Syst Dev & Mgmt. 3-6 Credits.
Competency-based instruction in developing and adapting technological programs for advanced system-level change. Prerequisite: EDSP 319 for six hours; Instructor permission.

EDSP 386. Intern: Mgmt Lrng Env for Hdcpd. 1-6 Credits.
Implementation of data-based individualized education in one-to-one, small group, and large group instruction for severely disabled student(s) in special or regular classrooms. Prerequisite: EDSP 217, EDSP 290, EDSP 228 or Instructor permission.

EDSP 387. Collaborative Consultation. 3 Credits.
Adult development and group dynamics theory provide the knowledge base for collaborating with parents and teachers to meet the diverse needs of students with disabilities. Cross-listed with: EDLP 320.

EDSP 391. Master's Thesis Research. 1-6 Credits.
Thesis topic must be approved by a faculty committee.

EDSP 397. Problems in Education. 1-6 Credits.
Individual work on a research problem selected by the student in consultation with a staff member. Prerequisite: Twelve hours in education and related areas; endorsement by a sponsoring faculty member.

EDSP 422. School Self-Assessment. 3 Credits.
Explores planning for school self-assessment to meet the educational needs of all students, especially pertaining to students with a full range of disabilities and intensity of support needs within an inclusive MTSS (Multi-Tiered System of Supports). Prerequisites: Doctoral students in the Educational Leadership and Policy Studies (Special Education Leadership Program); other UVM graduate students with Instructor permission.

STATISTICS (STAT)

Courses

STAT 200. QR: Med Biostat & Epidemiology. 3 Credits.

STAT 201. QR: Stat Computing & Data Analysis. 3 Credits.
Fundamental data processing, code development, graphing and analysis using statistical software packages, including SAS and R. Analysis of data and interpretation of results. Prerequisite: STAT 141 or STAT 143 or STAT 211; or STAT 111 with Instructor permission.

STAT 211. QR: Statistical Methods I. 3 Credits.
Fundamental concepts for data analysis and experimental design. Descriptive and inferential statistics, including classical and nonparametric methods, regression, correlation, and analysis of variance. Statistical software. Prerequisite: Minimum Junior standing or STAT 141 or STAT 143 and Instructor permission. Cross-listed with: BIOS 211.
STAT 221. QR: Statistical Methods II. 3 Credits.
Multiple regression and correlation. Basic experimental design. Analysis of variance (fixed, random, and mixed models). Analysis of covariance. Computer software usage. Prerequisite: STAT 143 or STAT 211; or STAT 141 and Instructor permission. Cross-listed with: BIOS 221.

STAT 223. QR: Applied Multivariate Analysis. 3 Credits.

STAT 224. QR: Stats for Quality & Productivity. 3 Credits.
Statistical process control; Shewhart, cusum and other control charts; process capability studies. Total Quality Management. Acceptance, continuous, sequential sampling. Process design and improvement. Case studies. Prerequisite: STAT 141, STAT 143, or STAT 211.

STAT 225. QR: Applied Regression Analysis. 3 Credits.
Simple linear and multiple regression models; least squares estimates, correlation, prediction, forecasting. Problems of multicollinearity and influential data (outliers).

STAT 229. QR: Survival/Logistic Regression. 3 Credits.

STAT 231. QR: Experimental Design. 3 Credits.
Randomization, complete and incomplete blocks, cross-overs, Latin squares, covariance analysis, factorial experiments, confounding, fractional factorials, nesting, split plots, repeated measures, mixed models, response surface optimization. Prerequisite: BIOS 221 or STAT 221; or BIOS 211 or STAT 211 and STAT 201. Cross-listed with: BIOS 231.

STAT 233. QR: Survey Sampling. 3 Credits.
Design and data analysis for sample surveys. Simple random, stratified, systematic, cluster, multistage sampling. Practical issues in planning and conducting surveys. Prerequisite: STAT 211; or STAT 141 or STAT 143 with Instructor permission.

STAT 235. QR: Categorical Data Analysis. 3 Credits.
Measures of association and inference for categorical and ordinal data in multiway contingency tables. Log linear and logistic regression models. Prerequisite: STAT 211. Cross-listed with: BIOS 235.

STAT 237. QR: Nonparametric Statis Mthd. 3 Credits.
Nonparametric and distribution free methods; categorical, ordinal, and quantitative data; confidence intervals; rank and chi-square hypothesis tests; computer-intensive procedures (bootstrap, exact tests). Prerequisite: STAT 211; or STAT 141 or STAT 143 with Instructor permission.

STAT 241. QR: Statistical Inference. 3 Credits.
Introduction to statistical theory: related probability fundamentals, derivation of statistical principles, and methodology for parameter estimation and hypothesis testing. Prerequisites: STAT 151, STAT 153, or STAT 251, and STAT 141 or equivalent, and MATH 121. Cross-listed with: BIOS 241.

STAT 251. QR: Probability Theory. 3 Credits.
Distributions of random variables and functions of random variables. Expectations, stochastic independence, sampling and limiting distributions (central limit theorems). Concepts of random number generation. Prerequisite: MATH 121; STAT 151 or STAT 153 recommended. Cross-listed with: MATH 207, BIOS 251.

STAT 252. Appl Discr Stochas Proc Models. 1 Credit.
Markov chain models for biological, social, and behavioral systems models. Random walks, transition and steady-state probabilities, passage and recurrence times. Prerequisite: STAT 151, STAT 153, or STAT 251.

STAT 253. QR: Appl Time Series & Forecasting. 3 Credits.
Autoregressive moving average (Box-Jenkins) models, autocorrelation, partial correlation, differencing for nonstationarity, computer modeling. Forecasting, seasonal or cyclic variation, transfer function and intervention analysis, spectral analysis. Prerequisite: STAT 211 or STAT 225; or STAT 141 or STAT 143 with Instructor permission. Cross-listed with: CSYS 253.

STAT 256. QR: Neural Computation. 3 Credits.
Introduction to artificial neural networks, their computational capabilities and limitations, and the algorithms used to train them. Statistical capacity, convergence theorems, backpropagation, reinforcement learning, generalization. Prerequisites: MATH 122 or MATH 124 or MATH 271; STAT 143 or STAT 153 or equivalent; CS 110. Cross-listed with: CS 256, CSYS 256.

STAT 261. QR: Statistical Theory. 3 Credits.
Point and interval estimation, hypothesis testing, and decision theory. Application of general statistical principles to areas such as nonparametric tests, sequential analysis, and linear models. Prerequisite: STAT 251; or STAT 151 or STAT 153 with Instructor permission. Cross-listed with: BIOS 261.

STAT 265. QR: Integrated Product Dev. 3 Credits.
Project-based course focusing on the entire product life cycle. Team dynamics, process and product design, quality, materials, management, and environmentally-conscious manufacturing. Prerequisite: Senior standing. Cross-listed with: BSAD 293, ME 265.

STAT 281. Statistics Practicum. 1-3 Credits.
Intensive experience in carrying out a complete statistical analysis for a research project in substantive area with close consultation with a project investigator. Prerequisite: STAT 200 or STAT 201 or STAT 221 through STAT 237 or STAT 253; some statistical software experience; Instructor permission.
STAT 287. QR: Data Science I. 3 Credits.
Data harvesting, cleaning, and summarizing. Working with non-
traditional, non-numeric data (social network, natural language
textual data, etc.). Scientific visualization using static and interactive
"infographics". A practical focus on real datasets, and developing
good habits for rigorous and reproducible computational science.
Prerequisites: CS 020 or CS 021; STAT 141 or STAT 143 or
STAT 211; CS 110 and MATH 124 recommended. Cross-listed
with: CS 287.

STAT 288. QR: Statistical Learning. 3 Credits.
Statistical learning methods and applications to modern problems in
science, industry, and society. Topics include: linear model selection,
cross-validation, lasso and ridge regression, tree-based methods,
bagging and boosting, support vector machines, and unsupervised
learning. Prerequisites: STAT 143, STAT 183 or STAT 211. Cross-
listed with: CS 288.

STAT 295. Advanced Special Topics. 1-18 Credits.
For advanced students. Lectures, reports, and directed readings on
advanced topics. Prerequisite: As listed in schedule of courses.

STAT 321. Seminar in Advanced Statistics. 1 Credit.
Seminar presentations and discussions of statistical literature
pertaining to the theoretical aspects of methods studied in STAT 221,
STAT 223, STAT 224, STAT 225, and STAT 229, respectively.
Corequisites: STAT 221; STAT 241 or STAT 261 recommended.

STAT 322. Seminar in Advanced Statistics. 1 Credit.
Seminar presentations and discussions of statistical literature
pertaining to the theoretical aspects of methods studied in STAT 221,
STAT 223, STAT 224, STAT 225, and STAT 229, respectively.
Corequisites: STAT 223; STAT 241 or STAT 261 recommended.

STAT 323. Seminar in Advanced Statistics. 1 Credit.
Seminar presentations and discussions of statistical literature
pertaining to the theoretical aspects of methods studied in STAT 221,
STAT 223, STAT 224, STAT 225, and STAT 229, respectively.
Corequisites: STAT 222; STAT 241 or STAT 261 recommended.

STAT 324. Seminar in Advanced Statistics. 1 Credit.
Seminar presentations and discussions of statistical literature
pertaining to the theoretical aspects of methods studied in STAT 221,
STAT 223, STAT 224, STAT 225, and STAT 229, respectively.
Corequisites: STAT 224; STAT 241 or STAT 261 recommended.

STAT 325. Seminar in Advanced Statistics. 1 Credit.
Seminar presentations and discussions of statistical literature
pertaining to the theoretical aspects of methods studied in STAT 221,
STAT 223, STAT 224, STAT 225, and STAT 229, respectively.
Corequisites: STAT 225 or STAT 221; STAT 241 or STAT 261 recommended.

STAT 329. Seminar in Advanced Statistics. 1 Credit.
Seminar presentations and discussions of statistical literature
pertaining to the theoretical aspects of methods studied in STAT 221,
STAT 223, STAT 224, STAT 225, and STAT 229, respectively.
Corequisite: STAT 229; STAT 241 or STAT 261 recommended.

STAT 330. Bayesian Statistics. 3 Credits.
Introduction to Bayesian inference. Posterior inference, predictive
distributions, prior distribution selection. MCMC algorithms.
Hierarchical models. Model checking and selection. Use of computer
software. Pre/co-requisite: STAT 241 or STAT 251 or Instructor
permission.

STAT 355. Statistical Pattern Recognition. 3 Credits.
Analysis of algorithms used for feature selection, density estimation,
and pattern classification, including Bayes classifiers, maximum
likelihood, nearest neighbors, kernels, discriminants, neural networks
and clustering. Prerequisite: STAT 241 or STAT 251, or Instructor

STAT 360. Linear Models. 3 Credits.
Theory of linear models, least squares and maximum likelihood
estimation, fixed, random and mixed models, variance component
estimation, introduction to generalized linear models, bootstrapping.
Prerequisites: STAT 261 and knowledge of matrix algebra or
Instructor permission.

STAT 369. Applied Geostatistics. 3 Credits.
Introduction to the theory of regionalized variables, geostatistics
(kriging techniques): special topics in multivariate analysis;
Applications to real data subject to spatial variation are emphasized.
Prerequisites: STAT 223 or STAT 225; CS 020 or CS 021; or
Instructor permission. Cross-listed with: CE 369, CSYS 369.

STAT 380. Sem:Statistics & Biostatistics. 0.5-1 Credits.
Presentation and discussion of current topics, methodological
research and applications in Statistics and Biostatistics by graduate
students, faculty and guest speakers. Prerequisite: Instructor
Permission.

STAT 381. Statistical Research. 1-3 Credits.
Methodologic or data analytic research culminating in oral and
written reports to the faculty. Prerequisite: Instructor permission.

STAT 385. Consulting Practicum. 1-3 Credits.
Supervised field work in statistical consulting. Experiences may
include advising UVM faculty and students or clients in applied
settings such as industry and government agencies. Prerequisites:
Second year Graduate standing in Statistics or Biostatistics and
permission of Statistics Program Director.

STAT 387. Data Science II. 3 Credits.
Advanced data analysis, collection, and filtering. Statistical modeling,
monte carlo statistical methods, and in particular Bayesian data
analysis, including necessary probabilistic background material.
A practical focus on real datasets and developing good habits for
rigorous and reproducible computational science. Prerequisite:
STAT 287 or CS 287 or Instructor permission. Cross-listed with:
CS 387.

STAT 391. Master's Thesis Research. 1-6 Credits.

STAT 395. Advanced Special Topics. 1-18 Credits.
Lectures or directed readings on advanced and contemporary topics
not presently included in other statistics courses. Prerequisites: As
listed in schedule of courses.

SURGERY (SURG)
Courses

SURG 200. Emergency Medicine Research I. 4 Credits.
Lecture course with 4 hour lab. Introduction to research in Emergency Medicine with clinical exposure including shadowing EMTs, RNs, and MDs. Students will learn about research ethics, informed consent, and clinical epistemology. Prerequisites: Minimum Sophomore standing and Instructor permission; First-Year students who have prior clinical experience (e.g. EMTs) or are non-traditional students are considered on a case-by-case basis.

SURG 201. Emergency Medicine Research II. 4 Credits.
Advanced discussion and research training in emergency medicine with continued emergency department-based human subjects laboratory. Includes eight hours of clinical time per week helping recruit patients for ongoing research projects as well as a one hour seminar per week. Prerequisites: SURG 200 with minimum grade B; Instructor permission.

SURG 220. Emerg. Medicine Research III. 3 Credits.
Emergency medicine research under guidance of a faculty member, including facilitating study enrollment and implementation of research project proposed during SURG 201. Prerequisites: SURG 200, SURG 201; Instructor permission.

SURG 301. Immunity and Host Defense. 3 Credits.
This course will cover aspects of the immune system that are necessary to understand the complex interactions between pathogen and host. Prerequisites: BIOL 001 and BIOL 002 or equivalent.

SURG 302. Introduction to Flow Cytometry. 2 Credits.
Provides basic knowledge in the theoretical and practical aspects of flow cytometry technology; combination of lecture and training in the practical use of instrumentation and analysis software.

SURG 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

TRANSPORTATION RESEARCH CENTER (TRC)

Courses

TRC 310. Transportation Systems Seminar. 1 Credit.
Introduction to the complex interconnections of engineering, policy, science and social science that characterize mobility systems. Seminar emphasizes academic research, articles and student writing. Prerequisite: Graduate standing or Instructor permission.

TRC 312. Sustainability & Transportn. 3 Credits.
Introduction to the complex interconnection of engineering, policy, science and social science that characterize transportation systems, mobility problems and solutions. Interdisciplinary teams conduct case studies. Prerequisite: Graduate standing or Instructor permission. Cross-listed with: CE 312, PA 342.

TRC 314. Risk/Behavior in Transportn. 3 Credits.
In-depth examination of human, environmental and vehicle factors in transportation crashes. Students develop safety research proposals and statistical measurements of risk and rates. Prerequisite: Graduate standing or Instructor permission.

TRC 316. Land Use Policy & Economics. 3 Credits.
Economic and social forces that drive urban and suburban land use patterns, such as urban sprawl, and the policy mechanisms designed to intervene in those processes. Prerequisite: Graduate standing or Instructor permission. Cross-listed with: NR 377.

TRC 395. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

VERMONT STUDIES (VS)

Courses

VS 295. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Prerequisite: Junior/Senior/Graduate standing.

VS 296. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles. Prerequisite: Junior/Senior/Graduate standing.

WATER RESOURCES (WR)

Courses

WR 391. Master Thesis Rsch. 1-12 Credits.
Credit as arranged.

WR 396. Advanced Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

WILDLIFE & FISHERIES BIOLOGY (WFB)

Courses

WFB 232. Ichthyology. 3 Credits.
Biology of fishes. Focus is on form and function, morphology, physiology, behavior, life history, and ecology of modern fishes. Prerequisites: BIOL 001 and BIOL 002, or BCOR 011 and BCOR 012; Junior standing. Alternate years.

WFB 261. Fisheries Management. 3 Credits.
Principles of fisheries management, including population assessment, analytical methods, harvest allocation models, human dimensions, policy and emerging issues. Prerequisites: BIOL 001 or BCOR 011; BIOL 002 or BCOR 012; WFB 161.

WFB 271. Wetlands Wildlife Ecology. 4 Credits.
Ecology, behavior, and population dynamics of wetland wildlife with emphasis on policy and management for waterfowl in North America. Prerequisites: WFB 174; NR 103 or BCOR 102.

WFB 275. Wildlife Behavior. 3 Credits.
Behavior and social organization of game and nongame species as they pertain to population management. Prerequisites: BIOL 001 or BCOR 011, BIOL 002 or BCOR 012, NR 103 or BCOR 102.

WFB 279. Marine Ecology & Conservation. 3 Credits.
The science of conservation biology and ecology in marine systems. Topics such as the components and processes of marine ecosystems, fisheries management, endangered species, and marine protected areas will be explored. Prerequisites: NR 103 or BCOR 102; Junior standing.
WFB 283. Terrestrial Wildlife Ecology. 4 Credits.
Wildlife ecology with an emphasis on the management and conservation of species, populations, and ecosystems. Prerequisite: WFB 174, and NR 103 or BCOR 012.

WFB 311. Ecology of Fishes. 3 Credits.
Structure of fish assemblages, zoogeography, morphology, life history strategies, bioenergetics, competition, predation, and fish effect on ecosystems. Prerequisite: Graduate standing.

WFB 352. Population Dynamics & Modeling. 4 Credits.
Modeling and analysis of animal population dynamics, as influenced by environmental, ecological, and management factors; estimation of population size, density, survivorship, reproduction, and migration. Prerequisite: Graduate standing.

WFB 387. Graduate Special Problems. 1-6 Credits.
Advanced readings or special investigation dealing with a topic beyond the scope of existing formal courses or thesis research, culminating in an acceptable paper.

WFB 388. Graduate Special Problems. 1-3 Credits.
Advanced readings or special investigation dealing with a topic beyond the scope of existing formal courses or thesis research, culminating in an acceptable paper.

WFB 396. Advanced Special Topics. 1-18 Credits.
See schedule of courses for specific titles.

ACCOUNTANCY
http://www.uvm.edu/business/

OVERVIEW
The Master of Accountancy (M.Acc) degree is designed to equip students with the 150 hours of university-level education required to sit for the Certified Public Accountant (CPA) exam and become certified as a CPA. The curriculum prepares students to become successful professionals, auditors, tax preparers and advisors, corporate, not-for-profit and governmental accountants. Graduates may also complete various other professional certifications including the Certified Management Accountant (CMA), Certified Internal Auditor (CIA), Certified Information Systems Auditors (CISA) or the Certified Fraud Examiner (CFE).

DEGREES
- Accountancy (M.Acc.) AMP (p. 94)
- Accountancy M.Acc. (p. 95)

FACULTY
Arel, Barbara M.; Associate Professor, Grossman School of Business; PHD, Arizona State University
Bonfield, Carolyn Marie; Associate Professor, Grossman School of Business; PHD, University of Iowa
Cats-Baril, William Lawrence; Associate Professor, Grossman School of Business; PHD, University of Wisconsin-Madison
Chiang, Kevin C.; Professor, Grossman School of Business; PHD, Louisiana State University
Dempsey, Stephen Jeffrey; Associate Professor, Grossman School of Business; PHD, Virginia Polytechnic Institute and State University
De Roeck, Kenneth; Assistant Professor, Grossman School of Business; DBA; Université catholique de Louvain
DeWitt, Rocki-Lee; Professor, Grossman School of Business; PHD, Columbia University
Do, Hung Tuan; Assistant Professor, Grossman School of Business; PHD, Purdue University
Glavas, Ante; Associate Professor, Grossman School of Business; PHD, Case Western Reserve University
Gove, Steve; Associate Professor, Grossman School of Business, PHD, Arizona State University
Hart, Stuart; Professor, Grossman School of Business; PHD, University of Michigan
Hughes, Susan; Associate Professor, Grossman School of Business; PHD, University of Cincinnati
Jones, David A.; Professor, Grossman School of Business; PHD, University of Calgary
Kingsley, Allison F.; Assistant Professor, Grossman School of Business; PHD, Columbia University
Lowensohn, Suzanne; Assistant Professor, Grossman School of Business; PHD, University of Miami
Lucas, Marilyn T.; Associate Professor, Grossman School of Business; PHD, University of Illinois Urbana-Champaign
Monsen, Erik; Associate Professor, Grossman School of Business; PHD, University of Colorado at Boulder
Noordewier, Thomas Gerald; Professor, Grossman School of Business; PHD, University of Wisconsin-Madison
Novak, David C.; Associate Professor, Grossman School of Business; PHD, Virginia Polytechnic Institute and State University
Prevost, Andrew; Associate Professor, Grossman School of Business; PHD, Wayne State University
Schnitzlein, Charles R.; Professor, Grossman School of Business; PHD, Washington University
Sharma, Pramodita; Professor, Grossman School of Business; PHD, University of Calgary
Sharma, Sanjay; Dean and Professor, Grossman School of Business; PHD, University of Calgary
Tomas, Amy M.; Senior Lecturer, Grossman School of Business; PHD, University of Memphis
Tomas III, Michael John; Associate Professor, Grossman School of Business; PHD, Syracuse University
Vanden Bergh, Richard G.; Professor, Grossman School of Business; PHD, University of California Berkeley
Venugopal, Srinivas; Assistant Professor, Grossman School of Business; PHD, University of Illinois at Urbana-Champaign
Walberg, Glenn C.; Associate Professor, Grossman School of Business; JD, College of William and Mary
Zhang, Chun; Associate Professor, Grossman School of Business; PHD, Michigan State University

ACCOUNTANCY (M.Acc.) AMP
All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

OVERVIEW
The Master of Accountancy provides a means of entry into the public accounting profession. Qualified undergraduate students who plan
to earn the Master of Accountancy (M.Acc.) degree may enroll in the Accelerated Master’s Program which enables UVM students to begin working on their master’s degree requirements during the last semester of their undergraduate study.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Accountancy

UVM students should apply for admission to the accelerated M.Acc. program during the first semester of their senior year. Admission to the accelerated program requires the following:

- A declared accounting or finance concentration;
- Successful completion of Financial Reporting 1 and 2;
- A minimum cumulative grade point average of 3.20;
- Completion of the Graduate College application form, that must include at least one positive letter of recommendation from a faculty member who taught the applicant in a 100- or 200-level accounting or finance course;
- A designation on the first page of the application indicating the applicant is applying for the accelerated program.

Consistent with the M.Acc. application guidelines, GMAT scores are not required of students enrolled in the Grossman School of Business accounting concentration with overall GPAs of 3.20 or higher.

Minimum Degree Requirements
Students may take up to nine (9) credits of graduate course work prior to the conferral of the B.S.B.A. degree. Of these, a maximum of six (6) graduate credits taken after Graduate College acceptance into the AMP program may be counted in the grade point average for both the B.S.B.A. and M.Acc. degrees. The other three (3) credits will only count toward the M.Acc. degree. All courses to be counted toward the M.Acc. degree must be completed after Graduate College acceptance of the students in the accelerated program, be 200- or 300-level business courses, and cannot include any courses that are required for the undergraduate program (the prohibition includes any courses required to reach 120 hours required for the B.S.B.A. and the four 100- and 200-level courses required for the accounting concentration), and be approved by the program director.

Comprehensive Examination
M.Acc. students complete the comprehensive examination through successful completion of the capstone course, BSAD 361

Requirements for Advancement to Candidacy for the Degree of Master of Accountancy
Successful completion of any pre-requisite courses, and at least 15 graded graduate credits with a 3.0 or better, including all core courses.

ACCOUNTANCY M.ACC.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
The Master of Accountancy provides a means of entry into the public accounting profession and positions in corporate, government and not-for-profit financial reporting.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Accountancy
To be considered by the Graduate Studies Committee, applicants to the Master of Accountancy must meet the following minimum requirements:

- 4-year Bachelor’s degree
- 2.75 (4.00 scale) overall GPA
- 500 score on the GMAT (or the GRE equivalent)

Students graduating from academic institutions in non-English speaking countries must demonstrate their abilities in English. A minimum TOEFL score of 90 is required for admission.

Students graduating from the University of Vermont, St. Michael’s College, or an accredited U.S. institution with a major or concentration in accounting or finance should consult the MAcc Program webpage for additional specific information.

Prerequisite Courses include:

- Mathematics
- Macro Economics
- Micro Economics
- Business Statistics
- Principles of Financial Accounting
- Principles of Managerial Accounting
- Intermediate Accounting 1
- Intermediate Accounting 2

Minimum Degree Requirements
The program requires 30 graduate credit hours made up of:

- 18 credit hours of accounting, auditing and tax knowledge;
- 3 credit hours of CPA law;
- 3 credit hours of Professional Communications; and
- 6 credit hours of graduate-level business electives. [Students who completed an undergraduate business degree have the option of replacing one of these business electives with one additional accounting course.]

The program emphasizes appropriate research strategies and techniques, effective business writing, and professional presentation skills. Students work closely with their academic advisor to design a course of study that best suits their future career objectives and prior course work.

Students who meet the prerequisite requirements can complete the MAcc program in one year. Spring admission is only permitted for students who plan to spend at least three semesters in the program.
International students will likely require two years to complete the program. The capstone course must be completed in the final spring semester of study.

**Comprehensive Examination**
MAcc students complete the comprehensive examination through successful completion of the capstone course, BSAD 361.

**Requirements for Advancement to Candidacy for the Degree of Master of Accountancy**
Successful completion of any prerequisite courses, and at least 15 graded graduate credits with a 3.00 GPA or better, including all core courses.

**AGROECOLOGY**
http://www.uvm.edu/agroecology/learning/cgsa/

**OVERVIEW**
Agroecology is an approach that seeks to integrate ecological science with other academic disciplines and knowledge systems to guide research and action towards the sustainable transformation of our current agrifood system. The Certificate of Graduate Study in Agroecology (CGSA) is a 15-credit program that can be completed within one year. The curriculum encourages students to integrate ecological, social, and economic perspectives in developing practical solutions to contemporary problems within our agrifood system. The fully prescribed coursework consists of an introductory residential/online hybrid course, three foundational online classes, and a final synthesis seminar course. Students will join yearly cohorts to build community and expand the network among program participants. The certificate is designed so that you can live in your own food shed while learning lessons that you can apply anywhere.

More information on the Certificate is available from the ALC website.

**DEGREES**
Agroecology CGS (p. 96)

**FACULTY**
Mendez, Victor E.; Professor, Department of Plant and Soil Science; PHD, University of California Santa Cruz

**AGROECOLOGY CGS**
All students must meet the Requirements for the Certificates of Graduate Study (p. 265)

**OVERVIEW**
Agroecology is an approach that seeks to integrate ecological science with other academic disciplines and knowledge systems to guide research and action towards the sustainable transformation of our current agrifood system. The Certificate of Graduate Study in Agroecology (CGSA) is a 15-credit program that can be completed within one year. The curriculum encourages students to integrate ecological, social, and economic perspectives in developing practical solutions to contemporary problems within our agrifood system. The fully prescribed coursework consists of an introductory residential/online hybrid course, three foundational online classes, and a final synthesis seminar course. Students will join yearly cohorts to build community and expand the network among program participants. The certificate is designed so that you can live in your own food shed while learning lessons that you can apply anywhere.

More information on the Certificate is available from the ALC website.

**Minimum Degree Requirements**
Students may earn the certificate either in conjunction with a UVM master’s or doctoral degree, or independent of a degree.

The Certificate of Graduate Study in Agroecology requires fifteen graduate credits, made up of five core courses. They are distributed as follows:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSS 311</td>
<td>Introduction to Agroecology</td>
<td>3</td>
</tr>
<tr>
<td>PSS 312</td>
<td>Ecological Foundations of Agro</td>
<td>3</td>

<tr>
<td>PSS 315</td>
<td>Agroecology Grad Capstone</td>
<td>3</td>
</tr>
</tbody>
</table>

More information on the Certificate is available from the ALC website.
ANIMAL SCIENCE

http://asci.uvm.edu/

OVERVIEW

The research program focuses on farm animal agriculture involving a combination of courses and graduate research. Areas of research interest include lactation physiology, mastitis, calf and cow nutrition, immunology, and genetics.

DEGREES

- Animal Science AMP (p. 97)
- Animal Science M.S. (p. 97)

FACULTY

Barbano, David Mark; Adjunct Professor, Department of Animal and Veterinary Sciences; PHD, Cornell University
Barlow, John; Associate Professor, Department of Animal and Veterinary Sciences; DVM, University of Illinois Urbana-Champaign; PHD, University of Vermont
Dann, Heather; Adjunct Assistant Professor, Department of Animal and Veterinary Sciences; PHD, University of Illinois
Fobare Erickson, Patricia Ann; Senior Lecturer, Department of Animal and Veterinary Sciences; DVM, Cornell University
Grant, Richard; Adjunct Professor, Department of Animal and Veterinary Sciences; PHD, Purdue University
Greenwood, Sabrina Louise; Associate Professor, Department of Animal and Veterinary Sciences; PHD, University of Guelph
Kraft, Jana; Associate Professor, Department of Animal and Veterinary Sciences; PHD, Friedrich-Schiller-University of Jena
McKay, Stephanie Dawn; Professor, Department of Animal and Veterinary Sciences; PHD, Cornell University
Van Amburgh, Michael; Adjunct Professor, Department of Animal Science and Veterinary Science; PHD, Cornell University
Zhao, Feng-Qi; Professor, Department of Animal and Veterinary Sciences; PHD, University of Alberta

ANIMAL SCIENCE AMP

All students must meet the Requirements for the Accelerated Master's Degree Programs (p. 264)

OVERVIEW

An option for the outstanding student with an interest in a graduate degree is the Accelerated Master’s Program in which students commence study for their master’s degree in their senior year and have the potential to obtain a B.S./M.S. in a five-year period. Further details about the Accelerated Master’s Program, available for students majoring in Animal Science or Biological Science, can be obtained from the Department of Animal and Veterinary Sciences, 102 Terrill Bldg., (802) 656-0155.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science

An acceptable undergraduate major in animal science, chemistry, biology, or a related field. Satisfactory scores on the general (aptitude) Graduate Record Examination must be presented.

Minimum Degree Requirements

<table>
<thead>
<tr>
<th>Option A (Thesis)</th>
<th>30</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thirty credits of study with a minimum of fifteen credits in courses in animal science or related fields and a minimum of nine credits of thesis research. Students are required to attend and participate in ASCI 301 and ASCI 302 twice during their programs. Students must also prepare a research proposal.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Option B (Non-thesis)</th>
<th>30</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thirty credits of study with twenty-four credits in courses in animal science or related fields, and a minimum of six credits of literature research. Students are required to attend and participate in ASCI 301 and ASCI 302 every semester the courses are offered.</td>
<td></td>
</tr>
</tbody>
</table>

Comprehensive Examination

Animal Science AMP students are required to pass a written comprehensive examination, an oral comprehensive examination, or both, in their field of specialization. The student's studies committee decides the format of this exam (time and page limits, open or closed book, etc.). All comprehensive examinations are taken on the University of Vermont campus in Burlington. One re-examination only is permitted for any failed comprehensive examination. The comprehensive examination is not the same as the oral thesis defense, and must be passed satisfactorily before defending the thesis. Usually the comprehensive exam process is completed at least 2 months prior to the thesis defense.

Requirements for Advancement to Candidacy for the Degree of Master of Science

The applicant must satisfy the requirements of the Graduate College with satisfactory performance in graduate courses or courses prescribed by the graduate studies committee.

ANIMAL SCIENCE M.S.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW

The research program focuses on farm animal agriculture involving a combination of courses and graduate research. Areas of research
interest include lactation physiology, mastitis, calf and cow nutrition, immunology, and genetics.

**ANIMAL, NUTRITION AND FOOD SCIENCES**

http://www.uvm.edu/nfs/

**OVERVIEW**

An interdisciplinary program leading to the Ph.D. degree in Animal, Nutrition and Food Sciences is offered under the direction of a committee composed of faculty members drawn from the departments of Animal and Veterinary Sciences and Nutrition and Food Sciences. The goal of this interdisciplinary program is to provide advanced education and research training in mammalian physiology and endocrinology, mammary gland biology, basic and applied nutrition, animal genetics, and food microbiology and technology. While all Ph.D. students will complete a common core of courses, they will choose from one of three tracks for specialized study: nutrition, food sciences, or animal science. The program provides flexibility necessary for students to gain competence in the area of their choice. The extensive research facilities of the participating departments are available to all graduate students enrolled in the program.

Currently, only the Animal Science track is accepting students.

**DEGREES**

- Animal, Nutrition and Food Sciences Ph.D. (p. 98)

**FACULTY**

**Barlow, John;** Associate Professor, Department of Animal and Veterinary Sciences; DVM, University of Illinois Urbana-Champaign; PHD, University of Vermont

**Blauijkel, Ruth;** University Veterinarian, Department of Animal and Veterinary Sciences; DVM, Michigan State University, PHD, Washington State University

**Dann, Heather;** Adjunct Assistant Professor, Department of Animal and Veterinary Sciences; PHD, University of Illinois

**Fobare Erickson, Patricia Ann;** Senior Lecturer, Department of Animal and Veterinary Sciences; DVM, Cornell University

**Grant, Richard;** Adjunct Professor, Department of Animal and Veterinary Sciences; PHD, Purdue University

**Greenwood, Sabrina Louise;** Associate Professor, Department of Animal Science and Veterinary Sciences; PHD, University of Guelph

**Guo, Ming Ruo;** Professor, Department of Nutrition and Food Science; PHD, University College Cork

**Kraft, Jana;** Associate Professor, Department of Animal and Veterinary Sciences; PHD, Friedrich-Schiller-University of Jena

**McKay, Stephanie Dawn;** Associate Professor, Department of Animal and Veterinary Sciences; PHD, University of Alberta

**Smith, Julia M.;** Research Associate Professor, Department of Animal and Veterinary Sciences; DVM, Cornell University

**Testroet, Eric;** Assistant Professor, Department of Animal and Veterinary Sciences; PHD, Iowa State University

**Townson, David H;** Professor, Department of Animal and Veterinary Sciences; PHD, Ohio State University

**Zhao, Feng-Qi;** Professor, Department of Animal and Veterinary Sciences; PHD, University of Alberta

**ANIMAL, NUTRITION AND FOOD SCIENCES PH.D.**

All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)
OVERVIEW
An interdisciplinary program leading to the Ph.D. degree in Animal, Nutrition and Food Sciences is offered under the direction of a committee composed of faculty members drawn from the departments of Animal and Veterinary Sciences and Nutrition and Food Sciences. The goal of this interdisciplinary program is to provide advanced education and research training in mammalian physiology and endocrinology, mammary gland biology, basic and applied nutrition, and food microbiology and technology. While all Ph.D. students will complete a common core of courses, they will choose from one of three tracks for specialized study: nutrition, food sciences, or animal science. The program provides flexibility necessary for students to gain competence in the area of their choice. The extensive research facilities of the participating departments are available to all graduate students enrolled in the program.

Currently, only the Animal Science track is accepting students.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy
Satisfactory scores on the general (aptitude) Graduate Record Examination must be presented.

Minimum Degree Requirements
- The candidate must meet all the requirements as prescribed by the Graduate College for the degree of Doctor of Philosophy.
- Candidates in the Animal Science track are required to attend and participate in ASCI 301 and ASCI 302 every semester that the courses are offered. These candidates must also participate in one semester of ASCI 303.
- In addition, all courses and seminars as established by the graduate studies committee must be satisfactorily met. The student is expected to meet with their committee within the first two semesters and then at least annually until the doctoral research is completed and an acceptable dissertation written and defended.
- It is also expected that a Ph.D. student will have at least two publications ready to submit, or already submitted, to an appropriate scientific journal. The specific publication expectations will be determined in consultation with the candidate’s Graduate Studies Committee.
- All doctoral candidates must acquire appropriate teaching experience prior to the award of the degree. The nature and amount of teaching will be determined by the candidate’s program.
- Proficiency in a modern foreign language or computer language and programming is optional at the discretion of the graduate studies committee.

Comprehensive Examination
For candidates in all tracks, the Comprehensive Examination will consist of both a written and oral component. The specific format of the written and oral exams will be determined in consultation with the candidate’s Graduate Studies Committee. Both the written and oral exams should typically be passed by the end of the third year of candidacy, but absolutely no later than six months before the dissertation is submitted. Should the candidate fail the examination, only one re-examination is permitted. Success in the comprehensive examination is prerequisite to standing for the Dissertation Defense Examination.

Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy
The applicant must satisfy the prerequisites of the Graduate College and complete one semester with satisfactory performance in graduate courses or courses prescribed by the graduate studies committee.

ATHLETIC TRAINING
OVERVIEW
https://www.uvm.edu/cnhs/rms

OVERVIEW
The mission of the University of Vermont MS in Athletic Training Program (hereafter MSAT) is to prepare and educate graduate students in the allied health profession of Athletic Training. By engaging students with the competencies and clinical proficiencies of the Commission on Accreditation of Athletic Training Education (CAATE) through professional integration of clinical behaviors and clinical decision-making, it is the mission of the MSAT to prepare high-quality, responsible, confident students to pass the Board of Certification (BOC) exam and to be prepared for employment as a Certified Athletic Trainer. It is also the mission of the UVM MSAT Program to conduct the preparation of athletic training students in a caring, respectful environment, keeping in mind that each student is an individual with unique talents and needs.

DEGREES
Athletic Training M.S. (p. 99)

FACULTY
Sibold, Jeremy S.; Associate Professor, Department of Rehabilitation and Movement Science; EDD, West Virginia University
Tourville, Timothy; Assistant Professor, Department of Rehabilitation and Movement Science, PHD; University of Vermont
Westervelt, Karen C.; Clinical Assistant Professor, Department of Rehabilitation and Movement Science; PHD, Bond University-Robina, Queensland, Australia

ATHLETIC TRAINING M.S.
All students must meet the Requirements for the Master’s Degree (p. 265).

OVERVIEW
UVM’s Master of Science in Athletic Training program integrates evidence-based, interprofessional practice with the hands-on skills of a 21st century athletic trainer. Investments in labs and teaching technologies and an excellent faculty-student ratio with faculty who have a proven track record in teaching, scholarship and clinical practice provide an optimum environment for learning. The 50-
The credit curriculum creates an impactful, affordable way to become a leader in athletic training. The curriculum is a 2-year full-time format consisting of 6 semesters of didactic and clinical skills coursework, and 5 semesters of clinical education and experience.

The purpose of the Athletic Training Program is to provide students with the knowledge, skills, clinical abilities, and foundational behaviors of professional practice needed to enter the health care profession of athletic training. The Athletic Training Program is designed using a medical-based education model to provide the graduate student with professional preparation and eligibility to sit for the Board of Certification (BOC) for Athletic Trainers examination. Certified athletic trainers are highly trained, multi-skilled health care professionals qualified to work in a number of settings to enhance the quality of health care for athletes and those engaged in physical activity. Working closely with physicians and other health professionals, their expertise includes “prevention, examination, diagnosis, treatment, and rehabilitation of emergent, acute or chronic injuries and medical conditions. Athletic training is recognized by the American Medical Association (AMA), Health Resources Services Administration (HRSA) and the Department of Health and Human Services (HHS) as an allied health care profession”.

During the intensive clinical education and experience portion of the program, students are assigned to a different clinical preceptor each semester at both on- and off-campus clinical sites. Our more than 25 affiliated clinical sites include UVM’s Division 1 varsity collegiate sports, UVM’s club sports teams, the Department of Orthopaedics and Rehabilitation at the UVM College of Medicine, local high schools, Division 2 collegiate sports at St. Michael’s College, and outpatient orthopedic rehabilitation clinics. Students are directly involved with patients and athletes and gain experience interacting with parents, coaches, and other health care professionals. Students may also have the opportunity to observe surgery and engage in research with department faculty if interested. Each student is evaluated at regular intervals and must demonstrate mastery of educational competencies in order to continue with subsequent clinical assignments.

The Athletic Training Program boasts exceptional faculty members with clinical and research expertise, whom many also continue to practice athletic training in the community. The faculty members below are in addition to those who have been formally appointed as Graduate Faculty members:

- **Maynard, Alan;** Clinical Associate Professor, Department of Rehabilitation and Movement Science; MEd, University of Virginia
- **Tourville, Kelly;** Clinical Associate Professor, Department of Rehabilitation and Movement Science; MEd, University of Vermont
- **Vreeland, Kit;** Clinical Associate Professor, Department of Rehabilitation and Movement Science; EdD, University of Vermont
- **Alosa, Denise;** Lecturer, Department of Rehabilitation and Movement Science; MS, University of New Hampshire
- **Farnham, Dan;** Lecturer, Department of Rehabilitation and Movement Science; DPT, ATC
- **Thibault, Maria;** Lecturer, Department of Rehabilitation and Movement Science; PT, ATC

### PROFESSIONAL CERTIFICATION
Upon successful completion of the program, graduates are eligible to sit for the national certification examination administered through the Board of Certification for the Athletic Trainer.

### ACCREDITATION
The MSAT program at UVM is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). 6850 Austin Center Blvd., Suite 100. Austin, TX 78731-3184

### SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of master of science

- B.S. or B.A. from accredited college or university
- Minimum overall GPA of 3.0
- Pre-requisite coursework: General Biology (3 credits), Anatomy and Physiology with lab (8 credits), Exercise Physiology with lab (4 credits), Kinesiology or Biomechanics (3 credits), Statistics (3 credits). Recommended coursework: General Chemistry, General Physics, Medical Terminology, General/Sport Psychology
- Three letters of recommendation: minimum one from a certified athletic trainer (ATC) and one from an academic faculty member
- 60 documented hours of observation with an athletic trainer or combination of athletic trainers.
- UVM Graduate College Application form

### Minimum Degree Requirements
The UVM MSAT program requires successful completion of 49 graduate credits.

Students will be recommended for graduation by the AT faculty if they:

- Receive no more than 2 passing course grades below a B
- Obtain a cumulative GPA of 3.0 or higher at the end of their didactic course work
- Pass all clinical education experiences and expectations and receive no more than one U grade in a clinical experience course
- Completion of all clinical skills proficiencies and Clinical Integrated Proficiencies
- Illustrate evidence of professional behaviors commensurate with professional practice in athletic training

**Comprehensive Examination**

Successful completion of the comprehensive examination for the MSAT student is achieved after successfully passing all proficiencies and standards as required by the Commission on Accreditation of Athletic Training Education.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**

Meet all of the above criteria.

**BIOCHEMISTRY**

http://www.med.uvm.edu/biochemistry/grad

**OVERVIEW**

The goal of the Biochemistry Graduate Program at the University of Vermont is to prepare students for careers in science as both researchers and educators. This is accomplished by expanding knowledge of both chemistry and biochemistry, while cultivating the ability for critical analysis, creativity and independent study.

**DEGREES**

- Biochemistry AMP (p. 101)
- Biochemistry M.S (p. 103).

**FACULTY**

- **Berger, Christopher Lewis**, Professor, Department of Molecular Physiology and Biophysics; PHD, University of Minnesota Twin Cities
- **Bouchard, Beth Ann**, Assistant Professor, Department of Biochemistry; PHD, University of Vermont
- **Brummel-Ziedins, Kathleen E.**, Professor, Department of Biochemistry; PHD, University of Maryland College Park
- **Butenas, Saulius**, Associate Professor, Department of Biochemistry; PHD, Kaunas Tech University
- **Everse, Stephen Jay**, Associate Professor, Department of Biochemistry; PHD, University of California San Diego
- **Quénet, Delphine**, Assistant Professor, Department of Biochemistry, PHD; University of Strasbourg, France
- **Stein, Gary**, Professor, Department of Biochemistry; PHD, University of Vermont
- **Stein, Janet**, Professor, Department of Biochemistry; PHD, Princeton University
- **Tracy, Paula Babiarz**, Professor, Department of Biochemistry; PHD, Syracuse University
- **Tye, Coralee E.**, Assistant Professor; Department of Biochemistry; PHD, Western University
- **Zaidi, Sayyed Kaleem**, Associate Professor, Department of Biochemistry; PHD, University of Punjab

**BIOCHEMISTRY AMP**

All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)
OVERVIEW

Our accelerated master’s degree program (AMP) in Biochemistry is a thesis-based program designed to offer select UVM undergraduate science majors the opportunity to obtain both their bachelor’s degree and a master’s degree in biochemistry in a total of five years of study. The objective of this program is to provide students both a theoretical and practical knowledge of fundamental biochemical concepts while preparing students for careers in research (academic or industrial) or increasing their competitiveness for additional graduate degrees.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science

Students could apply for admission into the accelerated master’s in biochemistry program in the beginning of fall semester their junior year and as late as the fall semester of their senior year. Admission into this program requires the following:

- A minimum cumulative grade point average of 3.2;
- Satisfactory completion of BIOC 205 & BIOC 206;
- Completion of the Graduate College Application form;
- Agreement of a UVM Biochemistry faculty member to serve as AMP advisor (this faculty member should also write one of the three recommendation letters in support of the student’s application to the Graduate College).

GRE/GMAT scores are NOT an admission requirement for the accelerated master’s in biochemistry program.

Note: Students MUST be admitted through the Graduate College before taking any courses that will be applied to the master’s degree requirements. Students may start full-time master’s degree coursework in the summer following their undergraduate graduation.

Minimum Degree Requirements for the Degree of Master of Science

A minimum of 30 credits and successful completion of a comprehensive exam are required for completion of the accelerated master’s degree in biochemistry. Students must meet all of the requirements stipulated by the UVM Graduate College for the Master’s Degree.

Students may take up to nine credit hours of graduate level coursework before the conferral of the bachelor’s degree. Of these, a maximum of six credit hours may be counted for both the bachelor’s and master’s degrees. The other three credit hours can only count toward the master’s degree provided they are not used in completing the bachelor’s degree. Students would then be expected to complete remaining master’s degree requirements during a fifth year of study.

Students must complete the following courses:

- BIOL 301 General Biochemistry* 3
- BIOL 302 General Biochemistry 3
- BIOL 381 Seminar 1

*Successful completion of BIOC 205/BIOC 206 can substitute for the BIOC 301/BIOC 302 requirement for previous UVM students only. However, these will not count towards the 30 graduate credit requirement.

Note: If a physical chemistry course has not been taken previously, a student must take Physical Chemistry (CHEM 165) in their first year (for which they do not receive credit toward the MS degree). CHEM 162 is no longer offered, but if a student has already taken this course, it is acceptable for the Physical Chemistry requirement.

Students must complete at least two upper level courses (6 credits) from the following selection of courses:

- BIOL 351 Proteins I: Structure&Function 3
- BIOL 352 Protein: Nucleic Acid Intact 3
- BIOL 353 Proteins II: Enzymology 3
- BIOL 370 Physical Biochemistry 3
- BIOL 372 Cancer Biology 3

Remaining credits in the degree program should be selected from the following approved list. Special topics or other graduate courses maybe acceptable by prior approval from the Chair of the Departmental Graduate Studies Committee.

- BIOL 263 Nutritional Biochemistry 3
- BIOL 275 Adv Biochem of Human Disease 3
- CHEM 223 Mass Spectrometry 3
- CLBI 301 Cell Biology 3
- MMG 211 Prokaryotic Molecular Genetics 3
- MMG 232 QR:Methods in Bioinformatics 3
- MPBP 301 Human Physiology & Pharm I 4
- MPBP 323 Biophysical Techniques 4
- PHRM 201 Introduction to Pharmacology 3
- PHRM 272 Toxicology 3

At least nine (and up to 13) credits of Master’s Thesis Research (BIOL 391) are required. In addition, a written thesis and defense of this thesis must occur according to the guidelines laid out by the Graduate College.

Comprehensive Examination

The comprehensive examination must be taken by the end of the second semester as a matriculated graduate student for students admitted in the accelerated program. The examination will cover
broad knowledge of the student’s discipline. The details and format of the examination and its form (written or oral or both) are decided upon by the Departmental Graduate Studies Committee and will be discussed with the student well in advance of the exam. A single retake is permitted for the comprehensive exam.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Advancement to candidacy requires satisfactory completion of the comprehensive exam.

BIOCHEMISTRY M.S.
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
The objective of this program is to provide students both a theoretical and practical knowledge of fundamental biochemical concepts while preparing students for careers in research (academic or industrial) or increasing their competitiveness for additional graduate degrees.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Science
An acceptable undergraduate major in biochemistry, biology, chemistry, or a related field. Satisfactory scores on the general (aptitude) Graduate Record Examination must be presented. Subject GRE not required, but helpful. In addition: year-long courses in organic chemistry, physical chemistry, and physics (equivalent to CHEM 141/CHEM 142 or CHEM 143; CHEM 144, CHEM 165 and PHYS 051/PHYS 152); quantitative chemistry; mathematics preferably through differential and integral calculus; a year-long course in a biological science. If a physical chemistry course has not been taken previously, a student must take Physical Chemistry (CHEM 165) in their first year (for which they do not receive credit toward the M.S. degree).

Minimum Degree Requirements
A minimum of 30 credits (at least seventeen of which must be taken from graduate courses offered by the Department of Biochemistry) and successful completion of a comprehensive exam are required for completion of the master’s degree in biochemistry. Students must meet all of the requirements stipulated by the UVM Graduate College for the Master’s Degree.

Students must complete the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOC 301</td>
<td>General Biochemistry</td>
<td>3</td>
</tr>
<tr>

</tbody>
</table>

Thesis Track:
At least nine (and up to 13) credits of Master’s Thesis Research (BIOC 391) are required. In addition, a written thesis and defense of this thesis must occur according to the guidelines laid out by the Graduate College.

Non-Thesis Track:
At least six (and up to 9) credits of Independent Literature Research (BIOC 392) and two credits of independent research set up as a special topics course (BIOC 395) with your mentor are required. In addition, a manuscript in the format of a review article must be submitted to the Departmental Graduate Studies Committee and a seminar on the manuscript must be presented to the Department.

Comprehensive Examination
The comprehensive examination must be taken by the end of the second semester as a matriculated graduate student. The examination will cover broad knowledge of the student’s discipline. The details and format of the examination and its form (written or oral or both) are decided upon by the Departmental Graduate Studies Committee.
and will be discussed with the student well in advance of the exam. A single re-take is permitted for the comprehensive exam.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Admittance to candidacy requires satisfactory completion of the comprehensive exam.

BIOENGINEERING
http://www.uvm.edu/~cems/soe/

OVERVIEW
The Bioengineering Ph.D. is an interdisciplinary graduate degree that leverages the close proximity on campus of the School of Engineering and the College of Medicine. The program is administered by the School of Engineering with strong involvement of the College of Medicine, and has a particular focus on complex systems. Students take courses in both the STEM disciplines and the biomedical sciences, including a core of required courses and a selection of electives as suits their research interests. Co-mentoring between faculty in engineering and the biomedical sciences is encouraged.

DEGREES

BIOENGINEERING PH.D.
All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

OVERVIEW
The program in Bioengineering is interdisciplinary and offers the Doctor of Philosophy degree. Graduate students obtain the Ph.D. degree through a program administered by the School of Engineering.

Participating faculty with strong commitments to bioengineering research and education are from the School of Engineering, the College of Medicine, and other departments and colleges across campus. The extensive research facilities of the participating faculty and departments are available to all graduate students enrolled in the program and the program provides the flexibility necessary for students to gain competence in the area of their choice. Research includes: bioinstrumentation, biomechanics, biomedical imaging, biomedical systems and signal analysis, clinical engineering, implant design, rehabilitation engineering, simulation and modeling, biomaterials, tissue engineering, and biomathematics.

Students in the program are generally supported by sponsored research projects, participating departments and training grants. Inquiries about current research and funding opportunities should be directed to:

University of Vermont
School of Engineering
Votey Hall
Burlington, VT 05405
(802) 656-8157

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy
Students applying for admission to the graduate program must meet the general requirements of admission of the University of Vermont Graduate College. Admission is competitive and students are selected on the basis of their scholastic preparation and intellectual capacity.
The following minimum preparation is recommended:

- Biology, Chemistry: Two semesters each, or four introductory courses in the following subjects - anatomy, biology, biophysics, chemistry, physiology
- Engineering: Two introductory courses in one or more of the following subjects - biomechanics, mechanics, thermodynamics, electrical engineering, control theory, or fluid mechanics
- Mathematics: One course past differential equations
- Physics: Two semesters of physics
- Satisfactory scores on the general Graduate Record Examination (GRE) must be presented

Special arrangements may be made, on an individual basis, for students who are highly prepared in one area, but less well prepared in another.

Minimum Degree Requirements
Candidates for the degree of Doctor of Philosophy must complete thirteen graduate credits of required courses (advanced bioengineering systems, complex systems, human physiology and pharmacology or equivalent, and an advanced mathematics or statistics course) plus at least seventeen credits of approved technical electives. In addition, the candidate must complete a teaching requirement, pass a comprehensive examination, complete up to forty-five credits of dissertation research, and pass a final oral examination.

Comprehensive Examination
The comprehensive exam for the Bioengineering Ph.D. will normally be taken at the end of a candidate’s fourth semester of study (typically around May of Year 2) and will consist of a written part and an oral part.

The Written Part: The written part of the comprehensive examination will be a report written in the form of a research grant proposal based around a research idea in the area of the candidate’s dissertation work, and will comprise three Specific Aims. The first two aims will be focused in the area of the candidate’s Ph.D. research, and will be expected to include some preliminary data and a research plan that is grounded in techniques that are well understood by the candidate. The third aim will be a “stretch aim” that extends beyond the scope of the candidate’s research. In this third aim, the candidate will be expected to exhibit evidence of an ability to generate imaginative and thoughtful hypotheses, and to think laterally about how their Ph.D. research area could be developed in a new direction.

The Oral Part: The oral part of the comprehensive examination will be a formal seminar by the student in front of their advisory committee. The student will be asked to defend the proposal and to answer any additional questions the committee members feel appropriate after the seminar. It is expected that there will be specific questions directly associated with broad engineering and biological sciences, as well as complex systems analyses and approaches.

Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy
Completion of any deficient admission requirements.

BIOMEDICAL ENGINEERING
OVERVIEW
Department website: https://www.uvm.edu/cems

OVERVIEW
Leveraging strong ties between the University of Vermont’s College of Engineering and Mathematical Sciences and the Larner College of Medicine, the new Master of Science in Biomedical Engineering (MSBME) was created to give students the opportunity to develop advanced skills so that they may apply engineering methods to address problems related to human health. Students enrolled in the MS in BME program will have the opportunity to pursue a research-oriented thesis based, project-based or coursework based program.

DEGREES
Biomedical Engineering AMP (p. 105)
Biomedical Engineering M.S. (p. 106)

BIOMEDICAL ENGINEERING AMP
All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

OVERVIEW
Qualified undergraduate students who plan to earn a master’s degree in biomedical engineering may enroll in the Accelerated Master’s Program, which enables students to begin working on a master’s degree while still an undergraduate. Students apply to the program in the second semester of their junior year. Following acceptance by the Graduate College, students may take up to nine graduate credits while still an undergraduate. Of these, up to six credits can be counted toward both the B.S. and the M.S. degrees. The graduate credits taken prior to completion of the bachelor’s must be in graded coursework only; independent study, research credits, internships and practica will not count towards the master’s degree. In addition,
the courses taken must be approved by the student's graduate advisor.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Science for Accelerated Students**

To apply for the program, students must be enrolled in an engineering program at the University of Vermont with a cumulative grade point average of at least 3.20 at the time of application, and must complete the CEMS Accelerated Masters Permission Form and the Graduate College application. For thesis students, the application should name a graduate faculty member who has agreed to serve as their thesis advisor. No Graduate Record Examination (GRE) is required for AMP applicants.

**Minimum Degree Requirements for the Degree of Master of Science**

**Thesis-Based:** Coursework component - 24 credit hours. At least 15 credit hours will come from CEE, EE, BME, ME, and/or ENGR graduate courses. At least 6 credits will have BME designation and at least 6 credits will be at the 300-level. Thesis component - 6 credit hours of research conducted with BME associated faculty. Research proposal presentation to serve as comprehensive exam.

**Project-Based:** Coursework component - 27 credit hours. At least 18 credit hours will come from CEE, EE, BME, ME, and/or ENGR graduate courses. At least 9 credits will have BME designation and at least 6 credits will be at the 300-level. Project component - 3 credit hours of project conducted with BME associated faculty. Final presentation to serve as comprehensive exam.

**Coursework Option:** 30 credit hours. At least 18 credit hours will come from CEE, EE, BME, ME, and/or ENGR graduate courses. At least 9 credits will have BME designation and at least 6 credits will be at the 300-level. Final presentation to serve as comprehensive exam.

**Comprehensive Examination**

M.S. Thesis Option: The student must orally present a proposal for their thesis research at least 3 months prior to graduation. The student’s thesis committee will orally examine the student based on the student's coursework and research focus.

M.S. Project Option: The student must orally present a proposal for their project research approximately 3 months prior to graduation. The student’s project committee will orally examine the student based on the student’s coursework and research focus.

M.S. Coursework Option: The student must complete a written and/or oral comprehensive exam during the final semester of residence at UVM.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**

An accredited bachelor's degree in engineering or equivalent education.

**BIOMEDICAL ENGINEERING M.S.**

All students must meet the Requirements for the Master's Degree (p. 265)

**OVERVIEW**

Leveraging strong ties between the University of Vermont’s College of Engineering and Mathematical Sciences and the Larner College of Medicine, the new Master of Science in Biomedical Engineering (MSBME) was created to give students the opportunity to develop advanced skills so that they may apply engineering methods to address problems related to human health. Students enrolled in the MS in BME program will have the opportunity to pursue a research-oriented thesis based, project-based or coursework based program.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Science**

An accredited bachelor's degree in an appropriate field and completion of the general (aptitude) portion of the Graduate Record Examination (GRE).

**Minimum Degree Requirements**

**Thesis-Based:** Coursework component - 24 credit hours. At least 15 credit hours will come from CEE, EE, BME, ME, and/or ENGR graduate courses. At least 6 credits will have BME designation and at least 6 credits will be at the 300-level. Thesis component - 6 credit hours of research conducted with BME associated faculty. Research proposal presentation to serve as comprehensive exam.

**Project-Based:** Coursework component - 27 credit hours. At least 18 credit hours will come from CEE, EE, BME, ME, and/or ENGR graduate courses. At least 9 credits will have BME designation and at least 6 credits will be at the 300-level. Project component - 3 credit hours of project conducted with BME associated faculty. Final presentation to serve as comprehensive exam.

**Coursework Option:** 30 credit hours. At least 18 credit hours will come from CEE, EE, BME, ME, and/or ENGR graduate courses. At least 9 credits will have BME designation and at least 6 credits will be at the 300-level. Final presentation to serve as comprehensive exam.

**Comprehensive Examination**

M.S. Thesis Option: The student must orally present a proposal for their thesis research at least 3 months prior to graduation. The student’s thesis committee will orally examine the student based on the student's coursework and research focus.

M.S. Project Option: The student must orally present a proposal for their project research approximately 3 months prior to graduation. The student’s project committee will orally examine the student based on the student’s coursework and research focus.

M.S. Coursework Option: The student must complete a written and/or oral comprehensive exam during the final semester of residence at UVM.
Requirements for Advancement to Candidacy for the Degree of Master of Science

An accredited bachelor’s degree in engineering or equivalent education.

BIOLOGY

http://www.uvm.edu/~biology/

OVERVIEW

The Biology Graduate Program has excellent students, world-class faculty members who advise students and superb staff members. Faculty members work with students to design a set of courses, a research project and other activities that will prepare them for their career choice of:

- academic research
- medical institution research
- private sector research
- government work
- teaching at the baccalaureate level

No matter what the choice is, this program will help students to develop as research scientists who know how to write, think critically, and express themselves effectively. Faculty will also help students to network and find the right position for their next step: postdoctoral training, industry, teaching position, etc. All Biology students learn to teach undergraduates, helping to develop teaching skills which will serve them well regardless of whether teaching is their ultimate career goal. Biology graduate students are very successful and are appreciated for their contribution to undergraduate research, to the research program of the faculty, and to the quality and liveliness of the Biology Department.

The research of Biology faculty is very diverse and ranges from cell and molecular biology, through animal behavior, ecology, and evolution. Faculty and student research typically range across these disciplines and students are encouraged to seek out diverse faculty for their graduate committee to meet their particular needs.

Biology offers an Accelerated Masters Degree, a Masters Degree, a Doctor of Philosophy (PhD) degree, and a Masters of Science in Teaching degree. PhD applicants are given priority over MS applicants.

DEGREES

- Biology AMP (p. 107)
- Biology M.S. (p. 108)
- Biology M.S.T. (p. 109)
- Biology Ph.D. (p. 109)

FACULTY

Agnarsson, Ingi; Associate Professor, Department of Biology; PHD, George Washington University

Ballif, Bryan A.; Professor, Department of Biology; PHD, Harvard University

Brody, Alison Kay; Professor, Department of Biology; PHD, University of California Davis

Cahan, Sara Irene; Associate Professor, Department of Biology; PHD, Arizona State University

Classen, Aimee; Associate Professor, Secondary Appointment in the Department of Biology; PHD, Northern Arizona University

Coutinho-Budd, Jaeda; Assistant Professor, Department of Biology; PHD, The University of North Carolina at Chapel Hill

Ebert, Alicia; Associate Professor, Department of Biology; PHD, Colorado State University

Goodnight, Charles James; Professor, Department of Biology; PHD, University of Chicago

Gotelli, Nicholas James; Professor, Department of Biology; PHD, Florida State University

Kilpatrick, Charles William; Professor Emeritus, Department of Biology; PHD, University of North Texas

Lam, Ying Wai; Research Assistant Professor, Department of Biology; PHD, Chinese University of Hong Kong

Lockwood, Brent; Assistant Professor, Department of Biology; PHD, Stanford University

Marsden, J. Ellen; Professor, Rubenstein School of Environmental and Natural Resources; PHD, Cornell University

Martinsen, Ellen; Adjunct Assistant Professor, Department of Biology; PHD, University of Vermont

Mitchell, John Joseph; Senior Lecturer, Department of Biology; PHD, University of Connecticut

Pespeni, Melissa H.; Assistant Professor, Department of Biology; PHD, Stanford University

Sanders, Nathan; Secondary Appointment in the Department of Biology; PHD, Stanford University

Schall, Joseph J.; Professor Emeritus, Department of Biology; PHD, University of Texas at Austin

Stevens, Lori; Professor, Department of Biology; PHD, University of Illinois-Chicago

Stockwell, Jason Dana; Associate Professor, Rubenstein School of Environmental and Natural Resources; PHD, University of Toronto

Van Houten, Judith; Professor Emerita, Department of Biology; PHD, University of California Santa Barbara

Vigoreaux, Jim Osvaldo; Professor, Department of Biology; Molecular Physiology and Biophysics; PHD, University of Oklahoma

BIOLOGY AMP

All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

OVERVIEW

An accelerated master’s degree in biology can be earned in a shortened time by applying and being accepted in the junior year of undergraduate work. Biology, Zoology, Neuroscience or Environmental Science B.S. majors should discuss this possibility with the department’s graduate program director as soon as they think they might be interested in the program. The AMP M.S. is expected to be earned in one additional year.

Learning goals for AMP students are:
• Be able to execute scientific experiments, analyze and communicate experimental results orally and in writing.
• Have a working knowledge of the fundamental literature, concepts and ideas of field of study.
• Have a broad factual and conceptual knowledge of biology.

Following formal admission to the Accelerated Master’s Program, up to six credits of subsequent Biology course work approved for graduate credit taken in the junior and senior year can be counted toward the degree requirement. Courses must be selected from among:

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Science for Accelerated Master’s Students**

To be eligible for the Accelerated Master’s Program, a student must be a declared biological science, zoology, neuroscience or environmental science B.S. major, and have identified a Biology faculty sponsor. Other requirements include a GPA typically higher than 3.10 overall and 3.30 in biology courses. Following admission students are required to take at least three credits of undergraduate research with a Biology faculty member who is the intended research advisor, usually in their senior year. After graduation with the B.S. degree, students are eligible to become candidates for the AMP M.S. degree. There is no GRE requirement for the AMP degree.

**Minimum Degree Requirements**

A total of 30 credits, 15 of which must be graded course credits are required (six of which can also be applied to the undergraduate degree) in biology and related fields; thesis research (up to fifteen credits); and successful defense of thesis.

**Comprehensive Examination**

The comprehensive examination requirement is met with a committee studies meeting where the progress and overall qualification of the student are assessed. This must take place by the end of the first semester as a matriculated graduate student for students admitted under the accelerated program.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**

All Biology M.S. students who are admitted to the Graduate College and have taken the diagnostic exam are admitted to candidacy for the degree.

**BIOLOGY M.S.**

All students must meet the Requirements for the Master’s Degree (p. 265)

**OVERVIEW**

The research of Biology faculty is grouped into two clusters: Cell and Molecular Biology and Ecology-Evolution-Animal Behavior. Students will have the opportunity to mention from the outset of the application process whose research they are interested in. While faculty research interests fall into these two broad groupings, students are encouraged to consider research projects that cross disciplines.

Learning goals for the MS degree students are:
• Be able to execute scientific experiments, analyze and communicate experimental results orally and in writing.
• Have a working knowledge of the fundamental literature, concepts and ideas of field of study.
• Have a broad factual and conceptual knowledge of biology.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science

An undergraduate major in biology or its equivalent. Acceptability to the faculty member with whom the candidate wishes to do thesis research. Taking the Graduate Record Examination is not required.

Minimum Degree Requirements

30 total credits, fifteen of which are graded credits including: Biology Graduate Colloquia, four credits; twelve to eighteen additional credits in biology and related fields; thesis research (eight to fifteen credits) and successful defense of thesis. Each candidate must participate in the teaching of at least one undergraduate course.

Comprehensive Examination

The comprehensive examination must be taken by the end of the second year. The examination will cover broad knowledge of the student’s discipline. The details and format of the examination and its form (written or oral or both) are decided upon by the Studies Committee and will be discussed with the student well in advance of the exam.

Requirements for Advancement to Candidacy for the Degree of Master of Science

All Biology M.S. students who are admitted to the Graduate College and have taken the diagnostic exam are admitted to candidacy for the degree.

BIOLOGY M.S.T.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW

Learning goals for MST students are:
• Be able to execute scientific experiments, analyze and communicate experimental results orally and in writing.
• Have a working knowledge of the fundamental literature, concepts and ideas of field of study.
• Have a broad factual and conceptual knowledge of biology.
• Gather knowledge of new techniques and information from laboratory and other courses potentially to use in the classroom.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science in Teaching

A bachelor’s degree from an accredited institution and certification as a teacher of biology or an associated field. At least three years of secondary school teaching. Taking the Graduate Record Examination is not required.

Minimum Degree Requirements

Thirty credits of graded course work to include a selection of courses in the Departments of Plant Biology and Biology which will broaden and balance the undergraduate work in biology. Courses in four of the five following areas: anatomy; neurobiology; morphology and systematics; evolution; genetics; developmental biology; and environmental biology. Up to twelve credits of 100-level courses may be used for the above requirements where approved by the advisor and the dean. Appropriate courses in related science departments chosen with the graduate studies committee may be used to complete the required thirty credits. No thesis is required; however, each degree recipient must complete a final written examination.

Comprehensive Examination

The comprehensive examination must be taken by the end of the second year. The examination will cover broad knowledge of the student’s discipline. The details and format of the examination and its form (written or oral or both) are decided upon by the Studies Committee and will be discussed with the student well in advance of the exam.

Requirements for Advancement to Candidacy for the Degree of Master of Science in Teaching

All Biology M.S. students who are admitted to the Graduate College and have taken the diagnostic exam are admitted to candidacy for the degree.

BIOLOGY PH.D.

All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

OVERVIEW

The research of Biology faculty is grouped into two clusters: Cell and Molecular Biology and Ecology-Evolution-Animal Behavior. Students will have the opportunity to mention from the outset of the application process whose research they are interested in. While faculty research interests fall into these two broad groupings, students are encouraged to consider research projects that cross disciplines.

Learning goals for the PhD degree students are:
• Be able to design and execute an independent research project, and analyze and communicate experimental results orally and in writing.
• Be proficient in analysis and visualization of experimental results.
• Be able to articulate and defend rationale and importance of research questions, study design, and analysis of results.
• Be able to communicate general and specific knowledge and importance of findings to broad audience as well as experts within sub-disciplines.
• Have a broad factual and conceptual knowledge of biology.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy
Satisfactory completion of: a B.A. or B.S. degree typically in the natural sciences or mathematics including courses in mathematics, statistics, chemistry, physics and biology; deficiencies in prerequisites may be made up after entering the program. Taking the Graduate Record Examination is not required.

Minimum Degree Requirements
There are seventy-five required credits, of which at least thirty graded credits must be earned in graduate courses including a minimum of six credits of Graduate Colloquia or special seminar style courses. The selection of courses will be designated for each student by the advisor and graduate studies committee. At least twenty, but not more than forty-five, credits must be earned in dissertation research. Each candidate must participate in the teaching of at least one undergraduate course.

Comprehensive Examination
The comprehensive examination must be taken by the end of the second semester of the second academic year. The format is a written proposal and oral defense of the proposal that will include examination of broad knowledge in the student’s discipline. The details and format of the examination are decided upon by the Studies Committee and will be discussed with the student well in advance of the exam.

Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy
The diagnostic examination prior to registration for the first semester; the comprehensive exam; minimum requirement course work of thirty credits and additional courses as required by the advisor and graduate studies committee; at least one academic year of graduate study at the University of Vermont.

BIOSTATISTICS
http://www.uvm.edu/~cems/mathstat/

OVERVIEW
The program offers a concentration in biostatistics leading to the M.S. degree.

Emphasis is placed on learning how to design studies and perform computerized data analysis as the statistician in a research team. The curriculum takes full advantage of courses taught in the Statistics Program and includes potential experience in a variety of health, biomedical, natural resource and other research projects in the College of Medicine or other departments of UVM. This experience is designed to provide candidates with opportunities to use their academic training and work experience in defining research problems, formulating rational methods of inquiry, and gathering, analyzing, and interpreting data.

Three faculty members are in the College of Medicine’s Department of Medical Biostatistics and Bioinformatics, whose research activities cover the full range of studies that take place within an academic medicine environment. These include population-based health surveys of various types and evaluations of health promotion programs and professional education activities, such as community intervention studies to prevent smoking and to promote breast cancer screening. They also include clinical studies of many different interventions, bioengineering experiment design and measurement studies, statistical genetics, as well as data from other preclinical, clinical, and epidemiological studies.

Opportunities are also available for biostatistical research related to problems in agriculture and the life sciences, as well as natural resources and the environment. Opportunities could include multivariate or spatial data analyses for ongoing wildlife and water quality studies, for example. All students gain research and consulting experience through the research requirement: a research project (STAT 381) or a thesis (STAT 391). Other opportunities for experience will arise through involvement in the Statistical Consulting Clinic (STAT 385). (See also Statistics Program and Statistical Consulting Clinic descriptions.)

DEGREES
• Biostatistics AMP (p. 110)
• Biostatistics M.S. (p. 111)

FACULTY
Ashikaga, Takamaru; Professor, Department of Mathematics and Statistics; PHD, University of California Los Angeles
Bagrow, James; Assistant Professor, Department of Mathematics and Statistics; PHD, Clarkson University
Bunn, Janice Yanushka; Research Associate Professor, Department of Mathematics and Statistics; PHD, Ohio State University
Buzas, Jeff Sandor; Professor, Department of Mathematics and Statistics; PHD, North Carolina State University Raleigh
Callas, Peter W.; Research Associate Professor, Department of Mathematics and Statistics; PHD, University of Massachusetts Amherst
Cole, Bernard; Professor, Department of Mathematics and Statistics; PHD, Boston University
Jefferys, William; Adjunct Professor, Department of Mathematics and Statistics; PHD, Yale University
Single, Richard M.; Associate Professor, Department of Mathematics and Statistics; PHD, SUNY Stony Brook

BIOSTATISTICS AMP
All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)
OVERVIEW
A master’s degree in mathematics, statistics or biostatistics can be earned in a shortened time by careful planning during the junior and senior years at UVM. For example, the M.S. could be earned in just one additional year, because six credits of graduate level courses taken while an undergraduate can also be counted concurrently toward the M.S. degree requirements.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Science
Students should discuss the possibility of an Accelerated Master’s Program in biostatistics with the respective program director as soon as they think they may be interested in this program. Students must declare their wish to enter the Accelerated Master’s Program in writing to the statistics program director (it is recommended that this happen before the end of their junior year). They would apply to the Graduate College for admission, noting their interest in the Accelerated Master’s Program. They can receive concurrent undergraduate and graduate credit for one or two graduate level courses, once admitted. No graduate credit can be counted for statistics courses earned prior to admission to the graduate program.

</tbody>
</table>

Both Options
Under both plans, students must have or acquire a knowledge of the material in BIOS 211, attend the regular colloquium series and participate in the Statistics Student Associate Journal Club as part of their training. The comprehensive examination covers knowledge acquired in the core courses of the program. Under the non-thesis option, students will be expected to take major responsibility for a comprehensive data analysis or methodological research project, and are encouraged to present the results from the project.

Comprehensive Examination
A written comprehensive examination is based on the courses STAT 211, STAT 221, STAT 223, STAT 231, STAT 251, and STAT 261. The comprehensive exam is typically held approximately two weeks after the final exam in the spring semester. The student can take the exam a maximum of two times.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Successful completion of any pre-requisite courses, and at least 15 graded graduate credits earned in compilation of the graduate GPA, including all core courses. A GPA of 3.00 or greater is also required.

BIOSTATISTICS M.S.
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
The program offers a concentration in biostatistics leading to the M.S. degree.

Emphasis is placed on learning how to design studies and perform computerized data analysis as the statistician in a research team. The curriculum takes full advantage of courses taught in the Statistics Program and includes potential experience in a variety of health, biomedical, natural resource and other research projects in the College of Medicine or other departments of UVM. This experience...
is designed to provide candidates with opportunities to use their academic training and work experience in defining research problems, formulating rational methods of inquiry, and gathering, analyzing, and interpreting data.

Two faculty members are in the College of Medicine’s Department of Medical Biostatistics and Bioinformatics, whose research activities cover the full range of studies that take place within an academic medicine environment. These include population-based health surveys of various types and evaluations of health promotion programs and professional education activities, such as community intervention studies to prevent smoking and to promote breast cancer screening. They also include clinical studies of many different interventions, bioengineering experiment design and measurement studies, statistical genetics, as well as data from other preclinical, clinical, and epidemiological studies.

Opportunities are also available for biostatistical research related to problems in agriculture and the life sciences, as well as natural resources and the environment. Opportunities could include multivariate or spatial data analyses for ongoing wildlife and water quality studies, for example. All students gain research and consulting experience through the research requirement: a research project (STAT 381) or a thesis (STAT 391). Other opportunities for experience will arise through involvement in the Statistical Consulting Clinic (STAT 385). (See also Statistics Program and Statistical Consulting Clinic descriptions.)

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science

An undergraduate major which provides a foundation for the application of statistical methodology and concepts to health and biomedical or agriculture/natural resource problems. For example, premedicine majors who have delayed their application to medical school will be well suited for the program. It is expected that candidates will have completed three semesters of calculus and a course including matrix algebra methods. Also they will have a solid introductory course in statistics (like STAT 211) and a course including undergraduate probability (like STAT 151). However, provisional admission to the program can be given prior to the completion of these mathematics and statistics requirements. Computer programming experience is desirable. Satisfactory scores on the general (aptitude) portion of the Graduate Record Examination are required. Current undergraduate students at the University of Vermont should contact the program director for details on the Accelerated Master’s Program.

Minimum Degree Requirements for the Degree of Master of Science

Option A (Thesis)

A thirty credit program requiring twenty-four credits of course work. The program must include:

- BIOS 220 QR: Med Biostat & Epidemiology 3
- BIOS 221 QR: Statistical Methods II 3

Option B (Non-Thesis)

A thirty credit program requiring twenty-seven credits of course work. The program must include:

- BIOS 200 QR: Med Biostat & Epidemiology 3
- BIOS 221 QR: Statistical Methods II 3
- BIOS 223 QR: Apld Multivariate Analysis 3
- BIOS 231 QR: Experimental Design 3
- BIOS 251 QR: Probability Theory 3
- BIOS 261 QR: Statistical Theory 3
- BIOS 229 QR: Survival/Logistic Regres 3
- STAT 360 Linear Models 3

Both Options

Under both plans, students must have or acquire a knowledge of the material in BIOS 211, attend the regular colloquium series and participate in the Statistics Student Associate Journal Club as part of their training. The comprehensive examination covers knowledge acquired in the core courses of the program. Under the non-thesis option, students will be expected to take major responsibility for a comprehensive data analysis or methodological research project, and are encouraged to present the results from the project.

Comprehensive Examination

A written comprehensive examination is based on the courses STAT 211, STAT 221, STAT 223, STAT 231, STAT 251, and STAT 261. The comprehensive exam is typically held approximately two weeks
after the final exam in the spring semester. The student can take the exam a maximum of two times.

Requirements for Advancement to Candidacy for the Degree of Master of Science

Successful completion of any pre-requisite courses, and at least 15 graded graduate credits earned in compilation of the graduate GPA, including all core courses. A GPA of 3.0 or greater is also required.

BUSINESS ADMINISTRATION

http://www.uvm.edu/business/

OVERVIEW

The Sustainable Innovation MBA program at the University of Vermont prepares students to create profitable and sustainable business opportunities in a world undergoing transformational change. The Sustainable Innovation MBA program aims to develop the next generation of leaders who will build, disrupt, innovate, and reinvent sustainable business and enterprises in a world that demands it.

The program is built for sustainable business innovation from the ground up. All courses cover topics and tools for sustainable innovation to create profitable business models that address social and environmental challenges, and help build a more inclusive, resilient, and sustainable economy. Courses and other co-curricular experiences are delivered by faculty and thought leaders drawn from the Grossman School of Business, other UVM units, Vermont Law School, and the local and global business communities.

The MBA program is accredited by The Association to Advance Collegiate Schools of Business (AACSB).

DEGREES

Venugopal, Srinivas; Assistant Professor, Grossman School of Business; PHD, University of Illinois at Urbana-Champaign

SUSTAINABLE INNOVATION M.B.A.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW

The Sustainable Innovation M.B.A. program at the University of Vermont is an accelerated, full-time, 12-month program (August-to-August) that culminates in a three-month summer practicum project focused on sustainable business opportunities and initiatives within existing companies or entrepreneurial ventures. This innovative and award-winning program was designed by faculty from the AACSB-accredited Grossman School of Business to prepare individuals to create profitable and sustainable business opportunities and initiatives in a world undergoing transformational change. The Sustainable Innovation M.B.A. aims to develop the next generation of leaders who will transform, disrupt, innovate, and build sustainable business and enterprises in a world that demands it.

The program requires the successful completion of 45 credit hours, which are structured across an online course taught in August, 4 modules that each comprise multiple courses taught over a 7-8 week period, and a 3 month summer practicum project. All courses cover topics and tools for sustainable innovation to create profitable business models that address social and environmental challenges, and help build a more inclusive, resilient, and sustainable economy. Courses and other co-curricular experiences are delivered by faculty and thought leaders drawn from the Grossman School of Business, other UVM units, Vermont Law School, and the local and global business communities.

All students take the same courses at the same time (with a few exceptions, such as students who complete the Sustainable Finance and Impact Investing Track). Given the nature of this accelerated one-year M.B.A. program, students are expected to be engaged in their coursework on a full-time basis.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies the Degree of Master of Business Administration

Admissions preference will be given to applicants who have 3 or more years of work experience in for-profit, non-profit, and/or government positions. Applicants with international exposure, and entrepreneurial and/or managerial experience are especially encouraged. Strong candidates for admission will have scored higher than 500 on the GMAT, or equivalent on the GRE, and those scoring higher than 550 are preferred (the GMAT/GRE requirement can be waived for qualified candidates who have successfully completed a graduate degree; and those who have completed, or are in the final year of completing, an undergraduate degree at UVM with a major or minor in Business Administration within the last 5 calendar years). The ideal applicants will have earned a GPA of 3.0 or higher on a 4.0 scale in their undergraduate program, and will possess a command of the English language (applicants for whom English is not their primary
language must have a minimum TOEFL score of 90 or a IELTS score of 6.5). Application requirements also include letters of reference and a statement of purpose.

The Sustainable Innovation M.B.A. program offers one elective track in addition to its core curriculum: the Sustainable Finance and Impact Investing Track. Applicants to this track must first meet the admission requirements to The Sustainable Innovation M.B.A. program. In addition, applicants should have expertise in finance gained through an M.S. degree in finance, the completion (or near completion) of the CFA process, or a strong undergraduate degree in finance coupled with significant professional experience. Please connect with the program leaders to learn more about the track.

**Minimum Degree Requirements**

To support the success of a diverse student body with varying levels of prior exposure to basic but core quantitative skills in business statistics, microeconomics, accounting, finance and spreadsheets, the program covers the cost of a required MBA Math course (www.mbamath.com). Admitted students who have paid their non-refundable deposit are invited to begin this self-paced, online, and non-credit bearing course as early as June 1 of the year in which they enroll in the program. Before the start of Module 1 in late August, each student is required to achieve 80% or higher on each MBA Math quiz, and an average quiz grade of 85% or higher. All tutorials and quizzes can be revisited and completed multiple times, and in any order. In exceptional circumstances, timeline extensions to meet these requirements can be granted at the discretion of a program Director. In the unlikely event that the MBA Math course is discontinued, the program Director has the discretion to require the completion of a comparable online course or to waive this requirement entirely.

**Comprehensive Examination**

Successful completion of the summer practicum in Module 5 will be considered as fulfilling the Graduate College requirement that all Master’s degree students pass a comprehensive examination in their field of specialization.

**Requirements for Advancement to Candidacy for the Degree of Master of Business Administration**

Successful completion of courses, and at least 15 graded graduate credits with a 3.00 GPA or better, including all core courses.

**SUSTAINABLE ENTERPRISE CGS**

All Students must meet the Requirements for the Certificates of Graduate Study. (p. 265)

**OVERVIEW**

The Certificate of Graduate Study in Sustainable Enterprise provides a comprehensive framework for learning how enterprises can be both profitable and responsible, providing students with the business
strategies, experience, professional network, and credentials to make an impact on their careers and the planet.

The Certificate of Graduate Study in Sustainable Enterprise is designed to:

- Develop students' business knowledge as they learn how sustainability issues impact business practices across organizational divisions
- Progress students' understanding of how enterprises stay competitive by incorporating triple bottom line concepts into their business strategy
- Deliver courses that fully integrate sustainability issues, similar to the Sustainable Innovation M.B.A. (SI-MBA), and draw on the knowledge and business acumen of our esteemed Grossman School of Business faculty and industry experts succeeding in their field

The fully online certificate will require 15 credits in the field of sustainable enterprise, including four required courses (12 credits) from three core enterprise content areas, including: accounting, marketing, operations, and supply chains, and one required course (3 credits) in a capstone course designed around leading sustainable innovation. Students can choose one elective course (3 credits) from a variety of topical electives, including: finance, new business models, and entrepreneurial family business. The program will offer two online courses each semester, with students expected to take one or both courses. Students may start the program in the fall, spring, or summer, so it will be possible to complete the program in one year.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the certificate of graduate study in sustainable enterprise

Students are required to have earned a bachelor’s degree from an accredited college or university.

CELLULAR, MOLECULAR, AND BIOMEDICAL SCIENCES

http://www.uvm.edu/cmb/

OVERVIEW

The Cellular, Molecular and Biomedical Sciences (CMB) program provides personalized training in a graduate-student focused, state-of-the-art research environment. Graduates are highly qualified scientists ready to take on the rigors of scientific careers in academia, industry, and government.

This interdisciplinary program is comprised of highly dedicated research faculty in 16 departments across the UVM campus. This breadth, combined with a collegial atmosphere, provides an ideal environment for studying the molecular, cellular, genetic, biophysical, and biochemical mechanisms that control organismal development and disease.

DEGREES

- Cellular, Molecular and Biomedical Sciences M.S. (p. 117)
- Cellular, Molecular and Biomedical Sciences Ph.D. (p. 117)

FACULTY

Amiel, Eyal; Assistant Professor, Department of Biomedical and Health Sciences; PHD, Dartmouth College

Anathy, Vikas; Assistant Professor, Department of Pathology and Laboratory Medicine; PHD, Madurai Kamraj University

Ballif, Bryan; Professor, Department of Biology; PHD, Harvard University

Barlow, John; Associate Professor, Department of Animal and Veterinary Sciences; DVM, University of Illinois Urbana-Champaign; PHD, University of Vermont

Berger, Christopher Lewis; Professor, Department of Molecular Physiology and Biophysics; PHD, University of Minnesota Twin Cities

Bonney, Elizabeth; Professor, Department of Obstetrics and Gynecology; MD, Stanford University

Botten, Jason W.; Associate Professor, Department of Medicine-Immunobiology; PHD, University of New Mexico

Bouchard, Beth; Assistant Professor, Department of Biochemistry; PHD, University of Vermont

Boysson, Jonathan; Associate Professor, Department of Surgery; PHD, University of Wisconsin Madison

Budd, Ralph Charles; Professor, Department of Medicine-Immunobiology; MD, Weill Cornell Medical College

Buskiewicz, Iwona A.; Assistant Professor, Department of Pathology and Laboratory Medicine; PHD, University of Witten

Car, Frances Eileen; Professor, Department of Pharmacology; PHD, University of Illinois Chicago

Coutinho-Budd, Jaeda; Assistant Professor, Department of Biology; PHD, University of North Carolina at Chapel Hill

Deming, Paula; Associate Professor, Department of Biomedical and Health Sciences; PHD, University of North Carolina at Chapel Hill

Diehl, Sean; Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, University of Vermont
Dostmann, Wolfgang; Professor, Department of Pharmacology; PHD, University of Bremen; MD, University of Munich

Double, Sylvie; Professor, Department of Microbiology and Molecular Genetics; PHD, University of North Carolina Chapel Hill

Erdos, Benedek; Assistant Professor, Department of Pharmacology; MD, PHD, Semmelweis University, School of Medicine, Budapest, Hungary

Everse, Stephen; Associate Professor, Department of Biochemistry; PHD, University of California San Diego

Franklyn, Christopher; Professor, Department of Biochemistry; PHD, University of California Santa Barbara

Freeman, Kalev; Assistant Professor, Department of Surgery; MD, PHD, University of Colorado Boulder

Frietze, Seth; Assistant Professor, Department of Biomedical and Health Sciences; PHD, Harvard University

Glass, Karen; Adjunct Assistant Professor, Department of Biochemistry; PHD, University of Vermont

Gordon, Jonathan; Assistant Professor, Department of Biochemistry; PHD, University of Western Ontario

Heath, Jessica; Assistant Professor, Department of Pediatrics; Department of Biochemistry; MD, SUNY Stony Brook

Honda, Robert; Associate Professor, Department of Biochemistry; PHD, Ohio State University

Howe, Alan K.; Associate Professor, Department of Pharmacology; PHD, Northwestern University

Huston, Christopher; Professor, Department of Medicine-Infectious Disease; MD, Cornell University

Irvin, Charles G.; Professor, Department of Medicine-Pulmonary; PHD, University of Wisconsin-Madison

Janssen-Heininger, Yvonne M.W.; Professor, Department of Pathology and Laboratory Medicine; PHD, Maastricht University, The Netherlands

Jetton, Thomas Lawrence; Professor, Department of Medicine-Endocrinology; PHD, Vanderbilt University

Kelm, Robert; Associate Professor, Department of Medicine-Cardiovascular; PHD, University of Vermont

Kinsey, C. Matthew; Assistant Professor, Department of Medicine-Pulmonary; MD, Albert Einstein College of Medicine, Bronx, NY; MPH Harvard School of Public Health

Krementsov, Dimitry N.; Assistant Professor, Department of Biomedical and Health Sciences, PHD, University of Vermont

Landry, Christopher C.; Professor, Department of Chemistry; PHD, Harvard University

Li, Dawei; Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, Shanghai Jiao Tong University

Li, Jianing; Assistant Professor, Department of Chemistry; PHD, Columbia University

Lian, Jane; Professor, Department of Biochemistry; PHD, Boston University

Lounsbury, Karen M.; Professor, Department of Pharmacology; PHD, University of Pennsylvania

Matthews, Dwight E.; Professor, Department of Chemistry; PHD, Indiana University Bloomington

McKay, Stephanie; Associate Professor, Department of Animal and Veterinary Sciences; PHD, University of Alberta

Morielli, Anthony D.; Associate Professor, Department of Pharmacology; PHD, University of California Santa Cruz

Morrical, Scott Walker; Professor, Department of Biochemistry; PHD, University of Wisconsin-Madison

Pederson, David Scott; Professor, Department of Microbiology and Molecular Genetics; PHD, University of Rochester

Poynter, Matthew; Professor, Department of Medicine-Pulmonary; PHD, University of Utah

Prenis, Michael; Assistant Professor, Department of Molecular Physiology and Biophysics; PHD, University of Vermont

Quénet, Delphine; Assistant Professor, Department of Biochemistry, PHD; University of Strasbourg, France

Rincon, Mercedes; Professor, Department of Medicine-Immunobiology; PHD, Autonomous University of Madrid

Ruiz, Teresa; Professor, Department of Molecular Physiology and Biophysics; PHD, Brandeis University

Seward, David; Assistant Professor, Department of Pathology and Laboratory Medicine; MD, PHD, University of Colorado Anschutz Medical Campus

Shukla, Arti; Associate Professor, Department of Pathology and Laboratory Medicine; PHD, Banares Hindu University

Shukla, Girja Shanker; Associate Professor, Department of Surgery-Oncology; PHD, Lucknow University

Silveira, Jay R.; Assistant Professor, Department of Biochemistry; PHD, University of Vermont

Spees, Jeffrey; Associate Professor, Department of Medicine-Cardiovascular; PHD, University of California Davis

Stafford, James; Assistant Professor, Department of Neurological Sciences; PHD, Oregon Health and Science University

Stein, Gary; Professor, Department of Biochemistry; PHD, University of Vermont

Stein, Janet; Professor, Department of Biochemistry; PHD, Princeton University

Stevens Jr., Stanley M.; Adjunct Associate Professor, Department of Biochemistry; PHD, University of Florida

Stumpf, Jason K.; Assistant Professor, Department of Molecular Physiology and Biophysics; PHD, University of Colorado

Suratt, Benjamin; Professor, Department of Medicine-Pulmonary; MD, Columbia University

Taatjes, Douglas Joseph; Professor, Department of Pathology and Laboratory Medicine; PHD, University of Basel

Testroet, Eric; Assistant Professor, Department of Animal and Veterinary Science; PHD, Iowa State University

Teuscher, Cory; Professor, Department of Medicine-Immunobiology; PHD, University of New Mexico

Thali, Markus Josef; Professor, Department of Microbiology and Molecular Genetics; PHD, University of Zurich

Tierney, Mary Lauretta; Associate Professor, Department of Plant Biology; PHD, Michigan State University

Toth, Michael; Professor, Department of Medicine-Cardiovascular; PHD, University of Maryland Baltimore

Trybus, Kathleen; Professor, Department of Molecular Physiology and Biophysics; PHD, University of Chicago

van der Vliet, Albert; Professor, Department of Pathology and Laboratory Medicine; PHD, University of Amsterdam

Vanejas, Juan; Assistant Professor, Department of Physics; PHD, University of California Davis

Vigoreaux, Jim Osvaldo; Professor, Department of Biology; Molecular Physiology and Biophysics; PHD, University of Oklahoma
Ward, Gary; Professor, Department of Microbiology and Molecular Genetics; PHD, University of California San Diego
Wargo, Matthew; Associate Professor, Department of Microbiology and Molecular Genetics; PHD, Dartmouth College
Warshaw, David; Professor, Department of Molecular Physiology and Biophysics; PHD, University of Vermont
Weiss, Daniel; Professor, Department of Medicine-Pulmonary; MD, PHD, Mount Sinai School of Medicine
Wellman, George; Professor, Department of Pharmacology; PHD, University of Vermont
Zaidi, Sayyed Kaleem; Associate Professor, Department of Biochemistry, PHD, University of Punjab
Zhao, Feng-Qi; Professor, Department of Animal and Veterinary Sciences, PHD, University of Alberta

CELLULAR, MOLECULAR AND BIOMEDICAL SCIENCES M.S.

All students must meet the Requirements for the Master’s Degree (p. 265)

The Cellular, Molecular and Biomedical Sciences Program only awards M.S. degrees to students who have matriculated into the Ph.D. program, and their studies committee has determined that their academic progress (research included) is not sufficient to complete a Ph.D. These students are required to complete the minimum course and research requirements for the M.S. as defined by the Graduate College, and must defend a research-based master’s thesis.

OVERVIEW

The CMB program trains students to:

- Become scholars in their field
- Conduct hypothesis-based research in an ethically responsible manner
- Think independently, creatively, and critically
- Effectively communicate as teachers, researchers, and scholars

The curriculum of the Cellular, Molecular and Biomedical Sciences program is designed to give students fundamental and applied skills to prepare them for future positions in scientific research and related fields. The core curriculum includes course work in biochemistry, cell biology, genetics, ethics, data analysis, and scientific communications. Students also enhance their writing skills through a grant-writing course and improve their presentation skills through participation in the CMB seminar series. Students are provided with at least two opportunities to serve as teaching assistants, typically in undergraduate laboratory-based courses.

During the first year, CMB students complete three research rotations with potential advisors, while taking the required core course work in Cell Biology and Biochemistry. Students generally fulfill their core course and comprehensive exam requirements in year two.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy

Competitive applicants typically have evidence of strong course preparation and an undergraduate GPA of 3.00 or better. Foreign applicants to the CMB Program are required to have a satisfactory score on either the TOEFL (100 or higher) or the IELTS (7.0 or better). Prior research experience and strong letters of recommendation are expected of all competitive applicants.

Minimum Degree Requirements

Completion of course and research credits totaling 75 credits is required for the Ph.D. Maintaining a GPA of 3.00 or better in core courses and advanced electives is required.

Required core courses for all CMB students:

<table>

</tr>
</tbody>
</table>

Students must complete a minimum of twenty research credits (CLBI 491) and thirty course credits, and an additional twenty-five course or research credits. Once students have earned 75 credits, they register for continuous registration GRAD 901, GRAD 902 or GRAD 903, as appropriate.

Additional program requirements include service as a graduate teaching assistant (GTA) twice during the first two years, weekly attendance at the CMB seminar series, annual presentation of research progress within the CMB seminar program starting in the second year, and annual meetings with the student’s dissertation studies committee beginning in the second year.
**Comprehensive Examination**

The comprehensive examination is a tool to evaluate the progress of each student and ensure that they are prepared to proceed toward the doctorate degree. All parts of the qualifying examination will be evaluated in a manner to avoid bias and maintain uniformity of assessment. The examination will determine whether the candidate:

1. Has acquired an adequate academic background through required course work and electives
2. Can analyze and interpret data and scientific ideas
3. Can apply logical thought to synthesize diverse facts and concepts
4. Understands and meets the intellectual demands of the degree program

The comprehensive examination is structured to provide assessment in oral and written formats. The two phases of the exam occur at distinct times during training and both must be satisfactorily completed to advance to doctoral candidacy.

Phase I is an oral examination that tests students on their ability to synthesize and integrate scientific knowledge learned from first-year laboratory rotations, CMB seminar and core courses. The oral exam must be completed by June 31\textsuperscript{st} of the first year. Phase II is a written grant proposal based on the student’s thesis research project that must be completed by August 31\textsuperscript{st} of the second year. The Phase II exam will provide the student with a detailed plan for conducting their dissertation research. The comprehensive exam is organized and conducted by the CMB Education Committee.

**Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy**

Maintain a 3.00 GPA and successful completion of the comprehensive exam, as outlined in the CMB Program Handbook.

**CHEMISTRY**

http://www.uvm.edu/~chem/

**OVERVIEW**

The Chemistry Department currently offers graduate programs leading to either the M.S. or Ph.D. in analytical, inorganic, organic, or physical chemistry. In recent years about eight students per year have received the Ph.D. In the Chemistry Department, courses are offered in inorganic chemistry, organometallic chemistry, physical inorganic chemistry, synthetic organic chemistry, physical organic chemistry, heterocyclic chemistry, advanced analytical chemistry, optical spectroscopy, mass spectrometry, electrochemistry, thermodynamics, quantum chemistry, and polymer chemistry.

Upon arrival, new graduate students in Chemistry take examinations in analytical, inorganic, organic, and physical chemistry in order to place students properly in the graduate curriculum. The exams are nationally standardized by the American Chemical Society, and national norms are used. Appropriate course work and didactic opportunities are in place to strengthen any student weakness that may appear from the exams.

Early in the fall semester faculty present a series of short talks that describe their research interests. New graduate students attend these talks and then discuss specific research interests with individual faculty members. After this process, students normally make a decision regarding their research direction and particular advisor around the end of November of the first year. Detailed information about the degree requirements of the program can be found via the Graduate Program link of the Chemistry Department’s website.

**DEGREES**

- Chemistry AMP (p. 118)
- Chemistry M.S. (p. 119)
- Chemistry Ph.D. (p. 120)

**FACULTY**

Brewer, Matthias; Professor, Department of Chemistry; PHD, University of Wisconsin-Madison
Goldberg, Joel M.; Associate Professor, Department of Chemistry; PHD, University of Michigan Ann Arbor
Honda, Robert J.; Associate Professor, Department of Biochemistry; PHD, Ohio State University
Landry, Christopher C.; Professor, Department of Chemistry; PHD, Harvard University
Li, Jianing; Assistant Professor, Department of Chemistry; PHD, Columbia University
Liptak, Matthew D.; Associate Professor, Department of Chemistry; PHD, University of Wisconsin
Madalengoitia, Jose S.; Associate Professor, Department of Chemistry; PHD, University of Virginia
Matthews, Dwight E.; Professor, Department of Chemistry; PHD, Indiana University Bloomington
Petrucci, Giuseppe A.; Professor, Department of Chemistry; PHD, University of Florida
Ruggiero, Michael T.; Assistant Professor, Department of Chemistry; PHD, Syracuse University
Schneebeli, Severin; Assistant Professor, Department of Chemistry; PHD, Columbia University
Waterman, Rory; Professor, Department of Chemistry; PHD, University of Chicago
Walley, Adam C.; Assistant Professor, Department of Chemistry; PHD, Columbia University

**CHEMISTRY AMP**

All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

**OVERVIEW**

Qualified undergraduate students who plan to earn a Master’s degree in Chemistry may enroll in the Accelerated Master’s Program (AMP), which enables students to begin working on a master’s degree while still an undergraduate. Students apply to the program in the second semester of their junior year or the first semester of their senior year. Upon admission to the program by the Graduate College, students will choose 6 credits of graduate approved courses that can be taken while still an undergraduate.
REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE FOR ACCELERATED STUDENTS

Students must apply for the Accelerated Master’s Program (AMP) during spring semester of their junior year. Students interested in the AMP can request information in writing from the Chemistry department. Recommendation for admission will be based upon the student’s prior academic record with particular attention paid to performance in upper-division 200-level Chemistry courses. Following formal Graduate College admission to the Accelerated Master’s Program, up to six credits of approved graduate course work may be taken that may be counted toward both the undergraduate and graduate degree requirements. Generally, AMP students begin research by or during the summer prior to their senior year.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

The above prerequisites for admission to candidacy must be supplemented in either of the following two ways:

<table>
<thead>
<tr>
<th>OPTION A (THESIS)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Completion of twelve credits of CHEM 391 and submission of a satisfactory thesis; and completion of at least thirty credits of graduate work (courses and Master’s Thesis Research).</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OPTION B (NON-THESIS)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Completion of six credits of CHEM 395; and completion of at least thirty credits of graduate work (courses and Literature Research Project).</td>
<td></td>
</tr>
</tbody>
</table>

M.S. students should decide at the beginning of their program whether they will pursue Option A or Option B and inform the Department of Chemistry and the Graduate College of their decisions.

COMPREHENSIVE EXAMINATION

In the Chemistry Department, the Comprehensive Examination for the Master’s degree consists of completion of the following three parts:

(1) Passing of the (entrance) qualifying-examinations requirement within the first year, and successful completion of the coursework requirement. The qualifying examinations establish a broad knowledge base in all major areas of chemistry, while the latter requirement is constructed to add breadth to the students’ knowledge base in specific areas of chemistry not directly related to their research area.

(2) Successful completion of the Advancement to Candidacy exam (CHEM 384). This course consists of the preparation of an end-of-second-year, 15-page dossier of research accomplishments, and an oral examination on its contents, which serves as a comprehensive review of the student’s fundamental understanding of chemistry.

(3) Completion of a total of two (2) credits of Current Topics (CHEM 318). This course consists of a review of one major article from the current literature (and supporting supplementary articles). The oral presentation is followed by an examination of the student’s understanding of the crucial information in that paper by faculty in the student’s major area.

CHEMISTRY M.S.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW

An M.S. degree in chemistry prepares students for careers in chemical sciences, biomedical sciences, catalysis, energy, environment, or materials science as well as other professional fields that apply strong research skills or basic chemical understanding. For a description of research by classic chemical subdivision, please refer to the Chemistry Ph.D. topic in this catalogue.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science

An undergraduate major in an appropriate field, minimally with course work in the four classic subdisciplines of chemistry (analytical, inorganic, organic, and physical). This is most commonly satisfied with a B.A., B.S., or equivalent degree in chemistry. Applicants with prior research experience are preferred. Satisfactory scores on the Graduate Record Examination general (aptitude) section is required.

Minimum Degree Requirements

The above prerequisites for admission to candidacy must be supplemented in either of the following two ways:

<table>
<thead>
<tr>
<th>OPTION A (THESIS)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Completion of twelve credits of CHEM 391 and submission of a satisfactory thesis; and completion of at least thirty credits of graduate work (courses and Master’s Thesis Research).</td>
<td></td>
</tr>
</tbody>
</table>
M.S. students should decide at the beginning of their program whether they will pursue Option A or Option B and inform the Department of Chemistry and the Graduate College of their decisions.

**Comprehensive Examination**

In the Chemistry Department, the Comprehensive Examination for the Master’s degree consists of completion of the following three parts:

1. Passing of the (entrance) qualifying-examinations requirement within the first year, and successful completion of the coursework requirement. The qualifying examinations establish a broad knowledge base in all major areas of chemistry, while the latter requirement is constructed to add breadth to the students’ knowledge base in specific areas of chemistry not directly related to their research area.

2. Successful completion of the Advancement to Candidacy exam (CHEM 384). This course consists of the preparation of an end-of-second-year, 15-page dossier of research accomplishments, and an oral examination on its contents, which serves as a comprehensive review of the student’s fundamental understanding of chemistry.

3. Completion of a total of two (2) credits of Current Topics (CHEM 318). This course consists of a review of one major article from the current literature (and supporting supplementary articles). The oral presentation is followed by an examination of the student’s understanding of the crucial information in that paper by faculty in the student’s major area.

**CHEMISTRY PH.D.**

All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

**OVERVIEW**

A Ph.D. degree in chemistry prepares students for careers in chemical sciences and related disciplines including biomedical sciences, biotechnology, catalysis, energy, environment, materials science, or nanotechnology. Individuals having earned a Ph.D. in chemistry at UVM have gone on to careers in academics, the chemical industry, and national research laboratories. Graduate study at UVM is research intensive, and a description of research by classic chemical subdivision follows.

Analytical chemistry involves developing and applying instrumentation and chemical methods to solve problems across a range of chemistries and scientific disciplines. One focus is the development of innovative methods and instruments to study the formation and chemistry of organic aerosols in the atmosphere. This work bridges the gap between analytical chemistry and atmospheric science, contributing to the understanding of the impact of aerosols on global climate through direct scattering of solar radiation and the formation of ice and water clouds.

Inorganic chemistry at UVM involves the study of main-group elements and transition metals in a variety of contexts, with applications in catalysis, energy, environment, and medicine. One example is the synthesis and characterization of inorganic particles, which can be functionalized for broad applications in heterogeneous catalysis, targeted drug delivery, and biological imaging. A second focus area employs biochemical, spectroscopic, and computational tools to elucidate and manipulate the enzymatic mechanisms of metalloproteins. Finally, a third example is the design of metal-based catalysts for chemical bond formation, which can be applied to the preparation of useful small molecules and novel polymeric materials.

Current research in organic chemistry includes the development of novel synthetic methodologies to prepare oxygen- and nitrogen-containing heterocyclic compounds, new ring fragmentation reactions and their applications in synthesis, development of efficient and stereoselective tandem/cascade reaction sequences, natural products, mechanistic studies of organic chemical reactions, development of 1,3-diaza-Claisen rearrangements and applications toward the synthesis of guanidine-containing natural products, and studies in bioorganic chemistry. Additional projects involve the methodological development of syntheses for π-conjugated small molecules, molecular cages, non-planar aromatics, and polymeric
systems as functional materials with applications ranging from mesoscale synthesis to renewable energy harvesting and storage.

Physical chemistry research areas include two major areas of focus. The first area is the development of multiscale modeling approaches to understand complex chemical systems, with the aims of elucidating the critical structure-mechanism-function relationships of chemical and biological compounds and providing rational guides to help drug discovery and materials design. The second area is the use of low-frequency vibrational spectroscopies, combined with quantum mechanical calculations, to understand how collective atomic motions are related to bulk material properties, with the aim of harnessing these vibrations to selectively drive processes related to mechanochemistry of energy storage materials, pharmaceutical stability, biomolecular function, and semiconducting potential.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for
the Degree of Doctor of Philosophy

An undergraduate major in an appropriate field, minimally with course work in the four classic subdisciplines of chemistry (analytical, inorganic, organic, and physical). This is most commonly satisfied with a B.A., B.S., or equivalent degree in chemistry. Applicants with prior research experience are preferred. Satisfactory scores on the Graduate Record Examination general (aptitude) section is required.

Minimum Degree Requirements

In addition to the above requirements a student must:

- Complete a doctoral research project, write an acceptable dissertation, and defend it
- Present a total of 75 hours of credit in course work and dissertation research. A minimum of 30 course credits, 15 of which must be graded, is required.
- Make an oral and written presentation of an original research proposal, CHEM 488, typically in the first semester of the third year

Comprehensive Examination

In the Chemistry Department, the Comprehensive Examination for the Doctorate degree consists of completion of the following three parts:

1. Passing of the (entrance) qualifying-examinations requirement within the first year, and successful completion of the coursework requirement. The qualifying examinations establish a broad knowledge base in all major areas of chemistry, while the latter requirement is constructed to add breadth to the students’ knowledge base in specific areas of chemistry not directly related to their research area.

2. Successful completion of the Advancement to Candidacy exam (CHEM 484). This course consists of the preparation of an end-of-second-year, 15-page dossier of research accomplishments, and an oral examination on its contents, which serves as a comprehensive review of the student’s fundamental understanding of chemistry.

3. Completion of a total of three (3) credits of Current Topics (CHEM 318). This course consists of a review of one major article from the current literature (and supporting supplementary articles). The oral presentation is followed by an examination of the student’s understanding of the crucial information in that paper by faculty in the student’s major area.

Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy

It is expected that a student will ordinarily complete the following requirements for admission to candidacy by the end of the second year of residence:

- At least fifteen credits of research (CHEM 491) 15
- CHEM 318 Current Topics in Chemistry (Must be taken three times) 1
- CHEM 380 Chemical Investigations 1
- CHEM 381 Grad Seminar 1
- CHEM 484 Advanced Topics in Chemistry (present and defend proposed dissertation topic) 2

Demonstration of basic competence in four fields of chemistry (analytical, inorganic, organic, and physical) through the biannual qualifying examinations or completion of prescribed courses at the University of Vermont

- Three credits of teaching 3
- One year of residence
- At least 15 credits of formal course work including:
  - Nine credits of graduate level courses in the chemical field of specialization
  - Six credits of graduate-level chemistry courses not in the area of specialization
- Maintenance of an overall grade point average of 3.00

CIVIL AND ENVIRONMENTAL ENGINEERING

http://www.uvm.edu/~cems/soe/

OVERVIEW

Graduate programs in Civil and Environmental Engineering (CEE) that lead to the master of science and doctor of philosophy degrees are offered. The curricular and research programs emphasize engineering related to environmental and hydrological processes, sustainable transportation systems, materials, and geotechnical, geoenvironmental and structural engineering.

Research includes: groundwater contamination modeling and remediation including optimal remediation design; environmental restoration and ecological engineering; hydrological processes; air pollution and related health effects; modeling of contaminant fate and transport in the environment; materials; geotechnical and geoenvironmental engineering; dynamic behavior of soils, structures
and structural health monitoring; geo-energy; and sustainable transportation systems.

Graduate students of CEE can concurrently pursue certificates of graduate study in, for example, complex systems and ecological economics.

**DEGREES**

- Civil and Environmental Engineering AMP (p. 122)
- Civil and Environmental Engineering M.S. (p. 123)
- Civil and Environmental Engineering Ph.D. (p. 123)

**FACULTY**

- **Aultman-Hall, Lisa M.**; Professor, Department of Civil and Environmental Engineering; PHD, McMaster University
- **Badireddy, Appala Raju**; Assistant Professor, Department of Civil and Environmental Engineering; PHD, University of Houston
- **Bomblies, Arne**; Professor, Department of Civil and Environmental Engineering; PHD, Massachusetts Institute of Technology
- **Dewoolkar, Mandar M.**; Professor, Department of Civil and Environmental Engineering; PHD, University of Colorado Boulder
- **Garcia, Luis**; Professor, Department of Civil and Environmental Engineering; PHD, University of Colorado Boulder
- **Ghazanfari, Ehsan**; Assistant Professor, Department of Civil and Environmental Engineering; PHD, Lehigh University
- **Hernandez, Eric M.**; Assistant Professor, Department of Civil and Environmental Engineering; PHD, Northeastern University
- **Holmén, Britt A.**; Professor, Department of Civil and Environmental Engineering; PHD, Massachusetts Institute of Technology
- **Pinder, George Francis**; Professor, Department of Civil and Environmental Engineering; PHD, University of Illinois Urbana-Champaign
- **Rizzo, Donna Marie**; Professor, Department of Civil and Environmental Engineering; PHD, University of Vermont
- **Tan, Ting**; Associate Professor, Department of Civil and Environmental Engineering; PHD, Princeton University
- **Underwood, Kristen L.**; Research Assistant Professor, Department of Civil and Environmental Engineering; PHD, University of Vermont

**CIVIL AND ENVIRONMENTAL ENGINEERING AMP**

All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Science for Accelerated Students**

Qualified undergraduate students who plan to earn a master’s degree in civil and environmental engineering may enroll in the Accelerated Master’s Program, which enables students to begin working on a master’s degree while still an undergraduate. Applications are typically completed in the second semester of the junior year, but must be completed at least one month prior to the semester in which the student wishes to take courses that will double-count for both Bachelor’s and MS degrees so that there is enough time to be admitted to the Graduate College before coursework that will double count is taken. Upon entering the program, students may take up to nine graduate credits while completing the undergraduate degree. Of these, a maximum of six credits can be counted toward both the B.S. and the M.S. degrees. These credits must be earned after the student has been accepted into the Graduate College, and are subject to approval of the student’s graduate advisor. Students pursuing an M.S. degree in civil and environmental engineering may choose either a thesis, project, or non-thesis based program.

To apply to the program, students should have a cumulative grade point average of at least 3.20 at the time of application (some exceptions may be made, if warranted), must submit a letter of application to the graduate program coordinator naming a faculty member who has agreed to serve as their graduate advisor and list the courses proposed for graduate credit. Applicants must also complete the Graduate College application. GRE scores are not required for AMP students.

**Minimum Degree Requirements**

The requirements for advancement to candidacy must be supplemented in either of the two following ways:

<table>
<thead>
<tr>
<th>Option</th>
<th>Minimum Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thesis Option</td>
<td>30 Total Minimum Credits (6-9 credits of CE 391) 30</td>
</tr>
<tr>
<td></td>
<td>Oral Comprehensive Examination</td>
</tr>
<tr>
<td></td>
<td>Completion and Defense of a Thesis</td>
</tr>
<tr>
<td>Non-Thesis Option #1</td>
<td>30 Total Minimum Credits (3-6 credits of CE 392) 30</td>
</tr>
<tr>
<td></td>
<td>Oral Comprehensive Examination</td>
</tr>
<tr>
<td></td>
<td>Completion of a Research Report</td>
</tr>
<tr>
<td>Non-Thesis Option #2</td>
<td>30 Total Minimum Credits 30</td>
</tr>
<tr>
<td></td>
<td>Written Comprehensive Examination</td>
</tr>
</tbody>
</table>

Students must declare which option they intend to pursue at the beginning of their program.

**Comprehensive Examination**

A comprehensive examination is required of all M.S. students and must be completed before the thesis defense. For thesis option students this generally takes the form of an informal oral examination with the Studies Committee and often focuses around the basic principles behind the thesis research. This should generally take place in the semester preceding the thesis defense.

For non-thesis option students, the required format is a written examination consisting of four to six topics related to the student’s course of study. The advisor solicits written questions from
instructors from the courses the student has taken. This is usually taken in the last semester of their program.

The examination may be retaken once if the student does not pass it on the first attempt.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**

Specific course work may be required of those who lack a sufficiently strong engineering background.

**CIVIL AND ENVIRONMENTAL ENGINEERING M.S.**

All students must meet the Requirements for the Master's Degree (p. 265)

**OVERVIEW**

A graduate program in Civil and Environmental Engineering (CEE) that leads to the master of science degree is offered. The curricular and research programs emphasize engineering related to environmental and hydrological processes, sustainable transportation systems, materials, and geotechnical, geoenvironmental and structural engineering.

Research includes: groundwater contamination modeling and remediation including optimal remediation design; environmental restoration and ecological engineering; hydrological processes; air pollution and related health effects; modeling of contaminant fate and transport in the environment; materials; geotechnical and geoenvironmental engineering; dynamic behavior of soils, structures and structural health monitoring; geo-energy; and sustainable transportation systems.

Graduate students of CEE can concurrently pursue certificates of graduate study in sustainable transportation systems, complex systems, and ecological economics.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Science**

All applicants must have an undergraduate degree from a recognized university. A Bachelor of Science degree in engineering is preferred, but applicants with a B.S. degree in one of the sciences are often accepted. The latter, however, should have a minimum of the following mathematics and science course work prior to admission:

- three semesters of calculus
- one semester of differential equations
- one semester of calculus-based physics
- one semester of chemistry

Satisfactory scores on the Graduate Record Examination general are also required. International students whose native language is not English or who have not received their education in English are required to submit satisfactory results from the TOEFL or IELTS examination. Completed applications are due February 1.

**Minimum Degree Requirements**

The requirements for advancement to candidacy must be supplemented in either of the two following ways:

<table>
<thead>
<tr>
<th>Thesis Option</th>
</tr>
</thead>
<tbody>
<tr>
<td>30 Total Minimum Credits (6-9 credits of CE 391)</td>
</tr>
<tr>
<td>Oral Comprehensive Examination</td>
</tr>
<tr>
<td>Completion and Defense of a Thesis</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Non-Thesis Option #1</th>
</tr>
</thead>
<tbody>
<tr>
<td>30 Total Minimum Credits (3-6 credits of CE 392)</td>
</tr>
<tr>
<td>Oral Comprehensive Examination</td>
</tr>
<tr>
<td>Completion of a Research Report</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Non-Thesis Option #2</th>
</tr>
</thead>
<tbody>
<tr>
<td>30 Total Minimum Credits (Restricted to Course Credits Only)</td>
</tr>
<tr>
<td>Written Comprehensive Examination</td>
</tr>
</tbody>
</table>

Students must declare which option they intend to pursue at the beginning of their program.

**Comprehensive Examination**

A comprehensive examination is required of all M.S. students and must be completed before the thesis defense. For thesis option students this generally takes the form of an informal oral examination with the Studies Committee and often focuses around the basic principles behind the thesis research. This should generally take place in the semester preceding the thesis defense.

For non-thesis option students, the required format is a written examination consisting of four to six topics related to the student’s course of study. The advisor solicits written questions from instructors from the courses the student has taken. This is usually taken in the last semester of their program.

The examination may be retaken if the student does not pass it on the first attempt.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**

Specific course work may be required of those who lack a sufficiently strong engineering background.

**CIVIL AND ENVIRONMENTAL ENGINEERING PH.D.**

All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

**OVERVIEW**

A graduate program in Civil and Environmental Engineering (CEE) that leads to the doctor of philosophy degree is offered. The curricular and research programs emphasize engineering related to environmental and hydrological processes, sustainable transportation systems, materials, and geotechnical, geoenvironmental and structural engineering.
Research includes: groundwater contamination modeling and remediation including optimal remediation design; environmental restoration and ecological engineering; hydrological processes; air pollution and related health effects; modeling of contaminant fate and transport in the environment; materials; geotechnical and geo-environmental engineering; dynamic behavior of soils, structures and structural health monitoring; geo-energy; and sustainable transportation systems.

Graduate students of CEE can concurrently pursue certificates of graduate education in sustainable transportation systems, complex systems, and ecological economics.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy
A Master of Science or Bachelor of Science degree in engineering is preferred, but applicants with a M.S. or B.S. degree in one of the sciences are often accepted. The latter, however, should have a minimum of the following mathematics and science course work prior to admission: three semesters of calculus, one semester of differential equations, one semester of calculus-based physics, and one semester of chemistry. Satisfactory academic performance as measured by grades and scores on the Graduate Record Exam are required. Applicants whose native language is not English or who have not received their education in English must present satisfactory results from the TOEFL or IELTS examination. Completed applications are due February 1.

Minimum Requirements for the Degree of Doctor of Philosophy
In addition to advancement to candidacy, the student must:

- Present at least seventy-five credits in approved course work and research (including those required for advancement to candidacy), of which at least thirty-five credits are in research, at least 30 credits are in coursework, 15 of which must be graded and six of which are in course work in disciplines ancillary to Civil and Environmental Engineering
- Write and successfully defend an acceptable dissertation

Comprehensive Examination
A comprehensive examination is required of all Ph.D. students and should be completed by the end of their second year in the doctoral program when they have taken at least 24 credits of graduate coursework in different topical areas. Some or all of the 24 credits required may be transferred in from their Masters degree if desired.

The comprehensive examination, successful proposal presentation, and one year of residency at UVM are needed for advancement to candidacy.

The comprehensive examination covers five topics or courses, from three topical areas. The three areas are described below.

Area 1. One topic from the following three;

1. Advanced Mathematical Methods
2. Advanced Statistical Methods
3. Probabilistic Methods

Area 2. Two topics from the following nine;

1. Water and Wastewater Engineering
2. Air Pollution, Hazardous Waste
3. Hydrology
4. Groundwater
5. Advanced Fluids
6. Advanced Structural Analysis
7. Advanced Soils
8. Transportation Systems
9. Advanced Materials

Area 3. Two topics from the following four;

1. Numerical Methods
2. Computational Modeling
3. Information Technology Applications
4. Optional Area subject to approval by Studies Committee

Five members of the Comprehensive Examination Committee will test the student in five appropriate topics selected from the previous list. Each faculty member will be responsible for one of the five topics. Students generally select from courses that they have had at UVM, but occasionally a student may select a faculty member that they did not have, but covers a topic that they have taken. The students and their Advisor select and recommend to the Graduate Student Coordinator the Comprehensive Examination Committee.

The examination takes place in two days and covers a written part (day 1) and an oral part (day 2). Each committee member makes up a written question or questions for the student that will take about an hour. The written examination is 6 hours long. The questions can be closed book or open book. This is determined by each committee member. The student should talk to each committee member prior to the examination to determine the format and scope.

The oral examination is usually given two days after the written examination. The oral examination requires three consecutive hours, a half an hour per examiner and a half an hour for the committee to reassemble and to decide if the student passed or failed the examination.

The student is responsible for coordinating the dates for the written and oral examination with their committee members, at least one month prior to the examination date. Students will coordinate with the office of the Dean of the college or Program administrative assistant to find a room for the oral examination. The student then gives to the Graduate Program Coordinator the list of members with email addresses and phone numbers, and the dates of the examinations.

The Comprehensive Examination must be passed at least 6 months before submitting the dissertation. Success in the Comprehensive Examination is prerequisite for an oral Dissertation Defense Examination.
The examination may be retaken once if the student does not pass it on the first attempt.

Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy

It is ordinarily expected that a student will complete the following requirements for advancement to candidacy prior to the end of the second year in the program:

- One year of residency at UVM
- At least twelve credits of research
- At least fifteen credits of course work at the graduate level acceptable to the student's graduate studies committee
- Satisfactory performance on a comprehensive examination that includes a written part and an oral part
- Satisfactory record of performance in courses and in teaching and research assignments

CLINICAL AND TRANSLATIONAL SCIENCE

http://med.uvm.edu/medicine/gimr/ctseducation/overview

OVERVIEW

Clinical and Translational Science (CTS) is a framework that helps us understand and develop new approaches to improving human health by linking basic biology, clinical medicine and community health. CTS students learn to design, execute and report studies of how biologic and non-biologic aspects of health care interact to influence individuals and populations. Our programs provide individuals with diverse backgrounds the opportunity to work with faculty from many disciplines and offer an Educational and Career Development Program to prepare them for roles as important and productive contributors to CTS.

DEGREES

- Clinical and Translational Science CGS (p. 125)
- Clinical and Translational Science M.S. (p. 125)
- Clinical and Translational Science Ph.D. (p. 126)

FACULTY

Callas, Peter W.; Research Associate Professor, Department of Mathematics and Statistics; PHD, University of Massachusetts Amherst

Kennedy, Amanda G.; Associate Professor, Department of Medicine-General Internal Medicine Research; PHARMD, Northeastern University

Littenberg, Benjamin; Professor, Department of Medicine-General Internal Medicine; MD, Case Western Reserve University

MacLean, Charles Duncan; Professor, Department of Medicine-General Internal Medicine Research; MD, McGill University

Pinckney, Richard G.; Associate Professor, Department of Medicine-General Internal Medicine; MD, SUNY Buffalo

Rubin, Alan Saul; Associate Professor, Department of Medicine-General Internal Medicine; MD, New York University

van Eeghen, Constance O.; Assistant Professor, Department of Medicine-General Internal Medicine; DRPH, University of North Carolina Chapel Hill

CLINICAL AND TRANSLATIONAL SCIENCE CGS

All students must meet the Requirements for the Certificates of Graduate Study (p. 265)

OVERVIEW

The Certificate in CTS (Clinical and Translational Science) is designed for biomedical scientists, health care professionals, and scholars in other fields (e.g., ethics, business, engineering, law) who are seeking to broaden their horizons in clinical and translational research.

More information on the certificate is available from the Center for Clinical and Translational Science website.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Certificate of Graduate Study

- U.S. Baccalaureate degree or an equivalent international degree
- Four semesters of college-level science highly recommended.
- Two semesters of college-level mathematics or statistics highly recommended.
- Two semesters of college level English composition or equivalent

Minimum Degree Requirements

Students are expected to complete 19 credits of core course work and participate in the weekly Seminar in CTS.

<table>

CLINICAL AND TRANSLATIONAL SCIENCE M.S.

All students must meet the Requirements for the Master's Degree (p. 265)

OVERVIEW

Concentration in Investigation

This program is designed to effectively and efficiently transform doctoral level professionals drawn from the large array of disciplines
contributing to health into successful independent clinical and translational science investigators.

**Concentration in Research Management**
This program is designed for individuals who have an interest in becoming research coordinators, patient advocates, research administrators, study nurses and other science professionals.

**SPECIFIC REQUIREMENTS**

**Requirements for Admissions to Graduate Studies for the Degree of Master of Science**

**CONCENTRATION IN INVESTIGATION**
- Applicants should have a Doctoral-level degree, expertise in their specialty and some general research experience.
- Four semesters of college-level science highly recommended.
- Two semesters of college-level mathematics or statistics highly recommended.
- Two semesters of college-level English composition or equivalent.
- Interviews with appointed faculty are required.

**CONCENTRATION IN RESEARCH MANAGEMENT**
(Not accepting applications for academic year 2019-20)
- U.S. Baccalaureate degree or an equivalent international degree.
- Four semesters of college-level science highly recommended.
- Two semesters of college-level mathematics or statistics highly recommended.
- Two semesters of college-level English composition or equivalent.
- Interviews with appointed faculty are required.

Applicants holding a degree from an unaccredited institution and International applicants should consult additional Graduate College Admission requirements

**Minimum Degree Requirements**

**CONCENTRATION IN INVESTIGATION**
The Master’s in CTS (Investigation) is a 31 credit degree that includes 19 credits of core course work, 6 credits of electives, and 6 credits of supervised research. Individuals must also participate in the weekly Seminar in CTS, successfully pass a comprehensive exam, and successfully complete and publicly defend a thesis.

</tbody>
</table>

**Comprehensive Examination**
The comprehensive exam is a required component for both concentrations of the M.S. program. The goal of the comprehensive exam is to determine whether the student’s depth and breadth of knowledge and ability to integrate information is within a scope expected as part of a master’s program in clinical and translational science (CTS).

The written exam has two parts. The first part is writing a 1-2 page NIH-style project summary of a grant protocol. The second part requires an analysis of an existing dataset using the concepts learned in the core courses.

The oral exam requires students to meet with Comprehensive Exam Committee to answer questions related to the written exam and concepts taught as part of the CTS core courses.

The comprehensive exam should be completed within 6 months of finishing the CTS core courses.

**Requirements for the Advancement to Candidacy for the Degree of Master’s of Science**
Successful completion of any prerequisite courses, and at least 15 graded graduate credits with a 3.00 GPA or better, including all core courses.

**CLINICAL AND TRANSLATIONAL SCIENCE PH.D.**
All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

**OVERVIEW**
The Ph.D. in CTS is designed for individuals who wish to become full-fledged independent investigators in CTS.
SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy

- U.S. Baccalaureate degree or an equivalent international degree.
- Four semesters of college-level science highly recommended.
- Two semesters of college-level mathematics or statistics highly recommended.
- Two semesters of college level English composition or equivalent.
- Interviews with appointed faculty are required.
- Students applying to the Ph.D. in CTS must have a source of funding and a Key CTS research mentor willing to provide a letter of support as part of the application.

Applicants holding a degree from an unaccredited institution and International applicants should consult additional Graduate College Admission requirements.

Minimum Degree Requirements

The Ph.D. in CTS is a 75 credit degree which includes 19 credit hours of core courses, at least 12 credits of elective courses, and a minimum of 20 credits of supervised research. Individuals must also participate in the weekly Seminar in CTS, complete a teaching requirement, successfully pass a comprehensive exam, and successfully complete and publicly defend a dissertation.

</tbody>
</table>

Comprehensive Examination

The overall goal of the comprehensive exam is to determine whether the student’s depth and breadth of knowledge and ability to integrate information is such that he or she should be advanced to candidacy for the Ph.D. The written exam involves writing a grant protocol in the style of a NIH Small Research Grant (R03) using the concepts learned in the core courses. The oral exam requires students to meet with the Comprehensive Exam Committee to answer questions related to the written exam and concepts taught as part of the CTS core courses. The comprehensive exam should be completed within 6 months of finishing the CTS core courses.

Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy

Students must have a minimum 3.00 grade point average in didactic coursework, have acceptable evaluations in their research work and successfully complete the oral and written comprehensive exam.

COMMUNICATION SCIENCES AND DISORDERS

http://www.uvm.edu/~cnhs/csd/

OVERVIEW

The Master of Science degree program in Communication Sciences and Disorders is designed to provide in-depth knowledge and skills in the areas required for a career in speech-language pathology. The course of study provides students with the academic background and clinical opportunities required in preparation for their Clinical Fellowship and ultimately the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP), allowing them to pursue a satisfying and rewarding career in health care, medicine, education, or research.

The master’s degree educational program in speech-language pathology at the University of Vermont has been re-accredited for the period 2012 - 2020 by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, MD, 20850; Phone: (800) 498-2071 or (301) 296-5700.

The Department of Communication Sciences and Disorders includes the Eleanor M. Luse Center for Communication: Speech, Language, and Hearing. This is an active clinic providing speech-language and audiology services to the community. It also serves as a key practicum site for students throughout their graduate studies. All students are supervised by clinically certified members of the faculty of the Eleanor M. Luse Center and affiliated practicum sites.

The CSD faculty conduct research in areas such as speech and language development, speech sound disorders and apraxia of speech, fluency and stuttering, autism and theory of mind, brain injury and cognitive-communication disorders. Many opportunities are available for graduate students who wish to become involved in faculty research projects.

DEGREES

- Communication Sciences and Disorders M.S. (p. 128)

FACULTY

Adams, Elizabeth; Clinical Associate Professor, Department of Communication Sciences and Disorders; Au.D., CCC-A, A.T. Still University

Bouyea, Laura; Lecturer; Department of Communication Sciences and Disorders; M.S., CCC-SLP, University of Vermont

Cannizzaro, Michael S.; Associate Professor, Department of Communication Sciences and Disorders; Ph.D., University of Connecticut
COMMUNICATION SCIENCES AND DISORDERS M.S.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW

The Master of Science degree program in Communication Sciences and Disorders is designed to provide in-depth knowledge and skills in the areas required for a career in speech-language pathology. The course of study provides students with the academic background and clinical opportunities required in preparation for their Clinical Fellowship and ultimately the Certificate of Clinical Competence in Speech-Language Pathology (CCC-SLP), allowing them to pursue a satisfying and rewarding career in health care, medicine, education, or research.

The master's degree educational program in speech-language pathology at the University of Vermont has been re-accredited for the period 2012 - 2020 by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association. Students must complete these 25 observation hours before they begin their graduate program. Additionally, the American Speech-Language-Hearing Association Standard III-A for certification requires evidence of previous course work in the biological sciences, physical sciences (i.e. physics or chemistry), statistics, and the social/behavioral sciences.

Minimum Degree Requirements

All students are required to complete mandatory course work in pursuit of the M.S. in Communication Sciences and Disorders. This course work includes content areas met by the following CSD courses:

- CSD 023 Linguistics for Clinicians
- or LING 080 Introduction to Linguistics
- CSD 094 Dev of Spoken Language
- CSD 101 Speech & Hearing Science
- CSD 022 Introduction to Phonetics
- or LING 165 Phonetic Theory and Practice
- CSD 281 Intro Cognitive Neuroscience (or an equivalent Human Neuroanatomy course)
- College Level Statistics

Applicants must complete all of the above prerequisite courses before entering the program. Students are also required to complete 25 observation hours obtained according to guidelines provided by the American Speech-Language-Hearing Association. Students must complete these 25 observation hours before they begin their graduate program. Additionally, the American Speech-Language-Hearing Association Standard III-A for certification requires evidence of previous course work in the biological sciences, physical sciences (i.e. physics or chemistry), statistics, and the social/behavioral sciences.
In total, 48-56 credits of graduate course work are required for the non-thesis track and 51-59 credits of graduate course work for students who write a thesis. Equivalent graduate-level course work, up to nine credits, may be waived if approved by the graduate program coordinator, reducing the total number of in-residence credits needed for completion of the program.

**Option A (Thesis)**

The student will complete 45-53 credits of graduate-level courses and six additional credits (CSD 362) for conducting the research leading to an M.S. thesis.

**Option B (Non-Thesis)**

Students choosing the non-thesis option will complete 45-53 credits required for the degree, including at least three credits of non-thesis research (CSD 361 and/or CSD 363 - research project or Systematic Reviews course).

**Comprehensive Examination**

The portfolio is used by this department as an alternative form of Comprehensive Examination; it provides a rich demonstration of the students’ achievements in their course of study. Each student’s portfolio includes a set of four reflective essays as well as academic and clinical artifacts selected by the student to reflect growth in specific areas of academic and clinical knowledge and skills required by the American Speech-Language-Hearing Association and the Vermont Department of Education. Other aspects of growth to be demonstrated include increasing rigor in critical thinking and methods of inquiry for research and its application.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**

Satisfactory completion of the written comprehensive examination in the form of a portfolio. Students will not be admitted to candidacy if 400 practicum hours (including twenty-five hours of observation) are not reached. Students may submit their comprehensive examination portfolio only in or following that semester in which they will have completed thirty-six graduate credits and 300 hours of supervised clinical practicum, and eleven credits in clinical study.

**COMMUNITY DEVELOPMENT AND APPLIED ECONOMICS**

http://www.uvm.edu/~cdae/

**OVERVIEW**

The Department of Community Development and Applied Economics (CDAE) supports sustainable local and international community development through interdisciplinary research, education, and outreach that serves the public interest. CDAE offers a Master of Science degree in Community Development and Applied Economics. Expertise among the CDAE faculty advisors includes economics (both ecological and neoclassical), rural sociology, food systems, applied econometrics, agricultural economics, policy and governance, consumer affairs, renewable energy, and community entrepreneurship. CDAE’s research and outreach is both global (e.g. Agroecology, Farmer Livelihoods and Ecosystem Services in Brazil’s Atlantic Forest) and local (e.g., dairy farming and farmers’ markets in Vermont) and graduate students benefit from close affiliation with other research institutions at the University of Vermont and beyond.

**DEGREES**

- Community Development and Applied Economics M.S. (p. 130)
- Community Resilience and Planning CGS (p. 130)

**FACULTY**

**Baker, Daniel H.;** Associate Professor, Department of Community Development and Applied Economics; PHD, University of Vermont

**Conner, David S.;** Assistant Professor, Department of Community Development and Applied Economics; PHD, Cornell University

**Farley, Joshua C.;** Professor, Department of Community Development and Applied Economics; PHD, Cornell University

**Heiss, Sarah Noel;** Associate Professor, Department of Community Development and Applied Economics; PHD, Ohio University

**Koliba, Christopher J.;** Professor, Department of Community Development and Applied Economics; PHD, Syracuse University

**Kolodinsky, Jane Marie;** Professor, Department of Community Development and Applied Economics; PHD, Cornell University

**McMahon, Edward;** Adjunct Associate Professor, Department of Community Development and Applied Economics; EDD, University of Vermont
McRae, Glenn; Adjunct Lecturer, Department of Community Development and Applied Economics; PHD, Union Institute and University
Sun, Tao; Associate Professor, Department of Community Development and Applied Economics; PHD, University of Minnesota Twin Cities
Tobin, Daniel; Assistant Professor, Department of Community Development and Applied Economics; PHD, Pennsylvania State University
Wang, Qingbin; Professor, Department of Community Development and Applied Economics; PHD, Iowa State University
Zia, Asim; Professor, Department of Community Development and Applied Economics; PHD, Georgia Institute of Technology

COMMUNITY DEVELOPMENT AND APPLIED ECONOMICS M.S.

All students must meet the Requirements for the Master’s Degree (p. 265).

OVERVIEW

The Department of Community Development and Applied Economics (CDAE) supports sustainable local and international community development through interdisciplinary research, education, and outreach that serves the public interest. CDAE offers a Master of Science degree in Community Development and Applied Economics. Expertise among the CDAE faculty advisors includes economics (both ecological and neoclassical), rural sociology, food systems, applied econometrics, agricultural economics, policy and governance, consumer affairs, renewable energy, and community entrepreneurship. CDAE’s research and outreach is both global (e.g. Agroecology, Farmer Livelihoods and Ecosystem Services in Brazil’s Atlantic Forest) and local (e.g., dairy farming and farmers’ markets in Vermont) and graduate students benefit from close affiliation with other research institutions at the University of Vermont and beyond.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science

- GPA = 3.00 or equivalent from bachelor’s degree.
- Completion of an acceptable Calculus and Microeconomics course by the end of the first semester of enrollment.
- Satisfactory scores from the Graduate Record Examination (GRE); official scores are required.
- Three letters of recommendation attesting to the candidate’s academic potential for graduate work and motivation for pursuing the M.S. in CDAE.
- For international students whose native language is not English or who have not completed undergraduate degrees in English, scores from the Test of English as a Foreign Language (TOEFL) or the English Language Testing System (IELTS) must be submitted.

Minimum Degree Requirements

The degree requires a total of thirty-six credits, of which twenty-seven to thirty are from advanced courses in CDAE and other related fields, plus a minimum of six credits of thesis research. A written comprehensive examination and an oral defense of a thesis are also required. A student’s thesis research is often an integral part of faculty-led, ongoing research projects in CDAE.

Students in the graduate program must have a 3.00 grade point average to remain a degree candidate. A student may be dismissed from the Graduate College if two or more grades below a "B" are received.

Five courses and graduate research seminars are required:

Comprehensive Examination

A written examination must be completed by the student’s third semester of full-time enrollment.

Requirements for Advancement to Candidacy for the Degree of Master of Science

Successful completion of any prerequisite courses, and at least 15 graded graduate credits earned in compilation of the graduate GPA, including all core courses. A GPA of 3.00 or greater is also required.

COMMUNITY RESILIENCE AND PLANNING CGS

All students must meet the Requirements for the Certificates of Graduate Study (p. 265)

OVERVIEW

The 18-credit Certificate of Graduate Studies in Community Resilience and Planning (CRP) provides masters, doctoral and certificate of graduate study-only students with the skills and knowledge needed to lead and guide communities through periods of change brought on by natural, economic, social and political shocks and disruptions. Students completing this certificate will develop deep understanding of the current threats and opportunities facing communities within Vermont, the United States, and across the globe. With a core set of courses designed to provide students with a survey of the community resilience and sustainability field, a foundation in community economic development and research methods, and a capstone experience focusing on system dynamics and strategic management and planning, the CRP prepares students with the tools needed to lead and assist communities through times of crisis and transition.
SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Certificate of Graduate Study
• Undergraduate transcripts showing completion of bachelor’s degree.
• Evidence of at least one college level course in statistics.
• Matriculated students in existing masters or doctoral programs will be required to have their program advisor sign off.
• There are no GRE requirements for acceptance into this certificate program.
• International students must meet UVM’s minimum English proficiency requirements.

COMPLEX SYSTEMS

http://vermontcomplexsystems.org/

OVERVIEW
The Vermont Complex Systems Center comprises a transdisciplinary group of faculty and their graduate students and postdocs who collaborate in analyzing, modeling, and understanding complex physical, biological, social and engineered systems. The Center sponsors an invited seminar series, a biweekly reading group, biweekly meetings of SCRAPs (Student Complexity Research And Pizza Seminar), research symposia, and TEDxUVM events. Most graduate students affiliated with the Center complete the S-course Certificate of Graduate Study in Complex Systems as a complement to their graduate degrees across campus.

DEGREES
• Complex Systems CGS (p. 131)

FACULTY
Bagrow, James; Assistant Professor, Department of Mathematics and Statistics; PHD, Clarkson University
Bongard, Joshua C.; Professor, Department of Computer Science; PHD, University of Zurich
Buzzas, Jeff; Chair and Professor, Department of Mathematics and Statistics; PHD, North Carolina State University Raleigh
Danforth, Chris; Associate Professor, Department of Mathematics & Statistics; PHD, University of Maryland College Park

Dodds, Peter S.; Professor, Department of Mathematics and Statistics; PHD, Massachusetts Institute of Technology
Eppstein, Margaret Jean; Professor, Department of Computer Science; PHD, University of Vermont
Hébert-Dufresne, Laurent; Assistant Professor, Department of Computer Science; PHD, Université Laval
Rizzo, Donna Marie; Professor, Department of Civil and Environmental Engineering; PHD, University of Vermont
Wshah, Safwan; Assistant Professor, Department of Computer Science; PHD, State University of New York at Buffalo

COMPLEX SYSTEMS CGS

All students must meet the Requirements for the Certificates of Graduate Study (p. 265)

OVERVIEW
In complex physical, biological, social and engineered systems, the self-organizing dynamics of interacting entities (be they molecules, cells, genes, bacteria, plants, birds, humans, nanobots, electrical substations, etc.) give rise to emergent system properties (such as consciousness, cancer, global warming, societies, etc.). Fortunately, many essential properties of such systems may be studied, modeled and understood using similar approaches, regardless of the application domain. Learning these cutting-edge complex systems approaches can help students move to the forefront of their field and stand out when competing in a tough job market.

The Certificate in Complex Systems may be earned either in conjunction with or independent of a UVM graduate degree program. In the latter case, credits earned with a grade of B or better may transfer into a graduate degree program following completion of the certificate. All policies regarding transfer credit apply.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Certificate of Graduate Study
A Bachelor’s degree and prior coursework in calculus, statistics, and computer programming (in any language, but prior Matlab and Python is helpful) are the minimum prerequisites. Linear algebra is recommended but not required. Specific electives may have additional prerequisites.

Minimum Degree Requirements
The Certificate of Graduate Study in Complex Systems requires a total of fifteen credits, distributed as shown below:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSYS/MATH 300</td>

131
Six credits of approved Complex Systems and/or Data Science electives taken at the graduate level. These include all courses at the 200 (approved for graduate credit) or 300 level with a CSYS prefix, many courses with a CS, Math, or Stat prefix, and miscellaneous relevant domain-specific courses in areas such as engineering, public administration, biology, plant biology, physics, etc. All electives must be approved by the graduate coordinator.

COMPLEX SYSTEMS AND DATA SCIENCE
https://www.uvm.edu/cems

OVERVIEW
The College of Engineering and Mathematical Sciences provides an educational program in Complex Systems and Data Science (CSDS) that includes education offerings at three levels:

1. A five course Graduate Certificate in Complex Systems that may be taken by any graduate student at UVM to augment their degree.
2. An MS in CSDS which is a two-year degree with optional disciplinary tracks, and which UVM undergraduates may initiate through an Accelerated Master’s Program.
3. A PhD in CSDS which will allow students to fully develop a deep portfolio of published research, thereby opening the door to high level research positions in, for example, government, industry, or academia.

The educational program naturally complements UVM’s undergraduate degree in Data Science but also thematically connects with many fields across the university.

The program’s overall goal is to help students become protean data scientists with eminently transferable skills. Students are provided with a broad training in computational and theoretical techniques for (1) describing and understanding complex natural and sociotechnical systems, enabling them to then, as possible, (2) predict, control, manage, and create such systems. Students will be trained in: Industry standard methods of data acquisition, storage, manipulation, and curation; Visualization techniques, with a focus on building high quality web-based applications; Finding complex patterns and correlations through, for example, machine learning and data mining; Powerful ways of hypothesizing, searching for, and extracting explanatory, mechanistic stories underlying complex systems—not just how to use black box techniques; Combining the formulation of mechanistic models (e.g., toy physics models) with genetic programming.

DEGREES
Complex Systems and Data Science AMP (p. 132)
Complex Systems and Data Science CGS (p. 133)
Complex Systems and Data Science M.S. (p. 134)
Complex Systems and Data Science Ph.D. (p. 135)

COMPLEX SYSTEMS AND DATA SCIENCE AMP
All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

OVERVIEW
The accelerated M.S. in Complex Systems and Data Science (CSDS) is a five year degree coupled with a relevant bachelor’s degree with optional disciplinary tracks. Our central goal is to help students become protean data scientists with eminently transferable skills. We provide students with a broad training in computational and theoretical techniques for (1) describing and understanding complex natural and sociotechnical systems, enabling them to then, as possible, (2) predict, control, manage, and create such systems. Students will be trained in: Industry standard methods of data acquisition, storage, manipulation, and curation; Visualization techniques, with a focus on building high quality web-based applications; Finding complex patterns and correlations through, for example, machine learning and data mining; Powerful ways of hypothesizing, searching for, and extracting explanatory, mechanistic stories underlying complex systems—not just how to use black box techniques; Combining the formulation of mechanistic models (e.g., toy physics models) with genetic programming.

SPECIFIC REQUIREMENTS
REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE FOR ACCELERATED STUDENTS
To be eligible for the Accelerated Master’s Program, a student must be a declared computer science, mathematics, or statistics B.S. major, and have identified a Complex Systems faculty sponsor. Students need to apply early (before the second semester of their junior year) to have time to plan two graduate level courses that can be used toward both their bachelor’s and graduate (M.S.) degree. These credits must be taken after formal admission to the graduate program. Other requirements include a GPA typically higher than 3.0 overall. All students must meet the Graduate college requirements.
for the Accelerated Master’s Degree Programs. There is no GRE requirement.

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

A total of thirty credits, distributed as shown below:

<table>

<td></td>
</tr>
</tbody>
</table>

Threaded throughout their courses, a desired central outcome of each Master’s student’s training will be their development of a data-intensive, high design portfolio of interactive online visualizations. Students will have many opportunities to work with faculty, researchers, institutions, and corporations, on meaningful, important real-world data sets, drawn from engineering systems, neuroscience, society through the lens of social media, and more. Beyond being a key training mechanism, we envisage these portfolios—in the manner of, for example, a traditional engineering design or artist’s set of works—will be instrumental in students achieving outstanding positions in their chosen fields.

student’s training will be their development of a data-intensive, high design portfolio of interactive online visualizations.

comprehensive exam

Receiving an A- or above in at least two of the four core courses and a B or above in the other two core courses meets the comprehensive exam requirement. If students do not meet this standard, they must demonstrate mastery of the material in which they have not proved to have satisfactory knowledge by one of three possible routes: an oral exam, a written exam, or a paper. The exact format will be decided upon by the Curriculum Committee in consultation with the student. The Curriculum Committee will also designate three relevant faculty who will create the exam and or specify the format and content area of the paper and assess the student’s performance.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE

Successful completion of the comprehensive exam and all required coursework.

COMPLEX SYSTEMS AND DATA SCIENCE CGS

All students must meet the Requirements for the Certificates of Graduate Study (p. 265)

OVERVIEW

In complex physical, biological, social and engineered systems, the self-organizing dynamics of interacting entities (be they molecules, cells, genes, bacteria, plants, birds, humans, nanobots, electrical substations, etc.) give rise to emergent system properties (such as consciousness, cancer, global warming, societies, etc.). Fortunately, many essential properties of such systems may be studied, modeled and understood using similar approaches, regardless of the application domain. Learning these cutting-edge complex systems approaches can help students move to the forefront of their field and stand out when competing in a tough job market.

The Certificate in Complex Systems may be earned either in conjunction with or independent of a UVM graduate degree program. In the latter case, credits earned with a grade of B or better may transfer into a graduate degree program following completion of the certificate. All policies regarding transfer credit apply.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of certificate of graduate study

A Bachelor’s degree and prior coursework in calculus, statistics, and computer programming (in any language, but prior Matlab and Python is helpful) are the minimum prerequisites. Linear algebra is recommended but not required. Specific electives may have additional prerequisites.

Minimum Degree Requirements

The Certificate of Graduate Study in Complex Systems requires a total of fifteen credits, distributed as shown below:

| CSYS/MATH 300 Principles of Complex Systems | 3 |
| CSYS/CS 302 Modeling Complex Systems | 3 |
| STAT/CS 287 QR: Data Science I | 3 |
| Complex Systems and Data Science Electives | 6 |
Six credits of approved Complex Systems and/or Data Science Electives taken at the graduate level. These include all courses at the 200 (approved for graduate credit) or 300 level with a CSYS prefix, many courses with a CS, Math, or Stat prefix, and miscellaneous relevant domain-specific courses in areas such as engineering, public administration, biology, plant biology, physics, etc. All electives must be approved by the graduate coordinator.

COMPLEX SYSTEMS AND DATA SCIENCE M.S.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW

The M.S. in Complex Systems and Data Science is a two year degree with optional disciplinary tracks. UVM undergraduates may incorporate the degree as part of an Accelerated Master’s Program. Our central goal is to help students become protean data scientists with eminently transferable skills (read: super powers). We provide students with a broad training in computational and theoretical techniques for (1) describing and understanding complex natural and sociotechnical systems, enabling them to then, as possible, (2) predict, control, manage, and create such systems. Students will be trained in: industry standard methods of data acquisition, storage, manipulation, and curation; visualization techniques, with a focus on building high quality web-based applications; finding complex patterns and correlations through, for example, machine learning and data mining; powerful ways of hypothesizing, searching for, and extracting explanatory, mechanistic stories underlying complex systems—not just how to use black box techniques; and combining the formulation of mechanistic models (e.g., toy physics models) with genetic programming.

SPECIFIC REQUIREMENTS

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE

The program serves students from a wide variety of backgrounds and therefore deliberately keep the prerequisites to a minimum. Students must have a Bachelor’s degree in a relevant field and prior coursework or be able to establish competency in calculus, computer programming, data structures, linear algebra, and probability and statistics. Please note that some electives have additional prerequisites. General GRE scores are not required.

We offer three courses for students who may be lacking in these prerequisites:

1. CS 124 Data Structures
2. MATH 122 Applied Linear Algebra, and
3. STAT 211 Statistical Methods I

Note that at most one of CS 124 or MATH 122 may be taken for graduate credit (pending completion of a Permission to take a 100/200 Level Course for Graduate Credit Form at least 1 month before the semester in which the course is taken).

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE

Threaded throughout the coursework, a desired central outcome of each Master's student's training will be their development of a data-intensive, high design portfolio of interactive online visualizations. Students will have many opportunities to work with faculty, researchers, institutions, and corporations, on meaningful, important real-world data sets, drawn from engineering systems, neuroscience, society through the lens of social media, and more. Beyond being a key training mechanism, we envisage these portfolios—in the manner of, for example, a traditional engineering design or artist’s set of works—will be instrumental in students achieving outstanding positions in their chosen fields.

Comprehensive Exam

Receiving an A- or above in at least two of the four core courses and a B or above in the other two core courses meets the comprehensive exam requirement. If students do not meet this standard, they must demonstrate mastery of the material in which they have not proved to have satisfactory knowledge by one of three possible routes: an oral exam, a written exam, or a paper. The exact format will be decided upon by the Curriculum Committee in consultation with the student. The Curriculum Committee will also designate three relevant faculty
who will create the exam and/or specify the format and content area of the paper and assess the student’s performance.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE
Successful completion of the comprehensive exam and all required coursework.

COMPLEX SYSTEMS AND DATA SCIENCE PH.D.
All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

OVERVIEW
The Ph.D. in Complex Systems and Data Science provides a pan-disciplinary academic training for graduate students working on complex systems problems across all quantitative sciences. While the Ph.D resides in the College of Engineering and Mathematical Sciences (CEMS), thereby providing a strong computational and theoretical training, the program’s scope is science-wide, encompassing natural, artificial, and sociotechnical systems. Depending on their chosen area of focus, students will work within and across research groups (potentially outside of CEMS) and be strongly connected with other students through co-location and regular student-led meetings and events. Students will be expected to generate and defend a scientifically important and socially meaningful body of work generally resulting in a minimum of three peer-reviewed journal papers and a dissertation. All students will receive a core training in empirical, computational, and theoretical methods for (1) describing and understanding complex systems thereby enabling them to, where possible, (2) predict, control, manage, and create such systems. Coursework will share a common core with the allied program Masters in Complex Systems and Data Science which include: (a) data acquisition, storage, manipulation, and curation; visualization techniques including state-of-the-art approaches to building high quality web-based applications; (b) finding complex patterns and correlations through, for example, machine learning; and (c) powerful ways of hypothesizing, searching for, and extracting explanatory, mechanistic stories underlying complex systems—not just how to use black box techniques.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy
A Bachelor’s degree and preferably a Master’s degree in a relevant field and prior coursework in computer programming, calculus, linear algebra, probability, and statistics. Training in relevant aspects of physics (e.g., statistical mechanics) will be beneficial but not required. Applicants lacking one or more of these prerequisite areas may be accepted provisionally and will be required to complete an approved program of supplementary work within their first year of study. GRE scores are not required. Applicants will be evaluated based on their potential for excellence in research, as judged from their academic background, test scores, relevant experience and letters of recommendation. Students who are most likely to succeed and thrive in the program will be admitted.

Applicants whose native language is not English or whose formal education has been conducted in a language other than English must have a Test of English as a Second Language (TOEFL) score of 90 (Internet-based test) or above or an International English Language Testing System (IELTS) score of 6.5 or above. To be considered for financial assistantship from the university, applicants must have an iBT TOEFL score of 100 or an IELTS score of 7.0 or above.

The student’s Studies Committee (see below) may recommend to the Dean of the Graduate College that a student be dismissed from the program if they receive two or more grades below a B (3.00), a designation of U in Dissertation Research, or if the Studies Committee deems that they are not making satisfactory progress towards their degree requirements (for which they must be able to provide sufficient documentation).

MINIMUM DEGREE REQUIREMENTS
Minimum Degree Requirements
The PhD will have five milestones:

• Completion of coursework
• The comprehensive exams
• The dissertation proposal
• At least two published or accepted peer-reviewed publications prior to defending their dissertation, with a third at least in peer-review. These publications must be deemed of sufficient breadth, depth, and quality by their Graduate Studies Committee
• The written dissertation and oral defense of the dissertation

COURSEWORK:
A minimum of 75 credits of graduate study must be approved by the students graduate studies committee and successfully completed. All students must take a minimum of 30 credits of research and 30 credits of graduate coursework, of which at least 15 must be graded and may not count towards a Master’s degree (only courses with grades of B- or above are counted towards this minimum requirement and students with two grades below B are eligible for dismissal). Students may transfer credits for other universities or within UVM following standard UVM policies. Students will need to earn a minimum 3.0 GPA to graduate.

CORE COURSES (3 CREDITS EACH):

<table>
<thead>
<tr>
<th>Course</th>

Other advanced complex systems and data science electives approved by the PhD in Complex Systems and Data Science Curriculum Committee (including special topics)

Students who do not make satisfactory progress toward their PhD dissertation will be offered the opportunity to switch to the MS program, provided they meet the standards for the MS.

Elective Tracks for the PhD in CSDS match those provided for the MS in CSDS:
- CSDS: Energy Systems
- CSDS: Policy Systems
- CSDS: Biomedical Systems
- CSDS: Evolutionary Robotics
- CSDS: Environmental Systems
- CSDS: Transportation Systems
- CSDS: Distributed Systems Track
- CSDS: Self-designed named disciplinary track (requires approval of the CSDS curriculum committee)

**CONCENTRATION TRACK ELECTIVES:**
Track Electives are considered relatively flexible and may be updated on a semester by semester basis, based on current course offerings and content and availability and may include special topics. See the Center’s website for current offerings. Track electives applied toward the MS in CSDS must be approved by the CSDS graduate coordinator.

**Comprehensive Examination**
Students will be tested via an extensive oral examination involving three faculty, one of whom should be their advisor. Material will cover the four core courses and/or curriculum committee approved content.

**Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy**
Successful completion of the comprehensive exam and all required coursework.

**COMPUTER SCIENCE**
http://www.uvm.edu/~cems/cs/

**OVERVIEW**
The Department of Computer Science offers three graduate programs through the Graduate College: an Accelerated Master’s Program (AMP) that enables strong undergraduate students to complete computer science Bachelor’s and Master’s degrees in 5 years; a Master’s Program (M.S.) in computer science with course work-only, project, and thesis options; and an interdisciplinary Ph.D. program that offers study in both traditional and cross-disciplinary areas of computing. The Department also participates in the Transdisciplinary Certificate of Graduate Study in Complex Systems, and the Master’s and Ph.D. degrees in Complex Systems & Data Science.

**DEGREES**
- Computer Science AMP (p. 137)
- Computer Science M.S. (p. 138)
- Computer Science Ph.D. (p. 139)
FACULTY

Bagrow, James; Assistant Professor, Department of Mathematics and Statistics; PHD, Clarkson University

Beckage, Brian; Professor, Department of Plant Biology; PHD, Duke University

Bongard, Joshua C.; Professor, Department of Computer Science; PHD, University of Zurich

Cheney, Nicholas A.; Research Assistant Professor, Department of Computer Science; PHD, Cornell University

Clemins, Patrick J.; Assistant Professor, Department of Computer Science; PHD, Marquette University

Danforth, Chris; Associate Professor, Department of Mathematics and Statistics; PHD, University of Maryland College Park

Darais, David; Assistant Professor, Department of Computer Science; PHD, University of Maryland

Dinitz, Jeffrey Howard; Professor, Department of Mathematics and Statistics; PHD, Ohio State University

Dodds, Peter Sheridan; Professor, Department of Mathematics and Statistics; PHD, Massachusetts Institute of Technology

Eppstein, Margaret Jean; Professor Emerita, Department of Computer Science; PHD, University of Vermont

Hébert-Dufresne, Laurent; Assistant Professor, Department of Computer Science; PHD, Université Laval, Québec, Canada

Hines, Paul D.; Associate Professor, Department of Electrical and Biomedical Engineering; PHD, Carnegie Mellon University

Lee, Byung S.; Professor, Department of Computer Science; PHD, Stanford University

Li, Dawei; Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, Shanghai Jiao Tong University

Ling, Alan Chi; Associate Professor, Department of Computer Science; PHD, University of Waterloo

Near, Joseph P.; Assistant Professor, Department of Computer Science; PHD, Massachusetts Institute of Technology

Pinder, George Francis; Professor, Department of Civil and Environmental Engineering; PHD, University of Illinois Urbana-Champaign

Radermacher, Michael; Professor, Department of Molecular Physiology and Biophysics; PHD, Technical University of Munich

Rizzo, Donna Marie; Professor, Department of Civil and Environmental Engineering; PHD, University of Vermont

Skalka, Christian Edward; Associate Professor, Department of Computer Science; PHD, Johns Hopkins University

Yu, Jun; Professor, Department of Mathematics and Statistics; PHD, University of Washington Seattle

Zia, Asim; Professor, Department of Community Development and Applied Economics; PHD, Georgia Institute of Technology

COMPUTER SCIENCE AMP

All students must meet the Requirements for the Accelerated Master's Degree Programs (p. 264)

OVERVIEW

The Accelerated Master’s Program (AMP) in computer science allows students with strong ability and motivation to complete a bachelor’s degree at UVM and a master’s degree at UVM in computer science within five years.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science for Accelerated Master’s Students

Students enrolled in any undergraduate bachelor’s degree program at UVM are eligible to apply for the computer science AMP. Following formal admission by the Graduate College to the Accelerated Master’s Program, students may count up to six graduate-level credits toward both the bachelor’s and master’s degrees. Beyond the six double-counted credits, an additional graduate-level course (up to 3 credits) taken prior to award of the bachelor’s degree may be counted toward the master’s degree, provided the course does not also count toward the bachelor’s degree.

Although the bachelor’s degree need not be in computer science, applicants must have at least a 3.2 GPA and demonstrate that they have taken the following prerequisite courses, or have equivalent knowledge:

<table>
<thead>
<tr>
<th>Two courses that treat systematic program development in a high-level language, for example:</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 021</td>
</tr>
<tr>
<td>CS 110</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>One course in computer system organization, for example:</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 121</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>One course in data structures, for example:</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 124</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>One course in computability and complexity, for example:</th>
</tr>
</thead>
<tbody>
<tr>
<td>CS 125</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Two courses in differential and integral calculus, for example:</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 021</td>
</tr>
<tr>
<td>MATH 022</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>One course in linear algebra:</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 122</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Coursework in probability and statistics, for example:</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 143</td>
</tr>
<tr>
<td>STAT 151</td>
</tr>
</tbody>
</table>

Undergraduates interested in the AMP should discuss this option with the College of Engineering & Mathematical Sciences Graduate Coordinator prior to any semester in which they wish to take courses that will apply to the master’s degree.

There is no GRE requirement for AMP students.
**Minimum Degree Requirements**

<table>
<thead>
<tr>
<th>Option A (Thesis)</th>
<th>30</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thirty credits, including a minimum of twenty-one credits of approved course work, and a minimum of six credits of thesis research (CS 391)</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Option B (Project)</th>
<th>30</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thirty credits, including a minimum of twenty-four credits of approved course work, and a minimum of three credits of project research (CS 392)</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Option C (Non-Thesis)</th>
<th>30</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thirty credits of approved course work</td>
<td></td>
</tr>
</tbody>
</table>

**All Options**

Students in all options must take, or have completed the equivalent of, CS 224 Algorithm Design & Analysis (students who took CS 224 at UVM for undergraduate credit with a grade of B+ or higher may substitute this core course with an appropriate alternative course) and 3 other core Computer Science Courses, to be determined in consultation with and approval of the student’s graduate advisor and the CS graduate coordinator, depending on a student's background and interests.

Pass comprehensive exams covering material from the 4 approved core courses.

Fulfill the credit requirement with approved graduate-level course work in computer science or related areas. (Only courses with grades of B- or above are counted towards course work requirements and students with two grades below B are eligible for dismissal.)

**Comprehensive Examination**

Taking a core course at UVM for graduate credit and receiving a grade of B+ or better constitutes successfully completing the comprehensive examination in that area.

Students who receive a grade of B or lower in a core course, or students who took CS 224 at UVM (whether for undergraduate or graduate credit) and received a grade of B or lower, must pass an oral comprehensive exam in that area. In this event, the Graduate Coordinator will form an exam committee for the oral exam(s). Each student who needs to take one or more comprehensive oral exam(s) should arrange a single date for all required oral exam(s) with the examiner(s) and then inform the Graduate Coordinator of the exam date. It is strongly recommended that the examination is completed during the academic year, unless all examiners voluntarily agree to give the exam on a date during the break.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**

Passing of the comprehensive exam.

**COMPUTER SCIENCE M.S.**

All students must meet the Requirements for the Master's Degree (p. 265)

**OVERVIEW**

The M.S. program in Computer Science offers thesis, project, and course work only options. Acceptance into thesis or project options is conditional upon the student finding an eligible advisor who agrees to supervise the thesis or project. Please see the Department of Computer Science website for current research interests of the department’s faculty.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Science**

A bachelor’s degree in computer science or a related discipline, and satisfactory scores on the Graduate Record Examination general (aptitude) section are required for admission. Students should also demonstrate that they have taken the following courses or have equivalent knowledge:

- Two courses that treat systematic program development in a high-level language, for example:
  - CS 021 QR: Computer Programming I 3
  - CS 110 QR: Intermediate Programming 4

- One course in computer system organization, for example:
  - CS 121 QR: Computer Organization 3

- One course in data structures, for example:
  - CS 124 QR: Data Struc & Algorithms 3

- One course in computability and complexity, for example:
  - CS 125 QR: Computability& Complexity 3

- Two courses in differential and integral calculus, for example:
  - MATH 021 QR: Calculus I 4
  - MATH 022 QR: Calculus II 4

- One course in linear algebra:
  - MATH 122 QR: Applied Linear Algebra 3

- Coursework in probability and statistics, for example:
  - STAT 143 QR: Statistics for Engineering 3
  - STAT 151 QR: Applied Probability 3

Applicants who have strong academic records but lack one or more of these prerequisites may be accepted provisionally. Provisionally accepted students will be required to complete an approved program of remedial work within their first year of study.

Applicants whose native language is not English or whose formal education has been conducted in a language other than English must have a Test of English as a Second Language (TOEFL) score of 90 (Internet-based test) or above or an International English Language Testing System (IELTS) score of 6.5 or above. To be considered for financial assistantship from the university, applicants...
must have an iBT TOEFL score of 100 or an IELTS score of 7.0 or above.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**

Passing of the comprehensive examination.

**COMPUTER SCIENCE PH.D.**

All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

**OVERVIEW**

The interdisciplinary Ph.D. program in computer science offers study in both traditional and cross-disciplinary areas in computing. Please see the departmental website for current research interests of the department’s faculty.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy**

A Bachelor’s degree and satisfactory scores on the Graduate Record Examination (GRE) general section are required of all applicants. Applicants will be evaluated based on their potential for excellence in research, as judged from their academic background, test scores, relevant experience and letters of recommendation. We admit students who we believe are most likely to succeed and thrive in the program.

No students are admitted unless a computer science graduate advisor has agreed to supervise them; thus, all applicants are strongly encouraged to contact potential advisors as soon as they have applied. All eligible graduate advisors are listed on the departmental website, along with their research areas and links to their websites.

Applicants who have strong academic records in a discipline other than computer science and lack an acceptable computer science background (normally including courses in Data Structures (e.g., CS 124), Computer Organization (e.g., CS 121), and Intro to Computability and Complexity (e.g., CS 125)) may be accepted provisionally. Provisionally accepted students will be required to complete an approved program of remedial work within their first year of study.

Applicants whose native language is not English or whose formal education has been conducted in a language other than English must have a Test of English as a Second Language (TOEFL) score of 90 (Internet-based test) or above or an International English Language Testing System (IELTS) score of 6.5 or above. To be considered for financial assistantship from the university, applicants must have an iBT TOEFL score of 100 or an IELTS score of 7.0 or above.

**Minimum Requirements for the Degree of Doctor of Philosophy**

A minimum of seventy-five credits of graduate study must be approved by the graduate studies committee and successfully completed. All students must take a minimum of thirty credits of research and thirty credits of course work, of which at least fifteen must be graded and may not count towards a master’s degree (only courses with grades of B- or above are counted towards this minimum requirement and students with two grades below B are eligible for dismissal).

A student’s doctoral program consists of:

- gaining a sound breadth of knowledge in computer science, primarily through course work
• gaining appropriate depth in a specific research area and posing an appropriate original research problem
• completing the research and documenting that research in a dissertation

Three hurdles mark the completion of these stages:

• the comprehensive exam demonstrates breadth of knowledge in computer science
• the dissertation proposal describes the current state-of-the-art in a particular research area and the particular research problem the student proposes to tackle
• the written dissertation and oral defense document the original research

Beyond research and course work, the student must gain appropriate experience, to the satisfaction of their graduate studies committee, in teaching, programming, and communicating technical ideas, both orally and in writing. The student must have at least two peer-reviewed publications accepted prior to defending their dissertation.

**Comprehensive Examination**

All students enrolled in the UVM CS Ph.D. program must pass the Ph.D. comprehensive exams, regardless of whether they received their M.S. degree at UVM. The Ph.D. comprehensive exams comprises a written component and an oral component. The written exam is given in the area of Algorithms. In the case that the student’s performance is not satisfactory in this written exam, an optional follow-up oral exam may be called for by examiners. The examiners are Computer Science graduate faculty members appointed by the Graduate Coordinator. The oral exam is a single-session exam, and aims to examine a student’s breadth of knowledge in selected topical areas. The topical areas and examiners on this oral exam committee will be determined by each student’s Studies Committee, with approval by the Graduate Coordinator. The specific policy on the oral examination procedure is administered by the Graduate Coordinator.

On the first try, the examination committee will award students one of the following three outcomes to the exam:

1. Pass at the Ph.D. level
2. Pass at the M.S. level with opportunity for at most one retake (to try for a Ph.D. level pass)
3. Fail with opportunity for at most one retake

If a student retakes the comprehensive exam, the examination committee will award students one of the following three outcomes to the retake:

1. Pass at the Ph.D. level
2. Pass at the M.S. level without further opportunity to retake at the Ph.D. level
3. Fail without opportunity for retake at the Ph.D. level

Ph.D. students who pass their Ph.D. comprehensive exams at the M.S. level but not at the Ph.D. level may, if desired, complete any remaining requirements to complete an M.S., but are not allowed to advance to candidacy for the Ph.D.

Written comprehensive exams are given by the Graduate Committee twice a year, in May and January. Each student’s Studies Committee will approve an appropriate timeframe of oral exams for a given student based on their individual circumstances. It is then up to the student to schedule their exams within the agreed-upon timeframe. While individual circumstances may vary, normal expectations are as follows:

- Ph.D. students are normally expected to take oral exams by the end of their second year of full-time Ph.D. graduate study (part-time students may take longer).
- A student who needs to retake their oral exams is expected to do so within 6 months of their first attempt.

**Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy**

Before advancing to candidacy, the student must:

- Demonstrate satisfactory performance in a schedule of courses of at least fifteen credits of graduate course work at UVM, as approved by the student’s graduate studies committee
- Pass a comprehensive exam in areas approved by the student’s graduate studies committee, including a written component
- Successfully propose a dissertation topic in a public presentation
- Pass an oral exam before the student’s graduate studies committee in a closed session following the dissertation proposal

**COUNSELING**

https://www.uvm.edu/cess/dlds/counseling

**OVERVIEW**

The mission of the Counseling Program at the University of Vermont is to prepare students to work as counseling professionals in culturally and socially diverse school, mental health, and community settings and to act as facilitators of personal and social change.

In the Counseling Program, students have the option to enroll in a 60-credit-hour School Counseling track, a 60-credit-hour Mental Health Counseling track, or a Dual Track option consisting of 79 credits. Program requirements include 600-1000 hours of practicum and internship in a field setting.

The Clinical Mental Health and School Counseling tracks of the UVM Counseling Program are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP), the national accrediting body for counselor education programs.

The specific composition of a student's program, designed with the assistance of a faculty advisor, is based on university, college, and program requirements in accordance with licensure and accreditation standards. Learning experiences consist of a balance between theory and supervised practice.
In addition to the general application procedures, a resume and a group interview are required of each qualified applicant. For a more detailed description of the program visit the Graduate Counseling website, or contact:

University of Vermont
Graduate Counseling Program

DEGREES
- Counseling AMP (p. 141)
- Counseling M.S. (p. 142)

FACULTY
Geroski, Anne M.; Associate Professor; Department of Leadership and Developmental Sciences; EDD, University of Maine
Okech, Jane E.; Professor; Department of Leadership and Developmental Sciences; PHD, Idaho State University
Smith, Lance C.; Associate Professor; Department of Leadership and Developmental Sciences; PHD, Syracuse University
Welkowitz, Julie A.; Lecturer; Department of Leadership and Developmental Sciences; PHD, University of Vermont

COUNSELING AMP
All students must meet the Requirements for the Accelerated Master's Degree Programs (p. 264)

OVERVIEW
The Counseling AMP is offered for the School Counseling Track only. This accelerated master’s degree program (AMP) is designed to offer select UVM undergraduates from multiple disciplines the opportunity to obtain their bachelor’s degree while beginning their Master’s degree in Counseling, School Counseling track, during their senior year. The mission of the Counseling Program at the University of Vermont is to prepare students to work as counseling professionals in culturally and socially diverse school settings and to act as facilitators of personal and social change. The Counseling degree, School Counseling track, is a 60 credit hour program, including a 700-hours of practicum and internship in a school setting. Following admission to the Graduate College, students enrolled in the AMP can take up to six credits of graduate-level courses completed during their senior undergraduate year which will count towards both a bachelor’s degree and the Master’s degree. An additional three credits of graduate level coursework taken during their senior year can be applied towards the Master’s degree provided that these three credits are not used to fulfill undergraduate degree requirements. Students in the AMP would then be expected to complete remaining Master’s degree requirements during a fifth and sixth year of study. Full-time graduate student status will start the fall after their undergraduate graduation and will be expected to be maintained until completion of their Master’s degree.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Science
Students must apply for admission into the accelerated Master’s in counseling program in the beginning of spring semester their junior year. Admission into AMP program will be determined, based upon the following:

- A minimum cumulative grade point average of 3.25
- Completion of the Graduate College Application form that must include at least two letters of recommendation from UVM faculty members.

Students MUST be admitted through the Graduate College before taking any courses that will be applied to the master’s degree requirements. Students will start AMP degree coursework during fall of their senior year. While not required for admission, applicants are strongly encouraged to take EDCO 101 The Helping Relationship during the spring of their junior year.

Minimum Degree Requirements for the Degree of Master of Science
A minimum of 60 credit hours for the School Counseling track is required. Students must also meet the UVM Graduate College requirements for the Master's Degree (p. 265).

ACCELERATED MASTERS PROGRAM COURSES
The 6-9 credits of course work for the AMP that will be taken during the student’s undergraduate senior year should be selected from the following list:

<table>
<thead>
<tr>

Comprehensive Examination
All students are required to successfully complete a comprehensive evaluation at the end of their studies in the UVM Counseling Program. The Level I Licensure Portfolio serves as the comprehensive evaluative tool for students in the School Counseling Track.

Requirements for Advancement to Candidacy for the Degree of Master of Science
At least 15 graded graduate credits with a 3.00 GPA or better, including all core courses.

COUNSELING M.S.
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
There are two tracks of study in the Graduate Counseling Program: the school counseling track (60 credits) and the mental health track (60 credits). Students may elect to enroll in both tracks - the Dual option, which is 79 credits. The Graduate Counseling Program (both tracks) is accredited by the Council for the Accreditation of Counseling and Related Educational Programs (CACREP). The school counseling track meets the requirements set by the State of Vermont Department of Education for preparing school counselors (K-12) for licensure in Vermont, and the mental health counseling track meets the academic requirements set by the Vermont Board of Allied Mental Health Practitioners for preparing clinical mental health counselors for licensure in Vermont.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Science
Submit the following (below) to the University of Vermont Graduate Admissions Office. Please be advised that the UVM Graduate College uses an on-line admissions process. Applications received by February 1 will be considered for the following Fall matriculation.

- Graduate Application Form: Available on-line from the Graduate College
- Statement of Purpose: The Statement of Purpose will be reviewed for clarity of expression, grammatical construction, and insight regarding the applicant’s reasons for pursuing study in the Counseling Program.
- Three Letters of Recommendation: Letters written by individuals who have a professional relationship with the applicant and who are well acquainted with the applicant’s accomplishments and potential for becoming an effective counselor are considered valid letters of recommendation. At least one of these letters should be from an academic advisor or instructor. Please do not include letters written by personal friends or acquaintances.
- Official College Transcripts: An official college transcript of course work (undergraduate and graduate) should be submitted from every college and/or university attended.
- Professional Resume: An up-to-date resume that attests to the applicant’s education, work, and volunteer experience should be included in the application packet. Work experience in counseling or in a related field is highly desired.
- Test of English as a Foreign Language (TOEFL): Applicants whose native or first language is not English must submit TOEFL (or IELTS) test scores for admission. Minimum acceptable scores for admission may be found on the Graduate College Admissions website.

After an initial review of applications, qualified applicants will be invited to participate in a group interview on the UVM campus. One or more faculty members and a graduate student currently enrolled in the program conduct the group interview. The applicant will be interviewed with a small group of others who are also applying to the Counseling Program. The group interview is critical in the application process. Faculty will be looking for evidence of candidates’ self-awareness, awareness of social and cultural issues, ability to communicate with others, and interest and commitment to the profession of counseling. The interview will also offer candidates an opportunity to receive information about the Counseling Program at UVM and meet other students applying to the program.

In extenuating circumstances, an applicant may be given permission to participate in a Skype interview. Arrangements will be made for these alternatives on an individual basis after full faculty consultation.

Admissions Prerequisites: Applicants seeking admissions to the School Track and wishing to be licensed in Vermont as a school counselor should have documentation of at least 30 credit hours in an Arts and Sciences undergraduate major (e.g., English, Mathematics, Psychology). This is a State of Vermont requirement for licensure to practice counseling in public schools in Vermont. For more information about this requirement or how a specific transcript may document this requirement, students should speak directly with the director of CESS Student Services, UVM (802-656-3468) prior to applying to the program.

Minimum Degree Requirements
The Graduate Counseling Program offers two specialty tracks: school counseling and mental health counseling. Students may also select the dual option which includes preparation in both specialty tracks. Sixty credits are required for completion of the school counseling track,
sixty credits are required for the mental health counseling track and seventy-nine credits are required for the dual option. (Note: school counselor licensure in Vermont requires that the individual have at least a thirty-credit-hour liberal arts concentration at the undergraduate-level.) Successful completion of the program is based on the demonstration of appropriate knowledge, relevant skills, and personal characteristics, as well as the accumulation of credits.

Comprehensive Examination
The comprehensive exam for the Graduate Counseling program consists of the oral defense examination for the clinical mental health track and the Vermont Level I Licensure Portfolio for the school counseling track. They must be taken and turned in by the end of the student’s last semester in the program.

The oral examination is designed to be a final assessment of a student’s knowledge of fundamental elements of clinical mental health practice. The exam process requires a written submission as well as a digital video recording of a clinical session. A standard format for the oral exam is adhered to by the orals committee and communicated in advance to the students in oral and written format.

The Vermont Level I Licensure Portfolio required by the Vermont Agency of Education is designed to be a comprehensive assessment of a student’s knowledge and engagement in School Counseling practice. A standard format for the portfolio is adhered to by the portfolio reviewers and communicated in advance to the student in oral and written format.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Successful completion of any prerequisite courses, and at least 15 graded graduate credits with a 3.00 GPA or better, including all core courses.

CURRICULUM AND INSTRUCTION
https://www.uvm.edu/cess/doe

OVERVIEW
There are three different types of Graduate Programs for Curriculum and Instruction:

Curriculum and Instruction, MAT:
The Master of Arts in Teaching program for middle level and secondary teachers is designed for those students who aspire to earn both a Master’s Degree and a license to teach in public middle or secondary schools. Students will prepare for licensure to teach in grades five through nine or seven through twelve in one summer and academic year.

Curriculum and Instruction, MEd:
The Master’s Degree in Curriculum and Instruction is designed to advance curriculum design for innovative educators with attention to research methods to advance practice. Additional emphasis is placed on advancing understanding of curriculum theory and practice, collaboration across school and community contexts, and responsive design to ensure optimal development of the whole child.

Curriculum and Instruction, Accelerated Masters Program (AMP):
The Accelerated Master’s Program leading to an M.A. in Teaching for middle level and secondary is designed for those students who aspire to earn both a master’s degree and a license to teach in public middle or secondary schools. Students will prepare for licensure to teach in grades five through nine or seven through twelve in one summer and academic year.

UVM students who are in their third year of study for a Bachelor’s degree may apply to the Accelerated Master of Arts in Teaching program. These students, when accepted, may complete nine credits of graduate level coursework, six of which may be counted toward both the minimum requirements for the Master of Arts degree, as well as toward the undergraduate degree. Qualified candidates will need a major or its equivalent in an approved licensing endorsement

DEGREES
- Curriculum and Instruction M.A.T. AMP (p. 144)
- Curriculum and Instruction M.A.T. (p. 146)
- Curriculum and Instruction M.Ed. (p. 147)

FACULTY
Bishop, Penny; Professor, Department of Education; EDD, University of Vermont
Carthew, Jessica; Assistant Professor, Department of Education; PHD, University of Maryland
Garnett, Bernice Raveche; Associate Professor, Department of Education; SCD, Harvard University
Haines, Shana; Assistant Professor, Department of Education; PHD, University of Kansas
Jiron, Haley Woodside; Associate Professor, Department of Education; PHD, SUNY Albany
Jorgenson, Simon; Assistant Professor, Department of Education; PHD, University of Cincinnati
Kervick, Colby T.; Assistant Professor, Department of Education; EDD, University of Vermont
Neumann, Maureen Doyle; Professor, Department of Education; PHD, University of Washington
Reyes, Cynthia; Associate Professor, Department of Education; PHD, University of Illinois at Chicago
Shepherd, Katharine; Professor, Department of Education; EDD, University of Vermont
Smith, Carmen Petrick; Assistant Professor, Department of Education; PHD, University of Texas-Austin
Tinkler, Alan S.; Associate Professor, Department of Education; PHD, University of Denver
Tinkler, Barri E.; Associate Professor, Department of Education; PHD, University of Denver
Toolin, Regina; Associate Professor, Department of Education; PHD, University of Wisconsin-Madison
Walls, Leon; Associate Professor, Department of Education; PHD, Purdue University

CURRICULUM AND INSTRUCTION
M.A.T. AMP
All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)
OVERVIEW

The Accelerated Master’s Program leading to an M.A. in Teaching for middle level and secondary is designed for those students who aspire to earn both a master’s degree and a license to teach in public middle or secondary schools. Students will prepare for licensure to teach in grades five through nine or seven through twelve in one summer and academic year.

UVM students who are in their third year of study for a Bachelor’s degree may apply to the Accelerated Master of Arts in Teaching Program. Following acceptance by the Graduate College, these students may complete nine credits of graduate-level course work, six of which may be counted toward both the minimum requirements for the Master of Arts degree as well as toward the undergraduate degree. Qualified candidates will need a major or its equivalent in an approved licensing area.

Requests for further information and application instructions may be obtained by contacting the Middle Level or Secondary Education Program; 411 Waterman Building, (802) 656-1411.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Arts in Teaching

All applicants to the Accelerated Master’s Program in Curriculum and Instruction must meet the following entrance criteria:

For Middle Level Education, a minor or its equivalent in one of the following areas:

- English, Science, Social Studies or Mathematics.

For Secondary Education, a major or its equivalent in a state-approved licensing area:

- Sciences: Earth Science, Biology, Chemistry, Physics
- Social Studies: Geography, History, Political Science, Economics
- English, Mathematics, French, German, Latin or Spanish

For both Middle Level and Secondary Education:

- A minimum overall grade point average of 3.00 in undergraduate course work as well as a 3.00 in the State-approved licensing area (major)
- A demonstrated commitment to working with young people

Minimum Degree Requirements

AMP students may use up to six (6) credits of graduate level courses taken at UVM toward both the bachelor’s and master’s degrees. Some programs specify the courses that must be taken; for other programs it is determined individually. In all cases, students must be admitted by the Graduate College before taking any courses that will apply to the master’s degree, i.e., all courses used for the master’s degree must be taken after formal admission to the AMP program.

The Master of Arts in Teaching program has two tracks: Middle level and Secondary level.

Degree requirements for a Master of Arts in Teaching in Secondary Education are as follows:

Students enrolled in the M.A.T. in Secondary Education are required to complete a 31-credit program in education course work that will prepare them to teach in grades 7-12. In addition, some students may be required to complete additional content related course work to fulfill content requirements for licensure.

For both tracks, the comprehensive examination is the satisfactory completion of the Vermont Licensure Portfolio.

Requirements for Advancement to Candidacy for the Degree of Master of Arts in Teaching
Successful completion of any prerequisite courses, and at least 15 graded graduate credits with a 3.00 or better, including all core courses.

CURRICULUM AND INSTRUCTION
M.A.T.
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
The Master of Arts in Teaching program for middle level and secondary teachers is designed for those students who aspire to earn both a master's degree and a license to teach in public middle or secondary schools. The program welcomes students from all colleges, and universities who have completed at least an undergraduate degree (BS and BA) in arts and sciences, agriculture or natural resources, who have completed majors in English, social sciences (history, political science, economics or geography), science, mathematics and/or foreign languages (French, Spanish, Latin and Greek). Students will prepare for licensure to teach in grades five through nine for the middle level program or seven through twelve for the secondary program in one or two summers and one academic year.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Arts in Teaching
All applicants to the Secondary Education Licensure Masters Preparation Program must meet the following entrance criteria:

- A major or its equivalent in a State-approved licensing area (see below).
- A minimum overall grade point average of 3.0 in undergraduate coursework as well as 3.0 in the State-approved licensing area (major).
- A demonstrated commitment to working with young people.

State-Approved Licensing Areas:

Sciences: Biological Science, Chemistry, Earth Science, Physics
Social Studies: Geography, History, Political Science, Economics
English
Mathematics
Languages: French, German, Latin, Spanish

Requests for further information and application instructions may be obtained by contacting the Middle Level or Secondary Education coordinator, 405A Waterman Building, (802) 656-1411.

Minimum Degree Requirements
The Master of Arts in Teaching program has two tracks: Middle level and Secondary level.

Degree requirements for a Master of Arts in Teaching in Secondary Education are as follows:

Students enrolled in the M.A.T. in Secondary Education are required to complete a 31-credit program in education course work and an internship that will prepare them to teach in grades 7-12. In addition, some students may be required to complete additional content related course work to fulfill content requirements for State of Vermont licensure.

Total Program Credit Requirements: 31
In addition, MAT students will take 2 required teaching exams for licensure: Praxis Core and Praxis II Content Exams and successfully complete the Vermont Licensure Portfolio.

Degree requirements for a Master of Arts in Teaching in Middle Level Education are as follows:

Students enrolled in the M.A.T. in Middle Level Teacher Education are required to complete a 30-credit program in education course work with an additional subject methods course to prepare them to teach math, English/Language Arts, Social Studies or Science in grades 5-9. Students seeking more than one content area endorsement will be required to complete additional methods courses.

Content Methods Course(s) 3-6

Total Program Credit Requirements 33

Comprehensive Examination
Both the Middle Level and Secondary Education Comprehensive Examinations include satisfactory completion of the Vermont Licensure Portfolio.

Requirements for Advancement to Candidacy for the Degree of Master of Arts in Teaching
Successful completion of any prerequisite courses, and at least 15 graded graduate credits with a 3.00 or better, including all core courses.

CURRICULUM AND INSTRUCTION M.ED.

All students must meet the Requirements for the Master of Education Degree (p. 266)

OVERVIEW
The Master’s Degree in Curriculum and Instruction is designed to advance curriculum design for innovative educators with attention to research methods to advance practice. Additional emphasis is placed on advancing understanding of curriculum theory and practice, collaboration across school and community contexts, and responsive design to ensure optimal development of the whole child.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Education
To be considered, applicants must submit one of the following:

- GRE General
- Passing VT Praxis II or Equivalent Teacher Examination scores from another state

Applicants must also submit the following:

- Statement of purpose
- Three formal letters of recommendation (in addition to the online letter of recommendation coversheet)
- Official transcripts from all institutions attended
- Resume
- Any other items required by the Graduate College

Minimum Degree Requirements
Ten (3-credit) courses are required. Those courses must include: one research course to advance practice, one curriculum theory course, one course that advances understanding across school and community contexts, one course that supports responsive design to ensure optimal development of the whole child, and six courses within a specialization; all at the graduate level or with graduate college approval.

Specialization areas include: Educational Technology; Library Media; Reading and Literacy; Curriculum Leadership; Inclusive Educational Practices; Middle Level Education; Multicultural and Global Studies; and Individually Designed.

Comprehensive Examination
Students will develop an e-portfolio to highlight their learning and work from the ten courses they took as part of their M.Ed. coursework.

Requirements for Advancement to Candidacy for the Degree of Master of Education
The requirements for advancement to candidacy for the Curriculum and Instruction M.Ed. focus includes:

1. The completion of ten courses that include: one research course to advance practice, one curriculum theory course, one course that advances understanding across school and community contexts, one course that supports responsive design to ensure optimal development of the whole child, and six courses within a specialization; all at the graduate level or with graduate college approval.
2. The satisfactory completion of the e-portfolio (Written Comprehensive Examination).
3. Successful presentation of the e-portfolio (Oral Comprehensive Examination).
DIETETICS
http://www.uvm.edu/nfs/

OVERVIEW
The Master of Science in Dietetics (MSD) Program, housed in the Department of Nutrition and Food Sciences under the College of Agriculture and Life Sciences at the University of Vermont, is a 30-hour graduate credit degree that includes didactic coursework, an evidence-based practice project, and supervised practice experience culminating in student eligibility to write the exam for Registered Dietitian Nutritionist.

The mission of the MSD is to prepare and educate graduate students who will successfully function as entry-level Registered Dietitian Nutritionist with specialized knowledge of and ability to apply the principles of sustainable food systems across all professional practice settings. Students will also develop competence in research methodology. Students will take graduate level courses throughout the University of Vermont as well as advanced nutrition courses offered in the Department of Nutrition and Food Sciences. For more information about the program, please visit the Dietetics website.

The Master of Science in Dietetics is accredited by:
Accreditation Council for Education and Dietetics (ACEND)
120 South Riverside Plaza, Suite 2190
Chicago, IL 60606-6995
800-877-1600, extension 5400

More information about ACEND and the Academy of Nutrition and Dietetics is available at their websites.

Following completion of the supervised practice experience and all requirements for the MSD, students will be issued a verification statement of completion of the program and will be eligible to write the exam for Registered Dietitian Nutritionists.

SPECIFIC REQUIREMENTS
Requirements for Admission for the Degree of Master of Science in Dietetics
Minimum GPA of 3.00 in college-level courses with an overall science GPA of 2.50 in required courses with no required science grade less than 2.00. Satisfactory scores on the Graduate Record Exam. The application deadline is mid-February. For a specific date, as well as prerequisite admission requirements, please visit the Dietetics webpage.

DIDACTIC CURRICULUM
The M.S.D. Program is designed for students who have completed a Didactic Program in Dietetics and have obtained a verification statement from an accredited program (these students would also be eligible to apply for any dietetic internship). Other students without a verification statement may apply following completion of prerequisite coursework.

Minimum Degree Requirements for the Degree of Master of Science in Dietetics
Satisfactory completion of thirty credits of graduate-level courses including research methods, statistics, evidence-based research project design, ethics, and dietetics practice in addition to all supervised practice requirements. This includes the following NFS courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>NFS 310</td>
<td>MSD Journal Club</td>
<td>1</td>
</tr>
<tr>

<td>4</td>
</tr>
<tr>
<td>NFS 312</td>
<td>Supervised Practice II</td>
<td>4</td>
</tr>
<tr>
<td>NFS 392</td>
<td>Evidence-based Practice Prjct</td>
<td>2</td>
</tr>
</tbody>
</table>

148
Other required courses include graduate college approved courses in Statistics, Ethics and Healthcare Policy.

SUPERVISED PRACTICE EXPERIENCES
The supervised practice portion of the curriculum is integrated with graduate course work. During the two semesters of supervised practice experience, NFS 311 Dietetics Practice I and NFS 312 Dietetics Practice II are coordinated so that class time is 5-6 hours per week on Monday, and the reminder of the week (Tuesday – Friday) is spent in supervised practice settings (for a total of at least 32 hours/week).

Between NFS 311 and NFS 312 (at least 150 hours) and the supervised practice (1216 hours) the M.S.D. Program exceeds the 1200-hour requirement established by the Accreditation Council for Education in Nutrition and Dietetics (ACEND).

The program also includes approximately 40 hours of orientation to the M.S.D. Program and supervised practice experience. All students will complete 15 weeks in clinical rotations, seven weeks in foodservice management rotations, and 15 weeks in community rotations, including three weeks in a school nutrition program. After completing all rotations, students will select a rotation of their choice for further skill and knowledge development (staff relief). The staff relief rotation must be a minimum of two weeks but it can be longer if a student desires and the preceptor agrees.

COMMUNITY HEALTH AND NUTRITION CONCENTRATION
The M.S.D. Program will prepare entry-level dietetics practitioners with a concentration in community health and nutrition. The program concentration will prepare students to incorporate, promote and support the principles of sustainable food systems across all areas of professional practice. The sustainable food system thread will be embedded in the curriculum and highlighted throughout the supervised practice experiences. Another priority of the M.S.D. Program is to develop entry-level RDN practitioners with advanced knowledge of food and nutrition assistance programs and supportive services available in communities, and skills in providing seamless nutrition care for all individuals, including patients/clients transitioning from the inpatient/rehab setting to their homes.

GRADUATION COMPLETION REQUIREMENTS
M.S.D. students must successfully complete all coursework, the comprehensive exam, supervised practice rotations, and the evidenced-based project design in order to receive the M.S.D. degree and verification statement of eligibility to write the exam for Registered Dietitian Nutritionists.

Comprehensive Examination
Candidates will defend a comprehensive exam that will test their ability to develop systems based solutions to practice problems in all areas of dietetic practice.

Requirements for Advancement to Candidacy for the Degree of Master of Science in Dietetics
Completion of requirements as outlined in program description.

ECOLOGICAL ECONOMICS
http://www.uvm.edu/giee/

OVERVIEW
Ecological Economics examines the relationships between ecological and economic systems while working to solve humanity’s environmental challenges. It is based on the understanding that the economy is a subsystem of a larger ecological life support system, and it strives to create an ecologically sustainable, socially equitable, and economically efficient future. The certificate is a problem-based, interdisciplinary program focused on developing a practical framework for integrating economic and ecological systems. Students will acquire a theoretical and pragmatic basis to carry these skills into the world of practice.

DEGREES
- Ecological Economics CGS (p. 149)

FACULTY
- Erickson, Jon; Professor, Gund Institute; PHD, Cornell University
- Farley, Joshua C.; Professor, Department of Community Development and Applied Economics; PHD, Cornell University
- Ricketts, Taylor H.; Professor, Rubenstein School of Environment and Natural Resources; PHD, Stanford University

ECOLOGICAL ECONOMICS CGS
All students must meet the Requirements for the Certificates of Graduate Study (p. 265)

OVERVIEW
Ecological Economics examines the relationships between ecological and economic systems while working to solve humanity’s environmental challenges. It is based on the understanding that the economy is a subsystem of a larger ecological life support system, and it strives to create an ecologically sustainable, socially equitable, and economically efficient future. The certificate is a problem-based, interdisciplinary program focused on developing a practical framework for integrating economic and ecological systems. Students will acquire a theoretical and pragmatic basis to carry these skills into the world of practice.

The Ecological Economics Certificate of Graduate Study is managed jointly by the Rubenstein School and the Gund Institute, and is conferred by the Graduate School.

SPECIFIC REQUIREMENTS
Requirements for Admission to Certificate of Graduate Study in Ecological Economics
FOR CURRENT UVM STUDENTS: Students currently enrolled in a graduate program must complete the online UVM Graduate Application. If the program you are in did not require GRE scores
for admission, you must provide them with the application to the Certificate Program.

FOR DUAL GRADUATE DEGREE/CERTIFICATE PROGRAM APPLICANTS: Students applying at the same time for a graduate degree program and a Certificate of Graduate Study at UVM must first complete the online UVM Graduate Application for the degree program. Once accepted into the degree program applicants can then log back into the portal and choose the option to apply as a certificate student. A fee waiver will be provided by the Graduate Admissions office. GRE scores are required.

FOR APPLICANTS TO THE CERTIFICATE PROGRAM: Applicants seeking to enroll in only a Certificate of Graduate Study program must complete the online UVM Graduate Application and all associated requirements. Note: You must have completed an advanced degree (Master’s, Ph.D., or J.D.) to apply for just the certificate and the GRE is not required.

Minimum Degree Requirements
Students may earn the certificate either in conjunction with a UVM master’s or doctoral degree, or independent of a degree.

The Certificate of Graduate Study in Ecological Economics requires fifteen credits, including three core courses and two approved electives. Students must also demonstrate competency in four areas: Natural Science, Social Science, Management, and Quantitative Methods. Two of the competencies must be satisfied through two elective courses (six credits) at UVM. The remaining two competencies may be satisfied through additional electives, through appropriate prior graduate course work, or through life experience.

The Certificate of Graduate Study in Ecological Economics requires fifteen graduate credits that must be taken at UVM. They are distributed as follows:\n
<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>NR 341</td>
<td>Ecological Economic Theory</td>
<td>3</td>

</tbody>
</table>

The 15 credits that need to be taken at UVM may be earned either in conjunction with or independent of a UVM graduate degree program.

More information on the Certificate is available from the Gund Institute website.

EDUCATIONAL LEADERSHIP
https://www.uvm.edu/cess/dlds

OVERVIEW
The master’s degree program in Educational Leadership is guided by its Conceptual Framework which is grounded in respect for diversity, social justice, and democratic community. The program is committed to the preparation of leaders who are reflective practitioners, instructional leaders, and change agents who can collaborate with other professionals to make a positive difference in schools, human service agencies, communities and in the lives of all learners. The program is directed toward preparing competent and caring professionals who:

• have the knowledge, skills, and professional dispositions to promote the success of all students and/or members of their educational and human service organizations
• understand alternative perspectives on leadership that support the development of more just, humane, and diverse organizations
• construct effective ways to demonstrate caring and collaborative leadership and understand how to partner with families and other community members, responding to diverse community interests, needs and assets
• create networks which support leadership and change, and cultures of learning
• advance educational and human environments that advance social justice, equity, and democracy

The program’s Conceptual Framework is guided by several principles which are aligned with the Vermont Standards for Professional Educators and the Interstate School Leaders Licensure Consortium.
(ISLLC) created by the National Policy Board for Educational Administration and the Educational Leadership Constituents Council (ELCC) Standards for Advanced Programs in Educational Leadership. The program is grounded in:

- **Constructivism** - Knowledge is socially constructed through dialogue and community-based practice (constructivism).
- **Collaboration** - Teachers and other school professionals work collaboratively to problem-solve with stakeholders (collaboration, interprofessional practice, reflective practice, excellence).
- **Human Development and Empowerment** - Education facilitates development of human potential (developmentally appropriate practice, strengths perspective, empowerment).
- **Inclusion** - All students can learn and have value in their communities (inclusion).
- **Multiculturalism/Culturally Responsible Pedagogy** - Learning communities demonstrate respect for and honor diversity; pursue knowledge and affirmation of diverse cultures (multiculturalism, culturally responsive pedagogy, equity).
- **Equity and Justice** - Education should advance social justice and democracy (equity).

**DEGREES**

- Educational Leadership AMP (p. 151)
- Educational Leadership M.Ed. (p. 152)

**FACULTY**

Clark/Keefe, Kelly; Associate Professor; Department of Leadership and Developmental Sciences; EDD, University of Vermont
Hurley, Sean M.; Assistant Professor, Department of Leadership and Developmental Sciences; PHD, Vanderbilt University
Killeen, Kieran M.; Associate Professor; Department of Leadership and Developmental Sciences; PHD, Cornell University
Kolbe, Tammy G; Assistant Professor; Department of Leadership and Developmental Sciences; EDD, University of Vermont

**EDUCATIONAL LEADERSHIP AMP**

All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

**OVERVIEW**

An accelerated pathway into the Master’s Program in Educational Leadership affords opportunities for UVM undergraduates interested in the efficient linkage of their undergraduate and graduate degree programs. The Accelerated Masters Program in Educational Leadership (AMPEL) seeks to build upon an institutional goal that stresses career alignment in disciplines and academic areas, across the undergraduate to graduate degree experience. The targeted audience are those undergraduates who seek advanced training and experiences towards the leadership of learning organizations and programs. The accelerated program is restricted to the non-licensure Master’s Program track. Students completing this pathway through the Master’s degree will be unable to be recommended for licensure.

Recruitment of students into AMPEL would stem from five types of affiliated undergraduate programs:

1. Students interested in leadership positions in youth and adult recreation programs, intermural sports leagues, K-12 athletic program administration, and/or sports team management. Programs targeted include:
   - a. Coaching (CESS)-Undergraduate Minor
   - b. Sports Management (CESS/Rubenstein)-Undergraduate Minor

2. Students interested in leading youth or adult groups through environmental curricula housed in state or national parks, curating educational exhibits in cultural or science museums, and/or administering youth camps. Programs targeted include:
   - a. Parks, Recreation and Tourism (Rubenstein)-Undergraduate Major
   - b. Environmental Studies (UVM)-Undergraduate Major/Minor

3. Students interested the pairing of outdoor or environmentally based recreation programs with occupational, physical, or mental health therapies. These students have worked or envision working for organizations that lead youth or adults into wilderness or related environments in the pursuit of therapeutic goals. Programs targeted include:
   - a. Human Development and Family Studies (CESS)-Undergraduate Major/Minor
   - b. Social Work (CESS)-Undergraduate Major

4. Students interested in the leadership of and programming for community based learning centers. These centers might provide a range of educational, family, literacy and related support services for refugees, English language learners, and adult populations.
   - a. English Language Learners (CESS)-Undergraduate Concentration/Minor
   - b. Social Work (CESS)-Undergraduate Major
   - c. Community Development and App. Economics (CALS)-Undergraduate Major/Minor

5. Students from social science fields like political science, economics, sociology and community development who seek foundational training at the graduate level towards careers in educational policy studies, administration, and analysis. Students who have partially completed or completed teaching Majors, but seek alternatives upon graduation will also be welcomed. Programs targeted would include:
   - a. Social science Majors (CAS)—Undergraduate Majors/Minors
   - b. Teaching degrees (CESS)-Undergraduate Majors
   - c. HDFS Program (CESS)
SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of education for Accelerated Students

Admissions to the accelerated program requires the following:

1. Students must have earned a cumulative grade point average of 3.25 at the beginning of the second semester of his/her junior year to be considered for possible admission to the AMPEL program.

2. Completion of the Graduate College Accelerated Master’s Degree Permission Form

3. Completion of the EL Graduate College Application Form online, which includes a written essay that matches their undergraduate program of study, professional experience and professional goals with the M.Ed. in Educational Leadership; Three letters of recommendation, including a letter of support from a faculty member who agrees to serve as a primary advisor during enrollment into the M.Ed. Program.

4. Applications will be reviewed by program faculty and finalists will be interviewed.

Minimum Degree Requirements for the Degree of Master of education

- Completion of the graduate program focusing on general educational leadership studies requires thirty-three credit hours of study distributed among courses, summer seminars, independent study, clinical field experiences, and internships.
- Through close faculty mentoring, approximately half of all courses taken comprise of the core curriculum, with the remainder making up the students individual subject area concentrations.
- An action research project and a leadership portfolio mark the final requirements of the program. Portfolios are presented at each student’s culminating oral examination. Students interested in AMPEL should review M.Ed. Program Requirements as specified in the Catalogue.

Following admission, and working with the Program Coordinator, accelerated students shall complete the Program Plan of Study. This study plan shall indicate which courses in the Educational Leadership program will be taken during their undergraduate studies and also count towards the Master’s degree. Participation in the accelerated program requires the satisfactory completion of the undergraduate course of study.

In essence, the accelerated pathway allows UVM juniors in their Spring semester to apply for admission to the graduate program. After acceptance into the Master’s Degree Program, students may take up to six (6) credits of graduate-level courses at UVM toward both their Bachelor’s and Master’s degrees. An additional three (3) credits of graduate-level coursework taken prior to the completion of the Bachelor’s degree, beyond the six double counted credits, may also be used for the Master’s.

AMPEL students may take courses limited to those offered in the Core Curriculum of the Master’s program prior to the completion of the bachelor’s, inclusive of:

- EDLP 300: Leading Learning Organization (Fall) and any one or two of the following:
  - EDFS 355: Data Analysis for Decision Making (Fall)
  - EDLP 380: Inequality in Education (Spring)
  - EDFS 322: Challenge of Multi-culturalism (Spring)
  - EDLP 310: Effecting and Managing Change (Spring)
  - EDLP 320: Collaborative Consultation.

In summary, AMPEL students are expected to take 6 credit hours of EDLP core coursework during their senior year, but may take an additional 3 credit hours, for a total of 9. A culminating total of 33 credit hours are needed to earn the Master’s. The remaining core courses will be taken after completion of the bachelor’s degree.

Thesis Option

The EDLP program has a thesis option in which 6 credits of EDLP 391, Master’s Thesis Research, replaces the equivalent number of elective course credits. The thesis option may replace the leadership portfolio at the completion of each student's degree program. A thesis is developed in collaboration with a supervising EDLP faculty member and adheres to policies and procedures of the Graduate College. Thesis research may only be pursued after the completion of the bachelor’s degree and full-time graduate student status begins.

Comprehensive Examination

The comprehensive examination is taken in the last semester prior to graduation. The examination consists of an oral presentation of a portfolio built throughout the program.

Requirements for Advancement to Candidacy for the Degree of Master of education

Students in the accelerated program are expected to maintain a high degree of academic and professional standing. A minimum cumulative undergraduate GPA of 3.25 is required for continuation in the M.Ed. program, through the completion of the undergraduate degree. Once fully enrolled as a graduate student, AMPEL participants must adhere to the same standards defined in the Catalogue as other students in the Master of Education Program in Educational Leadership.

EDUCATIONAL LEADERSHIP M.ED.

All students must meet the Requirements for the Master of Education Degree (p. 266)

OVERVIEW

The master’s degree in Educational Leadership is designed to cultivate leaders who can apply knowledge toward leading and building learning communities designed to make a positive difference in the lives of children, youth, families, adults, and communities. The program prepares public and private school leaders, curriculum leaders, teacher leaders, leaders of educational and social service
agencies, and leaders for other educational organizations. Additionally, professionals (i.e. police, non-profit administrators, civil-servants and care workers) involved in leading educational training and programming for their respective organizations and services are often attracted to this program of study. The program is designed to prepare leaders to think and act creatively, responsibly, and effectively in leadership roles.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Education**

There are two application deadlines. Applications are due November 15th for admission the following spring and April 1st for admission the following summer and fall. The process for application is as follows:

- Students apply to the Graduate College through electronic submission of the application materials. Materials are available on the website for the University of Vermont Graduate College.
- Applicants may be required to interview with the master’s program coordinator or program faculty member.
- Applicants will receive written notification of the status of their application from the Graduate College. Applicants are responsible for making sure all application materials have been submitted to the Graduate College.
- Once accepted, applicants will receive a letter of acceptance from the program coordinator and will be assigned an advisor.

**Minimum Degree Requirements**

The program requirements, depending on a degree focused on general educational leadership studies or a focus on school building administration with licensure, include:

- Thirty-three to thirty-six credits distributed among courses, summer seminars, independent study, clinical field experiences, and internships.
- Fifteen of which compose the core curriculum, with the remainder making up the student’s individual concentration. Students desiring the Vermont Administrative Licensure will take a majority of their electives in areas required through licensure standards as defined by Vermont Competencies for Administrative Endorsement and Vermont Standards for Professional Educators.
- The core curriculum consists of the following courses:
  - EDLP 300: Leading Learning Organizations
  - EDLP 310: Effecting and Managing Change
  - EDLP 320: Collaborative Consultation
  - EDFS 355: Applied Data Analysis for Decision Making OR EDFS 209: Intro to Research
  - EDFS 322: Challenge of Multiculturalism OR EDLP 380: Inequality in Education
  - EDLP 390: Internship
- A leadership portfolio which marks the final requirement of the program. Portfolios are presented as part of the Master’s Comprehensive Orals at the completion of each student’s degree program.

A maximum of nine (9) credits may be accepted in transfer into the program. Transfer credit may be completed prior to admission to the program provided that the credit is approved by the student’s graduate studies committee and that the credit conforms to all other Graduate College requirements.

While the program is designed within the broad concept of leadership, two major strands of concentration are available. The areas of concentration are:

**STRAND I: School Leader with Administrative Endorsement**

- Educational Administration
- Curriculum Leadership
- Teacher Leadership

**STRAND II: Human Service, Organizational and Community Leadership**

- Leadership in Private or Nonprofit Educational Organizations
- Leadership in human service agencies and other community/public agencies

Courses with an administration/planning focus include:

<table>

**Thesis Option**

The EDLP program has a thesis option in which 6 credits of EDLP 391, Master’s Thesis Research, replaces the equivalent number of elective course credits. The thesis option may replace the leadership portfolio at the completion of each student’s degree program. A thesis is developed in collaboration with a supervising EDLP faculty member and adheres to policies and procedures of the Graduate College.

**Comprehensive Examination**

The comprehensive examination is taken in the last semester prior to graduation. The examination consists of an oral presentation of a portfolio built throughout the program.
Requirements for Advancement to Candidacy for the Degree of Master of Education
Successful completion of any prerequisite courses, and at least 15 graded graduate credits with a 3.00 GPA or better, including all core courses.

EDUCATIONAL LEADERSHIP AND POLICY STUDIES
https://www.uvm.edu/cess/dlds

OVERVIEW
The Educational Leadership and Policy Studies degrees are designed to cultivate leaders who can apply knowledge toward leading and building learning communities designed to make a positive difference in the lives of children, youth, families, adults, and educational and social service agencies, and leaders for other educational organizations. The program is designed to prepare leaders to think and act creatively, responsibly, and effectively in leadership roles.

DEGREES
- Educational Leadership and Policy Studies Ph.D. (p. 155)

Tinkler, Barri E.; Associate Professor, Department of Education; PHD, University of Denver

EDUCATIONAL LEADERSHIP AND POLICY STUDIES ED.D.

All students must meet the Requirements for the Doctor of Education (p. 268) Degree.

OVERVIEW
A Doctor of Education (Ed.D.) degree is offered in Educational Leadership and Policy Studies. This is an applied research based program for professionals serving in educational management positions in schools and school-related organizations, e.g. state departments of education, professional associations, higher education, and human service agencies.

Program emphases include: the design and implementation of educational research; policy studies; adaptation of theoretical constructs and models related to leadership and change in educational and social service settings; knowledge and skills in interorganizational relationships; budget and strategic planning; and program evaluation.

This program has been designed to respond to the expanding demands placed on leaders in educational and human service organizations where leaders are increasingly expected to design and supervise local research and varied evaluative studies; interpret and apply recent national research findings; analyze and apply governmental regulations and court decisions; develop organizational responses to emerging social expectations; organize and lead staff development programs; understand and apply broad-based economic principles and social and fiscal policy; develop and manage budgets; assess and respond to the psychological needs of educational consumers; and employ effective interpersonal management and decision-making skills.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Doctor of Education

Applicants must possess a master's degree or equivalent, from an accredited institution and a cumulative grade point average of 3.00 for previous graduate study. Other requirements include three letters of recommendation, a representative scholarly writing sample and a resume.

Students admitted to graduate studies must complete successfully a core of study consisting of courses in research, foundational and policy studies, and organizational change and leadership. Upon such completion and submission of a qualifying paper, students will be considered for candidacy for the degree. Students must also pass a
written comprehensive examination prior to the award of the degree of Doctor of Education.

The application deadline is January 15th.

**Minimum Degree Requirements**
All course credits related to the core are distributed in educational leadership, research, critical perspectives, organizational change and selected specialty content areas. Students complete course work in selected elective and/or concentration content areas. Students complete research courses. Students must satisfactorily complete:

| Total Required Credits | 59 |

A maximum of 9 credit hours may be accepted in transfer from an accredited graduate program, and additional 6 credits may be applied for courses taken at The University of Vermont prior to admission. Credits to transfer may be completed prior to admission to the Doctor of Education program provided that the credit is approved by the student’s graduate studies committee and that the credit conforms to all other Graduate College requirements.

**Comprehensive Examination**
Consistent with Graduate College requirements, the EDLP doctoral program requires students to complete a comprehensive examination of core knowledge prior to the completion of the degree program. This examination occurs in the semester following the completion of the core course curriculum. Currently the comprehensive examination is taken in October, following the spring semester and completion of the core courses. The examination will test knowledge in areas of study germane to all Ed.D. students. Students may not sit for the comprehensive examination until they have successfully completed their core courses.

**Requirements for Advancement to Candidacy for the Degree of Doctor of Education**
A minimum of 59 credits of doctoral studies, at least 44 of which were completed at UVM following formal admission to the program, meeting the above distribution.

For further requirements concerning graduate studies committees, research and dissertation, and the dissertation defense examination committee, refer to General Requirements for the degree of Doctor of Education. More information about the program can be found on the Educational Leadership & Policy Studies doctoral programs website.

**EDUCATIONAL LEADERSHIP AND POLICY STUDIES PH.D.**
All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

**OVERVIEW**
The Ph.D. program in Educational Leadership and Policy Studies is a multidisciplinary program that seeks to examine complex educational and social problems through the integration of multiple theoretical, methodological, and disciplinary lenses. The Ph.D. in Educational Leadership and Policy Studies is intended as a full-time program to prepare candidates to attain a high level of scholarly competence and to develop the capacity to contribute knowledge to their field. The program will develop scholars who can analyze and inform the development of educational systems and public policies that will positively impact the lives of children and youth and address broad societal issues such as child poverty. The degree will serve students who wish to pursue research/teaching careers in universities and/or research and policy positions in government agencies, think tanks, non-governmental organizations, and other public and private sector organizations.

The goals of the program include, but are not limited to:

- Preparing professional researchers, scholars, and faculty competent in conducting and sharing research.
- Focusing on research training that uses advanced quantitative, qualitative, and mixed method approaches to add to theoretical knowledge.
- Emphasizing publication of research findings to enhance knowledge in education and social services.
- Developing areas of interdisciplinary specialization.
• Candidates will be mentored in conducting independent research, presenting papers at professional conferences, and submitting their work for publication.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy**

• Master’s degree or undergraduate work in a related field such as educational leadership, educational studies, higher education, public administration, counseling, social work, or curriculum and instruction characterized by a distinguished academic record

• Demonstrated commitment in letters of application and references to social change and justice with experience in inquiry at a level that will predict successful research and college teaching

• GRE general test scores taken within the last 5 years

• Research interests compatible with those of CESS faculty

• Strong inquiry and writing skills

• In-depth understandings of systems change, leadership, and policy in order to conduct high quality research

• Submission of an application by the program deadline

**Minimum Degree Requirements**

A minimum of seventy-five credits of doctoral studies following formal admission to the program comprised of:

<table>

</tr>
</tbody>
</table>

A written and oral individualized exam developed by dissertation committee after completing all coursework except for EDLP 449

All course credits beyond the core are distributed in educational leadership, research, critical perspectives, organizational change, and selected specialty content areas.

A maximum of twenty-four (24) credit hours may be accepted in transfer from an accredited graduate program. Credits to transfer may be completed prior to admission to the EDLP Ph.D. program provided that the credit is approved by the student's graduate studies committee and that the credit conforms to all other Graduate College requirements. Candidates for the Ph.D. must satisfactorily complete a minimum of 51 hours in residence. This requirement is completed by courses taken through UVM and taken after the student has been admitted to the Graduate College.

Dissertation expectations require a Journal Article format with a focus on original research, illustrating mastery of competing theories with the goal of informing knowledge (per Graduate College guidelines). This format requires that the candidate will complete one or more journal article(s) with the goal of manuscript submission for publication in refereed journals.

**Comprehensive Examination**

In order to assess students' scholarship and critical thinking, a comprehensive examination is required by the end of a student's course of study (typically the third year). The examination consists of a critical, in-depth review/empirical article on a topic to be agreed upon by the student, his/her mentor, and one additional faculty reader, with these individuals approving an abstract of the paper in advance. The review/empirical article must demonstrate comprehensive empirical and theoretical mastery of the agreed-upon topic, including relevant knowledge on which the specific research area is based.

Once the student's advisor and one other faculty member deem the article original and ready for review, the student will schedule a research colloquium on the topic of the paper for the CESS community. The student's studies committee will serve as the faculty examiners for the comprehensive examination. They will, by consensus, assign a grade of fail, conditional pass, or pass for the comprehensive examination. The article may later be incorporated into the student's doctoral dissertation if deemed appropriate by the student's dissertation committee.

**Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy**

Successful completion of any pre-requisite courses, and at least 15 graded graduate credits with a 3.00 GPA or better, including all core courses and a comprehensive examination.

For further requirements concerning studies committees, research and dissertation, and the dissertation defense examination committee, refer to General Requirements for the degree of Doctor of Philosophy. More information about the program can be found
on the Educational Leadership & Policy Studies doctoral programs website.

**ELECTRICAL ENGINEERING**

http://www.uvm.edu/~cems/soe/

**OVERVIEW**

The Electrical Engineering program at the University of Vermont (UVM) offers programs of study leading to the M.S. and Ph.D. degrees in Electrical Engineering. In addition, the EE program partners with other academic units to offer M.S. and Ph.D. degrees in materials science and the Ph.D. degree in bioengineering. Areas of research expertise in electrical engineering include digital signal processing, control systems, electromagnetics and optics, electric energy systems, solid-state physical electronics, semiconductor materials and devices, wireless communications, VLSI design and testing, and biomedical engineering.

**DEGREES**

- Electrical Engineering AMP (p. 157)
- Electrical Engineering M.S. (p. 158)
- Electrical Engineering Ph.D. (p. 158)

**FACULTY**

Almassalkhi, Mads; Assistant Professor, Department of Electrical and Biomedical Engineering; PHD, University of Michigan Ann Arbor

Doiron, Amber L.; Assistant Professor; Department of Electrical and Biomedical Engineering; PHD, University of Texas Austin

Duffaut Espinosa, Luis; Research Assistant Professor, Department of Electrical and Biomedical Engineering; PHD, Old Dominion University

Frolik, Jeff L.; Professor, Department of Electrical and Biomedical Engineering; PHD, University of Michigan Ann Arbor

Hines, Paul D.; Associate Professor, Department of Electrical and Biomedical Engineering; PHD, Carnegie Mellon University

Ossareh, Hamid-Reza; Assistant Professor, Department of Electrical and Biomedical Engineering, PHD; University of Michigan Ann Arbor

Xia, Tian; Professor, Department of Electrical and Biomedical Engineering; PHD, University of Rhode Island

**ELECTRICAL ENGINEERING AMP**

All students must meet the Requirements for the Accelerated Master's Degree Programs (p. 264)

**OVERVIEW**

Qualified undergraduate students who plan to earn a master's degree in electrical engineering may enroll in the Accelerated Master’s Program, which enables students to begin working on a master's degree while still an undergraduate. Students apply to the program in the second semester of their junior year. Following acceptance by the Graduate College, students may take up to nine graduate credits while still an undergraduate. Of these, up to six credits can be counted toward both the B.S. and the M.S. degrees. This is subject to approval of the student’s graduate advisor. Students in the program typically begin work toward their master's thesis starting in the summer following their junior year.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Science for Accelerated Students**

To apply to the program, students must have a cumulative grade point average of at least 3.20 at the time of application, must submit a letter of application to the graduate program coordinator naming a faculty member who has agreed to serve as their graduate advisor and must complete the Graduate College application.

**Minimum Degree Requirements**

Advanced courses in electrical engineering, physics, computer science, and mathematics (eighteen to twenty-four credits) with at least fifteen credits appropriately distributed in approved areas of study in the Electrical Engineering department. Thesis research (six to twelve credits).

Although a thesis is normally expected in the program leading to the M.S. in Electrical Engineering, AMP students may also pursue project or course-work only options.

In all cases, successful completion of the M.S. degree will require passing a comprehensive examination. This examination will be based on course work that was taken in the pursuit of the M.S. degree. Thesis option students will be tested orally at the time of their thesis proposal. Non-thesis option students will be asked to make a report, both written and oral on a design or research topic of current interest that relates to course work taken at UVM.

**Comprehensive Examination**

M.S. Thesis Option: The student must orally present a proposal for their thesis research at least 3 months prior to graduation. The student’s thesis committee will orally examine the student based on the student’s coursework and research focus.

M.S. Project Option: The student must orally present a proposal for their project research approximately 6 months prior to graduation. The student’s project committee will orally examine the student based on the student’s coursework and research focus.

M.S. Coursework Option: The student must complete a written and/or oral comprehensive exam during the final semester of residence at UVM.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**

An accredited bachelor’s degree in electrical engineering or equivalent education.
ELECTRICAL ENGINEERING M.S.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW

Typically candidates have obtained the Bachelor of Science degree in Electrical Engineering prior to application but those who haven’t are encouraged to apply for the program if they have extensive background in mathematics and the basic sciences. In such cases, it may be necessary for a student to complete the entrance qualifications without receiving credit toward graduate studies. The general requirements for admission by the Graduate College must be met. Areas of research expertise are biomedical engineering, mechatronics, power and energy systems, computer engineering, solid state physical electronics, electromagnetics, information processing, communication theory, semiconductor materials, devices, and integrated circuits (VLSI).

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science

An accredited bachelor’s degree in an appropriate field and completion of the general (aptitude) portion of the Graduate Record Examination (GRE).

Minimum Degree Requirements

Advanced courses in electrical engineering, physics, computer science, and mathematics (eighteen to twenty-four credits) with at least fifteen credits appropriately distributed in approved areas of study in the Electrical Engineering department. Thesis research (six to twelve credits).

Although a thesis is normally expected in the program leading to the M.S. in Electrical Engineering, students may also pursue project or course-work only options. In all cases, successful completion of the M.S. degree will require passing a comprehensive examination. This examination will be based on course work that was taken in the pursuit of the M.S. degree. Thesis option students will be tested orally at the time of their thesis proposal. Non-thesis option students will be asked to make a report, both written and oral on a design or research topic of current interest that relates to course work taken at UVM.

Comprehensive Examination

M.S. Thesis Option: The student must orally present a proposal for their thesis research at least 3 months prior to graduation. The student’s thesis committee will orally examine the student based on the student’s coursework and research focus.

M.S. Project Option: The student must orally present a proposal for their project research approximately 3 months prior to graduation. The student’s project committee will orally examine the student based on the student’s coursework and research focus.

M.S. Coursework Option: The student must complete a written and/or oral comprehensive exam during the final semester of residence at UVM.

Requirements for Advancement to Candidacy for the Degree of Master of Science

An accredited bachelor’s degree in electrical engineering or equivalent education.

ELECTRICAL ENGINEERING PH.D.

All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

OVERVIEW

Master of Science and Doctor of Philosophy in Electrical Engineering programs are offered. Typically candidates have obtained the Bachelor of Science degree in Electrical Engineering prior to application but other applicants are encouraged to consider the program if they have extensive background in mathematics and the basic sciences. In such cases, it may be necessary for a student to complete the entrance qualifications without receiving credit toward graduate studies. The general requirements for admission as outlined under the Regulations of the Graduate College must be met. Areas of research expertise are biomedical engineering, computer engineering, solid state physical electronics, power and energy systems, electromagnetics and optics, information processing, communication-theory, semiconductor materials, devices, and integrated-circuits (VLSI).

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy

A master’s degree in electrical engineering or the equivalent and completion of the general (aptitude) portion of the Graduate Record Examination (GRE).

Minimum Degree Requirements for the Degree of Doctor of Philosophy

A total of seventy-five (75) credit hours of graduate work are required for the Ph.D. degree, with at least 51 credits taken in residence at UVM. These courses should be selected to meet the following requirements:

Two courses to satisfy the EE Ph.D. core requirement (≥ 6 credit hours), which consists of EE 301 (System Theory) and EE 302 (Stochastic Processes). These courses are typically offered in alternate years in the fall semester. To achieve candidacy, students must complete both courses with a B or better grade.

At least three additional courses (≥ 9 credit hours) of advanced topics in electrical engineering (200 or higher) specifically selected with your graduate advisor to facilitate your research goals.

To bolster his/her background in a particular area and with their advisor’s approval, a student may apply three 100 or 200-level (that are not already approved for graduate credit) credits to their Ph.D. degree requirements. These credits may apply to the 75 in total required but not to the 15 credits of EE coursework specified above. Students interested in taking this course for graduate credit will need to submit a Permission to Take a 100/200 Level Course for Graduate Credit Form to the Graduate College before the first day of class.
One credit hour of Engineering Ethics (ENGR 201) taken in the first available Fall semester after entering graduate studies.

A student with a M.Sc. degree in Electrical Engineering can apply up to twenty-four (24) credit hours from this M.Sc. degree toward the Ph.D. coursework requirements, subject to the approval of the EE graduate studies committee.

At least 20 credit hours of EE 491, doctoral dissertation research, supervised by the student’s Ph.D. advisor.

Following the successful completion of all course and research credits, students requiring continuing registration must enroll in either GRAD 901 (less than half-time), GRAD 902 (at least half-time), or GRAD 903 (full-time) as a reflection of their current research activity.

Students should complete a coursework plan in their first year of Ph.D. studies, and submit this plan to the graduate studies committee for review.

**Comprehensive Examination**

To be eligible for taking the comprehensive exam, the student must have completed taking one of the two EE core courses (EE 301 or EE 302) with passing grades B or higher. Candidacy is achieved with successful completion of the exam and successful completion (B or higher) of the second EE core course (EE 301 or EE 302) in their 3rd semester.

The written part of the examination will be a report presented in the form of an IEEE conference paper, with the format of double column and maximum length of 6 pages. The paper will be focused on a research topic in the area of the candidate’s dissertation work, and will comprise three Specific Aims:

1. Introduction, background and literature review related to the research problem. Development of a comprehensive bibliography related to their research topic.

2. A clear description of open issues related to the research topic. Discussion of the value and innovative aspects of the student’s proposed research.

3. Proposed research approach description, hypothesis(es) and/or goal(s), potential barriers and possible solutions, preliminary data, and experimental design plan.

The first aim will demonstrate the student’s ability to collect and contextualize prior art in the area of research. The second aim will demonstrate the student’s ability to identify new research problems and justify their value to the field. The third aim will be a “stretch aim” that extends beyond the completed aspects of the candidate’s research. In this third aim, the candidate will be expected to exhibit evidence of an ability to generate imaginative and thoughtful hypotheses, and to think laterally about how their PhD research area could be developed in a new direction. The candidate should gain the approval of their thesis committee regarding the general area of the proposal prior to beginning work on it.

The oral part of the comprehensive examination will be a formal seminar by the student in front of the faculty committee, to take place after the committee members have had a chance to review the written report, which should be in the hands of the committee members at least 2 weeks prior to the oral presentation. The student will be asked to defend the paper and to answer any additional questions the committee members feel appropriate. It is expected that there will be specific questions directly associated with broad electrical engineering fundamentals. The expectation is that the oral portion will be completed prior the start of the student’s 3rd semester.

**Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy**

Successful completion of Ph.D. comprehensive examinations.

The majority of students will have completed a core program comprising graduate courses before taking the comprehensive examination.

**ENGINEERING MANAGEMENT**

https://www.uvm.edu/cems

**OVERVIEW**

The Master of Science in Engineering Management (MS in EM) is a professional degree with optional disciplinary tracks, and is available as a regular coursework only MS, and project-based MS, as well as an Accelerated Master’s Program for undergraduates majoring in Engineering or Engineering Management. Students may have a BS in Engineering from an ABET-accredited institution, a BS in Engineering Management, an unaccredited BS in Engineering, or physical sciences. Those without an accredited degree may have to take additional courses to achieve equivalency of background.

**DEGREES**

Engineering Management AMP (p. 159)
Engineering Management M.S. (p. 160)

**FACULTY**

Dewoolkar, Mandar M.; Professor, Civil and Environmental Engineering; PHD, University of Colorado Boulder
Dubief, Yves C.; Associate Professor Department of Mechanical Engineering; PHD, Institut National Polytechnique de Grenoble
Frolik, Jeff L.; Professor, Department of Electrical and Biomedical Engineering; PHD, University of Michigan Ann Arbor
Huston, Dryver R.; Professor, Department of Mechanical Engineering; PHD, Princeton University
Lucas, Marilyn T.; Associate Professor, Grossman School of Business; PHD, University of Illinois Urbana-Champaign
Monsen, Erik; Associate Professor, Grossman School of Business; PHD, University of Colorado at Boulder

**ENGINEERING MANAGEMENT AMP**

All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

**OVERVIEW**

Qualified undergraduate students who plan to earn a master's degree in engineering management may enroll in the Accelerated Master’s Program, which enables students to begin working on a master’s
degree while still an undergraduate. Students apply to the program in the second semester of their junior year. Following acceptance by the Graduate College, students may take up to nine graduate credits while still an undergraduate. Of these, up to six credits can be counted toward both the B.S. and the M.S. degrees, subject to approval of the student’s graduate advisor. Students in the Accelerated Masters Program must follow the M.S. degree requirements.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science for Accelerated Students

To apply for the program, students must be enrolled at the University of Vermont in an undergraduate engineering or engineering management program with a cumulative grade point average of at least 3.20 at the time of application, must submit a letter of application to the graduate program coordinator and, if applicable, name a faculty member who has agreed to serve as their graduate advisor, and complete the Graduate College application. No Graduate Record Examination (GRE) is required for admission for AMP applicants.

Minimum Degree Requirements for the Degree of Master of Science

The Engineering Management AMP requires the completion of advanced courses in business administration, engineering, mathematics, statistics, and other approved courses and research (for project option students) totaling at least thirty credits.

Further details on the core course requirements and the areas of specialization can be obtained from the Engineering Management Graduate Program website.

Comprehensive Examination

Candidates must successfully complete a written project report in EMGT 392, or a written project report from a pre-approved course. The examination may be retaken once if the student does not pass it on the first attempt.

Requirements for Advancement to Candidacy for the Degree of Master of Science

Successful completion of undergraduate engineering or engineering management degree program.

ENGINEERING MANAGEMENT M.S.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW

The Engineering Management Graduate Program offers a Master’s of Science (M.S.) degree in engineering management. Each student must meet the general requirements for admission as outlined under the regulations of the University of Vermont Graduate College. Typically, students entering the program have received a bachelor’s degree in engineering, engineering management or a related field. Applicants with other backgrounds will be evaluated individually and must complete prescribed undergraduate technical course work. Part-time study leading to the M.S. degree is possible for students who are employed in the vicinity.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science

Students may have a BS in Engineering from an ABET-accredited institution, a BS in Engineering Management, an unaccredited BS
in Engineering, or physical sciences. Those without an accredited degree may have to take additional courses to achieve equivalency of background. GRE is recommended but not required.

**Minimum Degree Requirements**
The Engineering Management M.S. requires the completion of advanced courses in business administration, engineering, mathematics, statistics, and other approved courses and research (for project option students) totaling at least thirty credits.

Sisk, Jennifer L.; Associate Professor, Department of English; PHD, Yale University
Turner, Sarah; Senior Lecturer, Department of English; PHD, Case Western Reserve University
Welch, Nancy Ellen; Professor, Department of English; PHD, University of Nebraska Lincoln
Yoo, Hyon Joo; Associate Professor, Department of English; PHD, Syracuse University

**ENGLISH AMP**

All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

**OVERVIEW**

Accelerated Master’s Degree (AMP) programs are designed to allow current UVM undergraduate students to earn both bachelor’s and master’s degrees within a total of five years. Accepted AMP students in the department of English begin work toward their MA during their senior year while completing the BA. Six credits are taken in the senior year that count toward both the BA and the MA. An additional graduate-level course taken prior to award of the bachelor’s, beyond the six double counted credits, may be used for the master’s, provided the course does not also count toward the bachelor’s degree. Three credits toward the MA are then taken in the summer after graduation, and the remaining MA credits (nine per semester) are completed in year 5.

**SPECIFIC REQUIREMENTS**

Requirements for Admission to Graduate Studies for the Degree of Master of arts for Accelerated Students

An undergraduate major in English or its equivalent with evidence (in the form of transcripts, letters of recommendation from UVM faculty members, and writing sample) that the applicant’s undergraduate career has adequately prepared him or her for the particular demands of graduate study (please contact the Director of Graduate Studies with questions regarding preparedness for graduate-level study of English); minimum cumulative GPA of 3.0; and demonstration of proficiency in writing (both by a statement of purpose detailing the applicant’s academic interests and research agenda and by the writing sample). GRE scores are not required.

AMP students must choose the thesis or comprehensive option before the end of their senior year. Those AMP students electing to follow the thesis track must identify the thesis advisor before the end of the senior year. By the end of that academic year these thesis students will also submit a comprehensive reading list that will be the basis of preparation for the thesis exam. Those AMP students electing to follow the comprehensive track will choose advisors and submit reading lists for three field exams by the end of their senior year.

Candidates must submit three reading lists (covering three different areas of the discipline) and pass a four-hour written comprehensive exam based on them. Please note that all incoming Teaching Assistants are required to take ENGS 345. This three-credit course does count toward the requisite number of credits for course work (for both options).</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Comprehensive Examination**

AMP students writing a thesis take their exam in the fall of their fifth year of study (first year following completion of the bachelor’s degree). Students completing the Comprehensive Option track take their exam in the spring of their fifth year of study (first year following completion of the bachelor’s degree). In both cases, the
exam consists of three 75-minute essays. Exams are open-book and open-notes, but no portion of the exam may be pre-written.

For the Thesis Option exam, the student’s first and second readers evaluate all three essays. If their assessments differ on any essay, the Director of Graduate Studies will ask an appropriate third reader to break the tie. Students who fail one or more essays have failed the examination and may ask to be re-tested not less than one month after the examination date. The first reader, in consultation with the second reader, will determine what constitutes a fair re-examination. Both readers assess the re-examination essay or essays. Students who fail all or part of their re-examination must leave the Master’s program.

For the Comprehensive Option, each of the student’s three examiners will provide the student with an examination question. (A faculty member may write more than one question and offer the student a choice of essays to write.) The composer of each question grades that response. Students who fail one of their three essays may be re-tested in that area. Students who fail two or three areas must retake the entire examination. Any student who fails any part of the re-examination must leave the Master’s program.

Requirements for Advancement to Candidacy for the Degree of Master of arts
Completion of the above requirements.

ENGLISH M.A.
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
The degree combines the history of literatures in English, from the Medieval period to the 21st century, with literary theory and cultural criticism. The department also has graduate faculty who specialize in Film and Television Studies, and Rhetoric and Composition.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Arts
An undergraduate major in English or its equivalent with evidence (in the form of transcripts, letters of recommendation, and writing sample) that the applicant’s undergraduate career has adequately prepared him or her for the particular demands of graduate study (please contact the Director of Graduate Studies with questions regarding preparedness for graduate-level study of English); satisfactory scores on the Graduate Record Examination (General test only); and demonstration of proficiency in writing (both by a statement of purpose detailing the applicant’s academic interests and research agenda and by the writing sample).

<tr>
<td>Students may take ONE 100- or 200-level course for graduate credit with approval of the course instructor, the Director of Graduate Studies, and the Graduate College. (Please note that most English department Senior Seminars—course numbers 201-282—are preapproved for graduate credit and are exempted from this restriction.) Candidates must submit three reading lists (covering three different areas of the discipline) and pass a four-hour written comprehensive exam based on them. Please note that all incoming Teaching Assistants are required to take ENGS 345. This three-credit course does count toward the requisite number of credits for course work (for both options).</td>
<td></td>
</tr>
</tbody>
</table>

Comprehensive Examination
Students writing a thesis take their exam in the fall of their second year. Students completing the Comprehensive Option track take their exam in the spring of their second year. In both cases, the exam consists of three 75-minute essays. Exams are open-book and open-notes, but no portion of the exam may be pre-written.

For the Thesis Option exam, the student’s first and second readers evaluate all three essays. If their assessments differ on any essay, the Director of Graduate Studies will ask an appropriate third reader to break the tie. Students who fail one or more essays have failed the examination and may ask to be re-tested not less than one month after the examination date. The first reader, in consultation with the second reader, will determine what constitutes a fair re-examination. Both readers assess the re-examination essay or essays. Students who fail all or part of their re-examination must leave the Master’s program.
For the Comprehensive Option, each of the student’s three examiners will provide the student with an examination question. (A faculty member may write more than one question and offer the student a choice of essays to write.) The composer of each question grades that response. Students who fail one of their three essays may be retested in that area. Students who fail two or three areas must retake the entire examination. Any student who fails any part of the reexamination must leave the Master’s program.

Requirements for Advancement to Candidacy for the Degree of Master of Arts
Completion of the above requirements.

FIELD NATURALIST (PLANT BIOLOGY)
http://www.uvm.edu/~plantbio/

OVERVIEW
The Field Naturalist Graduate Program, housed within the Plant Biology department, provides professional-level, hands-on training in field science, critical and integrative thinking, environmental problem-solving, and effective communication. Field Naturalists learn how to dissect landscapes and human influences into their component parts, make sense of the parts, piece the parts together into an integrative whole, and then “tell the story” in ways that engage any audience.

DEGREES
- Field Naturalist (Plant Biology) M.S. (p. 164)

FACULTY
Barrington, David Stanley; Professor, Department of Plant Biology; PHD, Harvard University
Bierman, Paul Robert; Professor, Department of Geology; PHD, University of Washington
Coghill-Wemple, Beverley; Professor, Department of Geography; PHD, Oregon State University
Erickson, Jon; Professor, Rubenstein School of Environmental and Natural Resources; PHD, Cornell University
Hughes, Jeffrey Winston; Associate Professor, Department of Plant Biology; PHD, Cornell University
Keeton, William Scott; Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Washington
Kolan, Matthew Peter; Senior Lecturer, Rubenstein School of Environment and Natural Resources; PHD, University of Vermont
Mendez, Victor E.; Professor, Department of Plant and Soil Science; PHD, University of California Santa Cruz
Murdoch, James D.; Associate Professor, Rubenstein School of Environment and Natural Resources; DPHIL, University of Oxford
Paris, Catherine Ann; Senior Lecturer, Department of Plant Biology; PHD, University of Vermont
Poleman, Walter Mallery; Senior Lecturer, Rubenstein School of Environment and Natural Resources; MS, University of Vermont
Strong, Allan Matthew; Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, Tulane University

FIELD NATURALIST (PLANT BIOLOGY) M.S.
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
The Field Naturalist Program is a unique field-based experience that develops the potential of tomorrow’s conservation leaders by emphasizing scientific integration, oral and written communication, and environmental problem solving. Students receive a solid grounding in field-related sciences and are trained to integrate scientific disciplines into a coherent whole at the landscape level. Students also develop competence in evaluating field sites from a number of perspectives and/or criteria, translating scientific insights into ecologically sound decisions, and communicating effectively to a wide range of audiences.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Science, Field Naturalist Option
- A background in science
- Strong scores on the Graduate Record Examination
- A demonstrated commitment to field sciences (e.g., research, field work, participation in environmental or conservation organizations)

A subject (advanced) test in biology or geology is advised for students who lack substantive coursework in natural sciences. Recent college graduates are encouraged to pursue interests outside academe before application to the Field Naturalist Program.

Minimum Degree Requirements
All students must successfully complete a total of 30 credit hours that includes enrollment in the Field Naturalist Practicum (PBIO 311) and Professional Writing (PBIO 333) each semester and at least two courses in each of three core areas: (1) life science (2) earth science, and (3) ecology (course selection to be determined by the student’s studies committee). In addition, satisfactory completion of an oral comprehensive examination is required. A Field Naturalist student’s degree culminates in satisfactory completion of a field project for a sponsoring organization that includes a professional report, a focused literature review, a written academic reflection, an oral presentation, and a journal publication or article in the popular mass media.

Comprehensive Examination
An oral examination takes place in the student’s third semester. During this examination the student identifies, inventories and assesses the pieces, patterns, and processes of a previously unvisited landscape, and presents findings in a manner that would be meaningful to staff, officers, and scientists of The Nature Conservancy.
Requirements for Advancement to Candidacy for the Degree of Master of Science
Satisfactory completion of an oral comprehensive examination.

FOOD SYSTEMS
https://www.uvm.edu/foodsystems/graduate_programs

OVERVIEW
Food Systems is an exciting and flourishing domain of inquiry, one that looks at the complex and interdependent relationships between humans and their food - everything from microbes found in compost facilities to global trade agreements.

Always keeping in mind that food systems are evolving and dynamic, our curriculum integrates social science, humanities and natural science approaches to understanding connections among vital interests of humanity in creating nourishment, pursuing health and well-being and sustaining the environment.

The program draws from over thirty UVM faculty members with primary affiliations in fourteen departments extended across five colleges. The program curriculum integrates humanities, social and natural science approaches to understanding complex and interdependent food systems of varying scope and scale.

Students examine key issues in our contemporary food system through:

- Collaborate with community partners on a variety of food systems problems and solutions
- Engage in experiential education from farm-to-plate, in the field and in the laboratory
- Integrate ideas and knowledge using a transdisciplinary approach

DEGREES

- Food Systems AMP (p. 166)
- Food Systems M.S. (p. 166)
- Food Systems Ph.D. (p. 167)

FACULTY
Barlow, John; Associate Professor, Department of Animal and Veterinary Sciences; DVM, University of Illinois Urbana-Champaign; PHD, University of Vermont
Bartlett, Robert, V.; Professor, Department of Political Science; PHD, Indiana University Bloomington
Berlin, Linda; Extension Associate Professor, Department of Ext—Programming and Faculty Support; PHD, Tufts University
Bishop-von Wettberg, Eric; Assistant Professor, Department of Plant and Soil Science; PHD, Brown University
Bose, Pablo Shiladitya; Associate Professor, Department of Geography; PHD, York University
Budolfsen, Mark; Assistant Professor, Department of Philosophy; PHD, Princeton University
Chen, Yolanda H.; Associate Professor, Department of Plant and Soil Science; PHD, University of California Berkeley

Classen, Aimee; Professor, Rubenstein School of Environment and Natural Resources; PHD, Northern Arizona University
Conner, David S.; Associate Professor, Department of Community Development and Applied Economics; PHD, Cornell University
DeWitt, Rocki-Lee; Professor, Grossman School of Business; PHD, Columbia University
Donnelly, Catherine Wright; Professor, Department of Nutrition and Food Sciences; PHD, North Carolina State University Raleigh
Farley, Joshua C.; Professor, Department of Community Development and Applied Economics; PHD, Cornell University
Galford, Gillian; Research Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, Brown University
Garnett, Bernice Raveche; Associate Professor, Department of Education; SCD, Harvard University
Gennari, John; Professor, Department of English; PHD, University of Pennsylvania
Greenwood, Sabrina Louise; Associate Professor, Department of Animal and Veterinary Sciences; PHD, University of Guelph
Harvey, Jean Ruth; Professor, Department of Nutrition and Food Sciences; PHD, University of Pittsburgh
Heiss, Sarah Noel; Associate Professor, Department of Community Development and Applied Economics; PHD, Ohio University
Hurley, Stephanie E.; Associate Professor, Department of Plant and Soil Science; DDES, Harvard University
Kindstedt, Paul Stephen; Professor, Department of Nutrition and Food Sciences; PHD, Cornell University
Koliba, Christopher J.; Professor, Department of Community Development and Applied Economics; PHD, Syracuse University
Kolodinsky, Jane Marie; Professor, Department of Community Development and Applied Economics; PHD, Cornell University
Kraft, Jana; Associate Professor, Department of Animal and Veterinary Sciences; PHD, Friedrich-Schiller-University of Jena
Mares, Teresa Marie; Associate Professor, Department of Anthropology; PHD, University of Washington
Mendez, Victor E.; Professor, Department of Plant and Soil Science; PHD, University of California Santa Cruz
Merrill, Scott; Research Assistant Professor, Department of Plant and Soil Science; PHD, Colorado State University
Morse, Cheryl E.; Associate Professor, Department of Geography; PHD, University of British Columbia
Neher, Deborah; Professor, Department of Plant and Soil Science; PHD, University of California Davis
Niles, Meredith; Assistant Professor, Department of Nutrition and Food Sciences; PHD, University of California-Davis
Pinel, Elizabeth; Professor, Department of Psychological Science; PHD, University of Texas at Austin
Pope, Lizzy; Assistant Professor, Department of Nutrition and Food Sciences; PHD, University of Vermont
Smith, Julia M.; Research Associate Professor, Department of Animal and Veterinary Sciences; DVM, Cornell University
Tobin, Daniel; Assistant Professor, Department of Community Development and Applied Economics; PHD, Pennsylvania State University
Trubek, Amy B.; Professor, Department of Nutrition and Food Sciences; PHD, University of Pennsylvania

165
Zia, Asim; Professor, Department of Community Development and Applied Economics; PHD, Georgia Institute of Technology

**FOOD SYSTEMS AMP**

All students must meet the Requirements for the Accelerated Master's Degree Programs (p. 264)

**OVERVIEW**

Qualified University of Vermont undergraduate students who plan to earn a Master's degree in Food Systems may enroll in the Accelerated Master's Program (AMP), which enables students to begin working on a master's degree while still an undergraduate. Students apply to the program in the second semester of their junior year or the first semester of their senior year. After admission to the graduate program by the Graduate College, students will choose 6 credits of graduate level courses from the list of approved electives below that can be taken while still an undergraduate. These credits will also count towards the master's degree.

**APPROVED ELECTIVES - FOR AMP STUDENTS PRIOR TO COMPLETION OF THE BACHELOR'S DEGREE.**

The instructor of record must acknowledge their registration at the graduate level before the course begins.

- ENVS 212 - Advanced Agroecology
- CDAE 208/ASCI 208 - Agricultural Policy & Ethics
- CDAE 237 - Economics of Sustainability
- ANFS 313 - Food Safety & Public Policy
- CDAE 326 - Community Economic Development
- CDAE 354 - Advanced Microeconomics
- PA 306 - Policy Systems
- PA 317 - Systems Analysis & Strategic Management
- PH 312 - Food Systems & Public Health
- CDAE 321 - Economics of Sustainable Food Systems

**SPECIFIC REQUIREMENTS**

Must be a UVM student with a declared Major or Minor in Food Systems. Please visit the Food Systems Graduate program website for application information and deadlines.

**Requirements for Admission to Graduate Studies for the Degree of Master of Science for Accelerated Master's Students**

- A declared Food Systems Major or Minor
- Cumulative GPA of 3.00 or higher
- Completion of a college-level statistics course
- Completion of the Graduate College application form and three letters of recommendation, including a faculty letter of support from a current Food Systems Graduate Faculty member

**Minimum Degree Requirements**

Food Systems Immersion Requirement: May be taken fall, spring or summer terms, or during semester breaks (3 credits). Students have the option of taking a travel immersion or practicum course, or a community internship.

The remainder of required credit hours must be satisfied through graded electives.

**Comprehensive Examination**

There is a required comprehensive examination. The details and format are decided upon by the Project & Thesis Committee and will be discussed with the student well in advance of the exam.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**

Satisfactory completion of the Comprehensive Exam.

**FOOD SYSTEMS M.S.**

All students must meet the Requirements for the Master's Degree (p. 265)

**OVERVIEW**

Food Systems M.S. graduates gain a broad and deep understanding of contemporary food systems, as well as a set of applied skills and experience – preparing them to succeed.

Most students complete required coursework and spend one semester designing and researching a final project. However, upon request of a Food Systems faculty member, a student can design a year-long thesis research project.

For more information, please contact the Program Coordinator.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Science**

The Food Systems Graduate Program is transdisciplinary and involves an understanding of social, physical, and life science concepts related to food from production through consumption. Therefore, students from all academic backgrounds are welcome to apply.

Minimum requirements include:

- GPA of 3.00 or higher
- Completion of the GRE with satisfactory results in the general (aptitude) portion. Read Graduate Admissions Tests for more information. If you have received a Master's Degree from an accredited institution, you may request to have the GRE waived. Contact the Program Coordinator for more information.
• TOEFL or IELTS exam scores must be submitted if you are an international student.
• Completion of a college-level statistics course. If this information is not clearly listed on a college transcript, you will need to provide additional documentation as evidence that you have fulfilled this requirement.

Minimum Degree Requirements
31 credit hours, including:

Food Systems Immersion Requirement: May be taken fall, spring or summer terms, or during semester breaks (3 credits). Students have the option of taking a travel immersion or practicum course, or a community internship.

The remainder of required credit hours must be satisfied through graded electives.

Comprehensive Examination
There is a required comprehensive examination. The details and format are decided upon by the Project & Thesis Committee and will be discussed with the student well in advance of the exam.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Satisfactory completion of all degree requirements and the Comprehensive Exam.

FOOD SYSTEMS PH.D.
All students must meet the Requirements for the Doctor of Philosophy Degree (http://catalogue.uvm.edu/graduatedegreerequirements/requirementsforthedoctorofphilosophydegree)

OVERVIEW
The PhD in Food Systems combines a comprehensive investigation of food systems and a commitment to developing methods for solving the current problems of the food system through a cohort intensive experience. Every year, the food systems cohort will work together to address problems and devise potential solutions. Students then move towards disciplinary depth and mastery by designing a course of study with a dissertation committee and developing a research proposal. Students will also engage in independent research.

SPECIFIC REQUIREMENTS

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY
There are two ways for a potential PhD candidate to pursue this program. First, a student with a BA/BS can apply to the PhD program. Second, a student can apply to the PhD after completing an MA or MS in an allied field, either at the University of Vermont or at another institution.

Minimum requirements include:
• GPA of 3.00 or higher
• Completion of the GRE with satisfactory results in the general (aptitude) portion. If you have received a Master’s Degree from an accredited institution, you may request to have the GRE waived. Contact the Program Coordinator for more information.
• TOEFL or IELTS exam scores must be submitted if you are an international student.
• Completion of a college-level statistics course. If this information is not clearly listed on a college transcript, you will need to provide additional documentation as evidence that you have fulfilled this requirement.
• A letter of support from a Food Systems Faculty member who agrees to serve as primary advisor during enrollment in the PhD Program.

MINIMUM DEGREE REQUIREMENTS
75 credits, including a minimum of 30 hours of graded coursework and 20 credits of supervised dissertation research.

<table>
<thead>

</tbody>
</table>

Students must also take a minimum of 9 credits of methodology coursework in consultation with advisor that represent a variety of methodological and research design approaches, such as FS 335, CDAE 351, EDLP 459, and CSYS 302. Consult with advisor for complete list.

Students must also take FS 395 - Issues and Solutions Seminar two times during their course of study. This is a one credit seminar.
COMPREHENSIVE EXAMINATION
The comprehensive examination is a tool to evaluate the progress of each student and ensure that they are prepared to proceed toward the doctorate degree.

Phase 1 is an oral exam that tests the student’s ability to read, analyze and synthesize scholarly knowledge across disciplines as well as to design a research-based response to a specific food systems issue or problem.

Phase 2 includes two steps: a dissertation pre-proposal and proposal submission. The form, content and timeline will be explained to the student by their advisor and will follow guidelines set forth by the Project and Thesis committee, in collaboration with the student’s dissertation committee.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY
Maintain a 3.00 GPA in designated first and second year courses and successful completion of the comprehensive exam.

GEOLOGY
http://www.uvm.edu/~geology/

OVERVIEW
The Master of Science in geology is a rigorous research thesis program with grounding in related course work. Research programs include environmental geology; geomorphology; water resources; environmental (bio)geochemistry; mineralogy; sedimentary, igneous and metamorphic environments; geochronology and structural geology; tectonics; and the evolution of orogen. Examples of specific faculty interests include geologic history and recent sedimentation in the Lake Champlain Basin; processes and chronology of glaciation; stable and cosmogenic isotopic studies; water quality and pollutant transport; crystal chemistry and crystallography; mineral structure analysis; environmental mineralogy; water-rock interactions; (bio)geochemical cycling in the critical zone; the tectonic evolution of continental margins and interiors; petrofabric and structural analysis of deformed rocks; partial melting and deep crustal processes; timing of deformation and rates of tectonic processes; and stratigraphy and sedimentary environments of lower Paleozoic sandstones and carbonates.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Science
- Bachelor’s degree in geology or related field from an accredited institution with year-long courses in chemistry, physics, biology, and mathematics preferred. The M.S. program is also open to undergraduate majors in physics, chemistry, biology, engineering or mathematics who have accumulated twelve semester hours of course work in geology.
- Strong undergraduate record, letters of recommendation, and satisfactory basic GRE scores.

Applicants should identify a potential faculty advisor (or advisors) and include research interests in the application statement.

Acceptance to the program is a competitive process and admission is dependent upon available Teaching and/or Research Fellowships.

Minimum Degree Requirements for the Degree of Master of Science
Admitted students will be assigned a three-person advisory committee at the beginning of the first year of graduate study. The
committee will prescribe a study program based on the interests of the student and the principal graduate advisor.

For the thesis option, successful writing, oral presentation and defense of a research thesis are required. Satisfactory completion will be determined by the candidate’s thesis committee. Advanced courses in geology must total at least thirty semester hours, including at least one 300-level course and six to nine credits for thesis research. Students enrolled in a traditional (thesis) M.S. cannot switch to the non-thesis option without prior approval from the thesis committee.

For the non-thesis option, at the time of enrollment the student must select a general area in which to write a project report. The report is the culmination of independent study and may be the result of an extensive literature search, fieldwork, laboratory work, or similar effort. The report must follow the general guidelines for writing a thesis and is subject to the principal advisor’s approval. Advanced courses in geology must total at least thirty semester hours, including at least one 300-level course and three to six credits for research.

Both options require giving a public oral defense after the thesis or non-thesis research project is completed.

For both options, a minimum of fifteen graded credits used in compilation of the graduate GPA must be taken in residence at UVM. Advanced courses in related sciences are encouraged and may be substituted for some selected geology courses on approval by the departmental advisor. With the prior approval of their department and the Graduate College, students may apply one 100/200 level, three-credit undergraduate course towards their graduate program. A student’s advisor must petition the Graduate College for approval before the student enrolls in the course. Consult individual programs for further limitations. Under no circumstances will a course numbered below 100 be applicable to a master’s program.

Comprehensive Examination
The comprehensive exam for the Geology M.S. comprises two parts. Part 1 is a written research proposal and oral presentation that must be completed before the end of the second semester. The proposal must discuss the research objectives and its significance and include a work plan demonstrating feasibility. The presentation is followed by geology faculty/thesis committee questions that cover the assumptions, methodology, and the relationship of the proposed work to and its dependence on auxiliary sciences. Part 2 is a written progress report and oral presentation and must be completed before the end of the third semester. The progress report presents the latest research findings and must demonstrate sufficient progress toward the M.S. degree. Faculty/committee questions cover the data presented, interpretations, and work plan to complete the thesis.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Advancement to candidacy requires satisfactory completion of a comprehensive examination. The comprehensive examination includes both a written and oral 1) research proposal and 2) progress report during the second and third semesters of enrollment, respectively.

GERMAN
http://www.uvm.edu/~grdept/

OVERVIEW
Current research interests include history of German language; Medieval literature; literature of the 18th, 19th, 20th, and 21st centuries; folklore; Exile studies; and translation studies.

DEGREES
- German M.A. (p. 169)

FACULTY
Mieder, Wolfgang; Professor, Department of German and Russian; PHD, Michigan State University
Schreckenberger, Helga; Professor, Department of German and Russian; PHD, University of Kansas

GERMAN M.A.
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
Current research interests include history of German language; Medieval literature; literature of the 18th, 19th, 20th, and 21st centuries; folklore; Exile studies; and translation studies.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Arts
An undergraduate major in German, including a year course in literature and a year course in advanced composition and conversation or the equivalent. Satisfactory scores on the Graduate Record Examinations general (aptitude) section.

Minimum Degree Requirements
Thirty credits of graduate-level courses including:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>GERM 281</td>
<td>Sem in Lit Genre,Period,Theme</td>
<td>3</td>
</tr>
<tr>
<td>GERM 282</td>
<td>Sem on Particular Author</td>
<td>3</td>
</tr>
<tr>
<td>Additional courses in German, which may include two advanced courses in a related field</td>
<td>12-18</td>
<td></td>
</tr>
<tr>
<td>Thesis research</td>
<td>6-12</td>
<td></td>
</tr>
</tbody>
</table>

Comprehensive Examination
The comprehensive exam for the German M.A. degree is taken upon completion of all required coursework (at the end of the 4th semester, at latest). The exam is conducted over a period of five hours. Subject matter for the exam questions will be drawn from three German graduate program courses of the student’s choosing. In each subject area, students will answer one of the three questions offered.
Requirements for Advancement to Candidacy for the Degree of Master of Arts

Students need to pass the comprehensive examination and successfully complete and defend a thesis.

GREEK AND LATIN

http://www.uvm.edu/~classics/

OVERVIEW

Our program emphasizes mastery of general philological skills in Greek and Latin, in preparation for further training at the doctoral level, teaching in public and private highschools, and a variety of other interesting paths. Current faculty research interests include Mycenaean and Homeric Greece; Greek and Latin lyric poetry; Greek drama; Attic orators; ancient literary criticism; Greek and Roman philosophy and intellectual history; Greek and Roman historiography; Latin epic and satire; Greek and Roman technical authors; Roman imperial families; mythology; the Ancient Near East and Egypt; ancient music and performance.

DEGREES

- Greek and Latin AMP (p. 170)
- Greek and Latin M.A. (p. 171)
- Greek and Latin M.A.T. (p. 172)

FACULTY

Bailly, Jacques A.; Associate Professor, Department of Classics; PHD, Cornell University
Chiu, Angeline C.; Associate Professor, Department of Classics; PHD, Princeton University
Franklin, John C; Professor, Department of Classics; PHD, University College London
Usher, Mark David; Associate Professor, Department of Classics; PHD, University of Chicago

GREEK AND LATIN AMP

All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

OVERVIEW

This Accelerated Master’s Program (AMP) offers select UVM undergraduate students of Greek and Latin an opportunity to earn both the bachelor’s and master’s degrees in Greek and Latin in 5 years. Nine credits toward the M.A. are earned during the senior year (6 of which may also count toward the B.A.). The remaining M.A. credits are completed in the 5th year. Full-time graduate student status can begin the summer after undergraduate graduation and be maintained until completion of the M.A. in Greek and Latin. Students typically pursue the master’s degree in Greek and Latin either as a stepping stone to doctoral work (hopefully well-funded as a result), or to teaching in high schools (typically Latin).

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of arts for Accelerated Students

Students must apply for and be accepted to the AMP through the standard Graduate College application process, except that GRE scores are not required. Normally, the application and admission process must be finalized prior to the beginning of the senior year (typically in the Spring of the junior year). Students must be admitted by the Graduate College before taking any courses that will apply to the master’s degree, i.e., all courses used for the master’s degree must be taken after formal admission to the AMP. Courses approved for graduate credit are 200-level or higher with the prefix GRK, LAT, CLAS, or GKLT. Students taking a course approved for graduate credit as part of the AMP program must notify the faculty member they are taking the course at the graduate level before the course begins and must complete the additional work required of graduate students in that course. That notification must be copied to gradcoll@uvm.edu. (gradcoll@uvm.edu)

Consideration for admission requires the following:

- Minimum cumulative GPA of 3.00
- Minimum knowledge of Greek and Latin language: at least one course in each language at the 200-level (the more the better).
- Standard Graduate College application, including:
  - Completion of the Graduate College Application form
  - 3 letters of recommendation from UVM faculty members
  - Reading knowledge of German (preferred), French, or Italian. Students lacking this may submit a plan describing how they will acquire such knowledge outside of the Spring and Fall semester of their 5th year for consideration (e.g. intensive course in summer between 4th and 5th years).

Minimum Degree Requirements for the Degree of Master of arts

<table>
<thead>
<tr>
<th>Track A (Non-Thesis)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>GKLT 300 Proseminar. This is offered every other year: when scheduling during an AMP student’s senior (4th) year, it must be taken then (course cannot be counted toward BA).</td>
<td>3</td>
</tr>
<tr>
<td>Eighteen credits of GKLT 381 (of which 6 are taken during senior year, and 12 in the fifth year).</td>
<td>18</td>
</tr>
<tr>
<td>Nine additional credits of advanced courses in Greek, Latin, Classics, or approved credits in related fields.</td>
<td>9</td>
</tr>
</tbody>
</table>

Most students should expect to follow Track A, since maximum exposure to language and literature is usually most beneficial at this stage-of-career. The development of research and writing samples for subsequent Ph.D. applications comes rather from four research papers (one per semester).

<table>
<thead>
<tr>
<th>Track B (Thesis)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Six credits of thesis research (GKLT 391), and successful completion and defense of a master’s thesis.</td>
<td>6</td>
</tr>
</tbody>
</table>
**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Arts**

An undergraduate major or minor or the equivalent; Greek and Latin language skills sufficient to take advanced courses (usually at least two years of each); a reading knowledge of a modern foreign language, usually French, German, or Italian. Satisfactory scores on the Graduate Record Examination (General test only).

**Minimum Degree Requirements**

</tr>
</tbody>
</table>

Most students should expect to follow Track A, since maximum exposure to language and literature is usually most beneficial at this stage-of-career. The development of research and writing samples for subsequent Ph.D. applications comes rather from four research papers (one per semester).

<tr>
<td>Comprehensive Examinations (see below)</td>
<td>Comprehensive Examinations (see below)</td>
</tr>
</tbody>
</table>

**Comprehensive Examination**

Comprehensive Exams may be taken in the first and last two weeks of Fall and Spring semesters. The Exams are in the following subjects: 1) Greek and Latin sight translation of passages from the department’s reading list. This must be attempted at the start of the fifth year; if not passed on the first attempt, it may be retaken at the start of the Spring term; 2) Greek and Roman History; 3) Literature and Philology. The GKLT 300 final exam may replace this exam if faculty agrees that it was appropriately structured, and student performed sufficiently well. 4) Modern Language: reading knowledge of German (preferred), French, or Italian, sufficient to conduct research in that language.

**Requirements for Advancement to Candidacy for the Degree of Master of Arts**

Completion of all requirements listed above for either the thesis or the non-thesis option.

**GREEK AND LATIN M.A.**

All students must meet the Requirements for the Master’s Degree (p. 265)

**OVERVIEW**

Our program emphasizes mastery of general philological skills in Greek and Latin, in preparation for further training at the doctoral level, teaching in public and private highschools, and a variety of other interesting paths. Current faculty research interests include Mycenaean and Homeric Greece; Greek and Latin lyric poetry; Greek drama; Attic orators; ancient literary criticism; Greek and Roman philosophy and intellectual history; Greek and Roman historiography; Latin epic and satire; Greek and Roman technical authors; Roman imperial families; mythology; the Ancient Near East and Egypt; ancient music and performance.
Requirements for Advancement to Candidacy for the Degree of Master of Arts

Completion of all requirements listed above for either the non-thesis or thesis Track.

GREEK AND LATIN M.A.T.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW

The M.A.T. is designed for two groups of people: those who already have licensure as secondary school teachers (but wish a higher qualification); and those who do not yet have licensure.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Arts in Teaching

An undergraduate major or minor or the equivalent in Greek, Latin, or Classics; most importantly Greek and Latin language skills sufficient to take advanced courses (usually at least two years of each); a reading knowledge of a modern foreign language—especially German, French, or Italian—is highly recommended.

Minimum Degree Requirements

Those who already have licensure must complete a minimum of thirty credits of work, with at least twenty-one in the field of specialization (Latin, Greek and Classical Civilization courses) and at least six in education (consult with advisor in education). Those who are seeking licensure must complete at least twenty-one credits in the field of specialization and at least thirty credits in education (consult with advisor in education).

In all cases, the individual program of study must be approved by advisors in Classics (for the Latin and related credits) and in Education (for the education credits).

Course requirements for the twenty-one credits in Latin, Greek, or Classical Civilization are as follows:

<table>
<thead>
<tr>
<th>GKLT 300</th>
<th>Proseminar</th>
<th>3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students must complete eighteen credits of Latin at or above the 200 level, including at least one semester of Latin Prose Composition (LAT 211/LAT 212). The following substitutions may be possible at the discretion of the Classics faculty: one 200-level or higher course in Roman (or Greek) history; one 200-level or higher course in Roman (or Greek) Art History; and 200-level Greek courses.</td>
<td>18</td>
<td></td>
</tr>
</tbody>
</table>

A second foreign language is strongly recommended, either a modern one as a second teaching field, or Greek as a complement to Latin.

The standards of performance in courses taken with the Department of Classics will be the same as for the M.A. in Greek and Latin.

Description and Timing of Comprehensive Examination

Students must take Comprehensive Exams in their field of specialization as well as in Education. (Please consult with Education for details about their comprehensive exam.) The student must pass the following specialization Exams:

- Latin sight translation Exam, to be taken at the end of the second semester (retaken, if needed, in the week before the start of third semester).
- Ancient History (emphasis on Roman, but including Greek and, if appropriate, Near Eastern History).
- Literature and Philology. The GKLT 300 final exam may replace this exam if faculty agrees that it was appropriately structured, and student performed sufficiently well.
- Oral examination taken at the conclusion of the teaching Practicum.

The format of the Comprehensive Examinations is at the discretion of the faculty. Students pursuing licensure are strongly encouraged to complete these exams before the end of the second semester, if possible (candidates will be fully occupied by education requirements in their second year, and Classics faculty are not available to administer exams in the summer).

Requirements for Advancement to Candidacy for the Degree of Master of Arts in Teaching

Completion of the above requirements.

GREEK AND LATIN LANGUAGES

http://www.uvm.edu/~classics/

OVERVIEW

Students and scholars in many disciplines (e.g. classics, history, English, Medieval studies, religious studies, philosophy) need proficiency in Latin and Greek to carry out research. Other students come to classics too late in their undergraduate career to acquire language proficiency at a level which qualifies them for Ph.D. or M.A.T. programs. Still other students are high school teachers who want to expand their repertoire of teaching subjects or who simply want to improve their mastery of their subject matter. Every year, excellent students inquire about the M.A. program who do not have sufficient Greek or Latin. Although some students may need to take a course or two prior to formally beginning the program in order to bring their Greek or Latin up to the level at which courses count for the certificate, this certificate offers an intensive language experience designed for such students.

DEGREES

- Greek and Latin Languages (GKLT) CGS (p. 173)
Faculty
Bailly, Jacques A.; Associate Professor, Department of Classics; PHD, Cornell University
Chiu, Angeline C.; Associate Professor, Department of Classics; PHD, Princeton University
Franklin, John C; Professor, Department of Classics; PHD, University College London
Usher, Mark David; Associate Professor, Department of Classics; PHD, University of Chicago

Greek and Latin Languages (GKLT) CGS
All students must meet the Requirements for the Certificates of Graduate Study (p. 265)

Overview
Scholars in many disciplines (e.g. Classics, History, English, Medieval studies, Religion, Philosophy) need proficiency in Latin and Greek to conduct research. Other students come to Classics too late in their undergraduate career to have acquired language proficiency at a level which qualifies them for Ph.D. programs. Still others are high school teachers who want to expand their teaching repertoire, or improve their mastery. This certificate program offers an intensive language experience for such students. For students it can fulfill many of the same goals as Post-Baccalaurate programs elsewhere, but students are held to a graduate-level standard in most of their coursework. Students in the M.A. program who are unable to complete their Comprehensive Exams may receive the C.G.S. instead.

Specific Requirements
Requirements for Admission to the Certificate of Graduate Study
Greek and Latin language abilities sufficient to succeed in advanced courses (generally, the minimum is at least 3 semesters or the equivalent in each language; students will struggle if they meet only the minimum).

Minimum Degree Requirements for Certificate of Graduate Study in Greek and Latin Languages
- Two GKLT 381 seminars, one in each language, are offered every semester. Each involves the work of the cross-listed 200-level literature seminar, supplemented by that of the concurrent Prose Style course (GRK 211, GRK 212 or LAT 211, LAT 212, depending on which is being offered that term) or a research paper (for the seminar not supplemented by Prose Style that term). The Prose Style component involves readings in literary prose, analyzed stylistically and imitated in composition.
- 3 additional credits of Greek or Latin, either as an Independent Study (by arrangement with Faculty) or an intermediate level course (GRK 051/LAT 051, GRK 052/LAT 052, LAT 101, LAT 102) enhanced by additional reading. Intermediate-level courses are more slowly paced, and include a good deal of syntax review and vocabulary building. As such, they admirably complement the graduate-level courses.
- Certificate students must maintain a GPA of 3.00.

Higher Education and Student Affairs Administration
https://www.uvm.edu/cess/dlds

Overview
The Higher Education and Student Affairs Administration (HESA) M.Ed. program is a nationally selective 40 credit-hour program designed to be completed within two years for full-time students and within three years for part-time students. We enroll students in a cohort-based model to promote strong and enduring relationships within seminar-based courses. Each cohort represents a wide spectrum of undergraduate majors, geographic locations, professional experience, and social identities, which promotes an enriching learning environment. All HESA graduates are considered part of The Vermont Connection, a spirited and active network of HESA alumni in fields related to student affairs, higher education administration, educational policy, research, and consultation.

The HESA graduate program offers a M.Ed. adhering to the Council for the Advancement of Standards (CAS) in Higher Education. The curriculum, including courses, practicum internships, and professional practice opportunities with the university and local institutions, integrates conceptual theory with administrative practice. ACPA/NASPA professional competency areas for student affairs educators are integrated throughout the program of study. Students gain an understanding of the student affairs profession, social justice and inclusion, college student development, history of and trends within U.S. higher education, organizational theory, and program assessment and evaluation. Social justice and pluralism, realities of American life and U.S. higher education are emphasized in the HESA graduate program. These emphases are expressed through course and experiential opportunities highlighting the diversity of people, experiences, perspectives, and structures in our democracy.

Mission Statement
To develop practitioner-scholars through academic and professional preparation whose commitment to reflection and social justice will transform higher education and student affairs in the spirit of The Vermont Connection.

Graduates from the HESA graduate program pursue national and international careers as professionals in colleges and universities, as well as in fields related to higher education. Professionals in this field serve as advisors, student service providers, policy makers, researchers, programmers, consultants, and administrators. Common to each functional area in student affairs and higher education is the goal to design opportunities conducive to students' growth and development.

HESA faculty provide mentorship through academic and professional advising. The curriculum is designed to promote self-directed field-based experiences to complement academic learning through 300
hours of practicum experience and summer internship opportunities. Campus partners cultivate relationships through supervising practica and assistantships, teaching HESA courses, and providing professional development opportunities. Funding opportunities are available to students through assistantships, full- and part-time work, and graduate travel stipends to professional and academic conferences.

Extensive information about the program is available on the HESA website.

Inquiries regarding this program should be addressed to:

The University of Vermont
Higher Education and Student Affairs Administration

Ballysingh, Tracy Arámbula; Assistant Professor, Department of Leadership and Developmental Sciences; PHD, University of Texas at Austin

Garvey, Jason C.; Assistant Professor, Department of Leadership and Developmental Sciences; PHD, University of Maryland, College Park

Hunter, Deborah, E.; Associate Professor, Department of Leadership and Developmental Sciences; PHD, Indiana University Bloomington

Thomas, Scott; Dean, College of Education and Social Services; Professor, Department of Leadership and Developmental Sciences; PHD, University of California Santa Barbara

HIGHER EDUCATION AND STUDENT AFFAIRS ADMINISTRATION M.ED.

All students must meet the Requirements for the Master of Education Degree (p. 266)

SPECIFIC REQUIREMENTS

Requirements for Admission

1. APPLICATION INFORMATION

Applications to the HESA Program are processed by the UVM Graduate College via the online admissions process. This process includes the documents that are listed below.

Applicants are strongly advised to submit all materials (e.g., transcripts, recommendations, resume) by or before the deadline to receive a full and timely review.

Through your admissions account set up in the Graduate College, you can check whether your application is complete and all materials (e.g., recommendations, transcripts) have been submitted. Your application will not be reviewed by the admissions committee until it is complete.

PLEASE NOTE: The assistantship application is due at the same time as the academic application.

Required Application Materials

- Graduate Application Form- The online application form is available on the Graduate College website.

- Statement of Purpose- Applicants should review the following when preparing the Statement of Purpose:

The HESA Statement of Purpose offers the applicant an opportunity to articulate his/her/zer reasons for pursuing graduate study in HESA and to review the skills and experiences that have informed the applicant’s desire to pursue studies in this area. The Statement will be reviewed for clarity of expression, grammatical construction, insight and clarity regarding the applicant’s reasons for pursuing study in the HESA Program. Select a quote that embodies a critical moment in your life and, in 750 words or less, reflect upon your aspirations and promise for pursuing the student affairs profession as a University of Vermont HESA.

- Three Letters of Recommendation

Applicants must request three letters written by individuals who have a professional relationship with the applicant and who are well acquainted with the applicant’s accomplishments and potential for becoming an effective professional. At least one of these letters should be from an academic advisor or instructor. Please do not include letters written by personal friends, family friends, therapists, or acquaintances. All letters of recommendation must be submitted by the recommenders by December 1. We allow a small buffer of a couple of days to allow for arrival and processing. Applicants are able to check to see if/when letters have been submitted.

PLEASE NOTE: Your application for assistantship (found on the Division of Student Affairs website) is separate from your application for admission to the HESA program, and the two applications are reviewed by separate groups of evaluators. The former is reviewed by assistantship providers who you may interview with for positions, and the latter is reviewed by the HESA program faculty. Here are what the letters of recommendation should address for each application:

HESA Academic Program Application: At least one letter from a faculty member (preferably two) and the third from a student affairs professional. These letters should highlight your preparedness for graduate level work, communication skills, critical reasoning skills, etc.

Student Affairs Graduate Assistantship Application: There are no restrictions on who writes these letters, but these letters should speak to your interests and passion for student affairs and should highlight your professional
preparation as an undergraduate student/returner to the academy.

Having shared these expectations, if the third individual who is writing your letter of recommendation can speak to these two separate but complementary criteria in the same letter, you can certainly use the same letters for both applications. However, each letter must have an original signature.

• Unofficial College Transcripts

Official transcripts are not necessary when submitting your application. An unofficial transcript of course work (undergraduate and graduate) should be submitted from every college and/or university attended for the Admissions Committee to review. Please make sure any community college credits are listed on your college or university transcript. If admitted to the program, you will be required to submit an official transcript for all course work (undergraduate and graduate) upon an acceptance of the offer.

• Professional Resume/Curricula Vitae (CV)

An up-to-date resume/CV that attests to the applicant’s education, work and volunteer experience should be included in the application packet.

• Test of English as a Foreign Language (TOEFL)

It is a Graduate College policy that applicants whose native or first language is not English must submit TOEFL test scores for admissions. The minimum acceptable score for admission to the Graduate College at the University of Vermont is 90; the minimum acceptable score for a student receiving funding at the University of Vermont is 100.

• Application Fee- $65

Please note:

• Candidates whose applications are COMPLETE (including the resume/CV) by December 1 will be given priority consideration. Applications completed after the December 1 deadline cannot be guaranteed a completed review by the interview session invitation deadline. As applications are completed and reviewed after the December 1 deadline, invitations to attend the on campus interview and program orientation occur on a rolling basis. Only applicants who have passed the admissions application review are invited for an on campus interview.

• All materials must be submitted online through the Graduate College. Materials that arrive external (e.g., in the mail, through email) to the online process cannot be considered for academic admissions.

• GREs are not required for academic admissions into the HESA program or for applicants seeking an assistantship or university funding through financial aid.

2. INTERVIEW

A one-and-a-half day Interview and Program Orientation Session is held for students who pass the initial academic application screening. Attendance for invited candidates is required for admission consideration into the HESA program. Invitations for the Interview and Program Orientation Sessions will be issued approximately three weeks prior to the first session.

Activities during these interview sessions include:

• an extensive welcome and academic program orientation including curriculum, program goals, and faculty,
• an academic interview with a HESA faculty member,
• meals with current students and University administrators,
• meetings with current students,
• orientation to the Division of Student Affairs, and
• assistantship interview(s), and
• visit to downtown Burlington.

Phone or Skype interviews are not an adequate substitute for a visit and orientation to the HESA program, University, Burlington, and Vermont.

Minimum Degree Requirements

Forty credits are required for the completion of the Master of Education degree in Higher Education and Student Affairs and the curriculum appears below. The course sequence varies depending on the student’s enrollment status (e.g., full or part-time). A faculty advisor will assist the student in preparing a program of study, which will be completed by the end of the first semester of the program. Successful completion of the program is based on the demonstration of appropriate knowledge, relevant skills, and personal characteristics, as well as the accumulation of credits in required coursework. Students are urged to hold either a twenty hours per week professional practice opportunity (e.g., volunteer position, graduate assistantship) during each semester if a full-time student; or a full-time position in college and/or student affairs administration, if a part-time student. Students are required to complete three practica internship assignments.

Comprehensive Examination
The comprehensive exam requirement of the Graduate College is met through successful completion of the Capstone Seminar course taken during the final semester of enrollment. This culminating experience is designed to be a final assessment of a student’s professional portfolio as aligned with the ACPA & NASPA Professional Competencies for Student Affairs Educators.

Requirements for Advancement to Candidacy for the Degree of Master of Education
At the conclusion of the first year of full-time study (completion of the prescribed 20 credit hours in the HESA curriculum with a minimum 3.00 GPA and no more than 1 grade below a B), HESA faculty assess students’ progression toward successful completion of the degree program.

HISTORIC PRESERVATION
http://www.uvm.edu/~histpres/

OVERVIEW
The University of Vermont Historic Preservation program aims to prepare graduate degree students for broad-based careers in the conservation and sustainable management of the historic environment through studies and research in heritage preservation administration, planning, architectural conservation, adaptive use and economic development, architectural and cultural history, documentation, law, and cultural resource management.

DEGREES
- Historic Preservation AMP (p. 176)
- Historic Preservation M.S. (p. 177)

FACULTY
McCullough, Robert L.; Professor, Department of History; PHD, Cornell University; JD, Hamline University
Visser, Thomas Durant; Professor, Department of History; MS, University of Vermont

HISTORIC PRESERVATION AMP
All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

OVERVIEW
The Historic Preservation Accelerated Master’s Program (AMP) provides an opportunity for capable undergraduate UVM students to enroll directly in the Historic Preservation graduate program while taking advantage of Accelerated Master’s Program degree incentives. Following their formal admission into the Historic Preservation AMP, students work simultaneously on their B.A. and M.S. requirements, counting up to six credits of 200-graduate level courses toward both the B.A. and the M.S. degrees. The remaining 30 credits of graduate study required for Historic Preservation M.S. degree normally would be taken in three semesters following undergraduate graduation.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Science for Accelerated Students
- Students must be working towards a baccalaureate degree with a major in a preservation-related field such as history, architectural history, art history, architecture, engineering, planning, business administration, economics, community development, interior design, law, American studies, or environmental studies.
- Cumulative GPA of 3.0
- Applicants must submit a writing sample.

A written comprehensive examination given during the third semester

An internship in a preservation agency, or a written thesis. The internship or thesis may be undertaken upon completion of two semesters of concentrated course work with advisor’s permission.
Students also take one elective unless they elect to do a thesis instead of an internship. For the thesis option, a total of six credits is required for HP 391, as well as advisor’s permission.

Comprehensive Examination
The comprehensive examination for M.S. Historic Preservation students is required to be taken by the end of the final semester of courses. Normally this is scheduled during the second half of the fall semester. This written examination covers broad knowledge in historic preservation. Information on the date, general details, and format of this examination is provided to students in advance.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Completion of the above requirements.

HISTORIC PRESERVATION M.S.
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
All graduate students enter the program in the fall. Most complete their studies after three semesters and a summer internship. Part-time enrollment is also possible by special arrangement.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Science
• A baccalaureate degree with a major in a preservation-related field such as history, architectural history, art history, architecture, engineering, planning, business administration, economics, community development, interior design, law, American studies, or environmental studies.
• Applicants must take the general (aptitude) portion of the Graduate Record Examination and submit a writing sample.

Minimum Degree Requirements for the Master of Science
Thirty-six credits of course work. A minimum of thirty-three credits (including an internship or thesis) must be taken in historic preservation.

Ergene, Bogac A.; Professor, Department of History; PHD, University of Toronto

HISTORY AMP

OVERVIEW

The accelerated master’s degree in history is designed to allow current UVM undergraduate history majors to earn both bachelor’s and master’s degrees in a streamlined period of time. Following formal admission to the Accelerated Master’s Program, students will work simultaneously on their B.A. and M.A. requirements, counting up to six graduate-level credits toward both the B.A. and the M.A. degrees. Beyond the six double-counted credits, an additional graduate-level course taken prior to award of the bachelor’s degree may be counted toward the master’s degree, provided the course does not also count toward the bachelor’s degree.

SPECIFIC REQUIREMENTS

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF ARTS FOR ACCELERATED STUDENTS

Applicants should be undergraduate history majors in the third year of the undergraduate program. Candidates must submit applications to the AMP through the standard Graduate College application process. The application includes an undergraduate transcript; three letters of recommendation from faculty members; a writing sample; and a statement of purpose. GREs are not required for the AMP. The application and admission process must be finalized before courses may be counted toward the M.A.

HST 301 is required for all students. Those enrolled in the Accelerated Masters Program may take this required course in the senior undergraduate year, when it will count toward the M.A., but not the B.A.

At least fifteen credits of course work must be earned in seminars, but students may complete independent study courses that involve the creation of individualized reading lists and regular meetings with instructors appointed to the graduate faculty. With the consent of the student’s advisor, six credits of the required course work for the M.A. may be taken in related fields outside of the history department. Students must maintain a grade point average of at least 3.30 (B+) each semester. Students failing to maintain this average will be dismissed from the program.

COMPREHENSIVE EXAMINATION

Students in the Accelerated Master’s Program must pass a comprehensive examination in a field of specialization, to be defined in consultation with the primary faculty advisor.

The examination requires students to provide a comprehensive analysis of major themes and problems in their field of historical specialization, including attention to historiography and interpretive
problems. The examination may take one of several forms, to be determined by the faculty advisor in consultation with the student and the director of graduate studies. Options include: a timed written examination; an oral examination; a take-home essay; a historiographical review undertaken as part of the student’s master’s thesis; an annotated syllabus or detailed lesson plans for a field of study. Exams will be assessed by the primary faculty advisor and a second faculty member.

Candidates whose initial efforts are not judged satisfactory may re-take the exam. In most instances, reexamination will occur within one month. Students failing the examination twice will be dismissed from the program.

AMP students will ordinarily take the Comprehensive Examination in December or January of the second year of the program.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF ARTS

Completion of the above requirements.

HISTORY M.A.

All students must meet the Requirements for the Master’s Degree (p. 265).

OVERVIEW

The Department of History offers a comprehensive program of courses in the history of the Americas, Europe, Asia, and Africa, and in global and comparative studies. At the graduate level, students develop broad historical knowledge and acquire training in historical interpretation and methods. Students may pursue the M.A. on either a part-time or full-time basis.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Arts

Applicants should have an undergraduate major in history or in a related field of the humanities or social sciences with the equivalent of a minor in history. The Graduate College application requires: Graduate Record Examination scores; letters of recommendation; a statement of purpose; and a writing sample (normally a research paper completed in an undergraduate history course).

To be considered for admission, a candidate must have a grade point average of 3.00 (B) in his or her last two years of undergraduate study, with evidence of better work 3.30 (B+) in history. Students will normally score above the 65th percentile on the Graduate Record Examination Verbal section.

Minimum Degree Requirements for the Degree of Master of Arts

<table>
<thead>
<tr>
<th>Option A (Portfolio)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>HST 301</td>
<td>Graduate Historiography</td>
</tr>
<tr>
<td>HST 397</td>
<td>Special Readings and Research</td>
</tr>
</tbody>
</table>

All students enrolled in the M.A. program are required to take HST 301 during their first semester. At least fifteen credits of course work must be earned in seminars, but students may complete independent study courses that involve the creation of individualized reading lists and regular meetings with instructors appointed to the graduate faculty. With the consent of the student’s advisor, six credits of the required course work for the M.A. may be taken in related fields outside of the history department. Students must maintain a grade point average of at least 3.30 (B+) each semester. Students failing to maintain this average will be dismissed from the program.

Description and Timing of Comprehensive Examination

All graduate students must pass a comprehensive examination in a field of specialization, to be defined in consultation with the primary faculty advisor. The examination requires students to provide a comprehensive analysis of major themes and problems in their field of historical specialization, including attention to historiography and interpretive problems. The examination may take one of several forms, to be determined by the faculty advisor in consultation with the student and the director of graduate studies. Exams will be assessed by the primary faculty advisor and a second faculty member. Comprehensive Examinations are typically taken in September or January of the second year of the program. Candidates whose initial efforts are not judged satisfactory may re-take the exam. In most instances, reexamination will occur within one month. Students failing the examination twice will be dismissed from the program.

Requirements for Advancement to Candidacy for the Degree of Master of Arts

Completion of the above requirements.
HUMAN FUNCTIONING AND REHABILITATION SCIENCE

http://www.uvm.edu/cnhs/

OVERVIEW

Human Functioning and Rehabilitation Science is translational in nature focusing on understanding the spectrum of human functioning from the basic physiological function of cells and body systems to overall physical and psychological health and unified by the common theme of human performance. The program is designed to consider health at three levels: 1) status of body structures and functions (molecular, cellular, and organ systems levels); 2) ability of the individual to participate in human activities and assume societal roles; and, 3) physical and social aspects of the environment that support the health of individuals and populations. This program prioritizes interprofessional and translational research. Students come from a wide range of disciplines (e.g., physical therapy and movement science, biomedical sciences, special education, communication disorders, nursing, neuroscience, psychology, nutrition, and related health professions). They learn side by side with other students and faculty from unique but related health professions to address the contextual nature of health conditions that affect body functioning, activity performance, and/or societal participation.

DEGREES

- Human Functioning and Rehabilitation Science Ph.D. (p. 180)

FACULTY

Angelopoulos, Theodore; Professor, Department of Rehabilitation and Movement Sciences, PhD, University of Pittsburgh

Bauerly, Kim; Assistant Professor, Department of Communication Sciences and Disordes, PhD, University of Toronto

Amiel, Eyal; Assistant Professor, Department of Biomedical and Health Sciences; PhD, Dartmouth College

Bosek, Marcia; Associate Professor, Department of Nursing; DNSC, Rush University

Cannizzaro, Michael S.; Associate Professor, Department of Communication Sciences and Disorders; PhD, University of Connecticut

Coderre, Emily; Assistant Professor, Department of Communication Sciences and Disorders, PhD, University of Nottingham

Deming, Paula; Associate Professor, Department of Biomedical and Health Sciences; PhD, University of North Carolina at Chapel Hill

Escorpizo, Reuben Samsuya; Clinical Assistant Professor, Department of Rehabilitation and Movement Science; DPT, Des Moines University

Frietze, Seth; Assistant Professor, Department of Biomedical and Health Sciences; PhD, Harvard University

Gell, Nancy; Assistant Professor, Department of Rehabilitation and Movement Science; PhD, Auburn University

Hutchins, Tiffany L.; Associate Professor, Department of Communication Sciences and Disorders; PhD, University of South Florida

Kasser, Susan; Associate Professor, Department of Rehabilitation and Movement Science; PhD, Oregon State University

Krementsov, Dimitry N.; Assistant Professor, Department of Biomedical and Health Sciences, PhD; University of Vermont

Laurent, Jennifer S.; Associate Professor, Department of Nursing; PhD, Duquesne University

Lewis, Laura Foran; Assistant Professor, Department of Nursing; PhD, University of Connecticut

Maltby, Hendrika J.; Professor, Department of Nursing; PhD, Curtin University of Technology

Mohaptra, Sambit; Assistant Professor, Department of Rehabilitation and Movement Sciences, PhD, University of Illinois, Chicago

Palumbo, Mary Val; Professor, Department of Nursing; DNP, Rush Medical College

Prelock, Patricia A.; Dean, College of Nursing and Health Sciences; Professor, Department of Communication Sciences and Disorders; Professor, Department of Medicine-Pediatrics; PhD, University of Pittsburgh

Sibold, Jeremy; Associate Professor, Department of Rehabilitation and Movement Science; EDD, West Virginia University

Tompkins, Connie L.; Associate Professor, Department of Rehabilitation and Movement Science; PhD, University of New Orleans

Tourville, Timothy; Assistant Professor, Department of Rehabilitation and Movement Science; PhD, University of Vermont

Velleman, Shelley; Professor, Department of Communication Sciences and Disorders; PhD, University of Texas Austin

HUMAN FUNCTIONING AND REHABILITATION SCIENCE PH.D.

All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

OVERVIEW

Human Functioning and Rehabilitation Science is translational in nature focusing on understanding the spectrum of human functioning from the basic physiological function of cells and body systems to overall physical and psychological health and unified by the common theme of human performance. The program is designed to consider health at three levels: 1) status of body structures and functions (molecular, cellular, and organ systems levels); 2) ability of the individual to participate in human activities and assume societal roles; and, 3) physical and social aspects of the environment that support the health of individuals and populations. This program prioritizes interprofessional and translational research. Students come from a wide range of disciplines (e.g., physical therapy and movement science, biomedical sciences, special education, communication disorders, nursing, neuroscience, psychology, nutrition, and related health professions). They learn side by side with other students and faculty from unique but related health professions to address the contextual nature of health conditions that affect body functioning, activity performance, and/or societal participation.

Doctoral student preparation considers three central principles:
1. Educating students as researchers and scientists, including how to contribute to evidence-based practice.

2. Fostering in students an interdisciplinary approach to education, research, and practice.

3. Engaging students in innovative instruction and assessment that is interprofessional and aligns with changes in delivery of health and human services.

SPECIFIC REQUIREMENTS

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Students with at least a master’s degree or the equivalent in a health-related field (e.g., kinesiology, exercise physiology, exercise science, movement sciences, communication sciences and disorders, rehabilitation science, nursing, biomedical science, laboratory science, etc.) may apply. Evaluations will be based upon the applicant’s grade point average, scores on the Graduate Record Exam (which may be waived for those who have successfully completed a master’s thesis), previous research experience, a statement of purpose for graduate study, and three letters of reference. In rare circumstances students with a bachelor of science degree showing exceptional promise as evidenced by their previous research experience, mentor recommendations, undergraduate GPA, and GRE scores (required in this case) will be considered.

MINIMUM DEGREE REQUIREMENTS

For students entering with a prior graduate degree in a relevant field, the Ph.D. in Human Functioning and Rehabilitation Science requires 76 credits, 32 of which are required course credits and 20 of which are required research credits. The remaining 24 credits are elective, 12 of which may transfer in from the prior degree. Students must maintain a 3.0 average in coursework, have no more than one grade below a B, have acceptable evaluations of their research, and pass their qualifying examination. Students will be required to teach in at least one course under the mentorship of a faculty member or serve as a teaching assistant for at least one course and mentor/co-mentor an undergraduate or master’s degree research project. The dissertation will be based on original research focusing on a significant problem in the student’s area of specialization with an interprofessional application. Under the guidance of the dissertation committee, each student will use a format consisting of three publishable papers (at least one of which has been submitted for publication) for which they are first author, with integrated introduction and conclusion chapters.

Students are required to take the following courses:

<table>

<td>12</td>
<td></td>
</tr>
</tbody>
</table>

Total Credits: 76

Students coming into the program with an undergraduate degree will need to earn an additional 12 credits of elective courses, for a total of 88 credits.

COMPREHENSIVE EXAMINATION

The qualifying examination process (QE), which serves as a comprehensive exam and the exam for advancement to candidacy for the PhD, will be undertaken after students have completed all of the didactic course requirements of the program with a GPA of 3.0 or better. This exam process will consist of two portions, a research proposal written in the form of a grant proposal and an oral defense of this proposal, and a dissertation concept paper.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

Doctoral candidacy is achieved after the student passes a formal proposal defense. After approval of the concept paper, the student works on the formal dissertation proposal, and, with guidance from his/her dissertation chair, schedules a date with the committee for the formal proposal defense.

INTERDISCIPLINARY - EDUCATION

https://www.uvm.edu/cess/dlds

OVERVIEW

Students in the Interdisciplinary Studies program in education represent a variety of professions including higher education administration, public school education, law enforcement, social and human services, business, military, health care, non-profits, etc. The program is ideally suited for persons whose personal and professional development requires a combination of course work not readily available in other graduate programs, or for individuals who plan to assume new or emerging roles in the fields of education or social and human services.
DEGREES

• Interdisciplinary M.Ed. (p. 182)

FACULTY

Nash, Robert James; Professor; Department of Leadership and Developmental Sciences; EDD, Boston University

INTERDISCIPLINARY M.ED.

All students must meet the Requirements for the Master of Education Degree (p. 266)

OVERVIEW

This degree program is for students who wish to pursue an individually designed, integrated program of study. The program draws primarily from graduate courses in Educational Leadership, Counseling, and Higher Education and Student Affairs Administration but may include courses from other departments within the college and the university.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Education

Applicants should have a clear understanding of how the Interdisciplinary graduate program will serve their career goals. For this reason, major emphasis in admissions is placed upon the applicant's Statement of Purpose. Detailed information about admission criteria is as follows:

• First, schedule a face-to-face interview with the program director at a time that is convenient for you.
• After the interview, and depending on whether the program fit is a satisfying one, submit an online application through the Graduate College of the University of Vermont.
• Submit three letters of reference, at least one of which should be an academic reference. Because some students have been out of college for a number of years (even decades), professional workplace references are also accepted.
• Transcripts are required from all previous institutions attended.
• A writing sample is required only if requested
• There is no Graduate Record Examination (GRE) requirement.
• There is no deadline for application, the program has a rolling admissions policy that is in effect 12 months a year.
• Up to 9 graduate credits previously earned within a five-year period can be transferred into the program.

Minimum Degree Requirements

The Interdisciplinary degree is self-designed. No two programs look the same. All programs are worked out under the supervision of the program director. All programs are subject to student modification at any time depending on the changing personal, academic, and professional interests of the student. Here are the basic curriculum requirements:

• 36 credits are required. There is a 5-year time period to finish the degree. All courses are offered once a week in the late afternoon or early evening. Summer courses are also available. Most of these summer courses run daily for two weeks, 4 1/2 hours at a time. The average number of years that students take to complete the Interdisciplinary program is currently 3 years. The majority of students are part-time.
• A minimum of two Foundations (EDFS) courses are required of most graduate programs in the College of Education and Social Services. Currently, students in the Interdisciplinary program satisfy this requirement by enrolling in EDFS 302 Philosophy of Education, EDFS 304 Religion, Spirituality and Education, and/or EDFS 309 Scholarly Personal Narrative Writing. There are also EDFS research courses available in quantitative and qualitative methodologies, as well as special topics EDFS courses in other subject matter, including courses in multicultural education.
• A minimum of 18 graduate level credits must be taken in the College of Education and Social Services. The other 18 graduate-level credits can be taken anywhere in the University of Vermont (if desired). And, of these 18 credits, 9 graduate credits can be taken outside the University of Vermont and transferred into the Interdisciplinary program. All courses must be graduate-level courses and must be directly relevant to each student's overall goals and purposes.
• The Interdisciplinary program has a 6-credit thesis option. These 6 credits replace 6 course credits. Currently over two-thirds of students elect to write a thesis. Selecting and researching a thesis topic is an excellent way to integrate all the components of the Interdisciplinary program for students.

Comprehensive Examination

All College of Education and Social Services graduate programs have a no-credit, written, comprehensive examination requirement for graduation. This requirement is individualized according to the unique professional needs of the student and is worked out with the program director.

Requirements for Advancement to Candidacy for the Degree of Master of Education

Successful completion of any prerequisite courses, and at least 15 graded graduate credits with a 3.00 GPA or better, including all core courses.

INTERDISCIPLINARY STUDY OF DISABILITIES

http://www.uvm.edu/~cdci/

OVERVIEW

This 18 credit Certificate integrates graduate level courses, independent study and fieldwork into an individualized plan, exploring disability across different fields of study and academic disciplines. Participants come from a broad range of programs and professional backgrounds. The program is designed to complement work done in traditional discipline-specific programs.
DEGREES

- Interdisciplinary Study of Disabilities (ISD) CGS (p. 183)

FACULTY

Avila, Maria Mercedes; Associate Professor, Department of Medicine-Pediatrics; PHD, University of Vermont

Killeen, Kieran M.; Associate Professor, Department of Leadership and Developmental Sciences; PHD, Cornell University

INTERDISCIPLINARY STUDY OF DISABILITIES (ISD) CGS

All students must meet the Requirements for the Certificates of Graduate Study (p. 265)

OVERVIEW

The Certificate of Graduate Study in ISD provides education, social services, healthcare, other professionals, and individuals with disabilities and their family members, access to a cohesive and relevant course of studies to enhance their education and instructional knowledge of disability studies. The certificate includes a total of eighteen credits, nine in core courses and nine in approved elective courses. Two options are offered:

1. Establish a general understanding of disabilities and of related interdisciplinary practices across disciplines;
2. Combine core courses with the focused study of a specific disability or related practice area.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Certificate of Graduate Study

- Completed bachelor’s degree
- Completed Graduate College Application
- Official transcripts from each college or university where credit has been earned
- Three letters of recommendation
- A personal statement of purpose
- A cumulative grade point average of 3.00 is recommended

Minimum Degree Requirements

The Certificate of Graduate Study in the ISD requires eighteen credits. Students admitted to the program must complete EDSP 274/CSD 274, EDSP 200, and develop an individualized plan of study for the remaining 12 credits. Depending on the chosen field of study, students work with their graduate advisor (if applicable) and the coordinator of this certificate program to identify twelve additional credits of coursework for their degree plan.

The core courses that are required for this certificate are:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>EDSP 274</td>
<td>D2: Culture of Disability</td>
<td>3</td>
</tr>
<tr>
<td>EDSP 200</td>
<td>Contemporary Issues</td>
<td>3</td>
</tr>
</tbody>
</table>

Although not an exhaustive list, suggested courses include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSD 299</td>
<td>Autism Spect Dis: Assess &amp; Interv</td>
<td></td>

<tr>
<td>PH 301</td>
<td>Public Health &amp; Health Policy</td>
<td></td>
</tr>
<tr>
<td>PH 311</td>
<td>Global Public Health</td>
<td></td>
</tr>
<tr>
<td>SWSS 220</td>
<td>Soc Welfare Pol &amp; Services I</td>
<td></td>
</tr>
<tr>
<td>SWSS 216</td>
<td>Th Found of Hum Beh &amp; Soc Envr I</td>
<td></td>
</tr>
</tbody>
</table>

Exception: VT LEND students taking this certificate are required to complete the following three required courses (nine credits) and three elective courses (nine credits).

The three required core courses for VT LEND students are:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSD 311/GRNS 380</td>
<td>Intradsc Sem Neurodev Disabl 1</td>

<td>3</td>
</tr>
</tbody>
</table>

Additional information about this program in the ISD is available from the Certificate of Graduate Study website.

MATERIALS SCIENCE

http://www.uvm.edu/matsci/

OVERVIEW

UVM’s graduate program in Materials Science is engaged in interdisciplinary education and research on the fundamental physical, chemical, electrical and mechanical properties and applications of materials. Our internationally-recognized faculty and our graduate students focus on a variety of theoretical and experimental research topics ranging from electronic materials to bio-polymers. Current interests include nanomechanics, graphene and quantum magnetism, dynamics of quantum systems, spin-dependent phenomena in semiconductors, real-time x-ray scattering and thin film microfabrication, synthesis of novel organometallics and small molecule semiconductors. Experimental and computational on-campus facilities include state-of-the-art transport, microscopy, spectroscopy (optical and X-ray) characterization and a supercomputing center. Our experimental faculty and graduate students work in close collaboration with scientists from national laboratories such as the Brookhaven National Lab and the National High Magnetic Field Lab.

We offer students the opportunity to follow customized curricula organized in three tracks (Electronic Materials, Biomaterials and Mechanics of Materials) that prepares them to be successful in their chosen research area. Research and teaching graduate assistantships
are available for full-time students on a competitive basis and the program also welcomes self–supporting part-time students in partnership with industry.

MATERIALS SCIENCE AMP

All students must meet the Requirements for the Accelerated Master's Degree Programs (p. 264)

OVERVIEW

The Accelerated Master's Program leads to both B.S. and M.S. degrees in five years. The program is open to undergraduate physics, electrical engineering, and mechanical engineering majors. Interested students should contact the Materials Science director by the beginning of their junior year.

Following formal Graduate College admission to the Accelerated Master's Program, up to six credits of approved graduate course work may be taken that may be counted toward both the undergraduate and graduate degree requirements.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science

A major in physics, chemistry, engineering, or mathematics.

Minimum Degree Requirements

The above requirements for admission must be supplemented in either of the following ways:

<table>
<thead>
<tr>
<th>Option A (Thesis)</th>
<th>Option B (Non-thesis)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thirty graduate credits of an approved program of study including at least eighteen credits of course work; completion of at least one three-credit course in each of the following categories: solid state theory, quantum mechanics, applied mathematics, and materials properties of solids; satisfactory completion of a comprehensive examination, and satisfactory completion of an M.S. thesis including its defense at an oral examination</td>
<td>Thirty graduate credits of an approved program of study; completion of at least one three-credit course in each of the following categories: solid state theory, quantum mechanics, applied mathematics, and materials properties of solids, and satisfactory completion of a comprehensive examination</td>
</tr>
</tbody>
</table>

Comprehensive Examination

Full-time Materials Science M.S. candidates are required to pass a written Comprehensive (Qualifying) Exam with a score of 50% or better, no later than four semesters after joining the program. Failure to pass the test will result in dismissal from the program. The deadline for part-time students is the semester they complete 24 credits. All students (full and part-time) are allowed a maximum of two attempts to pass the exam. Offered annually, the three-hour exam requires students to solve a minimum of four problems that cover the following topics: quantum mechanics, mathematical physics, mechanical behavior of materials, thermal physics, solid state physics, advanced inorganic chemistry or equivalent core course requirements.
Requirements for Advancement to Candidacy for the Degree of Master of Science
Successful completion of a comprehensive examination in Materials Science.

MATERIALS SCIENCE M.S.
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
Students must engage in research and defend a thesis and complete a comprehensive exam.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science
A bachelor’s degree in physics, chemistry, metallurgy, engineering, materials science, or mathematics. Applicants with other backgrounds will be evaluated individually.

Minimum Degree Requirements
The above requirements for admission must be supplemented in either of the following ways:

<table>
<thead>
<tr>
<th>Option A (Thesis)</th>
<th>30</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thirty graduate credits of an approved program of study including at least eighteen credits of course work; completion of at least one three-credit course in each of the following categories: solid state theory, quantum mechanics, applied mathematics, and materials properties of solids; satisfactory completion of a comprehensive examination; and satisfactory completion of an M.S. thesis including its defense at an oral examination</td>

Failure to pass the test will result in dismissal from the program. The deadline for part-time students is the semester they complete 24 credits. All students (full and part-time) are allowed a maximum of two attempts to pass the exam. Offered annually, the three-hour exam requires students to solve a minimum of four problems that cover the following topics: quantum mechanics, mathematical physics, mechanical behavior of materials, thermal physics, solid state physics, advanced inorganic chemistry or equivalent core course requirements.

Requirement for Advancement to Candidacy for the Degree of Master of Science
Successful completion of a comprehensive examination in Materials Science.

MATERIALS SCIENCE PH.D.
All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

OVERVIEW
The Materials Science Ph.D. leads to a degree in five years. Students must engage in research and defend a dissertation. Successful completion of a comprehensive exam within the first two years of the program is required.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy
An accredited master’s degree (or equivalent) in physics, chemistry, metallurgy, engineering, mathematics, or materials science.

Minimum Degree Requirements
In addition to the above, the following are required:

- A minimum of seventy-five graduate credits including a minimum of twenty in dissertation research. An overall grade point average in graduate courses of 3.25 or better
- Completion of at least one three-credit course in each of the following five categories:
  - Solid state theory
  - Quantum mechanics
  - Applied mathematics
  - Thermodynamics and kinetics
  - Materials properties of solids
- Satisfactory completion of a Ph.D. dissertation including its defense at an oral examination

Comprehensive Examination
Full-time Materials Science Ph.D. candidates are required to pass a written Comprehensive (Qualifying) Exam with a score of 50% or better, no later than four semesters after joining the program. Failure to pass the test will result in dismissal from the program. The deadline for part-time students is the semester they complete 24 credits. Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy
Successful completion of a comprehensive examination in Materials Science.

MATHEMATICAL SCIENCES
http://www.uvm.edu/~cems/mathstat/

OVERVIEW
The Department of Mathematics and Statistics offers programs towards the Doctor of Philosophy in Mathematical Sciences (the Ph.D. degree under the program heading of MASC). Students are encouraged to take courses in both core mathematics and applied mathematics, thereby gaining an appreciation of the connections between theory and applications.

Opportunities for research arise from the research interests of the Department faculty, which include analysis, algebra, biomathematics, combinatorics, complex systems, computational social science, differential equations, fluid mechanics, graph theory, mathematics education, modeling, network science, and number theory.

The Department also offers Master of Science degrees in Biostatistics, Mathematics, and Statistics.

DEGREES
- Mathematical Sciences Ph.D. (p. 186)

MATHEMATICAL SCIENCES PH.D.
All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

OVERVIEW
The Department of Mathematics and Statistics offers programs towards the Doctor of Philosophy in Mathematical Sciences (the Mathematical Sciences Ph.D. degree). There are three areas of concentration: applied mathematics, core mathematics and statistics. Students concentrating in either core or applied mathematics are encouraged to take courses in both core mathematics and applied mathematics, so as to gain an appreciation of the methods of both, and the connections between theory and applications.

Opportunities for research arise from the research interests of the Department faculty, which include analysis, algebra, biomathematics, combinatorics, complex systems, computational social science, differential equations, fluid mechanics, graph theory, mathematics education, modeling, network science, and number theory. Research foci in statistics include bioinformatics, sequential analysis, three stage sampling, time series analysis, survival data analysis, discriminant analysis, bootstrap methods, categorical data analysis, measurement error models, and experimental design. Opportunities are available for biostatistical research related to problems in agriculture and the life sciences, health and medicine, and natural resources and the environment.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy
Because of the breadth of pure and applied mathematics and statistics, it is recognized that applicants for admission will have diverse backgrounds. Admission requirements are therefore flexible. Applicants should have demonstrated strength in either
core or applied mathematics, a bachelor’s degree with a major in mathematics, statistics or a closely related discipline.

**Minimum Degree Requirements for the Degree of Doctor of Philosophy**

Each student must complete the comprehensive examination and an approved plan of study including at least seventy-five credits in course work or dissertation research. The student is required to write a doctoral dissertation and pass a final oral defense of that dissertation. The department requires two semesters of college-teaching experience. Students are expected to demonstrate appropriate proficiency in the use of technology. There is no formal language requirement.

**MASTER’S DEGREE CREDENTIAL:** Students who do not have a master’s in mathematical science in the track they are pursuing for the doctorate may petition their doctoral Studies Committee and the Graduate College to receive a master’s degree during the progression of their doctoral studies. Students must complete the requirements of the course-based option for the master’s in the relevant discipline (mathematics, biostatistics or statistics), including a master’s comprehensive examination that is distinct from the doctoral comprehensive examination. Students should indicate their intent to pursue the master’s prior to the second year in the doctoral program to provide appropriate advising for completion of the master’s requirements. Completion of the requirements for the master’s and the petition to the Graduate College to award the master’s must occur before completion of the final component of the doctoral comprehensive examination.

**Comprehensive Examination**

**CORE AND APPLIED MATHEMATICS TRACKS:** The Examination consists of three parts, two written and one oral. Syllabi for these exams are available from the Director of Graduate Studies in Mathematics. They are taken at distinct times and all three must be satisfactorily completed in order to advance to candidacy. For students with a concentration in Core Mathematics, one three-hour written exam is in real and complex analysis, and the other three-hour written exam is in algebra. For students with a concentration in Applied Mathematics, one three-hour written exam is in numerical analysis and the other three-hour written exam is in differential equations.

The two-hour oral examination is conducted by the studies committee on a topic chosen by the student in consultation with the committee.

One written examination must be passed by the middle of the second year in the program. All three exams must be passed by the beginning of the third year.

**STATISTICS TRACK:** The Examination consists of three parts, two written and one oral. They are taken at distinct times and all three must be satisfactorily completed in order to advance to candidacy. The first written exam is based on the courses STAT 211, STAT 221, STAT 223, STAT 231, STAT 251, and STAT 261. The first component of the comprehensive exam is typically held two weeks after the final exam period in the spring semester. The second written exam is an extensive literature review of a topical area written in the form of a review paper and must be passed by the middle of the second year in the program. The oral exam is scheduled after successful completion of both written exams and must be passed by the beginning of the third year. The oral exam is a presentation of the current state of research in a defined area and proposal for the future work to be conducted.

**Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy**

Successful completion of the comprehensive examination.

**MATHEMATICS**

http://www.uvm.edu/~cem/mathstat/

**OVERVIEW**

The Department of Mathematics and Statistics offers programs towards the Master of Science (the Mathematics M.S. degree), the Master of Science in Teaching (the Mathematics M.S.T. degree), and the Doctor of Philosophy in Mathematical Sciences. The Department also offers Master of Science degrees in Statistics and Biostatistics.

Opportunities for research arise from the research interests of the Department faculty, which include analysis, algebra, biomathematics, combinatorics, complex systems, computational social science, differential equations, fluid mechanics, graph theory, mathematics education, modeling, network science, and number theory.

Students in the M.S. and Ph.D. degree programs are encouraged to take courses in both core and applied mathematics, thereby gaining an appreciation of the connections between theory and applications.

The Department offers an Accelerated Master’s Program (AMP) leading to a B.S. and an M.S. degree in five years. Interested students should contact the department by the beginning of their junior year.

**DEGREES**

- Mathematics AMP (p. 188)
- Mathematics M.S. (p. 189)
- Mathematics M.S.T. (p. 190)

**FACULTY**

Ashikaga, Takamaru; Professor, Department of Mathematics and Statistics; PHD, University of California Los Angeles
Bagrow, James; Assistant Professor, Department of Mathematics and Statistics; PHD, Clarkson University
Bentil, Daniel E.; Associate Professor, Department of Mathematics and Statistics; DPHIL, University of Oxford
Bunn, Janice Yanushka; Research Associate Professor, Department of Mathematics and Statistics; PHD, Ohio State University
**MATHEMATICS AMP**

All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

**OVERVIEW**

A master’s degree in mathematics, statistics or biostatistics can be earned in a shortened time by careful planning during the junior and senior years at UVM. For example, the M.S. could be earned in just one additional year, because six credits of undergraduate courses can also be counted concurrently toward the M.S. degree requirements.

**SPECIFIC REQUIREMENTS**

Requirements for Admission to Graduate Studies for the Degree of Master of Science for Accelerated Students

Students must declare their wish to enter the Accelerated Master's Program in writing to the Department Chair, apply to and be accepted by the Graduate College before taking a course that they wish to count towards the M.S. degree requirements. Following acceptance by the Graduate College, they can receive concurrent undergraduate and graduate credit for up to six credits of 200-level courses approved for graduate credit. Students can take one additional pre-approved graduate course (3-credits) during their senior year that will count only towards the MS degree. Please refer to the Handbook for Graduate Studies in Mathematics, available on the Department website, for detailed information.

Students should discuss the possibility of an Accelerated Master’s Program in mathematics, statistics or biostatistics with the respective program director as soon as they think they may be interested in this program.

Minimum Degree Requirements for the Degree of Master of Science

Each student must complete one of the following options:

**OPTION A (THESIS)**

Twenty-four semester hours of acceptable graduate credits in advanced mathematics courses, and six semester hours of thesis research culminating in a master's thesis.

<table>
<thead>
<tr>
<th>OPTION A (THESIS)</th>
<th>30</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 331, MATH 333</td>
<td></td>
</tr>
</tbody>
</table>

**OPTION B (NON-THESIS)**

Thirty semester hours of acceptable graduate credits in advanced mathematics courses. No thesis is required.

<table>
<thead>
<tr>
<th>OPTION B (NON-THESIS)</th>
<th>30</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 481, MATH 482</td>
<td></td>
</tr>
</tbody>
</table>

**BOTH OPTIONS**

Under either option, students must take, or acquire the knowledge of the content in, the courses MATH 331 and MATH 333, and must satisfactorily complete at least four 300-level mathematics courses.

In both options students must select a major concentration from among the following areas: Analysis, Algebra, Applied Mathematics, or Discrete Mathematics. The concentration shall consist of at least nine approved credits in advanced mathematics courses in the respective area, three of which must be at the 300-level; students writing a thesis may count the six hours of thesis credit toward these nine hours.

With approval of the student's advisor up to six credits of courses outside mathematics may be used to fulfill the major, minor, or degree requirements.

**Comprehensive Examination**

M.S. students must pass two written exams, offered each August and January. Ph.D. students in our program take these exams as well, but with a higher criteria for passing. For example, M.S. students need to demonstrate proficiency in the material covered by MATH 241 & MATH 242, but not necessarily in material covered by MATH 331 & MATH 333 (which Ph.D. students must do).
For example, a student taking MATH 241 & MATH 242 in their first year could sit for the analysis exam in August before their second year begins, with a second opportunity in January before their final semester.

All M.S. students need to take the real/complex analysis exam. For non-thesis students, the second exam can be in any of these areas: algebra, numerical analysis, differential equations, complex systems. For thesis students, a successful M.S. thesis defense will satisfy the second exam.

Requirements for Advancement to Candidacy for the Degree of Master of Science

Students who have been admitted to the Accelerated Master’s Program in mathematics normally advance to candidacy in this program at the end of their senior year. The criteria for advancement to candidacy are:

1. Completion of a bachelor’s program in mathematics at UVM, or completion of a bachelor’s program in science or engineering at UVM with a minor in mathematics;

2. Completion of at least two additional mathematics or statistics courses at the 200-level approved for graduate credit with grades of B or better in each (these are in addition to MATH 241 MATH 242 and the two 200-level courses required for admission to the program); and

3. Completion of a 300-level course in Mathematics with a grade of B or better. This course will count towards the master’s but may not be counted towards the student’s undergraduate degree or GPA, and so must be taken as an overload.

Students who have been admitted to the AMP on the completion of their junior year but who fail to meet the requirements for advancement to candidacy for the M.S. degree will only be permitted to continue towards their M.S. degree after review by the Mathematics Graduate Committee and with the written approval of the Director of the Graduate Program in Mathematics.

MATHEMATICS M.S.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW

The Department of Mathematics and Statistics offers programs towards the Master of Science (the Mathematics M.S. degree). Students are encouraged to take courses in both core mathematics and applied mathematics, thereby gaining an appreciation of the connections between theory and applications. Each student declares a major subject, which may be algebra, analysis, applied mathematics, or discrete mathematics. Within this major, the student may pursue either course work or a thesis.

Opportunities for research arise from the research interests of the Department faculty, which include analysis, algebra, biomathematics, combinatorics, complex systems, computational social science, differential equations, fluid mechanics, graph theory, mathematics education, modeling, network science, and number theory.

See the Department of Mathematics and Statistics website for further details. The department also offers the Ph.D. in Mathematical Sciences.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science

Because of the breadth of pure and applied mathematics, it is recognized that applicants for admission will have diverse backgrounds. Admission requirements are therefore flexible. Applicants should have demonstrated strength in either core or applied mathematics, a bachelor’s degree with a major in mathematics or a closely related discipline, and satisfactory scores on the general section of the Graduate Record Examination.

Minimum Degree Requirements for the Degree of Master of Science

Each student must complete one of the following options:

<table>
<thead>
<tr>
<th>OPTION A (THESIS):</th>
<th>30</th>
</tr>
</thead>
<tbody>
<tr>
<td>Twenty-four semester hours of acceptable graduate credits in advanced mathematics courses; and six semester hours of thesis research culminating in a master’s thesis.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>OPTION B (NON-THESIS):</th>
<th>30</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thirty semester hours of acceptable graduate credits in advanced mathematics courses. No thesis required.</td>
<td></td>
</tr>
</tbody>
</table>

BOTH OPTIONS:

Under either option, students must take, or acquire the knowledge of the content in, the courses MATH 331 and MATH 333, and must satisfactorily complete at least four 300-level mathematics courses.

In both options, students must select a major concentration from among the following areas: Analysis, Algebra, Applied Mathematics, or Discrete Mathematics. The concentration shall consist of at least nine approved credits in advanced mathematics courses in the respective area, three of which must be at the 300-level; students writing a thesis may count the six hours of thesis credit toward these nine hours.

With approval of the student’s advisor, up to six credits of courses outside mathematics may be used to fulfill the major, minor, or degree requirements.

Comprehensive Examination

M.S. students must pass two written exams, offered each August and January. Ph.D. students in our program take these exams as well, but with a higher criteria for passing. For example, M.S. students need to demonstrate proficiency in the material covered by MATH 241 & MATH 242, but not necessarily in material covered by MATH 331 & MATH 333 (which Ph.D. students must do).

For example, a student taking MATH 241 & MATH 242 in their first year could sit for the analysis exam in August before their second
year begins, with a second opportunity in January before their final semester.

All M.S. students need to take the real/complex analysis exam. For non-thesis students, the second exam can be in any of these areas: algebra, numerical analysis, differential equations, complex systems. For thesis students, a successful M.S. thesis defense will satisfy the second exam.

Requirements for Advancement to Candidacy for the Degree of Master of Science

The requirements for advancement to candidacy are the completion of any prerequisites noted when the student was admitted.

MATHEMATICS M.S.T.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW

The Department of Mathematics offers programs towards the Master of Science, Master of Science for Teachers, and the Doctor of Philosophy in Mathematical Sciences. There are two areas of concentration: pure mathematics and applied mathematics. The programs emphasize the interaction between these two areas and the common role of scientific computation. Students can take courses common to both areas, enabling them to gain an appreciation of the mathematical techniques and the connections between theory and applications. Department research interests include classical analysis, harmonic analysis, Fourier analysis, approximation theory, algebra, number theory, graph theory, combinatorics, fluid mechanics, biomathematics, differential equations, numerical analysis, and modeling.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science for Teachers

A bachelor’s degree from an accredited institution, licensure as a teacher, and experience teaching grades K-12. GRE scores are not required.

Minimum Degree Requirements for the Degree of Master of Science for Teachers

Thirty credits of course work in mathematics. With the approval of their advisor and the Graduate College, students may choose courses from the 100-level or from closely related fields. The student must have a curriculum program approved by her/his advisor. The student must pass an oral comprehensive examination. No thesis is required.

Comprehensive Examination

The comprehensive examination must be taken no later than five weeks before the end of the semester preceding the conferral of the degree. The details of the examination are decided upon by each student’s examination committee and will be discussed with the student in advance of the exam.

Requirements for Advancement to Candidacy for the Degree of Master of Science in Teaching

The requirements for advancement to candidacy are the completion of any prerequisites noted when the student was admitted.

MECHANICAL ENGINEERING

http://www.uvm.edu/~cems/soe/

OVERVIEW

The main asset of the UVM mechanical engineering graduate program is certainly the human factor, including our dedicated faculty and staff, and motivated students.

Curriculum

We continuously update our curriculum to address modern topics in mechanical engineering, and to offer a breadth of courses that makes studying in our program more flexible, whether the student intends to earn an M.S. as a continuing student from local industries, or directly obtain a doctorate right from the bachelor’s degree. Most of our graduate students are full-time and actively engaged in research projects with one or two faculty mentors who are dedicated to their success. The size of the program also enables them to have close interactions with the rest of the faculty, and to regularly participate in the life of the program via graduate student seminars and invited speaker presentations.

Graduate

Since its creation, students from across the United States and various countries around the world have graduated from the UVM mechanical engineering graduate program. Also, we actively seek to admit a diverse group of students in mechanical engineering to address the contemporary challenges of our society. To date, our graduates have achieved successful careers in academia as distinguished professors, in industry as engineers and entrepreneurs, and in government positions as program directors for national funding agencies or scientists at national laboratories.

Faculty and Research

The success of our graduate program is built on a distinguished faculty whose research is recognized nationally and internationally through innovation, dissemination of knowledge in high-impact journals, and research awards. Recently, our faculty has won major awards from the Department of Defense, the Department of Energy, NASA, NIH and the National Science Foundation. Clearly, our focus is to create a research environment that is highly interdisciplinary and collaborative from which our students can flourish. The mechanical engineering faculty at UVM works closely with students in five research areas: 1- Computational Multiscale Simulations & Theory; 2- Aerospace Applications; 3- Biology and Medical Research; 4- Design, Monitoring and Energy Systems, and 5- Micro and Nanotechnology.
DEGREES

- Mechanical Engineering AMP (p. 191)
- Mechanical Engineering M.S. (p. 192)
- Mechanical Engineering Ph.D. (p. 193)

Fiorentino, Niccolo M.; Assistant Professor, Department of Mechanical Engineering; PHD, University of Virginia
Fletcher, Douglas G.; Professor, Department of Mechanical Engineering; PHD, University of Virginia
Garimella, Suresh; President, University of Vermont, Professor, Department of Mechanical Engineering; PHD, University of California at Berkeley
Hitt, Darren Lee; Professor, Department of Mechanical Engineering; PHD, Johns Hopkins University
Huston, Dryver R.; Professor, Department of Mechanical Engineering; PHD, Princeton University
Louisos, William; Senior Lecturer, Department of Mechanical Engineering; PHD, University of Vermont
Marshall, Jeffrey Scott; Professor, Department of Mechanical Engineering; PHD, University of California Berkeley
Meyers, Jason; Research Assistant Professor, Department of Mechanical Engineering; PHD, Univ. Libre de Bruxelles / von Kármán Institute
Oldinski, Rachael Ann; Associate Professor, Department of Mechanical Engineering; PHD, Colorado State University
Sansoz, Frederic P.; Professor, Department of Mechanical Engineering; PHD, Ecole des Mines de Paris
Schadler, Linda S.; Dean, College of Engineering and Mathematical Sciences; Professor, Department of Mechanical Engineering; PHD, University of Pennsylvania

MECHANICAL ENGINEERING AMP

All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

OVERVIEW

Qualified undergraduate students who plan to earn a master’s degree in mechanical engineering may enroll in the Accelerated Master’s Program, which enables students to begin working on a master’s degree while still an undergraduate. Students apply to the program in the second semester of their junior year. Following acceptance by the Graduate College, students may take up to nine graduate credits while still an undergraduate. Of these, up to six credits can be counted toward both the B.S. and the M.S. degrees, subject to approval of the student’s graduate advisor. Students in the Accelerated Masters Program must follow either the non-thesis option or research thesis option M.S. degree requirements. For the thesis option, research counting toward the thesis must begin immediately in the summer following the completion of the bachelor’s degree.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science for Accelerated Students

To apply for the program, students must be enrolled at the University of Vermont in mechanical engineering with a cumulative grade point average of at least 3.20 at the time of application, and must complete the CEMS Accelerated Masters Permission Form and the Graduate College application. For thesis students, the application should name a graduate faculty member who has agreed to serve as their thesis advisor. No Graduate Record Examination (GRE) is required for AMP applicants.

Minimum Degree Requirements for the Degree of Master of Science

The Mechanical Engineering AMP requires the completion of advanced courses in mechanical engineering, mathematics, and other approved courses and research (for thesis students) totaling at least thirty credits.

Students are required to complete:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>A prescribed set of nine core course credits which cover areas of advanced engineering, mathematics, continuum mechanics, and numerical methods</td>
<td>9</td>
</tr>
<tr>
<td>Six course credits in the area of specialization for their degree</td>
<td>6</td>
</tr>
</tbody>
</table>

Currently, the program offers areas of specialization in:

- Biomechanics and Biomaterials
- Control and Design of Mechanical Systems;
- Materials Engineering and Nanomechanics;
- Thermodynamics, Fluids and Energy; and
- Computational Mechanics.

Further details on the core course requirements and the areas of specialization can be obtained from the Mechanical Engineering Graduate Program website.

Option A (Thesis)

In addition to core courses, students selecting the thesis option must complete between six and nine thesis credits (ME 391) prior to the master’s thesis defense, with the expectation that the student’s research must culminate in an original piece of work publishable as a conference proceedings paper or a peer-reviewed journal article. Those opting for a six-credit thesis must complete an additional three credits of approved course work

Option B (Non-thesis)

Students selecting the non-thesis option must complete an additional fifteen credits of course work beyond the core credits in lieu of a thesis. Of the additional course work, a minimum of nine credits must be in a chosen area of specialization.
Comprehensive Examination
The comprehensive examination for the thesis option consists of successfully presenting a proposal research seminar.

The comprehensive examination for the non-thesis option tests the proficiency of the students in four topics of the mechanical engineering curriculum or closely related fields. The candidate works with his/her advisor and the graduate program coordinator to form a committee of four graduate faculty, one of whom should hold an appointment outside of mechanical engineering (one faculty member may test the student on two distinct topics). The comprehensive examination consists of a written part spanning no more than four hours (one hour per topic). The committee may meet with the student to ask questions regarding the written exam and any follow up topics that may be necessary to establish the proficiency of the candidate in mechanical engineering. A candidate is allowed to take no more than two comprehensive examinations. Comprehensive examinations are typically scheduled at the end of the Fall or Spring semesters.

Requirements for Advancement to Candidacy for the Degree of Master of Science
A cumulative grade point average of 3.00 or better.

MECHANICAL ENGINEERING M.S.
All students must meet the Requirements for the Master's Degree (p. 265)

OVERVIEW
The Mechanical Engineering Graduate Program offers a Master's of Science (M.S.) degree in mechanical engineering. Each student must meet the general requirements for admission as outlined under the regulations of the University of Vermont Graduate College. Typically, students entering the program have received a bachelor's degree in mechanical engineering or a related field. Applicants with other backgrounds will be evaluated individually and must complete prescribed undergraduate technical course work. Part-time study leading to the M.S. degree is also possible for engineers who are employed in the vicinity. Areas of research interest in the program currently include: Smart Structures, Aerospace Engineering, Turbulence, Complex Fluids, Multiscale Mechanics, Micro and Nano Engineering, Nanomaterials, Energy Harvesting, System Diagnostics, Biomechanics, Biomaterials, and Simulation using High-performance Computing.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science
An accredited bachelor's degree in Mechanical Engineering or equivalent is the typical requirement; however, students holding a bachelor's degree in a related engineering or scientific field may also qualify for admission. Completion of the general (aptitude) portion of the Graduate Record Examination is required only for those students who are applying for a Graduate Teaching or Research Assistantship.

Minimum Degree Requirements for the Degree of Master of Science
The Mechanical Engineering Graduate Program offers both thesis and non-thesis options for the master's degree. Both options require the completion of advanced courses in mechanical engineering, mathematics, and other approved courses and research (for thesis students) totaling at least thirty credits. Graduate students receiving financial support via teaching or research fellowships are required to select the thesis option. Part-time students typically select the non-thesis option but may choose the thesis option if they prefer. Students normally decide on which option they intend to pursue at the beginning of their program.

All students are required to complete:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>A prescribed set of nine core course credits which cover areas of advanced engineering, mathematics, continuum mechanics, and numerical methods</td>
<td>6</td>

</table>

Comprehensive Examination
The comprehensive examination for the thesis option consists in successfully presenting a proposal research seminar.

The comprehensive examination for the non-thesis option tests the proficiency of the students in four topics of the mechanical engineering curriculum or closely related fields. The candidate works with his/her advisor and the graduate program coordinator to form a committee of four graduate faculty, one of whom should hold an appointment outside of mechanical engineering (one faculty member may test the student on two distinct topics). The comprehensive
examination consists of a written part spanning no more than four hours (one hour per topic). The committee may meet with the student to ask questions regarding the written exam and any follow up topics that may be necessary to establish the proficiency of the candidate in mechanical engineering. A candidate is allowed to take no more than two comprehensive examinations. Comprehensive examinations are typically scheduled at the end of the Fall or Spring semesters.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**
A cumulative grade point average of 3.00 or better.

**MECHANICAL ENGINEERING PH.D.**
All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

**OVERVIEW**
The Mechanical Engineering Graduate Program offers a Doctor of Philosophy (Ph.D.) degree in mechanical engineering. Each student must meet the general requirements for admission as outlined under the regulations of the University of Vermont Graduate College. Typically, students entering the program have received a master’s degree in mechanical engineering or a closely-related field. Applicants with other backgrounds will be evaluated individually and may be asked to complete prescribed undergraduate technical course work. Areas of research interest in the program currently include: Smart Structures, Aerospace Engineering, Turbulence, Complex Fluids, Multiscale Mechanics, Micro and Nano Engineering, Nanomaterials, Energy Harvesting, System Diagnostics, Biomechanics, Biomaterials, and Simulation using High-performance Computing.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy**
An accredited master’s degree in mechanical engineering or closely related discipline is required. Completion of the general (aptitude) portion of the Graduate Record Examination is required.

**Minimum Degree Requirements for the Degree of Doctor of Philosophy**
The degree of Doctor of Philosophy requires of candidates a minimum of seventy-five credits to be earned in course work and in dissertation research. The seventy-five credits must be distributed in such a way that at least thirty-nine credits must be earned in courses and seminars and a minimum of twenty-one credits must be earned in dissertation research. Students must complete at least fifteen credits in graduate-level mechanical engineering course work at UVM from the different areas of specialization. This mechanical engineering coursework requirement can include M.S. course credits earned at UVM; however students must complete 15 credits of graded graduate coursework after matriculation into the doctoral program. Currently, the program offers areas of specialization in:

- Biomechanics and Biomaterials;
- Control and Design of Mechanical Systems;
- Materials Engineering and Nanomechanics;
- Thermodynamics, Fluids and Energy; and
- Computational Mechanics.

All Ph.D. candidates complete a doctoral dissertation consisting of original research and of sufficient quality to merit publication in an archival journal.

**Comprehensive Examination**
All Ph.D. candidates must pass the comprehensive examination. The comprehensive examination tests the proficiency of the students in four topics of the mechanical engineering curriculum or closely related fields. The candidate works with his/her advisor and the graduate program coordinator to form a committee of four graduate faculty, one of whom should hold an appointment outside of mechanical engineering (one faculty member may test the student on two distinct topics). The first part of the comprehensive examination consists of a written part spanning no more than four hours (one hour per topic). In the second part of the examination, the committee meets with the student to ask questions regarding the written exam and any follow up topics that may be necessary to establish the proficiency of the candidate in mechanical engineering. A candidate must pass the comprehensive examination in no more than two attempts. Comprehensive examinations are typically scheduled at the end of the Fall or Spring semesters. It is strongly advised that the Ph.D. candidate take the comprehensive examination at the completion of his/her second or third semester of studies.

**Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy**
Successful completion of the Ph.D. comprehensive examination.

**MEDICAL LABORATORY SCIENCE**

http://www.uvm.edu/cnhs

**OVERVIEW**
The Master of Science in Medical Laboratory Science (MMLS) program is designed to provide students with the knowledge and skills required for leadership opportunities in management, education, research and advanced clinical practice in the medical laboratory science profession.

Individuals may enter the program via two tracks, depending on their background:

- Track One is for individuals with a bachelor’s degree who are not certified in medical laboratory science but desire a career in the clinical laboratory sciences. Upon completion of the program, these students will be eligible to take the national certification exam in medical laboratory science offered by the American Society of Clinical Pathology (ASCP) and be prepared for advanced laboratory practice including engagement in evidence-based practice, scientific research, and healthcare leadership and management.

- Track Two is for medical laboratory science-certified graduates who seek advanced training and expertise in evidence-based
Both Track One and Track Two involve a research-based capstone project that will engage students in hands-on research methodology, experimental practice, and scientific communication. The capstone project provides students with the opportunity to develop important skills in evidence-based practice and clinically-related research.

Program faculty conduct research that aims to understand the molecular mechanisms of human disease, with particular emphasis on immune cell activation, gene expression and molecular signal transduction. Our faculty offer advanced practice courses in molecular methods, clinical laboratory correlations, healthcare leadership and management, policy, ethics, quality, research design and methods; and research experiences to prepare graduates of both tracks to become future leaders in the profession.

Students in Track One will complete a semester-long clinical internship at one of the hospitals within the University of Vermont Medical Center Network (UVM Medical Center Campus, Champlain Valley Physician’s Hospital Campus, and Central Vermont Medical Center Campus) as part of the core NAACLS-accredited program.

DEGREES
- Medical Laboratory Science M.S. (p. 194)

- Amiel, Eyal; Assistant Professor, Department of Biomedical and Health Sciences; PHD, Dartmouth College
- Deming, Paula; Associate Professor, Department of Biomedical and Health Sciences; PHD, University of North Carolina at Chapel Hill
- Frietze, Seth; Assistant Professor, Department of Biomedical and Health Sciences; PHD, Harvard University
- Fung, Mark K.; Professor, Department of Pathology and Laboratory Medicine; MD, PHD, University of Alabama School of Medicine
- Johnson, Douglas; Professor, Department of Microbiology and Molecular Genetics; PHD, Purdue University
- Kremenkov, Dimitry N.; Assistant Professor, Department of Biomedical and Health Sciences, PHD; University of Vermont

MEDICAL LABORATORY SCIENCE M.S.
All students must meet the Requirements for the Master's Degree (p. 265)

OVERVIEW
The Master of Science in Medical Laboratory Science (MMLS) program is designed to provide students with the knowledge and skills required for leadership opportunities in management, education, research and advanced clinical practice in the medical laboratory science profession.

Individuals may enter the program via two tracks, depending on their background:

- Track One is for individuals with a bachelor’s degree who are not certified in medical laboratory science but desire a career in the clinical laboratory sciences. Upon completion of the program, these students will be eligible to take the national certification exam in medical laboratory science offered by the American Society of Clinical Pathology (ASCP) and be prepared for advanced laboratory practice including engagement in evidence-based practice, scientific research, and healthcare leadership and management.

- Track Two is for medical laboratory science-certified graduates who seek advanced training and expertise in evidence-based practice, scientific research, healthcare management and leadership.

Both Track One and Track Two involve a research-based capstone project that will engage students in hands-on research methodology, experimental practice, and scientific communication. The capstone project provides students with the opportunity to develop important skills in evidence-based practice and clinically-related research.

Program faculty conduct research that aims to understand the molecular mechanisms of human disease, with particular emphasis on immune cell activation, gene expression and molecular signal transduction. Our faculty offer advanced practice courses in molecular methods, clinical laboratory correlations, healthcare leadership and management, policy, ethics, quality, research design and methods; and research experiences to prepare graduates of both tracks to become future leaders in the profession.

Students in Track One will complete a semester-long clinical internship at one of the hospitals within the University of Vermont Health Network as part of the core NAACLS-accredited program.

SPECIFIC REQUIREMENTS

Requirements for admission to graduate studies for the degree of Master of Science

TRACK ONE
- B.S. or B.A. in one of the life sciences (or related field) from accredited college or university
- Minimum overall GPA of 3.0
- Undergraduate and (when applicable) graduate transcripts
- General biology or anatomy and physiology (8 credits), general chemistry (8 credits), organic chemistry or biochemistry (4 credits), general microbiology with lab (4 credits), college level math (3 credits)
- TOEFL or IELTS scores (international students)
- UVM Graduate College Application

TRACK TWO
- B.S. in Medical Laboratory Science or related field
- ASCP certification in Medical Laboratory Science or ASCP certification-eligible
- Minimum overall GPA of 3.0
- Undergraduate and (when applicable) graduate transcripts
• General biology or anatomy and physiology (8 credits), general chemistry (8 credits), organic chemistry or biochemistry (4 credits), general microbiology with lab (4 credits), college level math (3 credits)
• TOEFL or IELTS scores (international students)
• UVM Graduate College Application

MINIMUM DEGREE REQUIREMENTS

TRACK ONE
43 credits NAACLS accredited courses and 24 credits Advanced Practice courses (67 credits total).

FIRST YEAR
Fall Semester
MLS 221  Clinical Chemistry I  4
BHSC 281  Applied Molecular Biology  3
BHSC 282  Applied Molecular Biology Lab  1
STAT 200  QR: Med Biostat&Epidemiology  3
or STAT 211  QR: Statistical Methods I
MLS 310  Advanced Immunobiology  3

Spring Semester
BHSC 244  Immunology Lab  1
MLS 222  Clinical Chemistry II  3
GRNS 328  Quality in Healthcare  3
or CTS 302  Quality in Healthcare
GRNS 325  Genetics for Clinicians  3
or PATH 325  Genetics for Clinicians
MMG 222  Advanced Medical Microbiology  4
MLS 389  Research and Design I  3

Summer Semester
MLS 397  Clinical Leadership & Mgt  3
MLS 390  Research and Design II  3

SECOND YEAR
Fall Semester
GRNS 322  Org, Deliv & Finance Hlth Care  3
or Approved Elective
MLS 255  Clinical Microbiology II  3
MLS 231  Hematology  4
MLS 262  Immunohematology  4
MLS 391  Research Capstone  3

Spring Semester

MLS 301  Clinical Practicum  12
MLS 302  Certification Review  1
Total Credits  67

TRACK TWO
30 credits of advanced practice coursework.

FIRST YEAR
Fall Semester
MLS 371  Clinical Correlations I  3
STAT 200  QR: Med Biostat&Epidemiology  3
or STAT 211  QR: Statistical Methods I

Spring Semester
MLS 389  Research and Design I  3
MLS 372  Clinical Correlations II  3
GRNS 325  Genetics for Clinicians  3
or PATH 325  Genetics for Clinicians
GRNS 328  Quality in Healthcare  3
or CTS 302  Quality in Healthcare

Summer Semester
MLS 397  Clinical Leadership & Mgt  3
MLS 390  Research and Design II  3

SECOND YEAR
Fall Semester
GRNS 322  Org, Deliv & Finance Hlth Care  3
or Approved Elective
MLS 391  Research Capstone  3

Total Credits  30

COMPREHENSIVE EXAMINATION
Students will complete a written comprehensive exam during their final semester.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF SCIENCE
Successful completion of the comprehensive exam and in academic good standing.

MEDICAL SCIENCE
https://learn.uvm.edu/program/uvm-master-of-medical-science-degree/
OVERVIEW

The main objective of the Master of Science in Medical Science (MMS) Program is to provide a rigorous curriculum in the basic biomedical sciences that prepares students with the background knowledge and skills required to gain acceptance into and succeed in medical school as well as other health-related professional doctoral-level degree programs including dental and pharmacy school. The program offers a cohesive set of core courses that cover the major biomedical disciplines that together provide the foundation of understanding how the human body works from the molecular (biochemistry), cellular (cell biology), and systems (anatomy and physiology) levels, as well as the fundamentals required to understand drug actions in the body (pharmacology) and the principles of quantitatively interpreting scientific and epidemiological data (biostatistics).

DEGREES

- Medical Science M.S. (p. 196)

FACULTY

Anathy, Vikas; Assistant Professor, Department of Pathology and Laboratory Medicine; PHD, Madurai Kamaraj University
Berger, Christopher Lewis; Professor, Department of Molecular Physiology and Biophysics; PHD, University of Minnesota Twin Cities
Deming, Paula B.; Associate Professor, Department of Biomedical and Health Sciences; PHD, University of North Carolina at Chapel Hill
Franklyn, Christopher Steward; Professor, Department of Biochemistry; PHD, University of California Santa Barbara
Howe, Alan K.; Associate Professor, Department of Pharmacology; PHD, Northwestern University
Kelm, Robert; Associate Professor, Department of Medicine-Cardiovascular; PHD, University of Vermont
Lounsbury, Karen M.; Professor, Department of Pharmacology; PHD, University of Pennsylvania
May, Victor; Professor, Department of Neurological Sciences; PHD, Northwestern University
Mawe, Gary Michael; Professor, Department of Neurological Sciences; PHD, Ohio State University
Stumpff, Jason K.; Assistant Professor, Department of Molecular Physiology and Biophysics; PHD, University of Colorado
Thali, Markus Josef; Professor, Department of Microbiology and Molecular Genetics; PHD, University of Zurich
Tracy, Paula Babiarz; Professor, Department of Biochemistry; PHD, Syracuse University
Ward, Gary E.; Professor, Department of Microbiology and Molecular Genetics; PHD, University of California San Diego
Wellman, George C.; Professor, Department of Pharmacology; PHD, University of Vermont

MEDICAL SCIENCE M.S.

All students must meet the Requirements for the Master’s Degree (p. 265)

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science

Applicants are required to have a BS or BA from accredited college or university, two semesters of general biology, general physics, general chemistry, and organic chemistry, and MCAT or GRE scores. International Students are required to take the TOEFL or IELTS.

Minimum Degree Requirements

UVM’s Master of Medical Science degree is a 30-credit, on-campus program, that is designed to be completed within one year (12 months). The curriculum includes a cohesive set of core courses that cover the major biomedical disciplines and provides the foundation of understanding how the human body works. Students complete seven core requirements and select two electives to complete the program.

Core Courses:

<table>

### Requirements for Advancement to Candidacy for the Degree of Master of Science

Successful completion of a comprehensive examination in Medical Science.

### MICROBIOLOGY AND MOLECULAR GENETICS

#### OVERVIEW

https://www.med.uvm.edu/mmg/home

#### OVERVIEW

The goal of the Microbiology and Molecular Genetics Master’s Programs is to prepare students for careers in science. The program provides an increased knowledge base in both microbiology and molecular genetics as well as the ability to think critically, communicate scientific knowledge clearly and perform independent scientific research. In addition to the Microbiology and Molecular Genetics M.S. and Accelerated Master’s Program (AMP), the MMG faculty participate in the interdisciplinary doctoral program in Cellular, Molecular, and Biomedical Sciences.

### DEGREES

- Microbiology and Molecular Genetics AMP (p. 197)
- Microbiology and Molecular Genetics M.S. (p. 199)

### FACULTY

**Diehl, Sean;** Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, University of Vermont

**Doublie, Sylvie;** Professor, Department of Microbiology and Molecular Genetics; PHD, University of North Carolina Chapel Hill

**Kirkpatrick, Beth Diane;** Professor, Department of Microbiology and Molecular Genetics; MD, Albany Medical College

**Lee, Andrea J.;** Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, University of Wisconsin-Madison

**Li, Dawei;** Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, Shanghai Jiao Tong University

**Mintz, Keith Peter;** Associate Professor, Department of Microbiology and Molecular Genetics; PHD, University of Vermont

**Pederson, David Scott;** Professor, Department of Microbiology and Molecular Genetics; PHD, University of Rochester

**Thali, Markus Josef;** Professor, Department of Microbiology and Molecular Genetics; PHD, University of Zurich

**Ward, Gary E.;** Professor, Department of Microbiology and Molecular Genetics; PHD, University of California San Diego

**Wargo, Matthew;** Associate Professor, Department of Microbiology and Molecular Genetics; PHD, Dartmouth College

### MICROBIOLOGY AND MOLECULAR GENETICS AMP

All students must meet the Requirement for the Accelerated Master’s Degree Programs (p. 264)
OVERVIEW

The Accelerated Master’s Degree Program (AMP) in Microbiology and Molecular Genetics is designed to offer select UVM undergraduate science majors the opportunity to obtain both their Bachelor’s degree and a Master’s degree in Microbiology and Molecular Genetics in a total of five years of study. The objective of this program is to provide a broad knowledge base of Microbiological and Molecular Genetic concepts to increase their competitiveness to pursue additional graduate degrees (PhD, MD) or to prepare students for careers in pharmaceutical, biotechnology and related industries.

Students enrolled in this program can have up to six credits of graduate-level courses, which are taken during their senior undergraduate year, count towards both a Bachelor’s degree and the Master’s degree in microbiology and molecular genetics. An additional three credits of graduate level coursework taken their senior year can be applied towards the Master’s degree provided that these three credits are not used to fulfill undergraduate degree or credit requirements. Students would then be expected to complete the remaining Master’s degree requirements during a fifth year of study. Full-time graduate student status will start the summer after their undergraduate graduation and will be expected to be maintained until completion of their Master’s degree in Microbiology and Molecular Genetics. Students interested in the Microbiology and Molecular Genetics program. Students interested in the Microbiology and Molecular Genetics AMP should contact the Program Coordinator.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science in Microbiology and Molecular Genetics

Students should apply for admission into the Accelerated Master’s Degree Program in Microbiology and Molecular Genetics with a minimum of 75 credits and before the start of their first semester Senior Year. Admission into this program requires the following:

- A minimum cumulative grade point average of 3.00.
- Enrollment in an undergraduate Bachelor’s Degree program and completion of at least one year of Introductory Chemistry, one year of Organic Chemistry, one year of Calculus, MMG 101, MMG 104, BCOR 101, and BCOR 103 or MMG 196C.
- GRE/GMAT scores are NOT an admission requirement for the Accelerated Master’s Degree Program in Microbiology and Molecular Genetics program.
- Students must identify a research mentor within the Department of Microbiology and Molecular Genetics in whose laboratory they will conduct their Master’s Degree research.
- Students MUST be admitted through the Graduate College before taking any courses that will be applied to the Master’s Degree.
- Courses taken as an undergraduate that will then count towards the master’s degree must be graded with letter grades (A-F, not P/F, S/U, SP/UP). Independent study, internship and research credits are not allowed to count towards the master’s degree.
- If more than 9 credits of graduate level coursework are taken prior to receipt of the bachelor’s, ONLY 9 credits will count towards the master’s. There are no exceptions.
- Students are expected to initiate Master’s Degree research in the summer following their undergraduate graduation. Students who graduate in January may initiate master’s research in the spring semester and are expected to continue the research in the summer.

Application Process

- Completion of application to the Graduate College, meeting all Graduate College application requirements.
- Include at least three letters of recommendation, one must be from your identified research mentor.
- Include the "Accelerated Masters" form, which can be found on the Graduate College Website. This document must be signed by the indicated parties before being uploaded to your application.

Minimum Degree Requirements

A minimum of 30 credits are required for completion of the Accelerated Master’s Degree in Microbiology Molecular Genetics. Students must also meet the Graduate College requirements for the Master’s Degree including maintaining a minimum GPA of 3.00.

Courses should be selected from the following lists.

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOC 301</td>
<td>General Biochemistry (every fall)</td>
<td>3</td>
</tr>
<tr>
<td>BIOC 302</td>
<td>General Biochemistry (every spring)</td>
<td>3</td>
</tr>
<tr>
<td>MMG 232</td>
<td>QR-Methods in Bioinformatics (every spring)</td>
<td>3</td>
</tr>
<tr>
<td>MMG 310</td>
<td>Current Topics in MMG</td>
<td>2</td>
</tr>
<tr>
<td>MMG 393</td>
<td>Graduate Teaching Practicum</td>
<td>3</td>
</tr>
<tr>
<td>Approved Graduate Ethics Course</td>
<td></td>
<td>1</td>
</tr>
</tbody>
</table>

*Successful completion of BIOC 205/BIOC 206 can substitute for the BIOC 301/BIOC 302 requirement for previous UVM students only. However, these will NOT count towards the 30 graduate credit requirement for the degree.

Choose at least one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MMG 201</td>
<td>Molecular Cloning Lab (every fall)</td>
</tr>
<tr>
<td>MMG 211</td>
<td>Prokaryotic Molecular Genetics (every fall)</td>
</tr>
<tr>
<td>MMG 233</td>
<td>Genetics and Genomics (every fall)</td>
</tr>
<tr>
<td>MMG 312</td>
<td>Eukaryotic Molecular Genetics (spring semester)</td>
</tr>
</tbody>
</table>

Choose at least one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>MMG 220</td>
<td>Environmental Microbiology (spring semester)</td>
</tr>
<tr>
<td>MMG 222</td>
<td>Advanced Medical Microbiology (every spring)</td>
</tr>
</tbody>
</table>
MMG 225  Eukaryotic Virology (fall semester, even years)

MMG 320  Cellular Microbiology (spring semester)

An additional 3 credits (9 for those using BIOC205/BIOC206 in place of BIOC301/BIOC302) may be selected from lists above or the following. Special topics or other graduate courses maybe acceptable by prior approval from the Student’s Studies Committee.

CLBI 301  Cell Biology (every spring)

MMG 223  Immunology (every spring)

MMG 352  Protein:Nucleic Acid Interact (spring)

At least six and up to 9 (12 for those who completed BIOC205/BIOC206 in place of BIOC 301/BIOC302) credits of Master’s Thesis Research (MMG 391) are required. In addition, a written thesis and defense of this thesis must occur according to the guidelines laid out by the Graduate College.

Comprehensive Examination
By the end of the first semester in the master’s program, M.S. students will write either an extensive literature review or research proposal that pertains to their research interests. Students can expect guidance from their advisor and Studies Committee in the writing of the proposal, but must assume responsibility for the final version and must acquire sufficient mastery of their chosen subject area to defend the proposal. Students will present their written proposal to their Studies Committee. That Committee will determine if the written proposal is satisfactory and, if it is, schedule an oral defense. During the oral defense, the Committee shall be free to explore the knowledge of the student on a range of subjects related to the proposal, much as occurs during a thesis defense. If the written review/proposal is deemed unsatisfactory or if a student fails the oral defense, the candidate will be given one opportunity to rewrite or redefend his/her proposal. If the student fails a second time, s/he/they will be dismissed from the M.S. program.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Advancement to candidacy requires satisfactory completion of the comprehensive exam.

MICROBIOLOGY AND MOLECULAR GENETICS M.S.
All students must meet the Requirement for the Master’s Degree (p. 265)

OVERVIEW
The Department of Microbiology and Molecular Genetics offers a Master of Science degree. The M.S. degree is a course and research based program. The program requires a minimum of 30 credits of research and coursework, a qualifying exam for candidacy, and the writing and defense of a thesis.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science in Microbiology and Molecular Genetics
- A bachelor’s degree with a minimum cumulative grade point average of 3.00.
- Minimum course requirements: Completion of two semesters of undergraduate biology, general chemistry, organic chemistry and calculus; in addition, one course in genetics, one course in microbiology with a laboratory, and one course in cell biology.
- Students must identify a research mentor within the Department of Microbiology and Molecular Genetics in whose laboratory they will conduct their Master’s Degree prior to application.
- GRE/GMAT scores are NOT an admission requirement for the Master’s Degree Program in Microbiology and Molecular Genetics program.
- Graduate student status will start one week prior to the start of fall classes and will be expected to be maintained full time including summers until completion of their Master’s degree in Microbiology and Molecular Genetics.

APPLICATION PROCESS
- Completion of application to the Graduate College, meeting all Graduate College application requirements.
- One of the required three letters of recommendation must be from your identified research mentor.

Minimum Degree Requirements
A minimum of 30 credits are required for completion of the Master’s Degree in Microbiology and Molecular Genetics. Six of the thirty credits must be master’s thesis research credits. Students must also meet the Graduate College requirements for the Master’s Degree including maintaining a minimum GPA of 3.00.

Complete the following courses:

<table>
<thead>

Gieder, Katherina; Adjunct Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, Virginia Tech

Ginger, Clare A.; Associate Professor; Rubenstein School of Environment and Natural Resources; PHD, University of Michigan Ann Arbor

---

**COMPREHENSIVE EXAMINATION**

By the end of the first year, M.S. candidates will write either an extensive literature review or research proposal that pertains to their research interests. Students can expect guidance from their advisor and Studies Committee in the writing of the proposal, but must assume responsibility for the final version and must acquire sufficient mastery of their chosen subject area to defend the proposal. Students will present their written proposal to their Studies Committee. That Committee will determine if the written proposal is satisfactory and, if it is, schedule an oral defense. During the oral defense, the Committee shall be free to explore the knowledge of the student on a range of subjects related to the proposal, much as occurs during a thesis defense. If the written review/proposal is deemed unsatisfactory or if a student fails the oral defense, the candidate will be given one opportunity to rewrite or re-defend his/her proposal. If the student fails a second time, s/he/they will be dismissed from the M.S. program.

**OVERVIEW**

Graduate students in the Rubenstein School work closely with faculty who are dedicated to applied environmental research in service of society and have very active research programs. Faculty take an integrated approach to their research projects, work with other faculty teams in the School, and collaborate nationally and internationally with other researchers.
Gould, Rachelle; Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, Stanford University

Yamamato, Britt; Adjunct Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Washington Seattle

Zydlewski, Gayle Barbin; Adjunct Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Maine

**NATURAL RESOURCES AMP**

All students must meet the Requirements for the Accelerated Master's Degree Programs (p. 264)

**OVERVIEW**

The Accelerated Master’s Degree Program (AMP) in Rubenstein is designed to give select UVM undergraduate students the opportunity to earn a Bachelor’s and a Master’s Degree in Natural Resources in 5 years. This option is only available for the thesis, and not the project, masters in Natural Resources.

Following admission to the Graduate College, students may earn up to 9 credits toward the MS degree in Natural Resources during their BS/BA, six of these credits also count toward their BS/BA. The three additional credits taken for the MS during their undergraduate degree program cannot count toward the BS/BA degree. The remaining 21 credits will be fulfilled after completion of the BA/BS when the MS degree becomes the primary curriculum.

**SPECIFIC REQUIREMENTS**

Requirements for Admission to Graduate Studies for the Degree of Master of Science

Students should apply for admission into the Accelerated Master’s Degree Program (AMP) in the Rubenstein School in the beginning of the spring semester of their junior year, but can apply in their first
semester of their junior year as well. Consideration for admission requires the following:

- A minimum cumulative GPA of 3.00.
- Identification of a research advisor.
- Completion of the Graduate College Application form:
  - Three letters of recommendation from UVM faculty members: one letter must be from the proposed MS advisor in the Rubenstein School, one must be from another UVM faculty member, and one from the program director.
  - Address the work to be conducted as part of your statement of purpose to the grad college

Students must be admitted thought the Graduate College before taking any courses that will count toward their MS degree requirements. Students taking 200 level courses approved for graduate credit as part of the AMP must notify the faculty that they are taking this course as a graduate student before the class begins. Students are expected to start their MS research in the summer/semester following their undergraduate graduation. Students who graduate in January (and not May) can begin their master’s research in the spring semester and are expected to continue research in the summer.

Minimum Degree Requirements
The master of science requires from fifteen to twenty-seven credits of course work in related fields (including NR 395: Applied Ecology, Environment and Society, and NR 306: Envisioning a Sustainable Future), a public research seminar presented at the annual graduate student symposium, a research proposal, a comprehensive examination, and six to fifteen credits of thesis research.

Comprehensive Examination
A written comprehensive examination is required for all master’s students. Generally taken during a students third or fourth semester, the examination will cover broad knowledge of the student’s discipline. The details and format of the examination and its form (written or oral or both depending on the requirements of each concentration) are decided upon by the Studies Committee and will be discussed with the student well in advance of the exam.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Successful completion of any required courses, and at least 15 graded graduate credits earned in compilation of the graduate GPA. A GPA of 3.00 or greater is also required.

AQUATIC ECOLOGY AND WATERSHED SCIENCE CONCENTRATION
The Aquatic Ecology and Watershed Science concentration provides students with advanced understanding of aquatic ecosystems and their watersheds, and the skills and methodologies required to analyze and solve technical problems concerning the effects of human activities on these systems. Current areas of research emphasis include watershed processes and management; stream and lake ecology; fish ecology and fisheries management; aquatic ecotoxicology; pollutant studies; biogeochemical dynamics, and the modeling of aquatic systems, processes and populations.

Minimum Degree Requirements
In addition to the general M.S. in Natural Resources requirements, this concentration requires enrollment in a one credit special topics seminar organized by faculty and students in the concentration, and at least twelve additional credits of course work in the aquatic and watershed sciences, or supportive fields (approved by the student’s graduate studies committee). Students in this concentration pursue a thesis and must complete a minimum of six thesis research credits.

ENVIRONMENT, SOCIETY AND PUBLIC AFFAIRS CONCENTRATION
Through the M.S. concentration in Environment, Society and Public Affairs, graduate students build theoretical understanding, analytical skills, and applied knowledge in the social dimensions of environmental and natural resource issues. Specific areas in which students may build understanding, skills, and knowledge include:

- environmental policy and planning
- community studies, human behavior, and environmental sociology
- ecological economics
- park and wilderness management
- public participation, conflict resolution, and decision making
- geospatial analysis

Minimum Degree Requirements
In addition to the general M.S. in Natural Resources requirements, this concentration requires twenty-one to twenty-four credits of advanced courses (including a methods course, three courses reflecting this concentration's emphasis, and one ecology course), and six credits of thesis research. Students pursue a thesis.

ENVIRONMENTAL THOUGHT AND CULTURE CONCENTRATION
In this concentration graduate students build interdisciplinary analytical skills and theoretical understanding of environmental and natural resource issues, with a focus on their human, ethical, and cultural dimensions. Specific areas include: environmental communication and cultural studies; environmental education and interpretation; environmental ethics and philosophy; environment, development, peace, and global justice studies; environmental politics and advocacy; religion and environment; sustainability; and sustainable development.

Minimum Degree Requirements
In addition to the general M.S. in Natural Resources requirements, this concentration requires eighteen to twenty-one credits of advanced courses and fifteen credits in a specialization within environmental thought and culture, and six to nine credits of thesis research. Students pursue a thesis.

FORESTRY CONCENTRATION
The goal of this Master of Science concentration is to provide graduate students with advanced training in forest science and the
opportunity to further their knowledge and proficiency in some specialized aspect of forestry. The faculty has research interests which span the broad areas of ecology, management, pathology, physiological ecology, sustainable forestry, and community forestry.

**Minimum Degree Requirements**
In addition to the general M.S. in Natural Resources requirements, this concentration requires eighteen to twenty-one credits of advanced forestry and related courses, a comprehensive examination with both a written and oral component, and six to nine credits of thesis research. Students pursue a thesis.

**WILDLIFE BIOLOGY CONCENTRATION**
This Master of Science concentration is designed to provide a vehicle for a wildlife biologist to develop research abilities and pursue a specialized course of study. Current areas of research emphasis include applied avian ecology, behavioral ecology, game management, nongame wildlife populations, reserve design, and landscape ecology.

**Minimum Degree Requirements**
In addition to the general M.S. in Natural Resources requirements, the Wildlife Biology concentration requires eighteen to twenty-one credits of course work in wildlife and related fields, a comprehensive examination with both a written and oral component, and six to nine credits of thesis research. Students pursue a thesis.

**NATURAL RESOURCES M.S.**
All students must meet the Requirements for the Master’s Degree (p. 265)

**OVERVIEW**
The Master of Science in Natural Resources prepares students to pursue studies in advanced disciplinary topics. They will learn scientific and practical methods and develop technical skills for understanding ecological, physical, social, political, and economic aspects of environmental and natural resource issues.

Students choosing to pursue research in this program will take fifteen to twenty-four credits of advanced course work and write and defend a thesis or project. This experience will further their knowledge and proficiency in natural resource fields including six areas of concentration:

- Aquatic Ecology and Watershed Science (p. )
- Environment, Society and Public Affairs (p. )
- Environmental Thought and Culture (p. )
- Forestry (p. )
- Wildlife Biology (p. )

Other areas of studies can be pursued through the general degree in Natural Resources including interdisciplinary research not included in the above concentrations. Students and their graduate studies committee work closely together to design these individualized curricula.

Students may also pursue a MELP/MSNR dual degree with the Vermont Law School.

Students choosing to emphasize advanced course work (twenty-seven credits) will pursue academic and work experiences leading to development of professional skills emphasizing conservation leadership, ecological planning, and sustainable forestry. A three credit project/internship experience will complement the academic course work.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Science**
Undergraduate degree in an appropriate field in the sciences, social sciences, or humanities/fine arts, and three letters of recommendation attesting to the candidate’s academic potential for graduate work and motivation for pursuing this degree. Most successful applicants to this highly competitive program have strong academic credentials and experience in an environmental or natural resource-related job, internship, or other related activity.

**Minimum Degree Requirements**
The master of science requires from fifteen to twenty-seven credits of course work in related fields (including NR 395: Applied Ecology, Environment and Society, and NR 306: Envisioning a Sustainable Future), a public research seminar presented at the annual graduate student symposium, a research proposal, a comprehensive examination, and three to six credits of project research, or six to fifteen credits of thesis research.

**Comprehensive Examination**
A written comprehensive examination is required for all master’s students. Generally taken during a students third or fourth semester, the examination will cover broad knowledge of the student’s discipline. The details and format of the examination and its form (written or oral or both depending on the requirements of each concentration) are decided upon by the Studies Committee and will be discussed with the student well in advance of the exam.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**
Successful completion of any required courses, and at least 15 graded graduate credits earned in compilation of the graduate GPA. A GPA of 3.00 or greater is also required.

**AQUATIC ECOLOGY AND WATERSHED SCIENCE CONCENTRATION**
The Aquatic Ecology and Watershed Science concentration provides students with advanced understanding of aquatic ecosystems and their watersheds, and the skills and methodologies required to analyze and solve technical problems concerning the effects of human activities on these systems. Current areas of research emphasis include watershed processes and management; stream and lake ecology; fish ecology and fisheries management; aquatic
ecotoxicology; pollutant studies; biogeochemical dynamics, and the modeling of aquatic systems, processes and populations.

Minimum Degree Requirements
In addition to the general M.S. in Natural Resources requirements, this concentration requires enrollment in a one credit special topics seminar organized by faculty and students in the concentration, and at least twelve additional credits of course work in the aquatic and watershed sciences, or supportive fields (approved by the student’s graduate studies committee). Students in this concentration pursue a thesis and must complete a minimum of six thesis research credits.

ENVIRONMENT, SOCIETY AND PUBLIC AFFAIRS
CONCENTRATION
Through the M.S. concentration in Environment, Society and Public Affairs, graduate students build theoretical understanding, analytical skills, and applied knowledge in the social dimensions of environmental and natural resource issues. Specific areas in which students may build understanding, skills, and knowledge include:

- environmental policy and planning
- community studies, human behavior, and environmental sociology
- ecological economics
- park and wilderness management
- public participation, conflict resolution, and decision making
- geospatial analysis

Minimum Degree Requirements
In addition to the general M.S. in Natural Resources requirements, this concentration requires twenty-one to twenty-four credits of advanced courses (including a methods course, three courses reflecting this concentration’s emphasis, and one ecology course), and three to six credits of project research or six credits of thesis research. Students pursue a project or thesis.

ENVIRONMENTAL THOUGHT AND CULTURE
CONCENTRATION
In this concentration graduate students build interdisciplinary analytical skills and theoretical understanding of environmental and natural resource issues, with a focus on their human, ethical, and cultural dimensions. Specific areas include: environmental communication and cultural studies; environmental education and interpretation; environmental ethics and philosophy; environment, development, peace, and global justice studies; environmental politics and advocacy; religion and environment; sustainability; and sustainable development.

Minimum Degree Requirements
In addition to the general M.S. in Natural Resources requirements, this concentration requires eighteen to twenty-one credits of advanced courses and fifteen credits in a specialization within environmental thought and culture, and six credits of project research or six to nine credits of thesis research. Students pursue a thesis or project.

FORESTRY CONCENTRATION
The goal of this Master of Science concentration is to provide graduate students with advanced training in forest science and the opportunity to further their knowledge and proficiency in some specialized aspect of forestry. The faculty has research interests which span the broad areas of ecology, management, pathology, physiological ecology, sustainable forestry, and community forestry.

Minimum Degree Requirements
In addition to the general M.S. in Natural Resources requirements, this concentration requires eighteen to twenty-one credits of advanced forestry and related courses, a comprehensive examination with both a written and oral component, and six credits of project research or six to nine credits of thesis research. Students pursue a thesis or project.

WILDLIFE BIOLOGY CONCENTRATION
This Master of Science concentration is designed to provide a vehicle for a wildlife biologist to develop research abilities and pursue a specialized course of study. Current areas of research emphasis include applied avian ecology, behavioral ecology, game management, nongame wildlife populations, reserve design, and landscape ecology.

Minimum Degree Requirements
In addition to the general M.S. in Natural Resources requirements, the Wildlife Biology concentration requires eighteen to twenty-one credits of course work in wildlife and related fields, a comprehensive examination with both a written and oral component, and three to six credits of project research or six to nine credits of thesis research. Students pursue a thesis or project.

LEADERSHIP FOR SUSTAINABILITY
M.P.S.
All students must meet the Requirements for the Master of Professional Studies Degree (p. 267)

OVERVIEW
The Masters of Professional Studies in Leadership for Sustainability is a two-year, low-residency professional graduate program designed for emerging and experienced leaders who wish to deepen their capacity to catalyze change and transcend boundaries. This two-year program offers a blend of residential intensives across the country, interactive online courses, professional coaching, and access to a network of faculty and professional affiliates. The program curriculum explores leadership practices inspired by the wisdom of nature and grounded in a critical inquiry of the mindsets, assumptions, and patterns of power and privilege that underlie change-making efforts.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Professional studies
Requirements for Admission to Graduate Studies for the Degree of Master of Professional Studies
Minimum Degree Requirements
Successful completion of thirty credits, including:

<table>

</table>

An approved set of courses that fulfill track specialization (in ecological leadership, education for sustainability, or ecological economics) or a suite of elective courses based on student interests.

CAPSTONE PROJECT
The Capstone is designed to provide MLS students with an applied leadership experience that integrates core program-level learning outcomes while addressing pressing challenges/opportunities in their own home community/organization. The project process is supported through a combination of online modules, professional affiliate coaching, and faculty mentorship, feedback and assessment. Students are required to develop and defend a project proposal; implement project activities and objectives; complete a culminating final report; and present their Capstone project at the annual Leadership for Sustainability Summit.

Comprehensive Examination
The written comprehensive exam will take place during the second year of the MLS Program. The exam will require students to demonstrate competency in the MLS programmatic learning outcomes. Each student’s comprehensive exam will be administered and assessed by a team of MLS faculty members and professional affiliates.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Advancement requires:

- Completion of the thirty (30) academic credit sequence described above
- Attendance at three week-long residential intensives
- Completion of the Capstone Project and Comprehensive Exam
- Presentation at the annual Leadership for Sustainability Summit

NATURAL RESOURCES: MASTER OF ENVIRONMENTAL LAW AND POLICY/MASTER OF SCIENCE IN NATURAL RESOURCES (MELP/MSNR)
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
Dual Degree Program with Vermont Law School
The Master of Environmental Law and Policy (MELP)/Master of Science in Natural Resources (MSNR) Dual Degree Program offered by Vermont Law School’s Environmental Law Center and the University of Vermont’s Rubenstein School of Environment and Natural Resources gives students an opportunity to deepen their graduate education by integrating significant aspects of the complementary disciplines of environmental law, policy, and science.

Each school applies its own grading system to students in the program. Students must be in good academic standing at both schools to remain in the program. Each school issues its own transcript.

After completing the requirements for either degree, students will receive a diploma from the appropriate school and may attend graduation.

For more information about this program, visit the MELP/MSNR Program website.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Science at the University of Vermont
Undergraduate degree in an appropriate field in the sciences, social sciences, or humanities/fine arts; satisfactory scores on the General Test of the Graduate Record Examination; and three letters of recommendation attesting to the candidate’s academic potential for graduate work and motivation for pursuing this degree. Most successful applicants to this highly competitive program have strong academic credentials and experience in an environmental or natural resource-related job, internship, or other related activity.

Students interested in the Dual Degree Program are required to apply separately to each school. Each school admits students according to its own criteria for admission. Dual Degree applicants may be interviewed by admissions officials at both schools, when appropriate. Students may apply for admission to the Dual Degree Program at any time prior to the awarding of the degrees.

Students admitted to the Dual Degree Program will have academic advisors in each school. These advisors assist with curriculum planning, program requirements, and similar matters. Advisors are
faculty members familiar with the course requirements for both schools.

**Minimum Degree Requirements at the University of Vermont**

Students in the Dual Degree Program may earn both degrees with a total of forty-two credits. Students must meet each school’s degree requirements, including required courses and thesis preparation. Students take a minimum of twenty-one credits at VLS toward the M.E.L.P. degree and a minimum of twenty-one credits at UVM toward the M.S. (Natural Resources) degree. Students may transfer a maximum of nine credits between the two programs. Courses to be transferred must meet the requirements of the Dual Degree Program. Transferred credits may be applied toward both degrees.

Students have a maximum of five years to complete the Dual Degree Program. Course credits to be transferred must be taken within that five year period.

The master of science requires from fifteen to twenty-seven credits of course work in related fields (including NR 395: Applied Ecology, Environment and Society, and NR 306: Envisioning a Sustainable Future), a public research seminar presented at the annual graduate student symposium, a research proposal, a comprehensive examination, and three to six credits of project research, or six to fifteen credits of thesis research.

**Comprehensive Examination at the University of Vermont**

A written comprehensive examination is required for all master’s students. Generally taken during a student’s third or fourth semester, the examination will cover broad knowledge of the student’s discipline. The details and format of the examination and its form (written or oral or both depending on the requirements of each concentration) are decided upon by the Studies Committee and will be discussed with the student well in advance of the exam.

**Requirements for Advancement to Candidacy for the Degree of Master of Science at the University of Vermont**

Successful completion of any required courses, and at least 15 graded graduate credits earned at UVM in compilation of the graduate GPA. A GPA of 3.00 or greater is also required.

**NATURAL RESOURCES PH.D.**

All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

**OVERVIEW**

The Ph.D. program provides the opportunity for focused, in-depth research in any of the specialties of the school, while fostering an interdisciplinary appreciation and perspective through course work and interactions with ecological, physical, and social scientists in an integrated academic setting. Students can develop programs in areas such as pollution ecology, recreation and tourism, conservation biology, and environmental policy, as well as any of the traditional natural resource disciplines featured in the master’s program. In addition, formal course work and practical experience in college-level teaching are an important component of the doctoral curriculum.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy**

Acceptability to a potential faculty advisor holding an appointment in the Rubenstein School of Environment and Natural Resources and the Graduate College. Applicants with a Master of Science degree are preferred.

**Minimum Degree Requirements**

The Doctor of Philosophy requires seventy-five total credits (including NR 395: Applied Ecology, Environment and Society, and NR 306: Envisioning a Sustainable Future). For students entering the program with a completed master’s degree, fifteen total graded course credits are required. For students entering the program without a master’s degree, thirty total graded credits are required. Credits must include no less than twenty and no more than 45 credits of dissertation research. In addition students must complete a public proposal defense, an approved research proposal, a written and oral comprehensive examination, and a teaching/professional skills requirement. An oral and written defense of the dissertation is required of all students.

**Comprehensive Examination**

Both a written and oral comprehensive examination are required for all Ph.D. students. The examination will cover broad knowledge of the student’s discipline. The exams should be taken and passed during the second year of matriculation. The Graduate College requirement stipulates that the examination must occur at least six months before the dissertation is submitted.

**Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy**

It is ordinarily expected that a student will complete the following requirements for advancement to candidacy prior to the end of the second year in the program:

- one year of full-time graduate study in residence at the University of Vermont;
- at least twelve credits of research;
- at least thirty credits of course work at the graduate level acceptable to the student’s graduate studies committee, with a minimum of 15 of the course credits graded and taken at UVM after matriculation into the degree program;
- satisfactory performance on a comprehensive examination;
- delivery of a public proposal seminar; and
- a dissertation proposal accepted by the student’s graduate studies committee.

**NEUROSCIENCE**

http://www.uvm.edu/neurosciencegrad
OVERVIEW
The Neuroscience Graduate Program is a university-wide, multidisciplinary, Ph.D. granting program that has more than 50 faculty mentors across 13 departments and five colleges. This program emphasizes rigorous training in neuroscience-related research, educates students about human health, and encourages interdisciplinary research projects.

DEGREES
- Neuroscience M.S. (p. 208)
- Neuroscience Ph.D. (p. 208)

FACULTY
Althoff, Robert; Associate Professor, Department of Psychiatry; PhD, University of Illinois Urbana-Champaign
Ballif, Bryan A.; Professor, Department of Biology; PhD, Harvard University
Barr, Jeremy; Assistant Professor, Department of Neurological Sciences; PhD, SUNY Downstate
Berger, Christopher Lewis; Professor, Department of Molecular Physiology and Biophysics; PhD, University of Minnesota Twin Cities
Bongard, Joshua C.; Professor, Department of Computer Science; PhD, University of Zurich
Bouton, Mark Earhart; Professor, Department of Psychological Science; PhD, University of Washington
Brewer, Matthias; Professor, Department of Chemistry; PhD, University of Wisconsin-Madison
Cannizzaro, Michael S.; Associate Professor, Department of Communication Sciences and Disorders; PhD, University of Connecticut
Cipolla, Marilyn Jo; Professor, Department of Neurological Sciences; PhD, University of Vermont
Cornbrooks, Carson Justis; Associate Professor Emeritus, Department of Neurological Sciences; PhD, Virginia Commonwealth University
Corderre, Emily; Assistant Professor; Department of Communication Sciences and Disorders; PhD, University of Nottingham
Coutinho-Budd, Jaeda; Assistant Professor, Department of Biology; PhD The University of North Carolina at Chapel Hill
Dostmann, Wolfgang R. G.; Professor, Department of Pharmacology; PhD, University of Bremen, MD, University of Munich
Dumas, Julie Anna; Associate Professor, Department of Psychiatry; PhD, University of North Carolina
Ebert, Alicia; Associate Professor, Department of Biology; PhD, Colorado State University
Eppstein, Margaret Jean; Professor Emerita, Department of Computer Science; PhD, University of Vermont
Erdos, Benedek; Assistant Professor, Department of Pharmacology; MD, PhD, Semmelweis University, School of Medicine, Budapest, Hungary
Falls, William A.; Dean, College of Arts and Science, Professor, Department of Psychological Science; PhD, Yale University
Forehand, Cynthia Jean; Dean, Graduate College, Professor, Department of Neurological Sciences; PhD, University of North Carolina Chapel Hill
Franklyn, Christopher Steward; Professor, Department of Biochemistry; PhD, University of California Santa Barbara
Freeman, Kaley; Assistant Professor, Department of Surgery; MD, PhD, University of Colorado Boulder
Garavan, Hugh P.; Professor, Department of Psychiatry; PhD, Bowling Green State University
Green, John Thomas; Professor, Department of Psychological Science; PhD, Temple University
Hammack, Saymowong E; Professor, Department of Psychological Science; PhD, University of Colorado
Henry, Sharon Margaret; Professor Emerita, Department Neurological Sciences; PhD, University of Vermont
Holmes, Gregory; Professor, Department of Neurological Sciences; MD, University of Virginia
Howe, Alan K; Associate Professor, Department of Pharmacology; PhD, Northwestern University
Hudziak, James Joseph; Professor, Department of Psychiatry; MD, University of Minnesota Twin Cities
Jaworski, Diane Marie; Professor, Department of Neurological Sciences; PhD, Texas Woman’s University
Krementsov, Dimitry; Assistant Professor; Department of Biomedical and Health Sciences; PhD University of Vermont
Li, Dawei; Assistant Professor, Department of Microbiology and Molecular Genetics; PhD, Shanghai Jiao Tong University
Lounsbury, Karen M.; Professor, Department of Pharmacology; PhD, University of Pennsylvania
Mackey, Michael Scott; Assistant Professor, Department of Psychiatry; PhD; McGill University, Montreal, Quebec
Mohapatra, Sambit; Assistant Professor; Department of Rehabilitation and Movement Science; PhD University of Illinois, Chicago
Mahoney, John Matthew; Assistant Professor, Department of Neurological Sciences; PhD, Dartmouth College
Mawe, Gary Michael; Professor, Department of Neurological Sciences; PhD, Ohio State University
May, Victor; Professor, Department of Neurological Sciences; PhD, Northwestern University
Morielli, Anthony D.; Associate Professor, Department of Pharmacology; PhD, University of California Santa Cruz
Nelson, Mark; Professor, Department of Pharmacology; PhD, Washington University in St Louis
Peters, Denise; Assistant Professor; Department of Rehabilitation and Movement Science; PhD, DPT, University of South Carolina
Potter, Alexandra S.; Associate Professor, Department of Psychiatry; PhD, University of Vermont
Prelock, Patricia A.; Dean, College of Nursing and Health Sciences; Professor, Department of Communication Sciences and Disorders; Professor, Department of Medicine-Pediatrics; PhD, University of Pittsburgh
Quénet, Delphine; Assistant Professor, Department of Biochemistry, PhD; University of Strasbourg, France
Schermherhorn, Alice C; Associate Professor, Department of Psychological Science; PhD, University of Notre Dame
Scott, Rodney; Professor, Department of Neurological Sciences; PHD, University of London
Sibold, Jeremy S.; Associate Professor, Department of Rehabilitation and Movement Science; EDD, West Virginia University
Spees, Jeffrey; Professor, Department of Medicine-Cardiovascular; PHD, University of California Davis
Stafford, James; Assistant Professor; Department of Neurological Sciences; PHD Oregon Health and Science University
Teuscher, Cory; Professor, Department of Medicine-Immunobiology; PHD, University of New Mexico
Toufexis, Donna J.; Associate Professor, Department of Psychological Science; PHD, McGill University
Vizzard, Margaret A.; Professor, Department of Neurological Sciences; PHD, Thomas Jefferson University
Wellman, George C.; Professor, Department of Pharmacology; PHD, University of Vermont
Weston, Matthew; Assistant Professor, Department of Neurological Sciences; DHSC, Baylor College of Medicine
Whitaker, Emmett; Assistant Professor; Department of Anesthesiology; MD, University of Rochester School of Medicine and Dentistry
White, Sheryl Lynne; Assistant Professor, Department of Neurological Sciences; PHD, University of Vermont

NEUROSCIENCE M.S.

All students must meet the Requirements for the Master's Degree (p. 265)

OVERVIEW

The Neuroscience Graduate Program awards M.S. degrees only to students who have matriculated into the Ph.D. program but whose academic and research progress is deemed by their advisory committee to be suitable for a M.S. rather than a Ph.D. degree. Terminal M.S. degrees are not automatically offered to students leaving the program prematurely. Students must be recommended for the M.S. degree by their advisory committee and are required to complete the minimum course and research requirements for the M.S. as defined by the Graduate College and the Neuroscience Graduate Program.

NEUROSCIENCE PH.D

All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

OVERVIEW

The Neuroscience Graduate Program is a university-wide, multidisciplinary, Ph.D. granting program that has more than 50 faculty mentors across 13 departments and 5 colleges. This program emphasizes rigorous training in neuroscience-related research, educates students about human health, and encourages interdisciplinary research projects.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy

Incoming students should have a bachelor’s and/or master’s degree in a biological science, neuroscience, chemistry, physics, engineering, psychology, mathematics, communication sciences or computer science. Research experience is not required, but is strongly recommended.

GRE General Test scores and scores on the Subject Test in Biology, Biochemistry, Cell and Molecular Biology, or Psychology are not required but are recommended. Applicants whose native language is not English must submit scores from Test of English as a Foreign Language (TOEFL).

Three letters of reference are required. Letters from research advisors or supervisors are highly desirable attesting to applicant’s abilities to work independently in an academic setting.

**Comprehensive Examination**
The qualifying examination for advancement to candidacy for a Ph.D. in Neuroscience must be taken prior to the end of the first semester of the second year. The exam has both a written and oral component, both of which must be completed successfully. The exam committee will consist of at least three members of the NGP faculty. Should the student fail the examination, only one re-examination is allowed.

**Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy**
Satisfactory completion of required courses and research rotations. Approval of the written and oral portions of the qualifying comprehensive examination.

**NURSING**
http://www.uvm.edu/~cnhs/nursing/

**OVERVIEW**
The Department of Nursing offers graduate programs which prepare nurses to assume leadership roles within health care systems in a variety of settings, to expand knowledge of the discipline of nursing, and to acquire the foundation for doctoral study and continued professional development. The ability to work collaboratively on an interdisciplinary team, provide patient-centered care, employ evidence-based practice, access information technology, and apply quality improvement strategies are basic competencies expected of all graduates of these programs.

The following Graduate Nursing Programs are currently being offered:

**Master of Science in Nursing - Clinical Nurse Leader (CNL)**
The Master of Science degree program for the Clinical Nurse Leader (CNL) prepares nurses for horizontal leadership positions through which evidenced-based care for groups of patients will be managed.

**Direct Entry Clinical Nurse Leader (DCNL)**
The Direct Entry into Clinical Nurse Leader (DCNL) is an accelerated, alternative-entry program for those who have not graduated from a nursing program, and who hold a baccalaureate or higher degree in another field. The program prepares the student to progress into the MS-CNL track. It is not a stand-alone accelerated RN program.

**Direct Entry Program in Nursing (DEPN)**
The Direct Entry Program in Nursing (DEPN) is an accelerated, alternative-entry program for those who have not graduated from a nursing program, and who hold a baccalaureate or higher degree in another field. The program prepares the student to progress into the DNP-Primary Care NP track. It is not a stand-alone accelerated RN program.

**Doctor of Nursing Practice (DNP)**
The Doctor of Nursing Practice (DNP) degree program has two entry options; one for registered nurses with a baccalaureate or higher degree (in nursing or another field) who wish to practice as a nurse practitioner in Primary Care, and another for post master’s degree in nursing applicants who wish to pursue the DNP.

**Post-Master’s Doctor of Nursing Practice (DNP)**
For candidates who have earned a MS degree in nursing and wish to pursue a DNP. Within the Post Master’s DNP there are two tracks: Primary Care DNP and Executive Nurse Leader DNP.

CNHS graduate nursing students are required to complete the CNHS mandates prior to matriculating into the program. Students must keep these requirements current throughout their program: Immunizations, CPR, HIPPA/OSHA training, annual PPD, and RN License. Some clinical sites require a Criminal Background check as well. It is required to be compliant with this process to participate in clinical courses/experiences. Complete details on CNHS Mandatories are available on the College website.

**DEGREES**
- Nursing AMP (p. 210)
- Nursing M.S. (p. 211)
- Nursing Practice DNP (p. 211)

**FACULTY**

NURSING AMP
All students must meet the Requirements for the Accelerated Master's Degree Programs (p. 264)

OVERVIEW
The Accelerated Master’s Degree Program (AMP) is designed to offer select UVM undergraduate nursing students the opportunity to obtain both their bachelor’s degree and master’s degree in nursing in a total of six years of study. Students apply to the program in the spring of their junior year, and CNL courses begin during the student’s senior year.

The Department of Nursing offers a graduate program leading to a Master of Science degree. The Clinical Nurse Leader program (CNL) prepares nurses to assume leadership roles within health care systems in a variety of settings, to expand knowledge of the discipline of nursing, and to acquire the foundation for graduate study and continued professional development. The ability to work collaboratively on an interdisciplinary team, provide patient-centered care, employ evidence-based practice, access information technology, and apply quality improvement strategies are basic competencies expected of all graduates of this program.

The M.S. graduate curriculum includes seven core courses essential for all students that address the theoretical basis of nursing care; professional issues and role development of CNLs, research utilization and evidence-based practice, quality and ethics of health care delivery, health policy and finance, theoretical foundations of nursing, genetics/ genomics, biostatistics and epidemiology. Students apply core content to their Clinical Nurse Leader program. Upon successful completion of program requirements students are eligible to complete a national CNL certification exam.

As a CNHS graduate nursing student, you are required to complete the CNHS Mandatories prior to matriculating into your program. Students must keep these requirements current throughout their program: Immunizations, CPR, HIPPA/OSHA training, annual PPD, and RN License. Some clinical sites require a Criminal Background check as well. It is a program requirement to be compliant with this process to participate in clinical courses/experiences. Complete details on CNHS Mandatories are available on the college website.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of science for Accelerated Students
The following criteria must be met to be considered for admission into the program:

- Minimum cumulative grade point average of 3.00
- Enrollment and good standing in the UVM undergraduate nursing program and at the junior level of the program
- Completion of the Graduate College Application Form, which must include three letters of recommendation, including one from a UVM nursing clinical instructor highlighting the candidate’s clinical performance
- Current resume
- Students must be admitted through the Graduate College before taking any courses that will be applied to the master’s degree requirements. Students will continue master’s degree coursework in the summer following their undergraduate graduation
- GRE scores are not an admission requirement for the AMP in Nursing

Minimum Degree Requirements for the Degree of Master of science
The following criteria must be met to complete your minimum degree requirements:

- Core, track, and elective courses
- Successful completion of comprehensive examination
- Grade point average of 3.00 or higher
- Completion and implementation of CNL Project

Comprehensive Examination
The Comprehensive Examination is conducted by the Graduate Program in the Department of Nursing. The examination is designed to allow the student to demonstrate analysis and synthesis of knowledge gained through the program. The examination must be completed prior to the final track courses and practicums, and students may take it any time after the majority of core courses have been successfully completed. Students will be expected to orally present their CNL Project proposal, clearly articulating, synthesizing, and applying the MS Essentials and the CNL competencies and core content addressed throughout the program of study as they relate to their CNL Project.

The Comprehensive Examination is rated on a satisfactory/unsatisfactory basis. In the event that the student does not achieve a satisfactory on the oral comprehensive exam, one opportunity to provide written evidence of satisfactory achievement of the goal of the comprehensive exam will be allowed.
Requirements for Advancement to Candidacy for the Degree of Master of Science
Meet all of the above criteria.

NURSING M.S.
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
The Department of Nursing offers a graduate program leading to a Master of Science degree. The Clinical Nurse Leader program (CNL) prepares nurses to assume leadership roles within health care systems in a variety of settings, to expand knowledge of the discipline of nursing, and to acquire the foundation for graduate study and continued professional development. The ability to work collaboratively on an interdisciplinary team, provide patient-centered care, employ evidence-based practice, access information technology, and apply quality improvement strategies are basic competencies expected of all graduates of this program.

The M.S. graduate curriculum includes seven core courses essential for all students that address the theoretical basis of nursing care; professional issues and role development of CNLs, research utilization and evidence-based practice, quality and ethics of health care delivery, health policy and finance, theoretical foundations of nursing, genetics/genomics, biostatistics and epidemiology. Students apply core content to their Clinical Nurse Leader program. Upon successful completion of program requirements students are eligible to complete a national CNL certification exam.

As a CNHS graduate nursing student, you are required to complete the CNHS Mandatories prior to matriculating into your program. Students must keep these requirements current throughout their program: Immunizations, CPR, HIPPA/OSHA training, annual PPD, and RN License. Some clinical sites require a Criminal Background check as well. It is a program requirement to be compliant with this process to participate in clinical courses/experiences. Complete details on CNHS Mandatories are available on the college website.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Science
The following criteria must be met to be considered for admission into the program:

- Bachelor’s Degree in nursing or another field of study (for DCNL or ADN students)
- Eligibility for licensure as an RN in Vermont
- Graduate Record Examination (GRE)
- College grade point average of 3.00 or higher
- Undergraduate statistics course
- Previous basic physical assessment course
- Three letters of recommendation
- Practice experience is an advantage

Minimum Degree Requirements
The following criteria must be met to complete your minimum degree requirements:

- Core, track, and elective courses
- Successful completion of comprehensive examination
- Grade point average of 3.00 or higher
- Completion, implementation, and evaluation of CNL Project

Comprehensive Examination
The Comprehensive Examination is conducted by the Graduate Program in the Department of Nursing. The examination is designed to allow the student to demonstrate analysis and synthesis of knowledge gained through the program. The examination must be completed prior to the final track courses and practicums, and students may take it any time after the majority of core courses have been successfully completed. Students will be expected to orally present their CNL Project proposal, clearly articulating, synthesizing, and applying the MS Essentials and the CNL competencies and core content addressed throughout the program of study as they relate to their CNL Project.

The Comprehensive Examination is rated on a satisfactory/unsatisfactory basis. In the event that the student does not achieve a satisfactory on the oral comprehensive exam, one opportunity to provide written evidence of satisfactory achievement of the goal of the comprehensive exam will be allowed.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Meet all of the above criteria.

NURSING PRACTICE DNP
OVERVIEW
The Department of Nursing offers a graduate program leading to a Doctor of Nursing Practice (DNP) degree. The program prepares nurses to assume leadership roles within health care systems in a variety of settings, to expand knowledge of the discipline of nursing, and to acquire the foundation for doctoral study and continued professional development. The ability to work collaboratively on an interdisciplinary team, provide patient-centered care, employ evidence-based practice, access information technology, and apply quality improvement strategies are basic competencies expected of all graduates of this program. The DNP program prepares graduates to provide primary care as advanced practice registered nurses (APRNs) in one of two tracks: Adult-Gerontology Nurse Practitioner (AGNP), or Family Nurse Practitioner (FNP). Additionally, the program offers nurses with an earned Master’s Degree in nursing the opportunity to complete a post-MS DNP degree, either in primary care or as an executive nurse leader.

The DNP graduate curriculum includes nine core courses essential for all students that address the theoretical foundation of nursing care, professional issues and role development of APRNs, evidence based research utilization and practice, health policy and finance, ethics, health care informatics, quality of health care delivery, leadership of
health care systems, genetics/genomics, population-based health, biostatistics and epidemiology. Students apply core content to their DNP Program. Upon successful completion of program requirements APRN students are eligible to complete a national certification exam as either FNP or AGNP.

As a CNHS graduate nursing student, students are required to complete the CNHS mandates prior to matriculating into the program. Students must keep these requirements current throughout their program: Immunizations, CPR, HIPPA/OSHA training, annual PPD, and RN License. Some clinical sites require a criminal background check as well. It is essential to be compliant with this process to participate in clinical courses/experiences. Complete details on CNHS Mandatories are available on the college website.

The following Doctor of Nursing Practice programs are being offered:

**Direct Entry Program in Nursing (DEPN)**
The Direct Entry Program in Nursing (DEPN) has replaced the Master’s Entry Program in Nursing (MEPN). This accelerated, alternative-entry program is for those who have not graduated from a nursing program, and who hold a baccalaureate or higher degree in another field. Upon successful completion of the accelerated pre-RN licensure year, students complete the national examination for RN licensure (NCLEX) and continue into the MS-CNL or the DNP-Primary Care Nurse Practitioner track. A certificate of completion is awarded for the successful completion of the pre-licensure year. A BS degree is not conferred.

**Doctor of Nursing Practice (DNP)**
The Doctor of Nursing Practice (DNP) degree program offers two entry options; one for registered nurses with a baccalaureate or higher degree (in nursing or another field), and another for post-MS applicants who wish to pursue the DNP.

**Post-Master’s Doctor of Nursing Practice (DNP)**
For candidates who have earned a MS degree in Nursing and wish to pursue a DNP. Within the Post Master DNP there are two tracks: Primary Care DNP and Executive Nurse Leader DNP.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Doctor of Nursing Practice**
The following criteria must be met to complete your minimum degree requirements:

- Bachelor’s Degree in Nursing, or Bachelor’s Degree in another field for the Direct Entry into Professional Nursing Program (DEPN), or Associate Degree in Nursing with a Baccalaureate Degree in another field
- Eligibility for licensure as an RN in Vermont
- Graduate Record Examination (GRE) scores within the past 5 years are required for DNP applicants (GRE is not required for post-MS DNP applicants with a MS degree in nursing).
- College grade point average of 3.00 or higher
- Undergraduate statistics course
- Previous basic physical assessment course
- Three letters of recommendation
- Practice experience preferred

**Minimum Degree Requirements for the Degree of Doctor of Nursing Practice**
The following criteria must be met to complete your minimum degree requirements:

- Completion of core, track, and elective courses
- Completion of Comprehensive Examination
- Grade point average of 3.00 or higher
- Completion and implementation of DNP Project

**Requirements for Admission to Graduate Studies for the Degree of Post Master’s DNP Nurse Practitioner and Post Master’s DNP Executive Nurse Leader**

- Master’s Degree in Nursing
- Eligibility for licensure as an RN in Vermont
- College grade point average of 3.00 or higher
- Three letters of recommendation
- Practice experience preferred
- An interview may be requested by the faculty

**Minimum Degree Requirements for the Degree of Post Master’s DNP Nurse Practitioner and Post Master’s DNP Executive Nurse Leader**

- Successful completion of core, track, and elective courses
- Grade point average of 3.00 or higher
- Completion of a DNP Project

**DNP Project**
The project option is a scholarly academic experience of the graduate program where students develop and conduct an innovative project/production relevant to advanced nursing practice with faculty supervision. It is anticipated that the DNP project will result in innovative practices that will improve health care delivery and patient outcomes. Students are required to present and defend the project orally upon its completion.

To register for the project, the student must have successfully completed the GRNS core courses, completed a Project Completion Form and be enrolled in DNP Project Seminar I. The project development and implementation will be completed over three semesters, with evaluation and dissemination completed in the final semester of the program.

**Comprehensive Examination**
The Comprehensive Examination is conducted by the Graduate Program in the Department of Nursing. The examination is designed to allow the student to demonstrate analysis and synthesis of knowledge gained through the program. Students may take the examination any time after the majority of the core courses have been successfully completed, and must be completed prior to the final track
courses and practicums. Students will be expected to orally present their DNP Project proposal, clearly articulating, synthesizing, and applying the DNP Essentials and the NP competencies and core content addressed throughout the program of study as they relate to their DNP Project.

The Comprehensive Examination is rated on a satisfactory/unsatisfactory basis. In the event that the student does not achieve a satisfactory on the oral comprehensive exam, one opportunity to provide written evidence of satisfactory achievement of the goal of the comprehensive exam will be allowed and is to be submitted by two weeks following the oral attempt.

Requirements for Advancement to Candidacy for the Degree of Doctor of Nursing Practice, Post Master’s DNP Nurse Practitioner, and Post Master’s DNP Executive Nurse Leader

Meet all of the above criteria.

NUTRITION AND FOOD SCIENCES

http://www.uvm.edu/nfs/

OVERVIEW

The department mission is to study the relationship between nutrition, food science, health and fitness (preventive nutrition), and between diet and disease (therapeutic nutrition). Faculty research encompasses both basic and applied aspects of human nutrition, food science, food safety and food systems.

DEGREES

- Nutrition and Food Sciences AMP (p. 213)
- Nutrition and Food Sciences M.S. (p. 214)

FACULTY

Berlin, Linda; Extension Associate Professor, Department of Ext—Programming and Faculty Support; PHD, Tufts University
Donnelly, Catherine Wright; Professor, Department of Nutrition and Food Sciences; PHD, North Carolina State University Raleigh
Etter, Andrea J.; Assistant Professor, Department of Nutrition and Food Sciences; PHD, Purdue University
Guo, Ming Ruo; Professor, Department of Nutrition and Food Sciences; PHD, University College Cork
Harvey, Jean Ruth; Professor, Department of Nutrition and Food Sciences; PHD, University of Pittsburgh
Kindstedt, Paul Stephen; Professor, Department of Nutrition and Food Sciences; PHD, Cornell University
Morgan, Emily; Assistant Professor, Department of Nutrition and Food Sciences; PHD, London School of Hygiene and Tropical Medicine
Niles, Meredith; Assistant Professor, Department of Nutrition and Food Sciences; PHD, University of California-Davis
Oyarzabal, Omar A.; Extension Associate Professor, Department of Ext—Programming and Faculty Support; PHD, Auburn University
Pope, Lizzy; Assistant Professor, Department of Nutrition and Food Sciences; PHD, University of Vermont

Trubek, Amy B.; Professor, Department of Nutrition and Food Sciences; PHD, University of Pennsylvania

NUTRITION AND FOOD SCIENCES AMP

All students must meet the Requirements for Admission to the Accelerated Master’s Degree Programs (p. 264)

OVERVIEW

The Accelerated Nutrition and Food Sciences Master’s degree program (ANFSMS) is designed to offer UVM Nutrition and Food Sciences (NFS) or Dietetics, Nutrition and Food Sciences (DNFS) students an opportunity to earn both the bachelor’s degree and the master’s degree in Nutrition and Food Sciences in five years. Students entering the master’s program as an accelerated students are only eligible to complete the non-thesis option of the master’s degree.

This is a 30 credit MS degree. Following formal admission by the Graduate College to the Accelerated Master’s Program, students may count up to six graduate-level credits toward both the bachelor’s and master’s degrees. Beyond the six double-counted credits, an additional graduate-level course (up to 3 credits) taken prior to award of the bachelor’s degree may be counted toward the master’s degree, provided the course does not also count toward the bachelor’s degree. The remaining 21 credits will be taken in the 5th year of study. Full-time graduate student status will begin the summer after undergraduate graduation and be maintained until completion of the MS in NFS.

The program is designed as a stepping stone to the pursuit of clinical or community practice opportunities in nutrition and dietetics or professional opportunities in the food industry.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science for Accelerated Students

Students apply for admission to the Nutrition and Food Sciences AMP program during the regular application cycle. Admission is restricted to students that are either entering the spring term of their junior year and or have yet to start the fall semester of their senior year.

Admission to the accelerated program requires the following:

- A declared major in NFS or DNFS
- A minimum of 3.0 cumulative GPA is required; a GPA of 3.3 or higher is preferred
- Completion of a college-level statistics course
- Completion of the Graduate College application form and three letters of recommendation
- A letter of support from a faculty member who is willing to serve as primary mentor during enrollment in the ANFSMS program. This may serve as the 3rd letter of recommendation
- Completion of the UVM Accelerated Master’s Degree Permission Form (attached to the online application)
Graduate Program.

These three people form the student’s Faculty Mentor and at least two additional members of the NFS Faculty Project Review Committee. One Graduate College faculty member from another department can substitute for one NFS faculty member. The student must create a flyer announcing the oral presentation two weeks before the presentation date and send it to their committee and to the NFS administrator for distribution. The following information should be included: project title, student’s name and degree program, presentation date, time and location, and project description. This oral presentation and the Faculty Project Review Committee meeting that follows will constitute the student’s M.S. Comprehensive Examination.

Requirements for Advancement to Candidacy for the Degree of Master of Science

Students in the ANFSMS are expected to continue the high degree of academic performance that was evident when they were admitted to the program. A minimum cumulative undergraduate GPA of 3.0 is required for continuation in the ANFSMS, and undergraduate students whose cumulative GPA at any time falls below this minimum for more than one semester will be removed from the program. Once students in the ANFSMS receive their bachelor’s degree and are admitted to the regular MS degree program, academic probation matters will be dealt with in the same manner as for other MS students.

Nutrition and Food Sciences M.S.

All students must meet the Requirements for the Master’s Degree (p. 265)

Overview

The department mission is to study the relationship between nutrition, food science, health and fitness (preventive nutrition), and between diet and disease (therapeutic nutrition). Faculty research encompasses both basic and applied aspects of human nutrition, food science, food safety and food systems.

The Department of Nutrition and Food Sciences offers thesis-based and non-thesis Master of Science degrees. The thesis-based M.S. degree, which requires the writing and defending of a thesis, is a course and research based program with 15-24 credits in course work and 6-15 credits of research. The minimum number of credits required is 30. A non-thesis M.S. degree also requires 30 credits: 24-27 credits in course work, and in consultation with their faculty mentor, the student chooses their final project for 3-6 credits. The non-thesis M.S. does not require a thesis or a thesis defense.

Specific Requirements

Requirements for Admission to Graduate Studies for the Degree of Master of Science

An undergraduate major in nutrition, dietetics, food science or a science-related field; an undergraduate course in biochemistry; satisfactory scores on the Graduate Record Examination. A minimum undergraduate GPA of 3.0 is recommended. Students need to complete the Graduate College Application form that must include three letters of recommendation. Students must be admitted through the Graduate College before taking any courses that will be applied toward the master’s degree requirements.

Minimum Degree Requirements for the Degree of Master of Science

A minimum of 30 credits and successful completion of a written comprehensive exam are required for completion of a Master’s Degree in Nutrition and Food Sciences. Students enrolled in the thesis-based program must also write, present and successfully defend their research thesis.

Minimum Degree Requirements for the Degree of Master of Science

Students must complete 30 credits, including a 3-6 credit final project under the direction of their graduate faculty mentor (this is a non-thesis track MS degree). Students taking a 200 level course approved for graduate credit as part of the ANFSMS program must notify the faculty member of the course that they are taking the course at the graduate level before the course begins. That notification must be copied to the Graduate College.

Comprehensive Examination

Non-Thesis M.S. candidates will present an oral presentation on their final project by the end of the semester for which the final project credits have been assigned. The oral presentation will be attended by the Faculty Mentor and at least two additional members of the NFS Grad Program. These three people form the student’s Faculty Project Review Committee. One Graduate College faculty member from another department can substitute for one NFS faculty member. The student must create a flyer announcing the oral presentation two weeks before the presentation date and send it to their committee and to the NFS administrator for distribution. The following information should be included: project title, student’s name and degree program, presentation date, time and location, and project description. This oral presentation and the Faculty Project Review Committee meeting that follows will constitute the student’s M.S. Comprehensive Examination.
Students must meet the UVM Graduate College Requirements for the Master’s Degree. Required courses for both the thesis and non-thesis M.S. are as follows:

**THESIS**
- STAT 211: QR: Statistical Methods I 3
- NFS 350: Nutrition & Food Science Seminar 1
- NFS 360: Resch Meth Nutr & Food Sciences 3
  or equivalent methods course approved by advisor
- NFS 391: Master’s Thesis Research 6-15

**NON-THESIS**
- STAT 211: QR: Statistical Methods I 3
- NFS 350: Nutrition & Food Science Seminar 1
- NFS 360: Resch Meth Nutr & Food Sciences 3
  or equivalent methods course approved by mentor
- NFS 390: Master’s Project Research 3-6

Remaining elective courses for both the thesis and non-thesis courses should be chosen in consultation with the student’s advisor and must be approved for graduate credit.

**Comprehensive Examination**
Thesis M.S. candidates will present a seminar before the end of the second semester of the degree program. This seminar will focus on the background to the proposed M.S. thesis research and experimental design. The candidate will be expected to provide an abstract of the seminar and a link to one pertinent online article related to the seminar topic. The abstract (electronic version) and link to a pertinent article must be submitted to the course instructor no later than one week prior to the seminar date. The course instructor will distribute the abstract and link to the NFS faculty and students. Within two weeks following the seminar date, the candidate will meet with his/her thesis defense committee to discuss the student’s performance with the seminar and provide feedback. This seminar and the committee meeting that follows will constitute the student’s M.S. Comprehensive Examination.

Non-Thesis M.S. candidates will present an oral presentation on their final project by the end of the semester for which the final project credits have been assigned. The oral presentation will be attended by the Faculty Mentor and at least two additional members of the NFS Graduate Program. These three people form the student’s Faculty Project Review Committee. One Graduate College faculty member from another department can substitute for one NFS faculty member. The student must create a flyer announcing the oral presentation two weeks before the presentation date and send it to their committee and to the NFS administrator for distribution. The following information should be included: project title, student’s name and degree program, presentation date, time and location, and project description. This oral presentation and the Faculty Project Review Committee meeting that follows will constitute the student’s M.S. Comprehensive Examination.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**
Advancement to candidacy requires satisfactory completion of the comprehensive exam.

**PATHOLOGY**
http://www.med.uvm.edu/pathology

**OVERVIEW**
The Department of Pathology is actively engaged in both undergraduate and graduate courses focusing on general and systemic pathology as well as mechanisms of environmental disease. Opportunities include courses on special techniques of translational pathology as well as molecular mechanisms of environmental disease. Numerous research opportunities are available in collaboration with the dynamic and engaged faculty.

**DEGREES**
- Pathology M.S. (p. 215)

**FACULTY**
Fung, Mark K.; Professor, Department of Pathology and Laboratory Medicine; MD, PHD, University of Alabama School of Medicine

**PATHOLOGY M.S.**
All students must meet the Requirements for the Master’s Degree (p. 265)

**OVERVIEW**
The Department of Pathology offers a non-thesis Master of Science degree. This M.S. degree requires 30 credits in coursework and does not require a thesis or thesis defense.

**SPECIFIC REQUIREMENTS**

Requirements for Admission to Graduate Studies for the Degree of Masters of Science
Students should apply for admission into the master’s in pathology program by March 15. Admission into this program requires the following:

- Satisfactory undergraduate or graduate course work in chemistry, organic chemistry, and the biological sciences.
- Satisfactory scores on the Graduate Record Examination (GRE) general exam or the Medical College Admission Test (MCAT).
- Completion of the UVM graduate college application.
- Three letters of recommendation that attest to the student’s intellectual maturity, oral and verbal communication skills, and their aptitude for studies towards an advanced degree in this area.

**Program Learning Outcomes for Students**
- Attain a core set of knowledge within pathology and molecular biology.
• Think independently, creatively, and critically about established scientific findings and new discoveries in pathology.
• Become effective written and oral communicators of science.
• Successfully prepare for pathology-based careers in patient care, translational and basic science research, and biomedical education.

Minimum Degree Requirements
A minimum of 30 credits with a minimum GPA of 3.00 and successful completion of a comprehensive oral exam are required for a master’s degree in pathology. Students must also meet the Graduate College requirements for the Master’s Degree.

Completion of core courses listed above and passing the comprehensive examination.

PHARMACOLOGY
http://www.med.uvm.edu/pharmacology

OVERVIEW
The objective of the Department of Pharmacology Master’s Programs is to provide a broad knowledge base of pharmacological concepts, preparing students for careers in Pharmaceutical, biotechnology and related industries; or to increase their competitiveness to pursue additional graduate degrees.

Research interests in the Department of Pharmacology are diverse, with special emphasis on cardiovascular and cerebrovascular pharmacology, physiology, neurovascular coupling, signal transduction, and medicinal chemistry/cancer chemotherapy.

The Department of Pharmacology offers thesis-based and non-thesis Master of Science degrees. The thesis-based M.S. degree is a course and research based program, with 24 credits in coursework, and 6 credits of research. Students may choose thesis advisors from within the Department of Pharmacology, or with approval from the program director, may choose faculty from outside of the Department. This gives students a wide range of options for selecting thesis advisors conducting pharmacology research. A thesis is written and there is a defense. A non-thesis M.S. degree requires 30 credits in coursework, but does not require a thesis or thesis defense.

Students can enter the thesis or non-thesis Pharmacology Master’s programs by one of two mechanisms. First is the Traditional Master’s Degree Program involving a two year program of study. This program is available to all applicants. Second is the Accelerated Master’s Degree Program (AMP). This program is available exclusively to UVM undergraduate science majors and is designed to provide the opportunity to obtain their Master’s degree in a two year program of study, the first year of which overlaps with their senior year of undergraduate study, decreasing both the time and cost of completing the Master’s degree.

In addition to the Pharmacology M.S. and Accelerated Master’s Program (AMP), the Pharmacology faculty participate in interdisciplinary doctoral programs in Neuroscience, and Cellular, Molecular, and Biomedical Sciences found elsewhere in this catalogue.

DEGREES
• Pharmacology AMP (p. 217)
• Pharmacology M.S. (p. 218)

FACULTY
Carr, Frances Eileen; Professor, Department of Pharmacology; PHD, University of Illinois Chicago
Dostmann, Wolfgang R. G.; Professor, Department of Pharmacology; PHD, University of Bremen; MD, University of Munich
Erdos, Benedek; Assistant Professor, Department of Pharmacology; MD, PHD, Semmelweis University, School of Medicine, Budapest, Hungary
Howe, Alan K.; Associate Professor, Department of Pharmacology; MD, PHD, Semmelweis University, School of Medicine, Budapest, Hungary
Lounsbury, Karen M.; Professor, Department of Pharmacology; PHD, Northwestern University
Morielli, Anthony D.; Associate Professor, Department of Pharmacology; PHD, University of California Santa Cruz
Nelson, Mark; Professor, Department of Pharmacology; PHD, Washington University in St Louis
Wellman, George C.; Professor, Department of Pharmacology; PHD, University of Vermont

PHARMACOLOGY AMP

All students must meet the Requirements for the Accelerated Master’s Degree Programs (p. 264)

OVERVIEW

This accelerated master’s degree program (AMP) is designed to offer select UVM undergraduate science majors the opportunity to obtain both their bachelor’s degree and a master’s degree in Pharmacology in a total of five years of study. Students may choose to complete either a thesis-based or non-thesis AMP. The objective of Department of Pharmacology Master’s Program is to provide a broad knowledge base of pharmacological concepts, preparing students for careers in pharmaceutical, biotechnology and related industries; or to increase their competitiveness to pursue additional graduate degrees. Research interests in the Department of Pharmacology are diverse, with special emphasis on cardiovascular and cerebrovascular pharmacology, physiology, neurovascular coupling, signal transduction, and medicinal chemistry/cancer chemotherapy.

The Department of Pharmacology offers thesis-based and non-thesis Master of Science degrees. The thesis-based M.S. degree is a course and research based program, with 24 credits in coursework, and 6 credits of research. Students may choose thesis advisors from within the Department of Pharmacology, or with approval from the program director, may choose faculty from outside of the Department. This gives students a wide range of options for selecting thesis advisors conducting pharmacology research. A thesis is written and there is a defense. A non-thesis M.S. degree requires 30 credits in coursework, but does not require a thesis or a thesis defense. Following acceptance into the program by the Graduate College, students enrolled in this program can take up to six credits of graduate-level courses that will count towards both a bachelor’s degree and the master’s in pharmacology degree. An additional three credits of graduate level coursework taken after acceptance into the program can be applied towards the master’s degree provided that these three credits are not used to fulfill undergraduate degree requirements. Students would then be expected to complete remaining master’s degree requirements during a fifth year of study. Full-time graduate student status will start the summer after their undergraduate graduation and will be expected to be maintained until completion of their master’s degree in Pharmacology.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science

- A course background in the sciences (biology, chemistry, physics, etc.) is recommended.
- Graduate Record Examination (GRE) scores are not required.
- A minimum cumulative grade point average of 3.00 is recommended.

Students should apply for admission into the accelerated master’s in Pharmacology program in the spring semester of their junior year. Admission to the program requires the following:

- Completion of the Graduate College Application form that must include at least three letters of recommendation, including at least one from a UVM faculty member.
- Students MUST be admitted through the Graduate College before taking any courses that will be applied to the Master’s degree requirements. Students will start full-time master’s degree coursework in the summer following their undergraduate graduation.

MINIMUM DEGREE REQUIREMENTS

A minimum of 30 credits and successful completion of a written comprehensive exam are required for completion of the Accelerated Master’s Degree in Pharmacology. Students enrolled in the thesis-based program must also write, present and successfully defend their research thesis. Students must also meet the UVM Graduate College Requirements for the Master’s Degree. Courses should be selected from the following lists. Up to two additional graduate level courses (6 credits), approved by the program director may be used towards the 30 credit requirement.

Comprehensive Examination
Students are required to pass a written comprehensive exam that will be taken in March of the second year. The format is a take-home written exam. The questions will be based on the core-curriculum Pharmacology focused courses common to the thesis and non-thesis based tracks. Grading is on a 1-10 scale for each question. An average score of 7 or better is required to pass. If a passing grade is not obtained, one re-take is permitted.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Advancement to candidacy requires satisfactory completion of the comprehensive exam.

PHARMACOLOGY M.S.
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
The objective of the Department of Pharmacology Master’s Programs is to provide a broad knowledge base of pharmacological concepts, preparing students for careers in pharmaceutical, biotechnology and related industries; or to increase their competitiveness to pursue additional graduate degrees. Research interests in the Department of Pharmacology are diverse, with special emphasis on cardiovascular and cerebrovascular pharmacology, physiology, neurovascular coupling, signal transduction, and medicinal chemistry/cancer chemotherapy.

The Department of Pharmacology offers thesis-based and non-thesis Master of Science degrees. The thesis-based M.S. degree is a course and research based program, with 24 credits in course work, and 6 credits of research. Students may choose thesis advisors from within the Department of Pharmacology, or with approval from the program director, may choose faculty from outside of the Department. This gives students a wide range of options for selecting thesis advisors conducting pharmacology research. A thesis is written and there is a defense. A non-thesis M.S. degree requires 30 credits in coursework, but does not require a thesis or thesis defense.

SPECIFIC REQUIREMENTS

PHYSICAL ACTIVITY AND WELLNESS SCIENCE
https://www.uvm.edu/cnhs/rms

OVERVIEW
The main objective of the Master’s degree in Physical Activity and Wellness Science is to offer students exposure to cutting-edge content in the dissemination, application, and delivery of physical activity and wellness programming. The science underlying the relationship between physical (in)activity and chronic disease will be examined and the subsequent impact at an individual level as well as the population. The program includes a cohesive set of courses that prepares the student to become a research-trained, physical activity practitioner in community, healthcare, and/or public health settings.

DEGREES
Physical Activity and Wellness Science M.S. (p. 219)

FACULTY
Angelopoulos, Theodore J.; Professor, Department of Rehabilitation and Movement Science; PHD, University of Pittsburgh
Bai, Yang; Assistant Professor, Department of Rehabilitation and Movement Science; PHD, Iowa State University
Gell, Nancy M.; Assistant Professor, Department of Rehabilitation and Movement Science; PHD, Auburn University
Kasser, Susan; Associate Professor, Department of Rehabilitation and Movement Science; PHD, Oregon State University
Tompkins, Connie L.; Associate Professor, Department of Rehabilitation and Movement Science; PHD, University of New Orleans

PHYSICAL ACTIVITY AND WELLNESS SCIENCE M.S.
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
The main objective of the Master’s degree in Physical Activity and Wellness Science is to offer students exposure to cutting-edge content in the dissemination, application, and delivery of physical activity and wellness programming. The science underlying the relationship between physical (in)activity and chronic disease will be examined and the subsequent impact at an individual level as well as the population. The program includes a cohesive set of courses that prepares the student to become a research-trained, physical activity practitioner in community, healthcare, and/or public health settings.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Science
- UVM Graduate Application Form
- Undergraduate degree from an accredited college or university
- Minimum overall GPA of 3.0
- Undergraduate transcripts
- Recommended coursework: Physiology (e.g. Human Physiology, Anatomy & Physiology, Exercise Physiology) and Statistics
- TOEFL scores (international students; minimum of 90)
- Statement of Career Interests
- Three letters of recommendation

Minimum Degree Requirements
UVM’s Master’s degree in Physical Activity and Wellness Science is a 30-credit, non-thesis graduate program that is designed to be completed in one academic year (2 semesters). The curriculum includes coursework in exercise assessment and prescription, physical activity epidemiology, research methods, exercise and energy balance, chronic disease and exercise, health and wellness promotion, and behavior change and theory.

A maximum of six (6) credits may be transferred into the program. Transfer credit may be completed prior to admission to the program provided that the credit is approved by the student’s graduate studies committee and that the credit conforms to all other Graduate College requirements.

Comprehensive Examination
Students must complete a comprehensive exam, integrating their knowledge of core course material in a written paper and/or oral format, by the end of their final semester in the program.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Successful completion of all required courses and the comprehensive examination.

PHYSICAL THERAPY
http://www.uvm.edu/~cnhs/rms/

OVERVIEW
The UVM Doctor of Physical Therapy (DPT) program’s mission is to prepare graduates to lead and collaborate in the quest of promoting the health of individuals, communities and society through movement and exercise in order to optimize function, activity, and participation across environments. UVM graduates provide ethical, evidence-based, client-centered services in a culturally sensitive manner as they serve society to enhance quality of life. Graduates are decision-makers in the primary care team who have a clear understanding of the importance of lifelong learning.
that will support their client, patient, and professional needs. Faculty model and support student learning of these expected educational outcomes.

The program's vision is to be recognized for leadership in its contribution to the creation, advancement, and dissemination of translational research while striving toward excellence to educate DPT scholars who collaborate to "transform society by optimizing movement," for the promotion of individual and population health of our communities and society.

**DEGREES**
- **Physical Therapy D.P.T.** (p. 220)

**FACULTY**
- Escorpizo, Reuben Samsuya; Clinical Associate Professor, Department of Rehabilitation and Movement Science; DPT, Des Moines University
- Failla, Matthew; Assistant Professor, Department of Rehabilitation and Movement Science; PHD, University of Delaware
- Mohapatra, Sambit; Assistant Professor, Department of Rehabilitation and Movement Science; PHD, University of Illinois, Chicago
- Peters, Denise; Assistant Professor, Department of Rehabilitation and Movement Science; PHD, DPT, University of South Carolina
- Sargent, Elizabeth; Clinical Assistant Professor, Department of Rehabilitation and Movement Science; SCD, Texas Tech University
- Tschoepe, Barbara A; Clinical Professor, Department of Rehabilitation and Movement Science; PHD, University of Colorado
- Westervelt, Karen C.; Clinical Assistant Professor, Department of Rehabilitation and Movement Science; PHD, Bond University-Robina, Queensland, Australia

**PHYSICAL THERAPY D.P.T.**

**OVERVIEW**

The Doctor of Physical Therapy (D.P.T.) program at the University of Vermont (UVM) consists of 102 graduate credits offered in a 2.5-year full-time program format, over 8 semesters inclusive of summers, that leads to a Doctor of Physical Therapy degree. The program is well recognized for preparing D.P.T graduates as primary care movement system experts who translate evidence into contemporary best practice. Graduates advocate to improve health outcomes and well-being at the individual and community level.

The movement system is the foundation of the curriculum design. Organized in a systems-based model, the curriculum integrates the basic and clinical sciences across the musculoskeletal, nervous, cardiovascular/pulmonary, integumentary and endocrine systems to facilitate student ability to develop as movement system experts. Additionally, the study of evidenced based practice, leadership and professional formation, health policy, business management, and social responsibility shape the students' professional role and identity as a Doctor of Physical Therapy.

Students engage in an array of active learning experiences with multiple opportunities for interprofessional education and community engagement. Integrated clinical experiences and 32 weeks of full time clinical internships broaden student professional preparation. Internships are offered throughout the U.S. in a variety of specialty areas and assignments are based on students' educational needs and clinical site availability. Students are responsible for all costs associated with clinical internships.

Exceptional faculty role model clinical and research expertise across each of the specialty areas of physical therapist practice to facilitate student development as movement system experts.

The faculty members below are in addition to those who have been formally appointed as Graduate Faculty members:

- **Dee, Justine;** Clinical Associate Professor, Department of Rehabilitation and Movement Science; M.S., University of Vermont, PT, Northeastern University
- **Kunsman, Michelle;** Clinical Assistant Professor, Department of Rehabilitation and Movement Science; D.P.T., Simmons College
- **Ouellette-Morton, Rebecca;** Clinical Assistant Professor, Department of Rehabilitation and Movement Science; M.S., University of Vermont, DPT, University of New England
- **Smith, Paula;** Clinical Assistant Professor, Department of Rehabilitation and Movement Science; D.P.T., Virginia Commonwealth University, Medical College of Virginia
- **Yargeau, Michelle;** Clinical Assistant Professor, Department of Rehabilitation and Movement Science; D.P.T.; Simmons College

**PROGRAM MISSION AND VISION**

The UVM DPT program mission is to prepare D.P.T. graduates to lead and collaborate in the quest of promoting the health of individuals, communities and society through movement and exercise in order to optimize function, activity, and participation across environments. UVM graduates are movement system experts who provide ethical, evidence-based, client-centered services in a culturally sensitive manner as they serve society to enhance quality of life. Graduates are decision makers in the primary care team who have a clear understanding of the importance of lifelong learning that will support their client, patient and professional needs. The program’s vision is to be recognized for leadership in its contribution to the creation, advancement, and dissemination of translational research while striving toward excellence to educate D.P.T. scholars who collaborate to "transform society by optimizing movement," and promote individual and population health of our communities and society.

**PROFESSIONAL LICENSURE**

Upon successful completion of the program, graduates are eligible to sit for the national licensure examination administered through the Federation of State Boards of Physical Therapy.

**ACCREDITATION**

The DPT program at UVM is accredited by the Commission on Accreditation in Physical Therapy Education, 1111 North Fairfax Street, Alexandria, VA, 22314.
SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Doctor of Physical Therapy

Applicants must complete the prerequisite course requirements and a baccalaureate degree in any major from UVM or any regionally accredited institution. Applicants with a baccalaureate degree from institutions outside the U.S. will also be considered.

Applicants to the D.P.T. program must have a cumulative GPA of 3.00 or higher in their undergraduate studies. All applicants must complete the following prerequisite courses with a cumulative GPA of 3.30 or higher prior to entry into the DPT program:

- Two semesters of anatomy/physiology
- Two semesters of college chemistry with labs
- Two semesters of physics with labs
- Two semesters of biology (not botany or zoology)
- One semester of psychology
- One semester of statistics

APPLICATION PROCESS:

All Applicants must complete the Common Application through the Physical Therapist Centralized Application Service (PTCAS), a division of the American Physical Therapy Association. Follow all instructions on the site. Application materials should be submitted directly to PTCAS and includes:

- Three letters of recommendation, one of which must come from an academic faculty member
- Official Transcript(s) from all U.S. and Canadian schools attended. PTCAS and the UVM D.P.T. program accept prerequisite credits from regionally accredited institutions only. For international applicants, transcripts must be translated and evaluated by an official service and sent to the CNHS Office of Student Services
- Official Graduate Record Exam (GRE) scores. GRE Code is 7708. Minimum preferred scores are 150 Quantitative, 150 Verbal and 4.0 Writing. Scores must be received by the application deadline

Complete the supplemental UVM Graduate College Application form. Include the following information:

- Upload a document that reads: "See essay on the PTCAS application."
- Application Fee
- Note: No transcripts, letters of recommendation or other materials submitted in the PTCAS application need to be submitted to the University of Vermont.
- If applying to the combined DPT/PhD in Neuroscience program select the DPT/NGP option on the supplemental application. See website for details.

Complete the D.P.T. Prerequisite Course Completion form.

Minimum Degree Requirements

The UVM D.P.T. program requires successful completion of 102 graduate credits.

**Total Credits**: 102

---

**Comprehensive Examination**

The examination takes the form of a small group research project or a systematic review and an individual student portfolio. Both culminate in a written paper and an oral dissemination/defense. The written paper and presentations may take multiple formats and must be satisfactorily completed by the end of the program. Should students not pass the comprehensive examination, they will have one additional opportunity to remediate and provide evidence of achievement of the learning outcomes of the comprehensive examination prior to being able to graduate from the program.

**Requirements for Advancement to Candidacy for the Degree of Doctor of Physical Therapy**

Successful completion of all graded graduate credits with a 3.00 GPA or better and the comprehensive examination.

**PHYSICS**

http://www.uvm.edu/~physics/

### OVERVIEW

The Department of Physics offers research opportunities in theoretical and experimental condensed matter physics, astronomy and astrophysics, and soft condensed matter physics and biophysics.

Research in theoretical condensed matter physics focuses on the dynamics of quantum systems with application to electronic, magnetic, optical, structural, and thermal properties of nanomaterials including fullerene-derived solids (buckyballs) and carbon nanotubes. Basic research also includes the investigation of low energy scattering of atoms and molecules from surfaces and systems with many internal degrees of freedom, and the development of new methods for studying quantum many-body systems, such as new extensions of density functional theory to van der Waals systems. In addition, high performance computational techniques including quantum Monte Carlo and exact diagonalization are used to study strongly-interacting quantum systems with a focus on the types of emergent phenomena that are ubiquitous in complex systems. This includes investigations of entanglement in quantum fluids and gases in the presence of confinement, disorder, and dissipation.

The physics of recently discovered Graphene and its derivatives is another major direction of theoretical research. These materials exhibit unconventional electronic, magnetic, mechanical, and transport properties, and efforts are under way to understand the role of quantum many-body effects both from fundamental standpoint and in relation to nanodevice applications.

Additional theoretical studies include strongly-correlated electron systems, such as complex oxides and cuprates and high-temperature superconductors. Of particular interest are frustrated quantum magnets with novel ground states, as well as conducting cuprates which exhibit complex interplay of charge and spin phenomena. Such systems also tend to undergo quantum phase transitions, and the study of quantum critical phenomena is a major research direction.

Theoretical studies of the optical properties of materials include the electronic structure of defect complexes in ionic crystals, the
application of subtracted dispersion relations to optical data analysis, and the separation of inter- and intra-band effects in the infrared spectra of metals. Related studies are concerned with theories of X-ray scattering, of X-ray optical properties, and of X-ray optical elements.

Research in materials physics includes studies of the kinetics of thin film growth and surface processing, applied to materials with interesting and useful physical properties such as organic semiconductors and magnetic materials. Many of the research projects involve real-time X-ray or electron diffraction structural studies of surface phenomena, combined with computer simulation of relevant surface processes. Available is an ultra-high vacuum thin-film deposition laboratory dedicated to these studies, and regular use is made of synchrotron X-ray facilities in the U.S.

Additional research in materials physics includes studies of fundamental magnetic and spin-dependent electronic properties of semiconductor nanostructures that employ high magnetic field optical spectroscopy imaging techniques. The physics department hosts one of the few laboratories in New England where time-resolved, spin-dependent spectroscopy imaging at magnetic fields as high as five Tesla may be carried out.

Astrophysical research centers on experimental radio astronomy, with particular emphasis on pulsars and the interstellar medium. Observations are carried out using major instruments of the U.S. National Observatories and generally involve computer analysis and interpretation.

Research in biophysical ultrasound is directed toward an understanding of the physical principles involved when ultrasound interacts with living systems. This often involves collaboration with the College of Medicine. Acoustical and optical tweezers permit manipulating single cells without touching them. New forms of ultrasonic transducers and biosensors are being developed in collaboration with the Department of Electrical Engineering, as part of the Materials Science program. Biophysical research includes studies on the development and employment of novel uses of in situ atomic force microscopy for biological applications, specifically high-resolution structural studies of membrane proteins, investigation of the packing of genetic materials on bilayer membranes, and studies on how DNA-bilayer interactions affect the use of cationic lipids as gene-delivery means. Other research in biological physics and protein dynamics involves combining the detail of atomic-resolution X-ray crystallography with the sensitivity of optical and IR spectroscopy. The department has access to a state-of-the-art protein crystallography diffractometer and organizes regular trips to synchrotrons in the U.S. and Europe.

Opportunities for collaborative research with other university departments and groups include those with Chemistry, the Materials Science program, Molecular Physiology and Biophysics, the Cellular, Molecular and Biomedical Sciences program, Computer Science, Electrical Engineering, Civil and Environmental Engineering, Mechanical Engineering, Medical Radiology, and Geology.

The department participates in a doctoral program in Materials Science.

Additional research in materials physics includes studies of fundamental magnetic and spin-dependent electronic properties of semiconductor nanostructures that employ high magnetic field optical spectroscopy imaging techniques. The physics department hosts one of the few laboratories in New England where time-resolved, spin-dependent spectroscopy imaging at magnetic fields as high as five Tesla may be carried out.

Astrophysical research centers on experimental radio astronomy, with particular emphasis on pulsars and the interstellar medium. Observations are carried out using major instruments of the U.S. National Observatories and generally involve computer analysis and interpretation.

Research in biophysical ultrasound is directed toward an understanding of the physical principles involved when ultrasound interacts with living systems. This often involves collaboration with the College of Medicine. Acoustical and optical tweezers permit manipulating single cells without touching them. New forms of ultrasonic transducers and biosensors are being developed in collaboration with Electrical Engineering, as part of the Materials Science Program. Biophysical research includes studies on the development and employment of novel uses of in situ atomic force microscopy for biological applications, specifically high-resolution structural studies of membrane proteins, investigation of the packing of genetic materials on bilayer membranes, and studies on how DNA-bilayer interactions affect the use of cationic lipids as gene-delivery means. Other research in biological physics and protein dynamics involves combining the detail of atomic-resolution X-ray crystallography with the sensitivity of optical and IR spectroscopy. The department has access to a state-of-the-art protein crystallography diffractometer and organizes regular trips to synchrotrons in the U.S. and Europe.

Opportunities for collaborative research with other university departments and groups include those with Chemistry, the Materials Science Program, Molecular Physiology and Biophysics, the Cellular, Molecular and Biomedical Sciences Program, Computer Science, Electrical Engineering, Civil and Environmental Engineering, Mechanical Engineering, Medical Radiology, and Geology.

The department participates in a doctoral program in Materials Science.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Science for Accelerated Students**

Students must apply for the Accelerated Master’s Program (AMP) during spring semester of their junior year. Students interested in the AMP can request information in writing from the physics department. Recommendation for admission will be based upon the student’s prior academic record with particular attention paid to performance in upper-division 200-level physics courses. Following formal Graduate College admission to the Accelerated Master’s Program, up to six credits of approved graduate course work may be taken that may be counted toward both the undergraduate and graduate degree requirements. The graduate credits taken prior to completion of the bachelor’s must be in graded coursework only; independent study, research credits, internships and practica will not count towards the master’s degree. In addition, the courses taken must be approved by the student’s graduate advisor.

**Minimum Degree Requirements for the Degree of Master of Science**

A total of thirty credits including 15 credits of graded course work and:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>A minimum of six credits of thesis research</td>
<td>6</td>
</tr>
<tr>
<td>At least nine credits of physics courses at the 300-level</td>
<td>9</td>
</tr>
</tbody>
</table>

**Comprehensive Examination**

At the start of their second semester at UVM, students are expected to sit for the written part of the Comprehensive Exam which covers Classical mechanics, Quantum Mechanics, Electricity and Magnetism, as well as Thermal Physics and Mathematical Physics.

Students are given two opportunities to pass the comprehensive exam. In addition to the written portion, there is also an oral portion that consists of a Master’s thesis proposal given after the start of a thesis research project.
Requirements for Advancement to Candidacy for the Degree of Master of Science

Successful completion of all required courses and the comprehensive exam.

PHYSICS M.S.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW

The Department of Physics offers research opportunities in theoretical and experimental condensed matter physics, astronomy and astrophysics, and soft condensed matter physics and biophysics.

Research in theoretical condensed matter physics focuses on the dynamics of quantum systems with application to electronic, magnetic, optical, structural, and thermal properties of nanomaterials including fullerene-derived solids (buckyballs) and carbon nanotubes. Basic research also includes the investigation of low energy scattering of atoms and molecules from surfaces and systems with many internal degrees of freedom, and the development of new methods for studying quantum many-body systems, such as new extensions of density functional theory to van der Waals systems. In addition, high performance computational techniques including quantum Monte Carlo and exact diagonalization are used to study strongly-interacting quantum systems with a focus on the types of emergent phenomena that are ubiquitous in complex systems. This includes investigations of entanglement in quantum fluids and gases in the presence of confinement, disorder, and dissipation.

The physics of recently discovered Graphene and its derivatives is another major direction of theoretical research. These materials exhibit unconventional electronic, magnetic, mechanical, and transport properties, and efforts are under way to understand the role of quantum many-body effects both from fundamental standpoint and in relation to nanodevice applications.

Additional theoretical studies include strongly-correlated electron systems, such as complex oxides and cuprates and high-temperature superconductors. Of particular interest are frustrated quantum magnets with novel ground states, as well as conducting cuprates which exhibit complex interplay of charge and spin phenomena. Such systems also tend to undergo quantum phase transitions, and the study of quantum critical phenomena is a major research direction.

Theoretical studies of the optical properties of materials include the electronic structure of defect complexes in ionic crystals, the application of subtracted dispersion relations to optical data analysis, and the separation of inter- and intra-band effects in the infrared spectra of metals. Related studies are concerned with theories of X-ray scattering, of X-ray optical properties, and of X-ray optical elements.

Research in materials physics includes studies of the kinetics of thin film growth and surface processing, applied to materials with interesting and useful physical properties such as organic semiconductors and magnetic materials. Many of the research projects involve real-time X-ray or electron diffraction structural studies of surface phenomena, combined with computer simulation of relevant surface processes. Available is an ultra-high vacuum thin-film deposition laboratory dedicated to these studies, and regular use is made of synchrotron X-ray facilities in the U.S.

Additional research in materials physics includes studies of fundamental magnetic and spin-dependent electronic properties of semiconductor nanostructures that employ high magnetic field optical spectroscopy imaging techniques. The physics department hosts one of the few laboratories in New England where time-resolved, spin-dependent spectroscopy imaging at magnetic fields as high as five Tesla may be carried out.

Astrophysical research centers on experimental radio astronomy, with particular emphasis on pulsars and the interstellar medium. Observations are carried out using major instruments of the U.S. National Observatories and generally involve computer analysis and interpretation.

Research in biophysical ultrasound is directed toward an understanding of the physical principles involved when ultrasound interacts with living systems. This often involves collaboration with the College of Medicine. Acoustical and optical tweezers permit manipulating single cells without touching them. New forms of ultrasonic transducers and biosensors are being developed in collaboration with the Department of Electrical Engineering, as part of the Materials Science program. Biophysical research includes studies on the development and employment of novel uses of in situ atomic force microscopy for biological applications, specifically high-resolution structural studies of membrane proteins, investigation of the packing of genetic materials on bilayer membranes, and studies on how DNA-bilayer interactions affect the use of cationic lipids as gene-delivery means. </tbody>
</table>

All of these courses must be completed with a grade B or better within the first two years of graduate study.

To accommodate the needs of the specific subfields in physics such as astrophysics, biological physics, condensed-matter physics and materials physics, three elective courses (nine credits) have to be chosen to fulfill the breadth requirement with a grade of B or higher. Elective courses must be completed within the first three years of the program, as the fourth year (and beyond if needed) should be dedicated to progress towards the Ph.D. dissertation.

Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy
Successful completion of all required courses and the comprehensive exam.

PLANT AND SOIL SCIENCE
http://www.uvm.edu/~pss/

OVERVIEW
The mission of the Department of Plant and Soil Science is to expand, integrate, and extend the knowledge of agricultural systems and environmental quality in plant/soil ecosystems affecting the people of Vermont, the region, and the world. The department will provide excellence in education, research, and extension that will foster environmentally, economically, and socially sound practices.

The department offers a Master of Science (M.S.) degree in all fields in plant science and soil science and a Doctor of Philosophy (Ph.D.) degree in plant science and soil science. A thesis, based on original research, is required for the M.S. degree, and completion of the requirements normally takes two and one-half years. A dissertation, based on original research, is required for the Ph.D. degree, and completion of the requirements typically takes three to four years.

The department is comprised of faculty representing the disciplines of agroecology, agronomy, entomology, horticulture, landscape design, plant pathology, and soil science. Research faculty are involved in studying plant, soil or insect interactions within environments managed for food, fiber, waste utilization, or for landscape purposes. The objectives of these studies are: (1) to develop fundamental knowledge of environmental impacts and interactions and (2) to apply knowledge to better manage systems...
and promote environmental health. Specifically, departmental projects have included:

- Biological control of insect pests – entomopathogenic fungi
- Integrated pest management (IPM) in greenhouse and field situations
- Agro-ecological practices in Vermont and international communities
- Ecological landscape design
- Green stormwater infrastructure for improving water quality
- Design and analysis of experiments and surveys
- Field and forage crop management and utilization, forage quality, pasture and grazing management, and pest/weed management
- Analytical procedures for testing soils and environmental samples
- Effects of nitrogen (from acid rain) on forest soils and bog ecosystems
- Interaction between soil manganese oxides and heavy metals
- Nutrient dynamics and management in agricultural systems
- Invasive earthworms
- Nematodes and microarthropods as environmental indicators for terrestrial and wetland soils
- Development of sustainable apple production systems
- Evaluation and identification of woody and herbaceous landscape plants adapted to environmental conditions in Vermont/New England
- Diversified horticulture which involves the planning, production, handling, and marketing of horticultural crops with emphasis on multiple, diverse crops produced with environmentally and economically sound techniques.

DEGREES

- Plant and Soil Science M.S. (p. 227)
- Plant and Soil Science Ph.D. (p. 228)

FACULTY

Bosworth, Sidney Carl; Extension Professor, Department of Programming and Faculty Support; PHD, University of Kentucky

Bradshaw, Terence; Research Assistant Professor, Department of Plant and Soil Science; PHD, University

Chen, Yolanda H.; Associate Professor, Department of Plant and Soil Science; PHD, University

Darby, Heather Marie; Extension Professor; Department of Ext.-Programming and Faculty Support; PHD, Oregon State University

Gorres, Josef H.; Associate Professor; Department of Plant and Soil Science; PHD, University of Manchester

Hazelrigg, Ann; Extension Assistant Professor, Exension; PHD, University of Vermont; MS, Cornell University

Hurley, Stephanie E.; Associate Professor, Department of Plant and Soil Science; DDES, Harvard University

Mendez, Victor E.; Professor; Department of Plant and Soil Science; PHD, University of California Santa Cruz

Merrill, Scott; Research Assistant Professor, Department of Plant and Soil Science; PHD, Colorado State University

Neher, Deborah; Professor; Department of Plant and Soil Science; PHD, University of California Davis

Parker, Bruce Lawrence; Professor; Department of Plant and Soil Science; PHD, Cornell University

Ross, Donald Savage; Research Professor; Department of Plant and Soil Science; PHD, University of Vermont

Skinner, Margaret; Research Professor; Department of Plant and Soil Science; PHD, University of Vermont

Starrett, Mark C.; Associate Professor; Department of Plant and Soil Science; PHD, North Carolina State University-Raleigh

PLANT AND SOIL SCIENCE M.S.

All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW

The mission of the Department of Plant and Soil Science is to expand, integrate, and extend the knowledge of agricultural systems and environmental quality in plant/soil ecosystems affecting the people of Vermont, the region, and the world. The department will provide excellence in education, research, and extension that will foster environmentally, economically, and socially sound practices.

The department offers graduate programs leading to the Master of Science (M.S.) degree in all fields in plant science and soil science. A thesis, based on original research, is required for this degree. Completion of the requirements normally takes two and one-half years for the M.S. degree.

The department is composed of faculty representing the disciplines of agroecology, agronomy, entomology, horticulture, landscape design, plant pathology, and soil science. Research faculty are involved in studying plant, soil or insect interactions within environments managed for food, fiber, waste utilization, or for landscape purposes. The objectives of these studies are: (1) to develop fundamental knowledge of environmental impacts and interactions and (2) to apply knowledge to better manage systems and promote environmental health. Specifically, departmental projects have included:

- Biological control of insect pests – entomopathogenic fungi
- Integrated pest management (IPM) in greenhouse and field situations
- Agro-ecological practices in Vermont and international communities
- Ecological landscape design
- Green stormwater infrastructure for improving water quality
- Design and analysis of experiments and surveys
- Field and forage crop management and utilization, forage quality, pasture and grazing management, and pest/weed management
- Analytical procedures for testing soils and environmental samples
- Effects of nitrogen (from acid rain) on forest soils and bog ecosystems
- Interaction between soil manganese oxides and heavy metals
- Nutrient dynamics and management in agricultural systems
• Invasive earthworms
• Nematodes and microarthropods as environmental indicators for terrestrial and wetland soils
• Development of sustainable apple production systems
• Evaluation and identification of woody and herbaceous landscape plants adapted to environmental conditions in Vermont/New England
• Diversified horticulture which involves the planning, production, handling, and marketing of horticultural crops with emphasis on multiple, diverse crops produced with environmentally and economically sound techniques

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science
An undergraduate major in an appropriate agricultural, environmental, biological, or physical science. Satisfactory scores on the Graduate Record Examination, general (aptitude) section.

Minimum Degree Requirements for the Degree of Master of Science

<table>
<thead>
<tr>
<th>Total Minimum Requirements</th>
<th>30</th>
</tr>

<td></td>
</tr>
</tbody>
</table>

Students are required to engage in hypothesis driven scientific research. They are expected to document their research efforts in a thesis. They are expected to defend their research. The defense comprises a seminar open to members of the University community and an oral exam conducted by a committee of faculty.

Comprehensive Examination
Comprehensive examinations are typically taken after one year in residence. The decision on the type of comprehensive exam (written or oral) will be made by the major professor after consultation with the student. The comprehensive examination is not the same as an oral thesis defense and must be satisfactorily passed before defending the thesis.

Requirements for Advancement to Candidacy for the Degree of Master of Science
Satisfactory completion of one academic year of graduate study in the Department of Plant and Soil Science and a written or oral comprehensive examination.

PLANT AND SOIL SCIENCE PH.D.

All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)

OVERVIEW
The mission of the Department of Plant and Soil Science is to expand, integrate, and extend the knowledge of agricultural systems and environmental quality in plant/soil ecosystems affecting the people of Vermont, the region, and the world. The department will provide excellence in education, research, and extension that will foster environmentally, economically, and socially sound practices.

The department offers graduate programs leading to the Doctor of Philosophy (Ph.D.) in all fields in plant science and soil science. A dissertation, based on original research, is required for this degree. Completion of the requirements normally takes three to four years for the Ph.D. degree.

The Department is comprised of faculty representing the disciplines of agroecology, agronomy, entomology, horticulture, landscape design, plant pathology, and soil science. Research faculty are involved in studying plant, soil or insect interactions within environments managed for food, fiber, waste utilization, or for landscape purposes. The objectives of these studies are: (1) to develop fundamental knowledge of environmental impacts and interactions and (2) to apply knowledge to better manage systems and promote environmental health. Specifically, departmental projects have included:

• Biological control of insect pests – entomopathogenic fungi
• Integrated pest management (IPM) in greenhouse and field situations
• Agro-ecological practices in Vermont and international communities
• Ecological landscape design
• Green stormwater infrastructure for improving water quality
• Design and analysis of experiments and surveys
• Field and forage crop management and utilization, forage quality, pasture and grazing management, and pest/weed management
• Analytical procedures for testing soils and environmental samples
• Effects of nitrogen (from acid rain) on forest soils and bog ecosystems
• Interaction between soil manganese oxides and heavy metals
• Nutrient dynamics and management in agricultural systems
• Invasive earthworms
• Nematodes and microarthropods as environmental indicators for terrestrial and wetland soils
• Development of sustainable apple production systems
• Evaluation and identification of woody and herbaceous landscape plants adapted to environmental conditions in Vermont/New England
• Diversified horticulture which involves the planning, production, handling, and marketing of horticultural crops with emphasis on multiple, diverse crops produced with environmentally and economically sound techniques.
SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy

A Master of Science degree in an appropriate agricultural, environmental, biological, or physical science. Satisfactory scores on the Graduate Record Examination, general (aptitude) section. 

Students admitted into Master of Science program in the Department may transfer to a Ph.D. program after one year. Students petition the Department’s Graduate committee.

Minimum Degree Requirements for the Degree of Doctor of Philosophy

| Credit hours to be earned in partial fulfilment of the Ph.D. requirements | 75 |
| Up to 24 credits of graduate-level coursework may be eligible for transfer to meet the credit requirements |
| Minimum graded course work credits in Plant and Soil Science and closely related disciplines (e.g. botany, chemistry, forestry, microbiology, biochemistry or geology) | 30 |
| Remainder in research credits and seminars | Variable |
| Satisfactory participation in department seminars during residency is required. Ph.D. students are required to enroll in at least two PSS seminar courses (non-graded) during their tenure at UVM. | 2 |
| Doctoral students must take part in the department’s undergraduate teaching program and in outreach activities related to their research efforts. They are expected to teach for two semesters and conduct outreach for two semesters |

Comprehensive Examination

Comprehensive examinations are typically taken after completion of the majority of all coursework. A written AND oral comprehensive examination must be passed by the candidate at least six months before the dissertation is submitted. It is the student’s responsibility to schedule an examination time that is satisfactory for all committee members. The written comprehensive examination is taken first followed by the oral examination. The comprehensive examination is not the same as an oral dissertation defense and must be satisfactorily passed before defending the dissertation. A unanimous vote of approval by the members of the Studies Committee is required for the student to pass the preliminary oral examination. Approval may be conditional, depending upon completion of specified additional work. If the oral and or written comprehensive examination is not passed, the student is permitted to retake the examination once. Failure to pass the second examination will result in dismissal from the graduate program.

Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy

Satisfactory completion of Comprehensive Examination and Dissertation Proposal.

PLANT BIOLOGY

http://www.uvm.edu/~plantbio/

OVERVIEW

The Plant Biology Department offers a research-oriented thesis-based program toward a M.S. or a Ph.D. in Plant Biology that provides training in basic scientific research in diverse aspects of plant biology. These include physiology, developmental genetics, molecular regulation of gene expression, cell biology, plant-microbe interactions, ecological genomics, systematics and biogeography, and ecology of plant population and community dynamics. Information on specific faculty research programs may be found on the department’s web page. Most graduate students in the Plant Biology graduate program earn a Ph.D., though exceptional candidates seeking an M.S. are accepted. The project-based Field Naturalist M.S. is also offered.

DEGREES

- Field Naturalist M.S. (p. 164)
- Plant Biology M.S. (p. 230)
- Plant Biology Ph.D. (p. 230)

FACULTY

Barrington, David Stanley; Professor, Department of Plant Biology; PHD, Harvard University
Beckage, Brian; Professor, Department of Plant Biology; PHD, Duke University
Delaney, Terrence Patrick; Associate Professor, Department of Plant Biology; PHD, University of Washington Seattle
Harris, Jeanne M.; Associate Professor, Department of Plant Biology; PHD, University of California Berkeley
Keller, Stephen Robert; Assistant Professor, Department of Plant Biology; PHD, University of Virginia
Lintilhac, Philip; Research Associate Professor, Department of Plant Biology; PHD, University of California Berkeley
Molofsky, Jane; Professor, Department of Plant Biology; PHD, Duke University
Perkins, Timothy David; Professor, Department of Plant Biology; PHD, University of Vermont
Preston, Jill C.; Assistant Professor, Department of Plant Biology; PHD, University of Missouri
Stratton, Donald Arthur; Senior Lecturer, Department of Plant Biology; PHD, SUNY Stony Brook
Tierney, Mary Lauretta; Associate Professor, Department of Plant Biology; PHD, Michigan State University
van den Berg, Abby Katrien; Research Assistant Professor, Department of Plant Biology; PHD, University of Vermont
Vogelmann, Thomas; Professor, Department of Plant Biology; PHD, Syracuse University
FIELD NATURALIST (PLANT BIOLOGY) M.S.

All students must meet the Requirements for the Master's Degree (p. 265)

OVERVIEW

The Field Naturalist Program is a unique field-based experience that develops the potential of tomorrow's conservation leaders by emphasizing scientific integration, oral and written communication, and environmental problem solving. Students receive a solid grounding in field-related sciences and are trained to integrate scientific disciplines into a coherent whole at the landscape level. Students also develop competence in evaluating field sites from a number of perspectives and/or criteria, translating scientific insights into ecologically sound decisions, and communicating effectively to a wide range of audiences.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science, Field Naturalist Option

- A background in science
- Strong scores on the Graduate Record Examination
- A demonstrated commitment to field sciences (e.g., research, field work, participation in environmental or conservation organizations)

A subject (advanced) test in biology or geology is advised for students who lack substantive coursework in natural sciences. Recent college graduates are encouraged to pursue interests outside academe before application to the Field Naturalist Program.

Minimum Degree Requirements

All students must successfully complete a total of 30 credit hours that includes enrollment in the Field Naturalist Practicum (PBIO 311) and Professional Writing (PBIO 333) each semester and at least two courses in each of three core areas: (1) life science (2) earth science, and (3) ecology (course selection to be determined by the student’s studies committee). In addition, satisfactory completion of an oral comprehensive examination is required. A Field Naturalist student’s degree culminates in satisfactory completion of a field project for a sponsoring organization that includes a professional report, a focused literature review, a written academic reflection, an oral presentation, and a journal publication or article in the popular mass media.

Comprehensive Examination

An oral examination takes place in the student’s third semester. During this examination the student identifies, inventories and assesses the pieces, patterns, and processes of a previously unvisited landscape, and presents findings in a manner that would be meaningful to staff, officers, and scientists of The Nature Conservancy.

Requirements for Advancement to Candidacy for the Degree of Master of Science

Satisfactory completion of an oral comprehensive examination.

PLANT BIOLOGY M.S.

All students must meet the Requirements for the Master's Degree (p. 265)

OVERVIEW

M.S. students in the Department of Plant Biology have the opportunity to join research programs covering a diverse set of disciplines including physiology, developmental genetics, molecular regulation of gene expression, cell biology, plant-microbe interactions, ecological genomics, systematics and biogeography, and ecology of plant population and community dynamics. Graduate students become members of a collegial academic community where they are trained to become cutting-edge researchers and effective educators in the plant sciences. In addition, the University of Vermont has a vigorous research community in the life sciences, allowing students to interact and collaborate with colleagues across campus.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Science

- The equivalent of a UVM major or minor in a natural or physical science
- Strong scores on the Graduate Record Examination
- Evidence of previous research experience

Minimum Degree Requirements

All students must successfully complete a total of 30 credits, including a minimum of 15 credits of program-related course work and 9 credits of thesis research. Satisfactory completion of the written and oral components of a comprehensive examination are required. A student’s M.S. degree is culminated by satisfactory completion of a thesis, a public seminar, and a private defense with their studies committee.

Comprehensive Examination

A written and oral examination is completed by end of the student’s second year in the program. The written exam consists of questions from each of the student’s committee members, and after successful completion an oral exam is scheduled.

Requirements for Advancement to Candidacy for the Degree of Master of Science

Satisfactory completion of the written and oral components of a comprehensive examination.

PLANT BIOLOGY PH.D.

All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270)
OVERVIEW

Ph.D. students in the Department of Plant Biology have the opportunity to join research programs covering a diverse set of disciplines including physiology, developmental genetics, molecular regulation of gene expression, cell biology, plant-microbe interactions, ecological genomics, systematics and biogeography, and ecology of plant population and community dynamics. Graduate students become members of a collegial academic community where they are trained to become cutting-edge researchers and effective educators in the plant sciences. In addition, the University of Vermont has a vigorous research community in the life sciences, allowing students to interact and collaborate with colleagues across campus.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy

- The equivalent of a UVM major in a natural or physical science
- Strong scores on the Graduate Record Examination
- Evidence of previous research experience

Minimum Degree Requirements

All students must successfully complete a total of 75 credits, including a minimum of 30 credits of program-related course work and 20 credits of dissertation research. First-year students participate in at least two rotations in research laboratories before committing to one laboratory for completion of dissertation research. Satisfactory completion of the written and oral components of a comprehensive examination are required for advancement to candidacy. A student’s Ph.D. degree is culminated by satisfactory completion of a dissertation, a public seminar, and a private defense with their studies committee. In addition to research, all students must participate in a minimum of two courses of supervised teaching.

Comprehensive Examination

A written and oral examination is completed by end of the student’s second year in the program. The examination requirements can be met in two different ways:

1. The written exam consists of questions from each of the student’s committee members, and after successful completion an oral exam is scheduled.
2. The written exam takes the form of a grant proposal, and then the oral exam starts out focusing on the proposal and then broadens out to be more complete.

Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy

Satisfactory completion of the written and oral components of a comprehensive examination are required for advancement to candidacy.

PSYCHOLOGY

http://www.uvm.edu/~psych/

OVERVIEW

The Master of Arts in General/Experimental or Clinical Psychology is aimed at students who wish to pursue a doctorate and want to strengthen their credentials to be competitive for doctoral programs, students who wish to pursue careers that require research skills, or students who wish to gain an understanding of research as it pertains to intervention and prevention.

The Ph.D. program in General/Experimental Psychology admits students in four broad areas of concentration (“clusters”): Biobehavioral Psychology; Developmental Psychology; Social Psychology; and Behavioral Psychopharmacology.

The Ph.D. program in Clinical Psychology places equal emphasis on research and clinical training. The Clinical Psychology program is fully accredited by the American Psychological Association.

The Ph.D. program in Clinical/Developmental Psychology provides students with training in the area of developmental psychopathology. Students completing the Clinical/Developmental degree meet the requirements of the Clinical program and those of the Developmental cluster in the General/Experimental program.

Further information about graduate programs can be obtained electronically from the Department of Psychological Science website, which contains details of requirements, funding opportunities, clinical and research facilities, specialty areas, ongoing research, and faculty.

DEGREES

- Psychology AMP (p. 232)
- Psychology M.A. (p. 233)
- Psychology Ph.D. (p. 235)

FACULTY

Abaied, Jamie L.; Associate Professor, Department of Psychological Science; PHD, University of Illinois Urbana-Champaign
Achenbach, Thomas Max; Professor, Department of Psychiatry; PHD, University of Minnesota Twin Cities
Aldoff, Robert; Associate Professor, Department of Psychiatry; PHD, University of Illinois Urbana-Champaign
Bouton, Mark Earhart; Professor, Department of Psychological Science; PHD, University of Washington
Burt, Keith B.; Associate Professor, Department of Psychological Science; PHD, University of Minnesota Twin Cities
Dumas, Julie Anna; Associate Professor, Department of Psychology; PHD, University of North Carolina
Falls, William A.; Dean, College of Arts and Sciences, Professor, Department of Psychological Science; PHD, Yale University
Fondacaro, Karen Marie; Clinical Professor, Department of Psychological Science; PHD, University of Vermont
Forehand, Rex L.; Professor, Department of Psychological Science; PHD, University of Alabama
Accelerated Master’s Program in Psychology in their junior year and are accepted prior to their senior year. The Accelerated Master’s Program in General/Experimental or Clinical Psychology is aimed at students who wish to pursue a Ph.D. in Psychology and want to strengthen their credentials to be competitive for doctoral programs, students who wish to pursue careers that require research skills, or students who wish to gain an understanding of research as it pertains to intervention and prevention.

Applicants are required to identify a thesis mentor among the faculty in the Department of Psychological Science, and to complete 3 or more undergraduate research credits with the prospective mentor prior to application.

Following formal admission to the Accelerated Master’s Program, up to six credits of subsequent Psychology (PSYS) coursework approved for graduate credit can be taken in the senior year and counted towards both the Bachelor’s degree and the Master’s degree (see course requirements for the Master of Arts in General/Experimental Psychology and for the Master of Arts in Clinical Psychology). An additional 3 credits can be taken in the senior year and applied towards the Master’s, but not the Bachelor’s, degree.

Learning goals for Accelerated Master’s Program in Psychology students are:

- Development of a foundational understanding in the area of research specialization.
- Development of strong research skills.
- Development of effective skills in communicating Psychological Science.

NOTE: Our goal is not to train licensed therapists pursuing a career in clinical practice. Hence, this program’s curriculum does not provide any supervised practicum or internship hours necessary for licensure. Students interested in a career as a licensed therapist should pursue that goal via the Master’s program in Counseling through the College of Education and Social Services.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of (name of degree here)

A Psychological Science faculty member must be identified as the research mentor and a letter of commitment from this research mentor provided. A major or its equivalent in undergraduate psychology is recommended, with a recommended minimum overall GPA of 3.1 and a GPA of 3.3 in the major. Applicants to the concentration in General/Experimental Psychology should have coursework in experimental psychology, and applicants to the concentration in Clinical Psychology should have completed abnormal psychology. The Graduate Record Examination is not required. A letter of commitment is required from the prospective faculty mentor and completion of 3 or more undergraduate research credits with the prospective mentor prior to admission. While students are in the undergraduate phase of their AMP, the graduate curriculum is listed as a secondary curriculum in their student record.
After graduation with the BA or BS degree, the Master’s curriculum becomes the primary curriculum. No more than 9 credits of graduate coursework taken prior to completion of the Bachelor’s will count towards the graduate degree. No exceptions are made.

**Minimum Degree Requirements**

Both the General/Experimental program and the Clinical program require a minimum of 30 credits. For students pursuing the concentration in General/Experimental Psychology, 9-15 credits must be accumulated in Master’s Thesis research, in addition to successful defense of an empirical Master’s Thesis. For students pursuing the concentration in Clinical Psychology, 9 credits must be accumulated in Master’s Thesis research, in addition to successful defense of an empirical Master’s Thesis. Detailed information on courses of study is available on the department website.

### Comprehensive Examination

A written thesis proposal and an oral examination of the proposal serves as the comprehensive examination. The Comprehensive Examination requirement should be completed by the end of the second semester in the program following conferral of the bachelor’s degree.

### Requirements for Advancement to Candidacy for the Degree of (name of degree here)

Satisfactory completion of the comprehensive examination.

### PSYCHOLOGY M.A.

All General/Experimental and Clinical students must meet the Requirements for the Master’s Degree (p. 265) prior to advancement to candidacy for the degree of Doctor of Philosophy.

### OVERVIEW

The Master of Arts in General/Experimental or Clinical Psychology is aimed at students who wish to pursue a doctorate and want to strengthen their credentials to be competitive for doctoral programs, students who wish to pursue careers that require research skills, or students who wish to gain an understanding of research as it pertains to intervention and prevention.

Applicants are required to identify a thesis mentor among the faculty in the Department of Psychological Science.

Learning goals for Master of Arts in Psychology students are:

- Development of a foundational understanding in the area of research specialization.
• Development of strong research skills.
• Development of effective skills in communicating Psychological Science.

NOTE: Our goal is not to train licensed therapists pursuing a career in clinical practice. Hence, this program’s curriculum does not provide any supervised practicum or internship hours necessary for licensure. Students interested in a career as a licensed therapist should pursue that goal via the Master’s program in Counseling through the College of Education and Social Services.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Arts
A Psychological Science faculty member must be identified as the research mentor and a letter of commitment from this research mentor provided. A major or its equivalent in undergraduate psychology is recommended, with a recommended minimum overall GPA of 3.1 and a GPA of 3.3 in the major. Applicants to the concentration in General/Experimental Psychology should have coursework in experimental psychology, and applicants to the concentration in Clinical Psychology should have completed abnormal psychology. Satisfactory scores on the Graduate Record Examination are required. Subject scores (Psychology) are not required but are strongly recommended for students applying without a psychology major. An interview is required of top applicants.

Minimum Degree Requirements
Both the General/Experimental program and the Clinical program require a minimum of 30 credits. For students pursuing the concentration in General/Experimental Psychology, 9-15 credits must be accumulated in Master’s Thesis research, in addition to successful defense of an empirical Master’s Thesis. For students pursuing the concentration in Clinical Psychology, 9 credits must be accumulated in Master’s Thesis research, in addition to successful defense of an empirical Master’s Thesis. Detailed information on courses of study is available on the department website.

Comprehensive Examination
A written thesis proposal and an oral examination of the proposal serves as the comprehensive examination. The Comprehensive Examination requirement should be completed by the end of the second semester in the program following conferral of the bachelor’s degree.
Requirements for Advancement to Candidacy for the Degree of Master of Arts
Satisfactory completion of the comprehensive examination.

PSYCHOLOGY PH.D.
All students must meet the Requirements for the Doctor of Philosophy Degree (p. 270).

OVERVIEW
The Ph.D. program in General/Experimental Psychology admits students in four broad areas of concentration ("clusters"): Biobehavioral Psychology; Developmental Psychology; Social Psychology; and Behavioral Psychopharmacology.

The Ph.D. program in Clinical Psychology places equal emphasis on research and clinical training. The Clinical Psychology program is fully accredited by the American Psychological Association.

The Ph.D. program in Clinical/Developmental Psychology provides students with training in the area of developmental psychopathology.

Additional clinical, research, and adjunct faculty supervise students in clinical and research placements.

Further information about graduate programs can be obtained electronically from the Department of Psychological Science website, which contains details of requirements, specialty areas, ongoing research, and faculty.

Applicants interested in the Ph.D. must apply for the Ph.D. degree only. Students whose goal is a terminal master’s degree should apply through the M.A. program.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Doctor of Philosophy
A major or its equivalent in undergraduate psychology is recommended. All applicants must have completed coursework including introductory psychology, statistics, and research methods. Applicants to the General/Experimental program should have coursework in experimental psychology, and applicants to the Clinical program should have completed abnormal psychology. Satisfactory scores on the Graduate Record Examination are required. Subject scores (Psychology) are not required but are strongly recommended for students applying without a psychology major. Applicants must submit a writing sample of a research project or paper on which they were the primary author. An interview is required of top applicants.

Minimum Degree Requirements for the Degree of Doctor of Philosophy
The General/Experimental program requires 75 credits and the Clinical program requires a minimum of 80 credits. A minimum of twenty credits must be accumulated in dissertation research and the remainder in course credits numbered in the 200 through 300 sequences of the psychology curriculum, or acceptable courses at 200- or 300-level from other curricula. The Clinical Ph.D. program requires satisfactory completion of a one-year pre-doctoral internship. Detailed information on courses of study is available on the department website. Satisfactory performance on the department final oral examination (dissertation defense) is required. There is no foreign language requirement. Although the requirement differs, both programs have a required master’s and a required preliminary examination.

Comprehensive Examination
In the General/Experimental Psychology program, the comprehensive exam ("preliminary exam") is taken following the successful defense of a master’s thesis. The examination consists of a two-day written examination on select primary literature within the student’s broad research area. The details of the examination are decided upon by a committee of faculty members within the student’s research area.

In the Clinical Psychology program, the comprehensive exam is proposed following the successful defense of a master’s thesis. The examination consists of either a literature review (or meta-analysis) on a topic relevant to the research program of the student or an NRSA F31 application submitted to the National Institutes of Health. Both options involve a proposal and an oral defense. Students in the Clinical/Developmental program complete the comprehensive exams for both the clinical and developmental programs.

Requirements for Advancement to Candidacy for the Degree of Doctor of Philosophy
For the General/Experimental program, satisfactory completion of the minimum degree requirements for the Master of Arts degree or equivalent; for the Clinical program, satisfactory performance on the Ph.D. comprehensive examination.

PUBLIC ADMINISTRATION
http://www.uvm.edu/~mpa/

OVERVIEW
The Master of Public Administration Program at the University of Vermont joins vigorous study of the foundations of public administration with the practice of public administration in the real world. Vermont’s small size, open local and state government, and wealth of nonprofit organizations make for an ideal environment in which to directly engage with the public administration field. More information on the M.P.A. program can be found on the Master of Public Administration website.

PUBLISHED ADMINISTRATION AMP

All students must meet the Requirements for the Accelerated Master's Degree Programs (p. 264)

OVERVIEW

The Accelerated Master’s Program in Public Administration (AMP-PA) offers University of Vermont students the opportunity to secure a sound undergraduate and graduate program of study in five rather than a minimum of six years. The program closely integrates both programs of study, and enhances competitiveness in a marketplace stressing broad undergraduate and focused professional graduate education. The AMP-PA welcomes students majoring in administrative, behavioral, health, environmental, organizational, social science and related disciplines requiring graduate work in administration, or planning and policy capacities in the public service. Application to the program is typically made during a student’s junior year. More information on the AMP-PA Program can be found on the Master of Public Administration website. Inquiries can be made through email mpa@uvm.edu or by phone (802) 656-0009.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Public Administration for Accelerated Students

The Accelerated Master’s Program requires that students fulfill the same entrance requirements as for all master’s candidates for the Master of Public Administration (MPA) Program and be accepted in order to matriculate and advance to candidacy. The following criteria must be met to gain admission to the AMP-PA program:

- A cumulative grade point average of 3.25 at the beginning of the second semester the candidate’s junior year
- Graduate Record Examination (GRE) scores (General Test and Analytical component scores) submitted by the end of the junior year of a candidate’s baccalaureate degree program (usually the end of the spring semester of any given academic year)
- Three letters of recommendation attesting to the candidate’s academic performance
- A strong motivation and academic potential for graduate work articulated in a statement of purpose

Required academic prerequisites, which include course work in economics, statistics, and American government, must also be completed. These prerequisites can be completed at any accredited institution of higher education. Admission into the MPA program is not contingent on completion of these prerequisites, but they must be completed within the first year of course work.

Applicants to the AMP-PA program must submit the standard Graduate College Application form. Students must also apply in writing to the MPA Program Directors and the Graduate College for admission to the MPA program. Completed applications will be reviewed in the month of May and a formal decision on admission will be rendered by the PA faculty by no later than May 15 of each year to afford potential new AMP-PA students the opportunity to enroll in Summer Session.

Following formal Graduate College admission to the Accelerated Master’s Program, up to six credits of approved graduate course work may be taken that may be counted toward both the undergraduate and graduate degree requirements.

Minimum Degree Requirements

Successful completion of thirty-six credits, including:

<table>

</tr>
</tbody>
</table>

Total Credits 24

An approved sequence of elective courses which may include up to twelve credits of course work from approved disciplines related to public administration 12

The Capstone is designed to provide M.P.A. students with a summative experience that ties learning competencies to evidence drawn from their course of study. This course is required for all M.P.A. students as it also incorporates the spirit of the Comprehensive Exam within the curriculum. Students in their final spring semester of the program are eligible to take this. This course counts as the “comprehensive exam” for the Master of Public Administration at UVM.
The Internship experience is a key opportunity to put into practice the concepts and theories of public administration. It is critical in gaining experience, building credentials and networking for future professional opportunities. A three-credit internship is required of all students, and students may apply up to 6 credits of internship experience toward the degree.

A six-credit thesis option is also available to all students and strongly recommended for students interested in continuing on to a Ph.D. A student doing a thesis selects a three member thesis review committee to evaluate her/his work. Students who would like to pursue this option should talk to their assigned advisor upon entering the program to allow plenty of time for the planning and writing of a thesis.

Comprehensive Examination
The Comprehensive Examination requirement is met when a student completes the Capstone during their final spring semester. The Capstone is designed to provide M.P.A. students with a summative experience that ties learning competencies to evidence drawn from their course of study.

Requirements for Advancement to Candidacy for the Degree of Master of Public Administration
Thirty six (36) academic credits are needed (12 courses) to earn an M.P.A. degree. These eight courses are required core courses:

- PA 301 Foundations of Public Administration (Fall)
- PA 302 Organizational Theory and Behavior (Spring)
- PA 303 Research and Evaluation Methods (Fall)
- PA 305 Public and Non-Profit Budgeting (Fall)
- PA 306 Policy Systems (Spring)
- PA 326 Community and Economic Development (Fall)
- PA 375 M.P.A. Capstone (Spring)
- PA 380 Internship

Students, with guidance from their advisor, select additional courses within the M.P.A. program or other academic units at the University of Vermont to round out their academic experience. A full-time student will finish the M.P.A. Program course work in 2 years, and a part-time student, 5 years. While the M.P.A. Program at UVM does not offer explicit specializations, a student may pursue courses with a common thread or focus and can tailor their course selections to work toward that focus.

PUBLIC ADMINISTRATION M.P.A.
All students must meet the Requirements for the Master's Degree (p. 265)

OVERVIEW
The Master of Public Administration (M.P.A.) Program at the University of Vermont joins vigorous study of the foundations of public administration with the practice of public administration in the real world. Vermont's small size, open local and state government, and wealth of nonprofit organizations make for an ideal environment in which to directly engage with the public administration field. More information on the M.P.A. program can be found on the Master of Public Administration website. Inquiries can be made through email: mpa@uvm.edu or by phone (802) 656-0009.

Mission
The Master of Public Administration Program is housed within the Department of Community Development and Applied Economics at the University of Vermont. The UVM M.P.A. Program inspires, equips, and elevates action-oriented leaders with the attitude, knowledge, and skills needed to foster a resilient sustainable society by drawing on the traditions and innovative spirit of Vermont communities.

Traditions
The M.P.A. program at UVM capitalizes on these unique traditions that have direct implications to Vermont and beyond to the public administration needs of a changing nation and world.

- The recognition and importance of community building
- The tradition of grassroots democracy
- A history of strong local governance with citizen input
- A record of fiscal conservatism combined with "progressive" positive change
- A citizen legislature with limited staff support
- An emphasis on efficiency, effectiveness, accountability, and sustainability
- Administrators serving their publics as "reflective practitioners"
- A history of cooperation between private and public sectors for the public good
- A vigorous non-profit sector, supported by citizens and organizations
- A deep commitment to inclusion and cultural diversity

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Public Administration

- A sound academic record, including a baccalaureate degree from an accredited undergraduate institution
- Satisfactory scores on the general aptitude section of the Graduate Record Examination (GRE). GMAT and LSAT scores are also accepted. This requirement may be waived for applicants with a minimum of 5 years of professional experience in the field of public administration. Experience can be at any level but must be within a professional context. Students who may be eligible for this waiver should send a resume to mpa@uvm.edu for review and confirmation.
- Three letters of recommendation attesting to the candidate's academic potential for graduate work and motivation for pursuing the M.P.A.
- Past experience in public service will be considered.
- Persons currently employed in administrative positions are encouraged to apply.

An additional requirement:
• Completion of these prerequisite courses: economics, American government, and statistics. Admission is not contingent upon prerequisites. Prerequisites must be completed by the end of the first semester of enrollment in the program.

For international students whose native language is not English or who have not completed undergraduate degrees in English, Test of English as a Foreign Language (TOEFL) scores must be submitted.

Minimum acceptable scores for admission to the Graduate College at UVM: Internet-based 90

Minimum acceptable scores for a student receiving funding from UVM: Internet-based 100

Institution code for test scores for UVM is 3920.

**Minimum Degree Requirements**

Successful completion of thirty-six credits, including:

- PA 375 M.P.A. Capstone (Spring)
- PA 380 Internship

Students, with guidance from their advisor, select additional courses within the M.P.A. program or other academic units at the University of Vermont to round out their academic experience. A full-time student will finish the M.P.A. Program course work in 2 academic years, and a part-time student, between 2 - 5 calendar years. While the M.P.A. Program at UVM does not offer explicit specializations, a student may pursue courses with a common thread or focus and can tailor their course selections to work toward that focus. Students may also choose to pursue a Certificate of Graduate Studies as an additional credential to fulfill elective requirements.

**PUBLIC HEALTH**

https://learn.uvm.edu/program/public-health-at-uvm/

**OVERVIEW**

The University of Vermont Program in Public Health is an innovative, online, interdisciplinary, accredited Public Health Program offering the Master of Public Health (MPH) degree and certificates of Graduate study. The program is designed as a collaboration of disciplines, through its faculty and community of students, that is both academic and applicable to health needs of actual populations, in both health care and community settings. Graduates will experience a comprehensive foundation of population health sciences to prepare them as they enter health care fields, public health practice, or further advanced study in public health and related sciences.

The UVM public health program offers a generalist MPH program. Graduates will complete sufficient course work to attain depth
and breadth in the six core areas of public health knowledge (Public Health and Health Policy, Biostatistics, Epidemiology, Environmental Health Sciences, Health Policy and Management, and Social and Behavioral Sciences), as well as interdisciplinary/cross-cutting areas. All graduate professional public health degree students will develop skills in basic public health concepts and demonstrate the skills and integration of knowledge, and application of these concepts through a culminating project experience.

The University of Vermont offers four online Certificates of Graduate Study, Public Health, Global and Environmental Health, Epidemiology and Health Care Management and Policy. Each is a concise, six-course curriculum that introduces students to the program area. Completing any Certificate of Graduate Study will provide students with competency in core areas of public health as well as 18 applicable credits for which the grade received was a B or higher should they decide to pursue the MPH degree at UVM.

After successful completion students will be prepared to:

1. Practice in a changing health care environment that requires accountability for the health of entire populations and skills to prevent illness and promote health
2. Engage in public health practice, with knowledge and skills needed for effective participation in work of government public health agencies or non-profit health-related organizations
3. Apply knowledge and skills from a strong foundation of population health sciences in preparation for further graduate study at the doctoral level in public health and related fields

DEGREES
- Public Health AMP (p. 239)
- Public Health CGS (p. 240)
- Public Health MPH (p. 241)
- Global and Environmental Health CGS (p. 242)
- Epidemiology CGS (p. 242)
- Health Care Management and Policy CGS (p. 243)

FACULTY
Carney, Jan Kirk; Professor, Department of Medicine-Pulmonary; MD, University of Cincinnati; MPH, Harvard University
Delaney, Thomas; Assistant Professor, Department of Pediatrics; PHD, University of Denver
Harder, Valerie Susan; Assistant Professor, Department of Pediatrics; PHD, Johns Hopkins University
Maltby, Hendrika J.; Professor, Department of Nursing; PHD, Curtin University of Technology

PUBLIC HEALTH AMP
All students must meet the Requirements for the Accelerated Master's Degree Programs (p. 264)

OVERVIEW
Qualified undergraduate students who plan to earn a Master of Public Health (MPH) degree may enroll in the Accelerated Master’s Program (AMP), which enables students to begin working on the MPH while still an undergraduate. This online program is designed for highly motivated UVM undergraduate students wishing to complete both their undergraduate degree and MPH degree in five years.

Students apply to the program in the second semester of their junior year and no later than June 1 before the start of their senior year. Following acceptance by the Graduate College, students enrolled in the program apply six public health graduate credits during their senior year toward both the undergraduate degree and the MPH. In addition, students can apply an additional three public health graduate credits taken during their senior year toward the MPH degree. These credits must be earned after the student has been accepted into the Graduate College, and are subject to approval of the student’s academic advisor.

Following the completion of their bachelor’s degree, students typically take the additional credits required to complete the MPH during a fifth year of study, including the Summer session.

SPECIFIC REQUIREMENTS
REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF SCIENCE FOR ACCELERATED STUDENTS
Student applications must take place during the Spring of their junior year, no later than June 1 before the start of their senior year.
Requirements for admission to the program include:
- A minimum GPA of 3.0
- One semester of college biology or other science course
- One semester of algebra, statistics, or a more advanced math course
- Completion of the Graduate College Application form that must include at least one letter of recommendation from a UVM faculty member

MINIMUM DEGREE REQUIREMENTS FOR THE DEGREE OF MASTER OF SCIENCE
The MPH degree requires 42 total credits and includes 18 credits of core courses (6 courses), 9 required advanced course credits (3 courses), 9 elective credits (3 courses), and a required culminating (capstone) project experience of 6 credits. Students will need to maintain a 3.00 grade point average in order to complete the program.

18 Credits in National Competency Core Courses (6 Courses):
- PH 301 Public Health & Health Policy 3
- PH 302 Epidemiology I 3
- PH 303 Biostatistics I: App Rsch in PH 3
- PH 304 Environmental Public Health 3
- PH 317/PA 312 Mgmt in Hlth Services&Med Care 3
- or PH 305 Pol,Org & Finance in Hlth Care
- PH 306 Social&Behavioral Public Hlth 3
9 credits in required advanced core courses (3 courses):

COMPREHENSIVE EXAMINATION

The program requires a comprehensive assessment of students’ understanding of public health and ability to synthesize and apply knowledge learned through the program of study. This requirement is fulfilled by the completion of the MPH Culminating Experience. This experience includes the Applied Practice Experience (APE) and the Integrated Learning Experience (ILE), each with specific objectives and competencies measured by faculty assessment.

The APE is assessed by the faculty coach and the site preceptor at the agency or organization where the student experience takes place. The ILE includes self, peer, and mentor evaluations. A faculty committee, comprised of faculty from the program, determines whether a students’ overall culminating project experience meets objectives and requirements, and achieves a passing grade.

REQUIREMENTS FOR ADVANCEMENT TO CANDIDACY FOR THE DEGREE OF MASTER OF Public Health

Successful completion of any prerequisite courses, and at least 15 graded graduate credits with a 3.00 GPA or better, including all core courses.

PUBLIC HEALTH CGS

All students must meet the Requirements for the Certificates of Graduate Study (CGS) (p. 265)

OVERVIEW

Public health is a dynamic and challenging, multidisciplinary field blending public policy, research, and population health sciences. The focus of public health is on promoting healthy practices and preventing disease among entire populations, rather than on treating individual illness.

The University of Vermont’s online Certificate of Graduate Study in Public Health enables students to explore current public health and health policy issues while gaining a strong foundation in population health sciences including epidemiology, biostatistics, and environmental health. The program is designed for medical and graduate students, health practitioners, public health professionals, researchers and others who wish to increase their knowledge in the vital field of public health. It also prepares graduates for advanced study at the master’s and doctoral levels.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Certificate of Graduate Study

Students are required to have a bachelor’s degree from an accredited college or university, and have completed one college-level course in mathematics and one college-level course in science.

Minimum Degree Requirements

The Certificate of Graduate Study in Public Health requires eighteen credits including five courses (fifteen credits) from five core content areas and one elective course (three credits).

<table>
<thead>

**PUBLIC HEALTH MPH**

All students must meet the Requirements for the Master’s Degree (p. 265)

**OVERVIEW**

The UVM online public health program offers a generalist MPH program. Graduates will complete sufficient course work to attain depth and breadth in the six core areas of public health knowledge (Public Health and Health Policy, Biostatistics, Epidemiology, Environmental Health Sciences, Health Policy and Management, and Social and Behavioral Sciences), as well as interdisciplinary/cross-cutting areas. All graduate professional public health degree students will develop skills in basic public health concepts and demonstrate the skills and integration of knowledge, and application of these concepts through a practice and a culminating project experience.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Public Health**

Students are required to have a bachelor’s degree from an accredited college or university, one semester of college biology or other science course, and one course in college algebra, statistics, or a more advanced math course, and submit a resume or CV and statement of experiences and goals. TOEFL will be required for international applicants.

**UVM PUBLIC HEALTH CERTIFICATE GRADUATE:**

If you completed the Certificate of Graduate Study in Public Health, the Global and Environmental Public Health Graduate Study Certificate, the Epidemiology Graduate Certificate, or the Healthcare Management & Policy Online Graduate Certificate at UVM, then all 18 credits for which the grade received was a B or higher can be applied toward the MPH. Students who choose this option may not transfer additional courses from UVM or other universities.

**GRADUATE LEVEL COURSES IN PUBLIC HEALTH:**

If you completed graduate level courses in Public Health at UVM or at another University, then the traditional transfer of credit policy applies for matriculation into the MPH. You can transfer in 9 relevant credits from UVM or another university and an additional 6 relevant credits taken at UVM, provided the grade received for any transferred course is a B or higher. The program director will determine whether each course is relevant. The grades do not transfer.

**Minimum Degree Requirements**

The MPH degree requires 42 total credits and includes 18 credits of core courses (6 courses), 9 required advanced course credits (3 courses), 9 elective credits (3 courses), and a required culminating (capstone) project experience of 6 credits. Students will need to maintain a 3.00 grade point average in order to complete the program.

**18 Credits in National Competency Core Courses (6 Courses):**

**Comprehensive Examination**

The program requires a comprehensive assessment of students’ understanding of public health and ability to synthesize and apply...
knowledge learned through the program of study. This requirement is fulfilled by the completion of the MPH Culminating Experience. This experience includes the Applied Practice Experience (APE) and the Integrated Learning Experience (ILE), each with specific objectives and competencies measured by faculty assessment.

The APE is assessed by the faculty coach and the site preceptor at the agency or organization where the student experience takes place. The ILE includes self, peer, and mentor evaluations. A faculty committee, comprised of faculty from the program, determines whether a student’s overall culminating project experience meets objectives and requirements, and achieves a passing grade.

**Requirement for Advancement to Candidacy for the Degree of Master of Public Health**

Successful completion of any prerequisite courses, and at least 15 graded graduate credits with a 3.00 GPA or better, including all core courses.

### GLOBAL AND ENVIRONMENTAL HEALTH CGS

All students must meet the Requirements for the Certificates of Graduate Study (CGS) (p. 265)

**OVERVIEW**

The field of environmental health continues to become more global in response to globalization and changing public health issues. Infectious diseases are not bound by borders and are often related to environmental change. Examples like Zika emphasize the local and global nature of disease, and climate change with its impact on weather, disease, food, water, vectors and emergency response.

The University of Vermont’s online Certificate of Graduate Study in Global and Environmental Health is an 18-credit program that gives students the opportunity to explore the global nature of environmental health issues including the built environment, infectious disease, climate change, and one health interrelationships between human and animal health. The program is designed for medical and graduate students; health practitioners; public health professionals and researchers; environmental specialists, engineers and scientists; and others who wish to increase their knowledge in global and environmental public health. It also prepares graduates for advanced study at the masters and doctoral level.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Certificate of Graduate Study**

Students are required to have a bachelor’s degree from an accredited college or university, and have completed one college-level course in mathematics and one college-level course in science.

**Minimum Degree Requirements**

The Certificate of Graduate Study in Global and Environmental Health requires 18 credits including three courses (9 credits) from core content areas and three elective courses (9 credits).

<table>
<thead>
<tr>
<th>Three required core competency courses:</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
<tr>
<td>PH 308 Environmental Public Health 2</td>
</tr>
<tr>
<td>PH 302 Epidemiology I</td>
</tr>
</tbody>
</table>

Choose three elective courses from the list of approved courses, including but not limited to:

- PH 301 Public Health & Health Policy
- PH 312 Food Systems & Public Health
- PH 314 Environmental Risk & Risk Communication
- PH 315 Public Health Surveillance
- PH 319 Environmental Health Law & Policy
- PH 325 Investigating Disease Outbreaks

### EPIDEMIOLOGY CGS

All students must meet the Requirements for the Certificates of Graduate Study (CGS) (p. 265)

**OVERVIEW**

Epidemiology is often called the “language” of public health, and is the foundation science of public health programs. Epidemiology has many uses and applications. The Centers for Disease Control and Prevention describes epidemiology “the study of the origin and causes of diseases in a community.” (CDC. The Importance of Epidemiology 2011).

The University of Vermont’s Certificate of Graduate Study in Epidemiology is an online and concise, six-course (18 graduate credits) immersion into the field of epidemiology and related quantitative population health science. This certificate introduces students to the foundations and language of public health and health policy through the study of epidemiology. Completing this course of study will provide students with competency in epidemiology and quantitative public health science.

The program is designed for medical and graduate students; health practitioners; public health professionals and researchers; and others who wish to increase their knowledge in the vital field of epidemiology. It also prepares graduates for advanced study at the masters and doctoral level.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Certificate of Graduate Study**

Students are required to have a bachelor’s degree from an accredited college or university, and have completed one college-level course in mathematics and one college-level course in science.
MINIMUM DEGREE REQUIREMENTS

The Certificate of Graduate Study in Epidemiology requires 18 credits including four courses (12 credits) from four core content areas and two elective courses (6 credits) from an approved list of electives.

Four required core competency courses:

<table>
<thead>
<tr>

HEALTH CARE MANAGEMENT AND POLICY CGS

All students must meet the Requirements for the Certificates of Graduate Study (CGS) (p. 265)

OVERVIEW

The Certificate of Graduate Study in Health Care Management and Policy is an online, six course (18 credits) program introducing students to health care management, finance, and policy. This program provides an overview of US health care policies, organizational structures, and financing systems. These concepts are examined from economic, social, legal, ethical, political, and global perspectives. Contemporary health care organizations and policies are analyzed with respect to concepts and principles of change theory, ethical decision making, and policy processes and analysis. Financing of health care systems, with emphasis on the roles of health care providers and impact on consumers, will also be examined. The distinct strategic and leadership challenges faced by managers in healthcare and public health organizations is examined through the lenses of consumers, employers, practitioners, insurers, regulators, and public policy-makers.

The program is designed for working professionals in health care and public health; nursing students, medical students and other graduate students; recent baccalaureate graduates with an interest in a non-clinical health degree; and employees and managers of healthcare-related programs and organizations.

SPECIFIC REQUIREMENTS

REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE CERTIFICATE OF GRADUATE STUDY

Students are required to have a bachelor’s degree from an accredited college or university, and have completed one college-level course in mathematics and one college-level course in science.

MINIMUM DEGREE REQUIREMENTS

The Certificate of Graduate Study in Health Care Management and Policy requires 18 credits including three courses (9 credits) from three core content areas and three elective courses (9 credits) from an approved list of electives.

Three required core competency courses:

SOCIAL WORK

https://www.uvm.edu/cess/socialwork

OVERVIEW

The Master of Social Work program at the University of Vermont prepares students for advanced social work practice with individuals, families, groups, organizations, and communities in the post-modern environment. The curriculum emphasizes strengths-oriented, relational practice guided by principles of social justice and human rights and a conceptual framework of critical social construction. The Master of Social Work program is fully accredited by the Council on Social Work Education (CSWE).

The professional foundation curriculum is designed to assist students to explore and develop generalist knowledge, values, and skills for professional practice. Students take thirty credits of foundation course work, including one elective. The curriculum comprises course work in five areas: Human Behavior in the Social Environment (HBSE), Social Welfare Policy, Social Work Practice, Field Practica, and Research.
The concentration year curriculum is designed to extend and integrate student knowledge, values, and skills for advanced practice in a single concentration, Transformative Social Work. This is accomplished through focused study in a student-generated, individualized area of interest. All core curriculum courses in the concentration year are considered advanced practice courses in Transformative Social Work, in that all emphasize the application of complex social ideas and the production of transformative roles and methods.

Students select four focus courses to direct their studies toward a particular population or field of social work practice. In addition, the concentration curriculum consists of two advanced practice courses, a field practicum, an advanced research course, and a ‘capstone course’ aimed at integrating the student’s application of transformative social work in the area of interest.

DEGREES
- Social Work M.S.W. (p. 244)

FACULTY
Comerford, Susan Ann; Associate Professor, Department of Social Work; PHD, Case Western Reserve University
Fook, Jan; Professor, Department of Social Work; PHD, University of Southampton, UK
Heading-Grant, Wanda; Vice President, Human Resources, Diversity and Multicultural Affairs; Clinical Associate Professor, Department of Social Work; EDD, University of Vermont
Solomon, Brenda M.; Associate Professor, Department of Social Work; PHD, Syracuse University

SOCIAL WORK M.S.W.
All students must meet the Requirements for the Master’s Degree (p. 265)

OVERVIEW
The Department of Social Work offers a full-time and part-time course of study toward the M.S.W. degree. An Advanced Standing option is also available for eligible students who have completed an undergraduate degree in social work from a bachelor’s program accredited by CSWE within 7 years of admission.

To request a program bulletin or additional information, please contact the Department of Social Work at (802) 656-8800 or visit the program’s Master’s Degree in Social Work website.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Social Work
- A baccalaureate degree completed in good standing from an accredited college or university.
- No minimum grade point average (GPA) is required; however, the applicant must show evidence of academic ability to undertake graduate study in social work. The applicant’s GPA is one indicator of performance and will be considered in the review process.
- Evidence of a strong liberal arts background, with a minimum of eighteen credits in general liberal arts course work that supports graduate education in social work.
- Prior work or volunteer experience in human services is preferred.
- International students must submit TOEFL or IELTS scores (from tests taken within two years of the date of application).

REQUIREMENTS FOR ADVANCED STANDING
- A BSW degree or a B.S. in social work, earned from a social work program accredited by the Council on Social Work Education (CSWE) within 7 years of admission to the M.S.W. program.
- Prior academic performance that supports graduate study in social work.
- Satisfactory undergraduate social work field practicum evaluations.

HOW TO APPLY
All applications are submitted online through the Graduate College Admissions site.

The following materials are required for application:
- Completed application form (online).
- Written Statement of Purpose that describes the applicant’s preparation and goals for pursuing graduate study in social work (submit online).
- Official transcripts from each college or university attended.
- Resume of work and professional experience.
- Three (3) letters of recommendation and completed recommender forms (recommendations from at least one academic source and one from human service related employment are strongly encouraged).
- Non-refundable application fee of $65.00 for online application.

Minimum Degree Requirements
The Master of Social Work degree requires sixty credits of graduate study, unless students are admitted with Advanced Standing status. Advanced Standing status is granted solely to students who have earned a bachelor’s degree in a program accredited, or acknowledged as being equivalent to a Bachelor’s in Social Work, by the Council on Social Work Education, and allows for a shorter course of study at thirty-nine credits. Both regular track and advanced standing students must complete all required and elective credits in social work courses.

The policies and standards for maintaining program accreditation do not permit the granting of academic credit toward graduation for life experience.

### Comprehensive Examination

To fulfill the UVM Graduate College comprehensive examination requirement, concentration year students complete a final project which is embedded in the capstone course SWSS 316. The project extends learning across the concentration curriculum and builds upon inquiry begun in the Advanced Research course. The project is the culmination of the student’s studies in the concentration year and provides integration and closure to the student’s educational experience.

### Requirements for Advancement to Candidacy for the Degree of Master of Social Work

Successful completion of any prerequisite courses, and at least 15 graded graduate credits with a 3.00 GPA or better, including all core courses.

### SPECIAL EDUCATION

https://www.uvm.edu/cess/doe

#### OVERVIEW

These programs are designed to prepare students to collaborate with families, educators, and other professionals and service agencies in the development, implementation, and evaluation of instructional programs and supports for learners with disabilities in integrated school and community settings. There are two primary areas of emphasis in this program, with each pathway having its own requirements:

- **Early Childhood Special Education**: Students are prepared to provide individualized, family-centered special education services to young children with disabilities and their families through both direct and collaborative delivery systems coordinated with social service agencies in integrated home, preschool and community settings in rural areas.
- **Special Education (K-Age 21)**: Students are prepared to collaborate with families, educators and other professionals in the design, implementation and evaluation of instruction for learners with mild to moderate disabilities in integrated regular elementary, middle or high school classrooms.

Within these two tracks there are different special education licensure pathways as well as a non-licensure option.

### DEGREES

- Special Education AMP (p. 246)
- Special Education M.Ed. (p. 247)

### FACULTY

- **Garwood, Justin D.**; Assistant Professor, Department of Education; PHD, University of North Carolina at Chapel Hill
- **Giangreco, Michael Francis**; Professor, Department of Education; PHD, Syracuse University
- **Haines, Shana Jackson**; Assistant Professor, Department of Education; PHD, University of Kansas
- **Hurley, Jennifer Jo**; Associate Professor, Department of Education; PHD, Vanderbilt University
- **Kervick, Colby T.**; Assistant Professor, Department of Education; EDD, University of Vermont
- **Meyer, Lori**; Assistant Professor, Department of Education; PHD, University of Illinois
- **Shepherd, Katharine**; Professor, Department of Education; EDD, University of Vermont
SPECIAL EDUCATION AMP

All students must meet the Requirements for the Accelerated Master's Degree Programs (p. 264)

OVERVIEW

The Accelerated Master’s Program (AMP) in Special Education is designed for UVM undergraduates to complete 6 to 9 credits towards their graduate degree while earning their undergraduate degree. Students in this program receive the same Master of Education degree as the traditional state-approved Special Education Master of Education, but they complete the degree one year after earning their undergraduate degree. There are two pathways in the AMP in Special Education: Early Childhood Special Education and K-age 21 Special Education.

1. K-age 21 Special Education: Students are prepared to collaborate with families, educators and other professionals in the design, implementation and evaluation of instruction for learners with mild to moderate disabilities in integrated regular elementary, middle or high school classrooms. Students apply to this program during the fall of their junior year. Upon acceptance into the program, students meet with advisors to determine their course sequence. During the last three semesters of their undergraduate degree, students enroll in 2 required classes (6 credits) that count towards their undergraduate and graduate degrees. If students will exceed the 120 requisite credit hours for the undergraduate degree, they may choose to enroll in a third class paid for with their undergraduate tuition that will only count towards the graduate degree. Recommended courses for students to take while dually enrolled in undergraduate and graduate degree programs include EDSP 217, EDSP 224, and EDSP 280. Additional information can be requested from the program coordinator. A non-licensure option is also available and the program plan can be tailored to students’ interests.

2. Early Childhood Special Education: Students are prepared to provide individualized, family-centered special education services to young children with disabilities and their families through both direct and collaborative delivery systems coordinated with social service agencies in integrated home, preschool and community settings. The AMP in Special Education leading to Early Childhood Special Education endorsement is an option for undergraduate students in the Early Childhood Education Program. Early childhood students meet early and often with advisers to plan the transition into the AMP program during their senior year. Students apply to this program in the fall of their senior year and take ECSP 310, EDSP 202, and ECSP 355 during the spring of their senior year. Six of these credits count towards the B.S. degree and 9 credits count towards the Master’s degree. The remaining 24 graduate credits are completed during one year of graduate school.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the AMP in Special education

Candidates for the Accelerated Master Program in Special Education must be UVM undergraduates. Students apply during their Junior (K-age 21 Special Education option) or Senior (Early Childhood Special Education option) year. Applicants are evaluated based on their GPA (must be least a 3.00), letters of recommendation, essay, and interview.

Minimum Degree Requirements

Specific courses are required for each area (K-age 21 Special Education, Early Childhood Special Education).

Comprehensive Examination

The comprehensive examination for both pathways is an oral examination taken in the last semester of study.
Requirements for Advancement to Candidacy for the Degree of master of education

Successful completion of any prerequisite courses, and at least 15 graded graduate credits with a 3.00 GPA or better, including all core courses. Program requires 30-36 credits depending on licensure requirements.

SPECIAL EDUCATION M.ED.

All students must meet the Requirements for the Master of Education Degree (p. 266)

OVERVIEW

There are two primary areas of emphasis within the M.ED.: Special Education K-age 21 and Early Childhood Special Education. Within those two tracks there are different special education licensure pathways as well as a non-licensure option.

1. K-age 21 Special Education: Students are prepared to collaborate with families, educators and other professionals in the design, implementation and evaluation of instruction for learners with mild to moderate disabilities in integrated regular elementary, middle or high school classrooms. Within this track there are numerous licensure options.

2. Early Childhood Special Education: Students are prepared to provide individualized, family-centered special education services to young children with disabilities and their families through both direct and collaborative delivery systems coordinated with social service agencies in integrated home, preschool and community settings in rural areas.

Additional information on the above tracks and/or about the different licensure options should be requested from the program coordinator.

SPECIFIC REQUIREMENTS

Requirements for Admission to Graduate Studies for the Degree of Master of Education

Candidates for the degree of Master of Education in Special Education must have a bachelor's degree that includes at least 30 hours of course work in a specific content area, and a GPA of at least a 3.00 in this course work. Preference is given to candidates with two years of teaching and/or related experience working with people with disabilities.

Candidates for the degree of Master of Education in Special Education, Early Childhood Special Education track, must have a bachelor's degree that includes at least 30 hours of course work in a specific content area, and a GPA of at least a 3.00 in this course work. Preference is given to candidates with two years of teaching and/or related experience working with individuals with disabilities.

Minimum Degree Requirements

Specific courses are required for each area (K-age 21 and Early Childhood Special Education). Students seeking licensure must meet additional requirements, and specific programs plans will be developed in adherence to a student’s desired licensure.

COMPREHENSIVE EXAMINATION

The comprehensive examination for both pathways is an oral examination taken in the last semester of study.

Requirements for Advancement to Candidacy for the Degree of Master of Education

Successful completion of any prerequisite courses, and at least 15 graded graduate credits with a 3.00 GPA or better, including all core courses. Program requires 30-36 credits depending on licensure requirements.

STATISTICS

http://www.uvm.edu/~cems/mathstat/

OVERVIEW

The Statistics Program offers biostatistics, statistics, and probability courses for the entire university community along with traditional degree programs and individually designed degree programs.
emphasizing statistics applied to other fields. The degree programs are designed primarily for students who plan careers in business, actuarial science, industry, and government or advanced training in disciplines that make extensive use of statistical principles and methods. The program faculty is deeply involved in consulting and collaborative research in a wide variety of fields, including industry, agriculture, and in the basic and clinical medical sciences. These research activities along with the research of other quantitative UVM faculty offer students unique opportunities to apply their classroom training to "real world" problems. Qualified students with the goal of learning statistics to use in a specialized area of application are especially encouraged to take advantage of these cooperative arrangements.

Program faculty have active statistics research efforts in areas such as bioinformatics, sequential analysis, three stage sampling, time series analysis, survival data analysis, discriminant analysis, bootstrap methods, categorical data analysis, measurement error models, and experimental design. Students seeking the traditional graduate degree in statistics (along with course work in mathematics and computer science, if desired) have excellent opportunities to participate in the faculty's research.

DEGREES
- Statistics AMP (p. 248)
- Statistics M.S. (p. 249)

FACULTY
Ashikaga, Takamaru; Professor, Department of Mathematics and Statistics; PhD, University of California Los Angeles
Bagrow, James; Assistant Professor, Department of Mathematics and Statistics; PhD, Clarkson University
Bunn, Janice Yanushka; Research Associate Professor, Department of Mathematics and Statistics; PhD, Ohio State University
Buzas, Jeff Sandor; Professor, Department of Mathematics and Statistics; PhD, North Carolina State University Raleigh
Callas, Peter W.; Research Associate Professor, Department of Mathematics and Statistics; PhD, University of Massachusetts Amherst
Cole, Bernard; Professor, Department of Mathematics and Statistics; PhD, Boston University
Jefferys, William; Adjunct Professor, Department of Mathematics and Statistics; PhD, Yale University
Single, Richard M.; Associate Professor, Department of Mathematics and Statistics; PhD, SUNY Stony Brook

STATISTICS AMP
All students must meet the Requirements for the Accelerated Master's Degree Programs (p. 264)

OVERVIEW
The Statistics Program offers biostatistics, statistics, and probability courses for the entire university community along with traditional degree programs and individually designed degree programs emphasizing statistics applied to other fields. The degree programs are designed primarily for students who plan careers in health sciences, business, actuarial science, industry, and government or advanced training in disciplines that make extensive use of statistical principles and methods. The program faculty is deeply involved in consulting and collaborative research in a wide variety of fields, including industry, agriculture, and in the basic and clinical medical sciences. These research activities along with the research of other quantitative UVM faculty offer students unique opportunities to apply their classroom training to "real world" problems. Qualified students with the goal of learning statistics to use in a specialized area of application are especially encouraged to take advantage of these cooperative arrangements.

Program faculty have active statistics research efforts in areas such as bioinformatics, sequential analysis, survival data analysis, discriminant analysis, bootstrap methods, categorical data analysis, measurement error models, and experimental design. Students seeking the traditional graduate degree in statistics (along with course work in mathematics and computer science, if desired) have excellent opportunities to participate in the faculty's research.

SPECIFIC REQUIREMENTS
Requirements for Admission to Graduate Studies for the Degree of Master of Science for Accelerated Students
Students should discuss the possibility of an Accelerated Master's Program in statistics with the respective program director as soon as they think they may be interested in this program. Students must declare their wish to enter the Accelerated Master’s Program in writing to the statistics program director (it is recommended that this happen before the end of their junior year). They would apply to the Graduate College for admission, noting their interest in the Accelerated Master’s Program. They can receive concurrent undergraduate and graduate credit for one or two graduate level courses, once admitted. No graduate credit can be counted for statistics courses earned prior to admission to the graduate program. Satisfactory scores on the general (aptitude) portion of the Graduate Record Examination are required.

Minimum Degree Requirements for the Degree of Master of Science

OPTION A (THESIS)
A thirty credit program requiring twenty-four credits of statistics course work. The program must include:

<table>
<thead>
<tr>

**OVERVIEW**

The Statistics Program offers biostatistics, statistics, and probability courses for the entire university community along with traditional degree programs and individually designed degree programs emphasizing statistics applied to other fields. The degree programs are designed primarily for students who plan careers in business, actuarial science, industry, and government or advanced training in disciplines that make extensive use of statistical principles and methods. The program faculty is deeply involved in consulting and collaborative research in a wide variety of fields, including industry, agriculture, and in the basic and clinical medical sciences. These research activities along with the research of other quantitative UVM faculty offer students unique opportunities to apply their classroom training to "real world" problems. Qualified students with the goal of learning statistics to use in a specialized area of application are especially encouraged to take advantage of these cooperative arrangements.

Program faculty have active statistics research efforts in areas such as bioinformatics, sequential analysis, survival data analysis, discriminant analysis, bootstrap methods, categorical data analysis, measurement error models, and experimental design. Students seeking the traditional graduate degree in statistics (along with course work in mathematics and computer science, if desired) have excellent opportunities to participate in the faculty’s research.

**SPECIFIC REQUIREMENTS**

**Requirements for Admission to Graduate Studies for the Degree of Master of Science**

A baccalaureate degree. Three semesters of calculus, a course in matrix methods, and one semester of statistics. Provisional acceptance can be given prior to the completion of these requirements. Satisfactory scores on the general (aptitude) portion of the Graduate Record Examination are required. Computer programming experience is highly recommended.

Current undergraduate students at the University of Vermont should contact the program director for details on the Accelerated Master’s Program.

**Minimum Degree Requirements for the Degree of Master of Science**

**OPTION A (THESIS)**

A thirty credit program requiring twenty-four credits of statistics course work. The program must include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 221</td>
<td>QR: Statistical Methods II</td>
<td>3</td>
</tr>
<tr>
<td>STAT 223</td>
<td>QR: Applied Multivariate Analysis</td>
<td>3</td>
</tr>
<tr>
<td>STAT 231</td>
<td>QR: Experimental Design</td>
<td>3</td>
</tr>
<tr>
<td>STAT 251</td>
<td>QR: Probability Theory</td>
<td>3</td>
</tr>
<tr>
<td>STAT 360</td>
<td>Linear Models</td>
<td>3</td>
</tr>
</tbody>
</table>

Nine additional course credits are required. Other 200-300 level statistics courses (except STAT 211, STAT 241, STAT 281) or (if approved) other courses in mathematics, quantitative methods, or specialized fields of application can be selected.

The research project requirement is met by taking three semester hours of:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 381</td>
<td>Statistical Research</td>
<td>3</td>
</tr>
<tr>
<td>or STAT 385</td>
<td>Consulting Practicum</td>
<td></td>
</tr>
</tbody>
</table>

Under both options, students must have or acquire knowledge of the material in STAT 211. The student is expected to participate in the colloquium series of the program and in the Statistics Student Association Journal Club. The student must pass the comprehensive examination.

**Comprehensive Examination**

A written comprehensive examination is based on the courses STAT 211, STAT 221, STAT 223, STAT 231, STAT 251, and STAT 261. The comprehensive exam is typically held approximately two weeks after the final exam in the spring semester. The student can take the exam a maximum of two times.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**

Successful completion of any prerequisite courses, and at least 15 graded graduate credits earned in compilation of the graduate GPA, including all core courses. A GPA of 3.00 or greater is also required.

**STATISTICS M.S.**

All students must meet the Requirements for the Master's Degree (p. 265)
Six additional course credits are required. Other 200-300 level statistics courses (except STAT 211, STAT 241, STAT 281) or (if approved) other courses in mathematics, quantitative methods, or specialized fields of application can be selected.

Six credits of thesis research is required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 391</td>
<td>Master's Thesis Research</td>
<td>6</td>
</tr>
</tbody>
</table>

**OPTION B (NON-THESIS)**

A thirty credit program requiring twenty-seven credits of course work. The program must include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 221</td>
<td>QR: Statistical Methods II</td>
<td>3</td>
</tr>
<tr>
<td>STAT 223</td>
<td>QR: Appld Multivariate Analysis</td>
<td>3</td>
</tr>
<tr>
<td>STAT 231</td>
<td>QR: Experimental Design</td>
<td>3</td>
</tr>
<tr>
<td>STAT 251</td>
<td>QR: Probability Theory</td>
<td>3</td>
</tr>
<tr>
<td>STAT 261</td>
<td>QR: Statistical Theory</td>
<td>3</td>
</tr>
<tr>
<td>STAT 360</td>
<td>Linear Models</td>
<td>3</td>
</tr>
</tbody>
</table>

Nine additional course credits are required. Other 200-300 level statistics courses (except STAT 211, STAT 241, STAT 281) or (if approved) other courses in mathematics, quantitative methods, or specialized fields of application can be selected.

The research project requirement is met by taking three semester hours of:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>STAT 381</td>
<td>Statistical Research</td>
<td>3</td>
</tr>
<tr>
<td>or</td>
<td>STAT 385 Consulting Practicum</td>
<td></td>
</tr>
</tbody>
</table>

**BOTH OPTIONS**

Under both options, students must have or acquire knowledge of the material in STAT 211. The student is expected to participate in the colloquium series of the program and in the Statistics Student Association Journal Club. The student must pass the comprehensive examination.

**Comprehensive Examination**

A written comprehensive examination is based on the courses STAT 211, STAT 221, STAT 223, STAT 231, STAT 251, and STAT 261. The comprehensive exam is typically held approximately two weeks after the final exam in the spring semester. The student can take the exam a maximum of two times.

**Requirements for Advancement to Candidacy for the Degree of Master of Science**

Successful completion of any prerequisite courses, and at least 15 graded graduate credits earned in compilation of the graduate GPA, including all core courses. A GPA of 3.00 or greater is also required.
ACADEMIC AND ENROLLMENT POLICIES

This section of the Graduate Catalogue includes academic and enrollment policies and information for graduate students.

- Change of Graduate Program (p. 251)
- Conferral of Graduate Degrees (p. 251)
- Continuous Graduate Registration (p. 251)
- Enrollment Policies and Procedures (p. 252)
- Grading Policies (p. 254)
- Inactivation, Deactivation and Reactivation (p. 255)
- Leave of Absence (p. 255)
- Requirements for Visiting Graduate Students (p. 255)
- Rights and Responsibilities (p. 256)
- Time Limits for Graduate Degree Completion (p. 257)
- Transfer Credit and Credit by Examination (p. 257)
- Withdrawal from a Graduate Degree Program (p. 258)

CHANGE OF GRADUATE PROGRAM

If an admitted student wishes to change to a different graduate program offered at UVM, a request must be made by the student, in writing, to the Dean of the Graduate College. Upon receipt of the request and any new supporting materials, the student’s file will be forwarded to the desired program for review. That program may require additional materials or a new complete application for consideration. If both the faculty of the desired program and the Dean of the Graduate College approve, the formal transfer of program is made in the Graduate College office with notification to the former program, new program, student, and registrar. The time limit for completion of the degree runs from the date of matriculation in the new program; however, all credits applied to the degree must be earned within 7 years of degree completion for master’s students and 9 years for doctoral students.

CONFERRAL OF GRADUATE DEGREES

Degrees are conferred in August, October, January, and May of each year. Diplomas are issued in May and mailed in August, October, and January.

It is the graduate student’s responsibility to make sure that their name has been submitted to their department or program and to the Graduate College dean’s office for graduation by completing an Intent to Graduate form by the published date for the cycle in which they plan to complete their degree requirements: June 1st (for August graduation); August 1st (for October graduation); October 1st (for January graduation); and February 1st (for May graduation).

GRADUATE STUDENT COMMENCEMENT WALK POLICY

Only graduate students who have completed all degree requirements are eligible to walk in the UVM Graduate College Commencement Ceremony held each May. For thesis and dissertation students, degree requirements include passing the oral defense examination and the submission of a final copy of their thesis or dissertation approved by the Graduate College through ProQuest.

CONTINUOUS GRADUATE REGISTRATION

Students who are actively working toward their degree completion and have completed enrollment in all credits required for the degree, but have not completed all graduation requirements, must enroll each semester for Continuous Registration and pay a flat $100 - $300 tuition fee for Continuous Registration each semester (Fall and Spring) until all degree requirements are completed, including resolving incomplete grades, passing the comprehensive examination, or completing a thesis or dissertation.

Students who are working at the full-time level of nine or more credit equivalency register for GRAD 903 in their discipline, pay a Continuous Registration fee of $300, and must pay the Health Center fee required of full-time students ($371.50). Students working at less than full time, but at least half time (five to eight credit equivalency) register for GRAD 902 in their discipline, pay a Continuous Registration fee of $200, and must pay the Health Center fee ($371.50) if they elect to purchase the UVM health insurance. Students working at less than half time (one quarter to four credit equivalency) register for GRAD 901 in their discipline and pay a Continuous Registration fee of $100.

The following chart describes the characteristics of each level of registration:

<table>
<thead>
<tr>
<th>Designation</th>
<th>Effort Expectation</th>
<th>Credit Equivalency</th>
<th>Attributes of Enrollment</th>
</tr>
</thead>
<tbody>
<tr>
<td>GRAD 901</td>
<td>Less than Half Time - 1-16 hours effort per week</td>
<td>1/4 TO 4^1</td>
<td>Caticard, library, fitness center and bus privileges</td>
</tr>
</tbody>
</table>
REGISTRATION
Consult the UVM Academic Calendar (https://www.uvm.edu/registrar/academic-calendars) and the Registration Schedule (https://www.uvm.edu/registrar/registration-schedule) for registration dates. Students register for courses at the time and in the manner designated by the university registrar. Early registration is encouraged for both new and presently enrolled graduate students. Students may not register for courses unless tuition and fees for any current and prior semesters have been paid.

Students should consult with their program advisor before using web registration. All charges for the ensuing semester must be paid, or otherwise provided for, before registration is complete.

GRADUATE COURSE LEVELS
Courses that may apply towards a graduate program are numbered 200 and above. Not all 200-level courses are eligible for graduate credit. The 200-level courses that are eligible for graduate credit when taken by graduate students are included in the Graduate Catalogue course list. These courses have a different level of expectation for graduate students taking the course than for undergraduate or non-degree students. Graduate students enrolled in a 200-level course approved for graduate credit must take the course for graduate credit. Undergraduate and non-degree students receive undergraduate credit for these courses, with the exception that undergraduate students may request to take up to 6 credits at the graduate level with prior permission from the Graduate College (http://catalogue.uvm.edu/undergraduate/academicinfo/graduatecourseenrollment/). Courses numbered 400 or above are limited to candidates for doctoral degrees; courses numbered 300 to 399 are limited to graduate students unless permission to enroll is given by the appropriate instructor, department or program.

COURSE LOADS
Generally, full-time graduate students enroll for nine to twelve credit hours per semester, with normal maximum enrollment being fifteen credits per semester and nine hours summer. Enrollment in excess of fifteen credits requires written approval from the student’s advisor and the Dean of the Graduate College.

AUDITING CLASSES
Students wishing to regularly attend a course, but not receive credit, may register as an auditor, with the approval of the Dean of the Graduate College and the instructor. Auditors have no claim on the time or service of the instructor. Students must meet minimum levels of performance set by the instructor at the time of registration in order to receive an audit grade. Tuition is charged at the applicable rate. Under no circumstances will changes be made after the add/drop period to allow credit for courses audited. Tuition scholarships funded by the academic units or the Graduate College do not cover tuition for audited courses.

PHYSICAL EDUCATION CLASSES
Students may not enroll in physical education classes without prior approval by the Dean of the Graduate College. Graduate College or

ENROLLMENT POLICIES AND PROCEDURES

HEALTH RECORD
The university requires that F-1 Visa students file an immunization record with the Center for Health and Wellbeing at the time of first enrollment. Appropriate forms are emailed directly to newly enrolled students through the Office of International Education and/or the Center for Health and Wellbeing.

1 Typically, students would register for 1-4 credits for an effort of 4-16 hours/week. However, for minimal required effort, such as sitting for a comprehensive exam a couple of days into the semester with no other requirements, students may register for ¼ credits.

2 Students funded as a half time GTA, GRA or GA (10 hours per week) must be enrolled in at least 5 credits, so must register for GRAD 902 or GRAD 903.

3 Students funded as a full time GTA, GRA or GA (20 hours per week) must be enrolled in at least 9 credits, so must register for GRAD 903.

4 Students enrolled in GRAD 903 must provide proof of health insurance coverage or purchase UVM Student Health Insurance and must pay the UVM Student Health fee if UVM Student Health Insurance is chosen.
academic unit tuition scholarships do not cover tuition or any fees for physical education activities.

ADD/DROP
Courses may be added through the first five instructional days of the semester without instructor permission, unless indicated. Adding a course between the sixth and tenth instructional day will be at the discretion of the faculty member and will occur by means of a faculty override. Courses may be dropped through the first ten instructional days of the semester. During summer and winter sessions, the add/drop period varies from course to course depending on when the class begins and how long it runs.

WITHDRAWAL FROM COURSES
From the eleventh day of instruction until the second business day after the 60% point in the semester, students may withdraw from courses. To do so, students must use the registration system to withdraw from the course. The student’s advisor(s) and dean(s) will be notified. The instructor(s) will be aware of the withdrawal by the Withdraw status on the class roster and the presence of a grade of W on the grade roster.

Between the second business day after the 60% point in the semester and the last day of classes, students may withdraw from one or more courses only by demonstrating to the Graduate College studies committee, through a written petition, that they are unable to continue in the courses(s) due to circumstances beyond their control. Such petition must contain conclusive evidence, properly documented, of the illness or other situation preventing completion of the course(s). Acceptable reasons do not include dissatisfaction with performance or expected grade, dissatisfaction with the course or instructor, or desire to change major or program. If the petition is approved, a grade of W will be assigned and recorded on the student’s permanent record. If the petition is denied, the instructor(s) will assign a final grade in accordance with the same criteria applied to all other students in the course(s). Final decisions rest with the Graduate College.

Withdrawals will be permitted after the last day of classes only when the student was incapacitated before the end of the term and unable to process a late withdrawal request. To be considered, the request must be made within 60 days of the end of the term in which the course was taken, or before the end of the add/drop period of the subsequent term attended, whichever is sooner. Final decisions rest with the Graduate College.

In all instances, withdrawal grades remain on the permanent academic record, but will not affect the grade-point average. Withdrawn courses are included in the number of credits used for billing purposes.

DEFINITION OF A CREDIT HOUR
The Faculty Senate has defined a University of Vermont credit hour as follows:

1. One hour of classroom or direct faculty instruction and a minimum of two hours of out-of-class student work each week for approximately fifteen weeks for one semester hour of credit or the equivalent amount of work over a different amount of time; or
2. At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.
3. “Direct faculty instruction” must include regular and substantive faculty/student contact regardless of delivery mode (for example, face-to-face, hybrid, distance/online).

All courses should span the full term (15 weeks in fall and spring) of the semester in which they are offered.

UNDERGRADUATE COURSE ENROLLMENT FOR GRADUATE CREDIT (NON-ACCELERATED MASTER’S STUDENTS)
UVM Senior undergraduates may enroll for up to six graduate credits at UVM under the following circumstances: courses must be available for graduate credit; approval to take the course for graduate credit is obtained from the Dean of the Graduate College prior to taking the course; and the course must not be computed as part of the bachelor’s degree. Permission to seek graduate credit must be obtained from the Dean of the Graduate College in writing by the dean of the undergraduate college/school in which the student is enrolled. Graduate credit can be used as transfer credit into a UVM graduate program if the course is deemed appropriate by the student’s advisor for the particular graduate program. The transfer is credit only (not grade) and does not count towards the minimum graded credit required after matriculation into the graduate program. Generally, other institutions will not accept such credit, earned before award of the bachelor’s degree, in transfer to their graduate programs.

DISTANCE EDUCATION STUDENT STATUS
A distance education student is a student whose primary affiliation with UVM is as a student matriculated in a distance education degree or academic certificate program where the majority of content is delivered at a distance. There may be a minimal residency component of the program that is exclusively available to the matriculated distance education students. A distance student may not register for an on campus course, however a residential student may register for courses offered through a distance program.

Students are billed according to their primary affiliation with UVM. These categories are residential or distance and may be program specific. When tuition differs between these categories, tuition is billed according to the primary affiliation of the student for any courses taken.

DISMISSAL
Academic: Students whose academic progress is deemed unsatisfactory at any time may be dismissed from the Graduate College by the dean upon consultation with the student’s department or program. In addition, students may be dismissed if they receive two grades or more below a B (3.00), or they receive a U (Unsatisfactory) or UP (Unsatisfactory Progress) in Thesis or Dissertation Research,
Seminar or Clinical Practicum. Students will be dismissed from the graduate program if they fail the comprehensive examination on both the first and second attempt or if they fail a thesis or dissertation defense on both the first and second attempt.

Professional: Students whose professional integrity is deemed unsatisfactory at any time may be dismissed from the Graduate College by the dean upon consultation with the student’s department or program. Breaches of professional integrity include, but are not limited to, violations described in the Misconduct in Research and Other Scholarly Activities policy, violation of the Code of Academic Integrity, and actions that violate the standards of professional practice in the discipline of study or in duties associated with an assistantship.

**GRADING POLICIES**

Grades are reported and recorded as letter grades. Graduate Students do not receive a grade of D. Student grade point averages (GPA) are calculated from quality point equivalents noted here:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points/Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>A+</td>
<td>Excellent 4.00</td>
</tr>
<tr>
<td>A</td>
<td>Excellent 4.00</td>
</tr>
<tr>
<td>A-</td>
<td>Excellent 3.67</td>
</tr>
<tr>
<td>B+</td>
<td>Good 3.33</td>
</tr>
<tr>
<td>B</td>
<td>Good 3.00</td>
</tr>
<tr>
<td>B-</td>
<td>Good 2.67</td>
</tr>
<tr>
<td>C+</td>
<td>Fair 2.33</td>
</tr>
<tr>
<td>C</td>
<td>Fair 2.00</td>
</tr>
<tr>
<td>C-</td>
<td>Fair 1.67</td>
</tr>
<tr>
<td>F</td>
<td>Failure 0.00</td>
</tr>
</tbody>
</table>
| AF    | Administrative Failure due to a missing grade.  
1 The AF grade is equivalent to the grade of F in the determination of grade point averages and academic standing (Effective spring, 2017).

<table>
<thead>
<tr>
<th>Grade</th>
<th>Points/Credits</th>
</tr>
</thead>
</table>
| XF    | Failure resulting from academic dishonesty.  
2 The XF grade is equivalent to the grade of F in the determination of grade point averages and academic standing. (Effective fall, 2005) |

A candidate for a graduate degree must complete the program with a minimum overall grade-point average of 3.00. A course may be repeated for credit only when failed and only once; only the second grade is then considered. Both grades remain on the student’s transcript.

In certain instances, grades are assigned that will appear on the transcript, but will not be used in grade point calculation. These grades are:

<table>
<thead>
<tr>
<th>Grade</th>

<tr>
<td>SP/UP</td>
<td>Satisfactory Progress/Unsatisfactory Progress (see below)</td>
</tr>
<tr>
<td>W</td>
<td>Withdrawn</td>
</tr>
<tr>
<td>AUP</td>
<td>Administrative Unsatisfactory Progress</td>
</tr>
</tbody>
</table>

AU: Students wishing to regularly attend a course, but not receive credit, may register as an auditor, with the approval of the dean and the instructor. Auditors have no claim on the time or service of the instructor. Students must meet minimum levels of performance set by the instructor at the time of registration in order to receive an audit grade. Tuition is charged at the applicable rate. Under no circumstances will changes be made after the add/drop period to allow credit for courses audited. Graduate College tuition scholarships do not cover courses taken for Audit.

INC: This grade may be assigned when course work is not completed for reasons beyond the student’s control. Incompletes require the approval of the Graduate College dean. The incomplete course requirement will be satisfied at the earliest possible date, but not longer than the beginning of the corresponding semester of the next academic year. In cases of laboratory assignments, the student must complete all work the first time that the laboratory experience is offered again. Instructors will fill out an electronic incomplete grade exception request to the Graduate College dean and include the reason for the incomplete as well as the completion date agreed to by the student and instructor. It is the student’s responsibility to learn from the Graduate College dean whether the request has been approved, the expected date of completion, and, from the instructor, the nature of all outstanding requirements.

Incompletes may be approved for the following reasons: medical, personal tragedy or academic.

S/U: These grades are used in courses where the A-F grade is inappropriate, such as in seminars, internships, practica, etc. For graduate students, S and U are used to indicate levels of performance for credits received in research and may be used to indicate levels of performance in a Seminar. There are no quality points associated with the letter grades of S and U.

SP/UP: These grades are used in courses with a linkage in credits to multiple semesters such as thesis and dissertation research. Neither SP nor UP will be included in the student’s GPA. The grade of SP will be assigned when a student has made satisfactory progress during a semester prior to the final semester of the linked courses; credit will be awarded with the grade of SP. The grade of UP will be assigned when the student’s progress has been unsatisfactory and no credit will be awarded. For course work, the faculty member may change the grade of SP to a letter grade once the final grade for the multiple semester work is completed; the change must occur for all students in the course. A grade of SP cannot be changed to a UP or F based on a
student not completing the final semester’s work satisfactorily. UP is a final grade. It can stand as it is, or it can be changed to an F. Grades of SP or UP for thesis or dissertation credits may not be changed to letter grades.

**GRADE REPORTING**

Grades must be reported to the Registrar’s office as soon as possible after the course is completed but not later than 72 hours after the final examination for that course. If the final exam is on the Friday of exam week, grades are due by noon on the following Tuesday.

**INACTIVATION, DEACTIVATION AND REACTIVATION**

**INACTIVATION AND REACTIVATION**

Students who do not register in any fall or spring semester will be inactivated by the Registrar and will be unable to enroll for classes and their CATCards will be deactivated. To be reactivated please contact the Graduate College; there is no fee for reactivation following inactivation for less than one year.

**DEACTIVATION AND REACTIVATION**

Deactivation is equivalent to withdrawal from a graduate program. Students who do not enroll in their program following the termination date of a Leave of Absence will be deactivated from the Graduate College. Students who, prior to completing enrollment for all credit requirements for a graduate program, do not enroll for one or more credits for a period of one calendar year and are not on an approved Leave of Absence will be considered to have withdrawn from the degree program and deactivated from the college.

Students who have completed all credits required for their degree, but have not completed all graduation requirements, do not enroll in continuous registration (GRAD 901, GRAD 902 or GRAD 903) for a period of one calendar year and are not on an approved Leave of Absence will be considered to have withdrawn from the degree program and deactivated from the college.

Reactivation into a program requires the approval of the program and the Graduate College. Students seeking reactivation must complete the Reactivation Form and pay a $40 Reactivation fee and, if reactivation is approved, all other outstanding fees.

**LEAVE OF ABSENCE**

A Leave of Absence may be awarded for a period of up to one year. Students must request a leave of absence prior to the beginning of the semester in which the leave will take effect. The leave suspends the 5 year time limit for master’s and certificate of graduate study students for the duration of the leave. It does not suspend the time limit for the completion of individual courses.

The time limits for degree completion are master’s and certificate of graduate study: 5 years; doctoral: 9 years. All credit used for the degree, including transfer credit and credit by exam, and irrespective of a Leave of Absence, must be earned within 5 (certificate of graduate study), 7 (master’s) or 9 (doctoral) years of graduation.

**PROCEDURE**

Students request a Leave of Absence from their graduate program coordinator or chair. If the program approves the request, the chair or program faculty completes the Leave of Absence form available on the Graduate College (http://www.uvm.edu/graduate) website and forwards it to the Dean of the Graduate College for approval. A Leave of Absence does not take effect until after approval has been received from both the graduate program coordinator or chair and the Dean of the Graduate College.

Any student who does not enroll following termination of a Leave of Absence will be deactivated from the Graduate College.

**REQUIREMENTS FOR VISITING GRADUATE STUDENTS**

1. Visitors will be enrolled (or active) in accredited graduate degree programs elsewhere (U.S. or abroad).
2. Visitors will participate at UVM in formal fellowship programs or graduate-level research projects under the direction of UVM faculty.
3. Funding for the fellowship or research activity generally will be from external sources.
4. Visitors will normally perform the equivalent of at least five credits of course work or research credit per semester during the term of the appointment.
5. Visitors will enroll for a Visiting Graduate Student Research section of GRAD 902 or GRAD 903, depending on the level of expected effort, each term (to include Fall, Spring and Summer) they are at UVM. Permission to enroll in the section is required from the Graduate College. Fees and level of access to UVM facilities are established by the enrollment level with a minimum provision of a UVM student ID card and access to the library, fitness center and bus privileges and can be found on the Continuous Graduate Registration topic found under Academic and Enrollment Policies in this catalogue.
6. With the equivalent of half-time student status (GRAD 902), visiting graduate students will be eligible to enroll in the UVM student insurance plan. Normally, visitors will be required to show proof of existing medical insurance coverage comparable to or greater than the UVM student insurance plan, or else to enroll in the UVM plan.
7. Visitors will be appointed for a period of up to one year as determined by the Dean of the Graduate College and consistent with the educational objectives of the Visitor. Visitors may be reappointed by the dean; in most cases, the maximum total period of Visitor status will not exceed two years.
8. Visitors enrolled for Visiting Graduate Student Research are not enrolled in UVM degree programs and thus will not be eligible for financial aid, i.e., federal loans or work study, through the University of Vermont.
9. International students should contact the Office of International Education for information on visas and transition to UVM. For information regarding tax status, refer to Tax Information,
10. Visitor appointments will be made by the department or program subject to the approval of the college or school and the Dean of the Graduate College. Appointing departments will request visiting graduate student status from the Graduate College dean’s office by providing a description of the research or other academic activity, an official transcript or a letter from the student’s home institution indicating that the student is currently enrolled or active in a graduate program at that institution, and a completed cover sheet with basic background information. The Graduate College dean’s office will maintain a file on all individuals appointed as Visitors. The Visiting Graduate Student Form to request Visitor Status can be found on the Graduate College (https://www.uvm.edu/graduate) website Resources page.

1 2019-2020 fees are $200 per semester for GRAD 902 and $300 per semester for GRAD 903. For students who also want eligibility to utilize the Center for Health and Well Being and/or to purchase UVM health insurance, an additional fee of $371.50 is required. The estimated annual health insurance premium for the 2019-2020 school year is not yet available; the 2018-2019 premium was $2,694 per year.

RIGHTS AND RESPONSIBILITIES

Students have the responsibility to familiarize themselves with the policies and procedures of the university, the Graduate College, and their department or program. Students are primarily responsible for knowing the degree requirements and following the policies that govern their academic program. If students have questions or concerns about individual policies and procedures, they may contact their advisor, their program or department chair, or the Graduate College office, which is the ultimate arbiter of policies and procedures.

University policies and those of the Graduate College are contained on the UVM Institutional Policies (http://www.uvm.edu/policies) website.

ADVISING

Unless a department or program employs an alternative approved procedure, each graduate student will have a faculty advisor to advise on matters of course selection, research direction, and overall guidance from admission to the Graduate College to completion of degree requirements. The initial advisor is assigned by the department chair or the graduate program coordinator prior to or shortly after enrolling in the Graduate College. If an initial advisor is not assigned by either of the above parties within two weeks after the initiation of course work in a given graduate program, the student is encouraged to contact the Graduate College. Many times, one faculty member serves as an initial advisor for several students, and the advisor may change as the student’s program and research interests develop.

Another common model, especially in doctoral programs, is a graduate studies committee composed of faculty who share a student’s scholarly and professional interests. The committee meets regularly to discuss the student’s progress and consult with the student regarding academic development.

While there are a variety of advising models, in each case students have the right to consult regularly with their academic advisor or graduate studies committee.

PROFESSIONAL ETHICS AND ACADEMIC HONESTY

Graduate students are required to adhere to the highest standards of professionalism as students, researchers, and teachers. The university, in order to encourage a positive atmosphere in all phases of academic learning, teaching and research, has created specific guidelines and policies regarding academic honesty. Information may be found on the Center for Student Conduct (http://www.uvm.edu/sconduct) website.

SEXUAL HARASSMENT

No member of the university community may sexually harass another. Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature constitute sexual harassment when:

1. submission to such conduct is made either explicitly or implicitly a term or condition of an individual’s employment or education;
2. submission to or rejection of such conduct by an individual is used as the basis for academic or employment decisions affecting that individual; or
3. such conduct has the purpose or effect of substantially interfering with an individual’s academic or professional performance or creating an intimidating, hostile, or offensive environment.

Any University of Vermont student having a complaint of sexual harassment should notify the Office of Affirmative Action and Equal Opportunity; students may also contact the Dean of Student’s office. If a student has personal concerns regarding sexual harassment, confidential counseling can be arranged through the Center for Health and Wellbeing. Policies and procedures governing complaints of sexual harassment are available in the office of each dean, department head, and chair as well as in the Bailey/ Howe Library.

DISCRIMINATION

The university community will not tolerate discrimination. Information and resources may be found at The Office of Affirmative Action and Equal Opportunity (https://www.uvm.edu/aaeo) website.

APPEALS

The Graduate College is ultimately responsible for grievances regarding policies and procedures related to graduate education. A grievance properly begins within the student’s department by an appeal to a program director or chair. If this does not resolve the grievance, the student can present the grievance in writing to the dean of the unit in which the program resides, and thereafter to the Dean of the Graduate College. Grievances must state clearly and
precisely the basis for appeal and provide supporting evidence that a student’s rights have been jeopardized. The Graduate College dean may recommend that the grievance be reviewed by the Graduate College Executive Committee. The Graduate College dean is the final arbiter of Graduate College regulations. Specifically excluded from the Graduate College appeals process are grievances that contest grades on grounds other than due process. The procedure for grade appeals may be found on UVM’s Institutional Policies website, listed above.

TIME LIMITS FOR GRADUATE DEGREE COMPLETION

Master’s Degree - 5 years from matriculation
Doctoral Degree - 9 years from matriculation
Certificate of Graduate Study - 5 years from matriculation

All courses applied towards the degree must be taken within 7 years for Master's degrees, 9 years for Doctoral degrees, and 5 years for Certificates. Individual departments may set deadlines within these time limits.

TRANSFER CREDIT AND CREDIT BY EXAMINATION

A limited number of graduate course credits acquired elsewhere, at UVM prior to admission to a graduate program, or by credit by examination may be included as part of a student’s program of study, with approval of the program faculty and the Dean of the Graduate College. Credit by examination is earned by arranging through a program faculty member to take an examination that tests the student’s skills and knowledge in a particular UVM course appropriate for inclusion in the student’s degree program.

If credit is transferred, only the credit is transferred, not the grade.

Graduate Credit earned at UVM after completion of the bachelor's degree but prior to admission to a graduate program is transfer credit, only the credit and not the grade is transferred, and is subject to the requirements and limits that follow.

APPROVAL OF CREDIT

Approval of credit is recommended by the graduate program and approved by the Graduate College based on the specific program requirements described in the Graduate College catalogue, as well as:

1. the number of credits requested,
2. the appropriateness of credit for inclusion in the degree program, and
3. the currency of the credit.

These criteria are described below. Any exceptions must be approved by the program faculty and the Dean of the Graduate College.

NUMBER OF CREDITS

Master’s degree and Doctor of Education students are allowed nine hours of transfer credit, and/or credit by examination, and an additional six credits acquired from appropriate courses taken at UVM prior to admission to a degree program may also be transferred; Doctor of Philosophy students are allowed twenty-four credits, and an additional six credits acquired from appropriate courses taken at UVM. This means that all master’s students take at least twenty-one credits at the University of Vermont (at least fifteen after admission); Doctor of Philosophy students at least fifty-one credits (at least forty-five after admission); and Doctor of Education students at least forty-seven credits (at least forty-one after admission). For master’s programs that require more than thirty credits, program faculty may, in individual cases, recommend more transfer credits. In all cases, students must take at least one half of their degree credits at the University of Vermont after admission to the graduate program and adhere to all requirements stipulated by the graduate program.

Graduate credits taken at other institutions may not transfer into a UVM Certificate of Graduate Study program. Credit (but not grades) from courses taken at UVM prior to matriculation in the certificate may transfer, but only for those certificates requiring more than fifteen credits and only for the credits in excess of the fifteen graded credit minimum.

Credits used for a Certificate of Graduate Study may be applied toward an appropriate master’s or doctoral degree at UVM, and credits applied toward a graduate degree at UVM may be applied toward an appropriate Certificate of Graduate Study. Credits may overlap between one certificate and one degree. Credits taken for one Certificate of Graduate Study may not be used to fulfill the requirements for another Certificate of Graduate Study.

APPROPRIATENESS OF CREDIT

Transfer credit and credit by examination must be approved by the program faculty as appropriate for inclusion as part of the student’s degree requirements. Credit cannot be awarded for:

1. courses taken prior to completion of an undergraduate degree program,
2. courses that were not graduate credit where taken or would not receive graduate credit if taken at the University of Vermont,
3. courses with a grade lower than B (3.00),
4. independent study or independent research,
5. thesis or dissertation research credits, and
6. credit by examination given by another institution.

CURRENCY OF CREDIT

Transfer credit and credit by examination must be taken within seven years of completion of the master’s degree and within nine years of completion of the doctoral degree. Students wishing to apply for readmission to a program after deactivation must demonstrate currency of knowledge in the field of study to which they are applying. Currency of knowledge must be formally evaluated by the program faculty and approved by the Dean of the Graduate College. In addition, the returning student must complete a program of study including at least two courses in the current program.
CONCURRENT MASTER'S AND DOCTOR OF PHILOSOPHY CREDIT

Up to twenty-four credits of course work for which graduate credit is earned at UVM in a master's degree program, whether a master's degree is received or not, may be applied toward a Ph.D. at UVM, provided that the credit is appropriate for the Ph.D. program. If the UVM master's program has a course-based (non-thesis or project) option, then thirty credits of course work for which graduate credit is earned at UVM in a master's degree program may be applied toward a Ph.D. at UVM, provided that the credit is appropriate for the Ph.D. program. No provision is made for a person to employ the same credit to satisfy two master's degrees at the University of Vermont. Students must still complete a minimum of fifteen graded credits that do not count towards the Master’s degree as part of the Ph.D. curriculum.

WITHDRAWAL FROM A GRADUATE DEGREE PROGRAM

Students must notify the Graduate College dean’s office, in writing, of their intent to withdraw from a degree program. If a student does not register at the University of Vermont for course work, thesis or dissertation research, or continuous registration for a period of more than one calendar year, and does not notify the department or the Graduate College dean’s office in writing, the student will be considered to have withdrawn from the degree program and will be deactivated from the college. It will be necessary to apply for reactivation and pay a reactivation fee if the student wishes to resume the graduate program. Approval of both the Graduate Program Director (or equivalent) and the Dean of the Graduate College is required for reactivation.

ADMISSION AND FINANCIAL INFORMATION

- Admissions (p. 258)
- Tuition and Fees (p. 259)
- Financial Aid (p. 260)
- Financial Aid Programs (p. 261)
- Fellowships, Assistantships, Traineeships, Stipends, and Grants (p. 261)
- Payments (p. 262)
- Sponsored and Institutional Research (p. 263)

ADMISSIONS

Admissions criteria, procedures and deadlines for graduate programs vary by individual program. Current information about graduate admissions can be found on the Graduate Admissions page of the Graduate College website.

ADMISSION TESTS

Information about admission tests is available from the GRE website or from the Educational Testing Service, P.O. Box 6103, Princeton, NJ 08541-6103 for the Graduate Record Examinations Test, or from the official GMAT website for the Graduate Management Admission Test. Those considering application to a graduate program must remember that it can take four to six weeks for the Graduate College to receive the results of test scores.

Applicants must consult the listing of the program to which they are applying to determine exactly which test scores are required. Scores must be from tests taken within five years of the date of application.

If a prospective student’s native or first language is not English, scores must be submitted from the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS), academic version.

Minimum acceptable TOEFL or IELTS scores for admission to the Graduate College at the University of Vermont:

<table>
<thead>
<tr>
<th>Test</th>
<th>Minimum Acceptable Score</th>

Institution Code for test scores for UVM is 3920.

UVM GLOBAL GATEWAY PRE-MASTER'S PROGRAM

The University of Vermont offers a pathway program for academically prepared international students, combining English Language coursework with UVM graduate courses, and leading to matriculation into a degree program upon successful completion. The two-term Global Gateway Pre-Master’s Program (PMP) is designed to prepare students for the progression to the second year of degree status with 12 graduate credits, assuming that they meet all program standards. Current participating programs are Biomedical Engineering, Civil and Environmental Engineering, Electrical Engineering, Materials Science, Mathematics, Mechanical Engineering, Pharmacology, Physics and Statistics. Admission to the UVM PMP is competitive. Eligible students should have the equivalent of a minimum bachelor’s degree grade point average of 3.0 on a U.S. 4.0 scale (or country/regional equivalent) and meet the minimum entrance requirements for the UVM program they choose. Students seeking admission to the PMP should have a minimum TOEFL iBT score of 75 or an IELTS score of 6.0.

Eligible students are offered admission to the University of Vermont graduate degree program and progress to degree status by successful completion of the UVM Pre-Master’s Program with a cumulative grade point average in the PMP graduate coursework of 3.0, and an oral test proficiency level equivalent to direct admit requirement of 6.5 IELTS or 90 TOEFL.

Students can apply to the UVM Global Gateway (http://globalgateway.uvm.edu) Pre-Master's Program using the online application form.
TUITION AND FEES
The student expenses outlined in the following paragraphs are anticipated charges for the 2019-2020 academic year for graduate students enrolled in most on-campus degree programs. Changing costs may require adjustment of these charges before the beginning of the fall semester. View graduate college tuition and fees (https://www.uvm.edu/studentfinancialservices/graduate_tuition_and_fees) to find charges approved by the UVM Board of Trustees after the May 2019 board meeting.

APPLICATION FEE
The application fee is $65.

TUITION
Estimated tuition rates for the 2019-20 academic year are as follows:

For Vermont residents, $683 per credit hour. For out-of-state students, $1,720 per credit hour. Some graduate programs have different out-of-state tuition rates, and the information on the graduate college tuition and fees (https://www.uvm.edu/studentfinancialservices/graduate_tuition_and_fees) page should be referred to for details.

The lower rates for Vermont residents are made possible by a subvention to the university from the state of Vermont.

Note: Courses taken for audit are also included in determining the number of credits for which a student is billed at the standard tuition rate.

CONTINUOUS REGISTRATION TUITION FEE: GRAD 901/902/903
Students who are actively working toward their degree completion and have completed all credits required for the degree, but have not completed all graduation requirements, must enroll each semester for Continuous Registration and pay a fee ranging from $100-$300 for the Continuous Registration fee each semester until all degree requirements are completed, including removing incomplete grades, passing the comprehensive examination, or completing a thesis or dissertation. For students enrolled in Continuous Registration, the UVM Health Fee of $371.50 will be billed as a separate charge if the UVM Student Health Insurance Plan is purchased.

COMPREHENSIVE FEE
Estimated 2019-20 per semester comprehensive fee schedule:

</tr>
</tbody>
</table>

GRADUATE STUDENT SENATE FEE
Graduate students enrolled below 5 credits, are charged $7 for the Graduate Student Senate Fee each semester, and students enrolled in 5 or more credits are charged $10. This fee is allocated by the Graduate Student Senate toward the support of student organizations and student activities. Students enrolled in Continuous Registration must also pay this fee.

STUDENT HEALTH FEE
A health fee (https://www.uvm.edu/health/fees) is included in the Comprehensive fee for students enrolled in nine or more credits. The health fee is a required fee for any student enrolled in fewer than nine credits who purchases UVM health insurance. The health fee for 2019-20 is estimated at $371.50 per semester, and is subject to change. Visit graduate college tuition and fees (mandatory student fees) (https://www.uvm.edu/studentfinancialservices/graduate_tuition_and_fees) for updated cost information.

STUDENT ACCIDENT AND SICKNESS INSURANCE
Through an arrangement with a commercial insurance company, students are able to procure health insurance which is designed to provide coverage for services beyond those provided by the Center for Health and Wellbeing. There is an additional charge for this extended coverage beyond the student health fee. The 2018-19 cost for one year’s coverage for single students is $2,694 and is subject to change for 2019-20. Married students may obtain coverage for their spouse and children. Health insurance information (https://www.uvm.edu/health/health-insurance-information) is available from the Center for Health and Wellbeing. To participate in this insurance, the student health fee must be paid each semester as well as the additional insurance premium.

CREDIT BY EXAMINATION
A student may, under certain circumstances, receive credit for a course by taking and passing an examination. A fee of $50 per credit is charged for each examination. Any credit earned by examination applies to the total number of credits allowed for validation and transfer. Appropriate forms to initiate the process of credit by examination are available in the registrar’s office.

REACTIVATION FEE
Reactivation following withdrawal without an approved leave of absence for longer than two consecutive semesters requires the Reactivation Form (PDF) (http://www.uvm.edu/sites/default/files/reactivation_0.pdf) to be completed along with payment of a $40 reactivation fee.

BILL ADJUSTMENT
Tuition refunds for students who drop or withdraw from courses will be handled according to the university’s published tuition refund policy.
refund schedule (https://www.uvm.edu/studentfinancialservices/tuition_refunds).

WITHDRAWALS
A student may voluntarily withdraw from the university by notifying the Dean of the Graduate College and the registrar. The student will receive a refund in accordance with the Bill Adjustment Policy (PDF) (http://www.uvm.edu/policies/student/billadjust.pdf). Date and time of withdrawal normally will be the date the withdrawal notice is received by the registrar.

DISMISSAL
In the case of suspension or dismissal from the university for disciplinary reasons, the student will receive a refund in accordance with the Bill Adjustment Policy (http://www.uvm.edu/policies/student/billadjust.pdf).

DEATH
In case of death of the student, tuition, room and fees which has been paid for the semester during which the death occurs will be refunded fully.

FINANCIAL AID
Federal education loans are the primary sources of financial assistance for graduate students. For detailed information about financial aid, view information on types of aid for graduate students (https://www.uvm.edu/studentfinancialservices/types_aid_and_how_apply/#graduate_financial_aid). Students with financial need who do not receive supplemental assistance in the form of assistantships or fellowships may find that their need-based financial assistance is insufficient to meet their entire cost of attendance. It is important for graduate students to fully assess their costs and resources before making a final decision about attendance.

Eligibility for federal financial aid is based on the Free Application for Federal Student Aid (FAFSA) (https://fafsa.gov), UVM’s cost of attendance, and any other sources of aid being received, such as funding from assistantships, fellowships, traineeships, or tuition grants. Students must meet core eligibility requirements for federal student aid, including U.S. citizenship (or permanent resident status), and at least half-time enrollment (five credits per semester).

For students seeking a Graduate Certificate, financial aid will generally not be available. View information on costs, types of aid, and financing options for UVM Certificate Programs (https://www.uvm.edu/studentfinancialservices/certificate-graduate-study-tuition-and-fees).

APPLICATION FOR FINANCIAL AID
Students should apply for financial aid as soon as possible. The only financial aid application required is the Free Application for Federal Student Aid (FAFSA). For on-time awarding, submit the FAFSA (https://fafsa.gov) application by February 1st (the University’s priority financial aid deadline) for the following school year. Late filing of the FAFSA will not affect eligibility for Federal Stafford or Federal Graduate PLUS Loans. On the FAFSA use UVM’s Title IV School Code (003696) to have the record sent to UVM. Student Financial Services will contact students via email if any additional information is required in order to determine financial aid eligibility. For students who are starting their graduate programs in the summer, the FAFSA will need to be submitted for the prior and upcoming academic years. For example, if the program starts in Summer 2019, students will need to file the 2018-2019 FAFSA to be considered for summer aid, and the 2019-2020 FAFSA to be considered for fall aid for the Fall 2019 and Spring 2020 terms. In addition to completing the FAFSA, graduate students applying for financial aid may be required to inform us of their enrollment plans and funding they may have been awarded through their program through the Graduate Student Data form each year. Applicants will be notified of financial aid eligibility after admission to the university and the submission and review of any additional required documentation, but no earlier than early to mid-February for incoming fall students.

Students must reapply for financial aid each year. The FAFSA (https://fafsa.gov) should be submitted each year by February 1 for the following school year.

FOR ADDITIONAL INFORMATION
More detailed information about the financial aid availability and procedures may be obtained from the UVM Office of Student Financial Services located in 223 Waterman Building:

Phone: (802) 656-5700

Please use the Student Financial Services (http://www.uvm.edu/studentfinancialservices) website as a valuable resource to find answers to questions, or email a counselor at sfs@uvm.edu.

CHANGES IN CREDIT HOUR LOAD
A student who adds courses during an enrollment period will be billed additional tuition and fees applicable to the adjusted credit hour load. Students who drop or withdraw from courses during the enrollment period will receive a tuition credit based upon the university’s published Refund and Bill Adjustment Policy (http://www.uvm.edu/~uvmpg/ppg/student/billadjust.pdf) which is subject to change. Financial aid will be reviewed and adjusted for any changes to the course load. It is recommended that financial aid recipients speak with Student Financial Services before withdrawing from or dropping courses.

SATISFACTORY ACADEMIC PROGRESS FOR FINANCIAL AID RECIPIENTS
Federal financial aid regulations require that financial aid recipients maintain satisfactory academic progress in order to remain eligible for financial aid. The UVM Satisfactory Academic Progress (SAP) policy (https://www.uvm.edu/studentfinancialservices/types_aid_and_how_apply/handbook_and_consumer_information_current/#SAP_GRAD) for financial aid recipients is found in the Student Financial Services handbook and can also be obtained by contacting UVM Student Financial Services. All students should review the complete SAP policy to understand the requirements to remain eligible for aid.
FINANCIAL AID PROGRAMS

FEDERAL LOAN PROGRAMS
The Federal Direct Unsubsidized Stafford and Federal Direct Graduate PLUS Loan programs are the primary source of financial assistance for graduate students. Admitted students who submit the Free Application for Federal Student Aid (FAFSA) (https://fafsa.gov) will be reviewed for loan eligibility. The financial aid award provided by Student Financial Services will indicate loan eligibility and provide information on loan application procedures. Read more about the types of federal financial aid for graduate students (https://www.uvm.edu/studentfinancialservices/types_aid_and_how_apply/#graduate_financial_aid).

VETERANS BENEFITS
The university provides support and information to any veteran or dependent eligible for benefits under Federal Law, Chapters 30, 31, 32, 33, 34, 35, or 106. Students eligible for these benefits should contact the Registrar’s Office at least one month prior to registration each semester. Students wishing to register for benefits should be prepared to present their certificates of eligibility. Read the information for Veterans (https://www.uvm.edu/studentfinancialservices/veteran_information) regarding application for and use of GI Bill benefits, including the Yellow Ribbon Program.

Students involved in the Veterans Program should contact the university in the event of any change in credit load, dependency status, address, or major. The phone number is (802) 656-0581.

NEW ENGLAND REGIONAL STUDENT PROGRAM
The New England Regional Student Program is an opportunity for qualified legal residents of New England states to enroll at reduced rates for some programs that are not offered by the home state university but are offered in another New England state. You can learn more about the tuition break policy (https://www.uvm.edu/registrar/tuition-break-policy) for graduate students through the New England Board of Higher Education (NEBHE).

Applicants must indicate to the Office of Graduate Admissions that they are seeking admission under the terms of the New England Regional Student Program. Applicants are then sent an application to apply under the New England Regional Student Program where they are requested to provide residency information and supporting documentation. In cases where the program of study is clearly unique or distinctive to the out-of-state institution, the Office of Graduate Admissions will certify directly the applicant’s eligibility.

FELLOWSHIPS, ASSISTANTSHIPS, TRAINEESHIPS, STIPENDS, AND GRANTS
Students who wish to be considered for fellowships must follow the guidelines for the specific fellowship as well as application deadlines for their program. Graduate Teaching and Research Assistantships are awarded by departments/programs.

Application for fellowships and assistantships is normally made by completing the appropriate section on the application form. No separate form is required except where indicated in the descriptions below.

Tuition scholarships accompanying Graduate Teaching, College, Research, and Student Affairs Assistantships do not cover audits or physical education activity courses, nor do they cover courses numbered below 200 or 200-level courses not approved for graduate credit, except upon prior approval of the Dean of the Graduate College.

GRADUATE TEACHING AND/OR RESEARCH ASSISTANTSHIPS
Graduate Teaching and/or Research assistantships are awarded through many of the departments and programs offering graduate work. For AY 2019-20, 9-month appointments have minimum stipends of $16,367 for master’s and $20,250 for doctoral students; 12-month appointments have minimum stipends of $21,823 for master’s and $27,000 for doctoral students. Some programs have stipends higher than the minimum.

Graduate Teaching, Research or Research/Teaching assistants must maintain full time enrollment of a minimum of nine credits (or GRAD 903) per semester. In addition to the stipend, the assistantship award includes a tuition scholarship for up nine credits per semester (and up to 5 credits in summer if on a 12-month assistantship) during the period of the assistantship.

Approximately 20 hours of research and/or teaching effort per week is required of Graduate Teaching, Research or Research/Teaching assistants, and assistants must expect that more than one academic year will be necessary to complete the requirements for the master's degree. If a Teaching or Research/Teaching assistant is a candidate for the doctoral degree, at least four calendar years must be anticipated for completion of the academic program. Generally, assistants are appointed in the departments in which they are doing graduate work.

STUDENT AND CAMPUS LIFE GRADUATE ASSISTANTSHIPS
The Division of Student Affairs works to create a campus environment where all students can be healthy, successful and engaged. Each year the Division and other campus partners offer several assistantships to provide graduate students with a professional opportunity to develop and support departmental goals and programs to enhance the learning and growth of our undergraduate students.

The assistantships offer graduate students the opportunity to utilize theory and reflective practices to examine their roles as student affairs practitioners by working directly with students while learning about the field of student affairs and higher education administration.

Graduate Assistants play a critical role at the University and within the Division of Student Affairs. The candidates selected to fill these positions are assigned to work in various departments on campus, some of the opportunities are within the division (e.g.
Residential Life) and others are located in other student services areas. Graduate students who hold assistantships gain valuable experience in the areas of advising, administration, supervision and program development. The majority of graduate students who presently hold these positions are enrolled in the Higher Education and Student Affairs Administration (HESA) graduate program.

Selection is based upon academic record, character, recommendations, and quality of related experiences. A personal interview is required.

Requests for applications and additional information should be addressed to the Graduate and Professional Development Coordinator at sagrads@uvm.edu. Completed applications must be received by December 1st for full consideration. Assistantship appointments are announced throughout the following April. Applications received after December 1st will be considered only for unanticipated openings.

University of Vermont
Vice Provost and Dean of Students Office
41 South Prospect Street
Burlington, VT 05405-0094

EXTRAMURALLY-FUNDED GRADUATE ASSISTANTSHIPS

Graduate assistantships are generally available when a faculty member receives a grant from a source external to the university. Graduate Assistants are generally appointed for twelve months with minimum stipends of $21,823 for master’s and $27,000 for doctoral students for 2019-2020. These stipend levels are pro-rated for reduced lengths. In addition to the stipend, the assistantship award includes a tuition scholarship for up nine credits per semester (and up to 5 credits in summer if on a 12-month assistantship) during the period of the assistantship from a combination of grant and UVM resources. Some programs have stipends higher than the minimum.

Approximately 20 hours of effort per week on the grant-sponsored project is required of extramurally-funded Graduate Assistants. More than one academic year will be necessary for the completion of the master’s degree, and more for completion of the doctoral degree. For information on the availability of extramurally funded assistantships, contact the chair or graduate program coordinator of the department.

GRADUATE FELLOWSHIPS/TRAINEESHIPS

Graduate Fellowships/Traineeships are available in some departments through grants from various state and federal agencies. Fellowships/Traineeships may include both a stipend and tuition scholarship.

TRAVEL MINI-GRANTS

The Graduate College provides mini-travel grants to help students underwrite the cost of attending conferences where they will present papers or posters based upon their research. The Mini-Grants Program is administered by the Graduate Student Senate. Funds are awarded three times per year. The student’s home department must provide a match. Further information on the Mini-Grants Program is available at the GSS website.

SMALL GRANTS FOR RESEARCH SUPPORT

The Graduate College has funds for small awards (up to $750) to graduate students to support their thesis or dissertation research. These awards are limited to students in programs where extramural support is typically not available and resources from their program or academic college/school are not available.

OTHER FELLOWSHIPS

Fellowships established by private donors or through departmental resources are available periodically in some departments. Please check the website for the program in which you are interested for this information. In addition, the Graduate College has several awards for students in specific disciplines. Please see the Student Awards page on the Graduate College Website for further information.

PAYMENTS

By registering for courses, students are entering into a financial arrangement with UVM and accept responsibility for charges billed to their UVM account. This legal responsibility of the student is regardless of whether a third party is assisting with payment of their UVM expense. The online registration system will generate charges based on enrolled credits. Students who enroll in advance for courses will receive notification at their university email address when itemized billing statements of applicable charges are ready to view online. The billing statement will include instructions to settle in full by a specific date. Advance payments are accepted; checks should be made payable to the University of Vermont. Any checks or payments received by the university may be applied to outstanding balances.

Students who cannot meet their financial obligations because of unusual circumstances should contact the Office of Student Financial Services as soon as possible before the payment due date.

Students who have not satisfactorily completed financial arrangements by the announced due date will be assessed a late payment fee of $250 and a hold preventing access to registration, grades, and transcripts. They are also subject to potential cancellation of their enrollment. Dis-enrollment will automatically place a registration hold on a student’s account that will prevent re-enrolling until the student has contacted Student Financial Services to discuss the account.

The university reserves the right to withhold registration material, the diploma, degree, and all information regarding the record, including transcript, of any student who is in arrears in the payment of tuition, fees, or other charges, including, but not limited to, student loans, dining and housing charges, and parking fines.

Seriously delinquent accounts may be placed with an outside collection agency and/or reported to the national credit bureau system. Students are responsible for all late payment fees, collection charges, attorney fees, interest and any other costs and charges necessary for the collection of amounts not paid when due.
International student accounts may be placed with a collection agency if the University can identify a collection agency willing to pursue collections in the student’s home country. Since international student visas require students to supply proof of ability to pay, if it is determined that they no longer have the ability to meet their financial obligations they may have their immigration records terminated and the student will be required to leave the United States.

Accounts with problematic history of payment may be required to pre-pay for the semester or year depending upon case by case assessment by the Director of Student Financial Services.

**BUDGETED PAYMENT**

The university offers a Monthly Payment Plan (https://www.uvm.edu/studentfinancialservices/payment_billing_repayment/#monthly_payment_plan) to budget semester costs in monthly installments.

**LATE PAYMENT FEE**

Students who do not settle their accounts by the due date will be charged a $250 late payment fee. Learn more about reviewing and responding to the bill (https://www.uvm.edu/studentfinancialservices/billing_and_payment_due_dates) to avoid a late payment fee.

**SPONSORED AND INSTITUTIONAL RESEARCH**

During fiscal year 2018, the university received 624 research awards representing $136,000,000 in funding from a diverse range of sponsors (over 300) from proposals submitted by more than 300 Principal Investigators. UVM ranks nationally as one of the 142 leading universities in terms of federal grant support. In addition, there are a substantial number of faculty research projects supported, in part, by institutional funds. Graduate students frequently serve as integral parts of faculty research projects in a wide range of disciplines.

**ACADEMIC AND STUDENT LIFE RESOURCES**

**GRADUATE TEACHING PROGRAM**

UVM’s Center for Teaching & Learning (CTL), Writing in the Disciplines Program (WID), and the Graduate College invite graduate students to participate in the Graduate Teaching Program. Graduate students completing the program can earn formal recognition from the Graduate College.

This program, designed for graduate students who are interested in pursuing teaching in higher education, provides encouragement and feedback in developing teaching philosophies, practices and strategies to prepare you to teach to a wide variety of students, support for preparing a teaching portfolio, a supportive community encouraging professional development.

**GRADUATE WRITING CENTER**

The Graduate Writing Center offers free one-to-one and small group consultations for graduate student writers at work on a wide range of projects for academic and public audiences. Staffed by experienced tutors who hail from graduate programs across the campus, the Graduate Writing Center also supports graduate students in their writing through Sunday Graduate Writing Retreats, Friday Forums, and multi-day “camps” for thesis and dissertation writers.

**STUDENT ACCESSIBILITY SERVICES**

Student Accessibility Services (SAS) offers: exam accommodations, meetings with Accessibility Specialists to receive advisement and advocacy around disability-related matters, ebooks, deaf and hard of hearing services, notetaking and adaptive technology, as well as other programs and services. For a student with a diagnosis/condition that may be considered disabling, using accommodations and services at SAS could be a resource that helps break down barriers and insures equal access. In order to be eligible for academic services through SAS, students should provide documentation about their disability and meet with a staff person to discuss their disability and their accommodations.

**UVM STUDENT RESEARCH CONFERENCE**

All UVM students performing research or creative projects under the mentorship of a UVM faculty member are encouraged to participate in the UVM Student Research Conference, which is a full day devoted to presentations by graduate and undergraduate students from all disciplines. This event is sponsored by the Vice President for Research, the Graduate College and the Honors College.

**STATISTICAL SOFTWARE SUPPORT AND CONSULTING SERVICES**

Located on the first floor of Bailey/Howe Library in room 115, Statistical Software Support and Consulting Services provides support to users of statistical software throughout the UVM community, as well as general statistical consulting.

**GRADUATE STUDENT SENATE**

The Graduate Student Senate (http://www.uvm.edu/~gss) (GSS), composed of graduate student representatives from various graduate programs, provides a forum for discussion of graduate student issues and assists the dean and the Executive Committee in matters affecting graduate students. Issues considered by GSS include academic matters, professional development and student life. GSS sponsors occasional social events and conducts a mini-grants program to support, in part, expenses associated with student travel for professional purposes.

**GRADUATE STUDENT OMBUDSPERSON**

The Graduate Student Ombudsperson is responsible for providing independent, confidential, informal and impartial assistance to graduate students on matters affecting their graduate education. The Graduate College ombudsperson is a designated neutral party and approaches each case impartially and without prejudice. The
Ombudsperson is committed to fairness, equity and the humane treatment of all parties.

GRADNET

GRADNET is an electronic forum where graduate students, faculty, and staff discuss issues, research topics, graduate student life, and announcements that pertain to the graduate community. Subscription is voluntary. Please refer to the Graduate College website for further information and instructions to subscribe.

INTERFAITH CENTER

The Interfaith Center is open to all UVM students, staff, faculty, and affiliates for reflection, spiritual practice, conversation, education, and community building. The Center hosts a number of programs throughout the year to bring people together and encourage conversation.

PRISM CENTER

The Prism Center serves the diverse queer and trans communities at the University of Vermont. They support and empower lesbian, gay, bisexual, transgender and queer students, as well as students whose identities fall in between or expand beyond those categories, and work to create a campus community where people of all sexual and gender identities can thrive. They are committed to working with all members of the UVM community to create a more socially just, equitable, and inclusive campus through education, advocacy and community building. The Prism Center holds a variety of events, social and educational programs, and training & advocacy opportunities throughout the year for students, staff, and faculty members.

THE MOSAIC CENTER FOR STUDENTS OF COLOR

The Mosaic Center for Students of Color (MCSC) fully supports the holistic development of African, Latino(a), Asian, Native American, Multiracial and New American students so that as confident students of color they attain their goals for academic achievement, personal growth, identity formation, and cultural development. The MCSC administers a variety of programs throughout the year.

DEGREE REQUIREMENTS

The Graduate College of the University of Vermont is responsible for all advanced degree programs except the program leading to the degree of Doctor of Medicine. Degree requirements for graduate students vary by academic program and degree type. Please see below for degree specific requirements of the Graduate College and program pages for additional program specific requirements.

MINIMUM GRADE-POINT AVERAGE REQUIREMENT

To meet the graduation requirements of the Graduate College, a student must have attained a minimum cumulative grade-point average of 3.00. Individual graduate programs may require a higher grade-point average for graduation. Transfer of credit grades cannot be included in this average. Additionally, at least 15 graded credit hours must have been taken after the student matriculated in the graduate program.

- Requirements for Accelerated Master’s Programs (p. 264)
- Requirements for Certificates of Graduate Study (p. 265)
- Requirements for the Master’s Degree (p. 265)
- Requirements for the Master of Education Degree (p. 266)
- Requirements for the Master of Professional Studies Degree (p. 267)
- Requirements for the Doctor of Education Degree (p. 268)
- Requirements for the Doctor of Nursing Practice Degree (p. 269)
- Requirements for the Doctor of Philosophy Degree (p. 270)
- Requirements for the Doctor of Physical Therapy Degree (p. 271)

REQUIREMENTS FOR ACCELERATED MASTER’S DEGREE PROGRAMS

Accelerated Master’s Degree (AMP) programs are designed to allow current UVM undergraduate students to earn both bachelor’s and master’s degrees within a total of five years. Students are expected to be full-time until completion of the master’s degree. Not all UVM master’s degree programs include an AMP option. Those programs that do are listed in the undergraduate catalog under Unique Learning Opportunities/Accelerated Degree Programs. The curriculum for an AMP is identical to that of the affiliated master’s degree.

AMP students may use up to six (6) credits of graduate-level courses taken at UVM toward both the bachelor’s and master’s degrees. Some programs specify the courses that must be taken; in others it is determined individually.

In some programs an additional three (3) credits of graduate-level coursework taken prior to earning the bachelor’s, beyond the six double counted credits, may be used for the master’s, provided the credits do not also count toward the bachelor’s degree.

Graduate-level courses taken for the AMP prior to earning the bachelor’s must be graded and cannot be independent study or research; thesis research credits; internships; or practica.

Under no circumstance will more than nine (9) credits of graduate-level coursework taken prior to earning the bachelor’s be applied towards the graduate degree.

Students must apply for and be accepted to the AMP through the standard Graduate College application process. Normally, the application and admission process must be finalized prior to the beginning of the senior year. In all cases, students must be admitted by the Graduate College before taking any courses that will apply to the master’s degree, i.e., all courses used for the master’s degree must be taken after formal admission to the AMP.

Standardized admissions tests are typically not required for AMP admission. AMP students may not receive fellowship or assistantship funding prior to completion of the bachelor’s degree and, normally,
AMP students are not funded following completion of the bachelor’s as the intent is for them to be fully engaged in their studies and complete the master’s one year beyond the bachelor’s degree.

REQUIREMENTS FOR THE CERTIFICATES OF GRADUATE STUDY

Certificates of Graduate Study provide opportunities for currently enrolled UVM graduate degree students to acquire an additional concentration of study and for post-baccalaureate certificate only students to prepare for further graduate study and/or develop their professional skills.

The general requirements for a Certificate of Graduate study at UVM are:

1. A minimum of fifteen graded credits of graduate-level course work is required. Some certificates require more than fifteen credits. The courses must be in a defined subject area and approved for the specific certificate. At least nine of the credits must be identified as core courses in the certificate curriculum, and the remaining courses must be chosen from a published and approved list of options for that certificate.
2. All credits must be completed at UVM within a five year period. Graduate credits taken at other institutions may not transfer into a UVM Certificate of Graduate Study program. Credit (but not grades) from 300-level courses taken at UVM as a non-degree student may transfer, but only for those certificates requiring more than fifteen credits and only for the credits in excess of the fifteen graded credit minimum.
3. Students who elect to pursue a Certificate of Graduate Study in conjunction with a master’s or doctoral program must apply to the Certificate before registering for the final 6 credits needed for the Certificate. Students pursuing a master’s or doctoral degree must choose a Certificate of Graduate Study in a different discipline from the graduate degree.
4. A minimum grade point average of 3.00 must be achieved in the certificate program.
5. Credits used for a Certificate of Graduate Study may be applied toward an appropriate master’s or doctoral degree at UVM, and credits applied toward a graduate degree at UVM may be applied toward an appropriate Certificate of Graduate Study, subject to the above (i.e., credits may overlap between one certificate and one degree). Credits taken for one Certificate of Graduate Study may not be used to fulfill the requirements for another Certificate of Graduate Study.

REQUIREMENTS FOR THE MASTER’S DEGREE

In addition to the requirements described below, individual programs may have their own specific requirements. Students must read and familiarize themselves with their program’s requirements. Some of them are detailed in this catalogue under individual program listings and other requirements are available from the director or chair of each program.

CREDITS

Master’s degrees require a minimum of thirty credits; some programs require more. A minimum grade point average of 3.00 must be achieved. A minimum of fifteen graded credits used in completion of the graduate GPA must be taken in residence at UVM following matriculation into the master’s program. Consult individual program descriptions for specific credit requirements. In programs that require a thesis, the number of credits earned in thesis research may vary by program between six (minimum) and fifteen (maximum). Thesis credit is included as part of the 30-hour minimum. With the prior approval of their program and the Graduate College, students may apply one 100-level, or 200-level (and not listed in the Graduate Catalogue as approved for graduate credit) course toward their graduate program. The student’s advisor must petition the Graduate College for approval before the student enrolls in the course. Consult individual programs for further limitations. Under no circumstances will a course numbered below 100 be applicable to a master’s program.

MINIMUM RESIDENCE REQUIREMENTS

Candidates for the master’s degree must satisfactorily complete twenty-one credits in residence. The residency requirement is completed by courses that

1. are taken for graduate credit through the University of Vermont, and
2. are taken after the student has been admitted to the Graduate College.

Some programs may require more than the above minimum hours in residence. Consult with the individual program.

COMPREHENSIVE EXAMINATION

All master’s degree students are required to pass a written and/or oral comprehensive examination in their field of specialization. If both formats are used, satisfactory completion of the written examination is prerequisite to standing for the oral examination. All comprehensive examinations are taken on the University of Vermont campus in Burlington. One re-examination only is permitted for any failed comprehensive examination. The comprehensive examination is not the same as the oral thesis defense, and must be passed satisfactorily before defending the thesis. Consult individual program descriptions for specific information.

There is no fee for the Master’s Comprehensive Examination. The student’s program director or advisor must notify the Graduate College of the outcome of the examination. The result and date of the examination is recorded as a notation on the academic transcript.

RESEARCH AND THESIS

If a thesis is required, the candidate for the master’s degree undertakes a problem of original research under the supervision of a faculty member in the department of specialization. At the conclusion of the research, the student must present and defend successfully a thesis which embodies the results of the work and demonstrates the capability for independent research.
**THESIS DEFENSE FORMS**

Defense Committee Membership and Defense Notice forms must be submitted to the Graduate College by the designated deadlines. A Public Notice of the defense is required in order to defend. The Intent to Graduate form must be submitted to the candidate’s department/program and the Graduate College by the published deadline for the graduation cycle.

**THESIS FORMAT**

Students are required by the Graduate College to use a computer software program appropriate to the discipline to create the Table of Contents and the Lists of Tables and Figures from the thesis text headings.

The thesis must be prepared and submitted in compliance with the “Guidelines for Writing a Thesis or Dissertation” available from the Graduate College office. A formatted copy of the thesis must be submitted to the Graduate College for a Format/Record Check at least three weeks prior to the scheduled defense. Students must also provide defendable copies of the thesis to members of their thesis defense examination committee at least two weeks before the scheduled examination. Individual departments may require earlier deadlines.

Students must notify the Graduate College of the thesis defense at least three weeks prior to defending their thesis.

The oral defense of a thesis may be scheduled only after successful completion of the comprehensive examination and the submission of an original copy of the thesis to the Graduate College for a Format/Record Check.

**THESIS DEFENSE EXAMINATION COMMITTEE**

The thesis defense examination committee consists of at least three University of Vermont faculty members, at least two of whom must be regular members of the graduate faculty. Ordinarily, two committee members will be from the candidate’s program, including the thesis advisor. The third member, who acts as chair of the committee, must be a member of the graduate faculty, must be from a different program and department (including any secondary or adjunct appointments) than the candidate, and must be approved by the Graduate College dean upon nomination by the thesis advisor. For University-wide interdisciplinary programs, the chair must be outside the department of the candidate’s advisor. The thesis defense examination committee and the graduate studies committee do not have to be the same.

The chair of the thesis defense examination committee has the responsibility for ensuring proper conduct of the examination, appropriate documentation of the results, and that the signatures of endorsement are added to the Defense Examination Record following a successful defense.

The acceptability of the thesis is determined by the thesis defense examination committee. The result and date of the examination is recorded as a notation on the academic transcript. If a student’s defense examination performance is not satisfactory, then only one re-examination is permitted.

After a successful thesis defense, candidates must electronically upload the corrected thesis to http://www.etdadmin.com/uvm for approval by the Graduate College within the time period specified by the thesis defense examination committee, and/or the Graduate College.

**ADDITIONAL REQUIREMENTS FOR THE MASTER OF ARTS IN TEACHING**

The M.A.T. degree in Curriculum and Instruction is designed for students seeking initial licensure for middle school or high school teaching. For those seeking licensure in secondary education, the program requires at least thirty credits of education course work and at least thirty credits in the field of specialization for each subject that you are seeking licensure. For those seeking licensure in middle level education, the program requires at least thirty credits in education coursework and eighteen credits in one content field for middle level endorsement. The middle level or secondary program coordinator must approve the individual program of study for each M.A.T. student.

**ADDITIONAL REQUIREMENT FOR THE MASTER OF SCIENCE FOR TEACHERS**

Applicants for the Master of Science for Teachers must be licensed teachers. Students in a Master of Science for Teachers program may apply more than one three-credit, 100-level course toward their degree. Consult specific department listings for additional requirements and policies related to this degree program.

**REQUIREMENTS FOR THE MASTER OF EDUCATION DEGREE**

The graduate program of each student admitted to candidacy for the degree of Master of Education is planned and supervised by an advisor in the respective program area. Program planning is based upon the student’s undergraduate curriculum, professional experience, and aims and purposes in pursuing the master’s degree.

Each program must include a minimum of thirty approved credits (Higher Education and Student Affairs, forty; Interdisciplinary Studies, thirty-six). A minimum grade point average of 3.00 must be achieved. Contingent on a candidate’s background and interests and on program specification, additional credits may be required. If a student’s preparation is inadequate to begin study at the graduate level, additional undergraduate courses will be required. Normally, each Master of Education degree program must include a minimum of three to six semester hours of graduate work in the foundations of education unless this requirement or its equivalent has been met previously.

**COMPREHENSIVE EXAMINATION**

A comprehensive examination is required. It may be written, oral, or both. The choice of the examination format will be made by faculty
members in the area of specialization after consultation with the advisor and the candidate.

1. The written comprehensive examination will cover the field of education with emphasis on the area of specialization.
2. The oral comprehensive examination will emphasize the area of specialization.

It is the responsibility of the candidate to schedule the required examination with the College of Education and Social Services. Since each program has different options for meeting the oral and written comprehensive requirements, candidates must contact the respective program chair or advisor regarding program policy.

**THESIS OPTION**

If the thesis option is elected (Interdisciplinary and Educational Leadership only), the oral or written comprehensive examination must be successfully completed prior to the thesis defense.

**RESEARCH AND THESIS**

If a thesis is required, the candidate for the master's degree undertakes a problem of original research under the supervision of a faculty member in the department of specialization. At the conclusion of the research, the student must present and defend successfully a thesis which embodies the results of the work and demonstrates the capability for independent research.

**THESIS DEFENSE FORMS**

Defense Committee Membership and Defense Notice forms must be submitted to the Graduate College by the designated deadlines. A Public Notice of the defense is required in order to defend. The Intent to Graduate form must be submitted to the candidate’s department and the Graduate College by the published deadline for the cycle in which the student plans to graduate.

**THESIS FORMAT**

Students are required by the Graduate College to use a computer software program appropriate to the discipline to create the Table of Contents and the Lists of Tables and Figures from the thesis text headings.

The thesis must be prepared and submitted in compliance with the “Guidelines for Writing a Thesis or Dissertation” available from the Graduate College website. A formatted copy of the thesis must be reviewed by the Graduate College at the Format/Record Check at least three weeks prior to the scheduled defense. Students must also provide defendable copies of the thesis to members of their thesis defense examination committee at least two weeks before the scheduled examination. Individual departments may require earlier deadlines.

Students must notify the Graduate College of the thesis defense at least three weeks prior to defending their thesis.

**THESIS DEFENSE EXAMINATION COMMITTEE**

The thesis defense examination committee consists of at least three University of Vermont faculty members, at least two of whom must be members of the graduate faculty. Ordinarily, two committee members will be from the candidate’s program, including the thesis advisor. The third member, who acts as chair of the committee, must be a member of the graduate faculty, must be from a different program and department (including any secondary or adjunct appointments) than the candidate, and must be approved by the Graduate College dean upon nomination by the thesis advisor. For University-wide interdisciplinary programs, the chair must be outside the department of the candidate’s advisor. The thesis defense examination committee and the graduate studies committee do not have to be the same.

The chair of the thesis defense examination committee has the responsibility for ensuring proper conduct of the examination, appropriate documentation of the results, and that the signatures of endorsement are added to the Defense Examination Record following a successful defense.

The acceptability of the thesis is determined by the thesis defense examination committee. The result and date of the examination is recorded as a notation on the academic transcript. If a student’s defense examination performance is not satisfactory, then only one re-examination is permitted.

After a successful thesis defense, candidates must electronically upload the corrected thesis to http://www.etdadmin.com/uvm for approval by the Graduate College within the time period specified by the thesis defense examination committee, and/or the Graduate College.

**REQUIREMENTS FOR ADMISSION TO GRADUATE STUDIES FOR THE DEGREE OF MASTER OF EDUCATION**

Eighteen credits of Education and related areas or appropriate professional experience as detailed in application. The Education courses prerequisites may not apply to the Higher Education and Student Affairs Administration, Educational Leadership, or Interdisciplinary Studies programs in the Department of Leadership and Developmental Sciences, i.e., persons seeking positions which do not require public school certification.

**MINIMUM DEGREE REQUIREMENTS**

Eighteen graduate credits in courses in Education, including a minimum of six in the foundations of education, twelve additional credits in approved graduate courses or six additional credits and thesis research; a year of successful experience in teaching or in a related educational activity.

1. This requirement no longer applies to the program in Special Education.

**REQUIREMENTS FOR THE MASTER OF PROFESSIONAL STUDIES DEGREE**

In addition to the requirements described below, individual programs may have their own specific requirements. Students must read and familiarize themselves with their program’s requirements. Some of
them are detailed in this catalogue under individual program listings and other requirements are available from the director or chair of each program.

CREDITS
Master of Professional Studies (M.P.S.) degrees require a minimum of thirty credits; some programs require more. A minimum grade point average of 3.00 must be achieved. A minimum of fifteen graded credits used in compilation of the graduate GPA must be taken in residence at UVM following matriculation into the master's program. Consult individual program descriptions for specific credit requirements. With the prior approval of their program and the Graduate College, students may apply one 100-level, or 200-level (and not listed in the Graduate Catalogue as approved for graduate credit) course toward their graduate program. The student's advisor must petition the Graduate College for approval before the student enrolls in the course. Consult individual programs for further limitations. Under no circumstances will a course numbered below 100 be applicable to a master's program.

MINIMUM RESIDENCE REQUIREMENTS
Candidates for the M.P.S. degree must satisfactorily complete twenty-one credits in residence. The residency requirement is completed by courses that:

1. are taken for graduate credit through the University of Vermont, and
2. are taken after the student has been admitted to the Graduate College.

Some programs may require more than the above minimum hours in residence. Consult with the individual program.

COMPREHENSIVE EXAMINATION
All M.P.S. degree students are required to pass a written and/or oral comprehensive examination in their field of specialization. If both formats are used, satisfactory completion of the written examination is prerequisite to standing for the oral examination. All comprehensive examinations are taken on the University of Vermont campus in Burlington. One re-examination only is permitted for any failed comprehensive examination. Consult individual program descriptions for specific information.

There is no fee for the Master's Comprehensive Examination. The student's program director or advisor must notify the Graduate College of the outcome of the examination. The result and date of the examination is recorded as a notation on the academic transcript.

INTERNSHIP/RESEARCH
All M.P.S. degree students must complete a minimum of 3 and a maximum of 6 credits of project research or internship to apply their newly acquired knowledge as they develop practical skills.

CAPSTONE PROJECT
All M.P.S. degree students must complete a capstone project that is the culmination of their studies and integrates their research or internship experience into a professional framework informed by their curriculum. The capstone project must be presented to and assessed by program faculty.

REQUIREMENTS FOR THE DOCTOR OF EDUCATION DEGREE
CREDITS
A minimum of fifty-nine credits earned in courses and in dissertation research, at least forty-four of which were completed at UVM following formal admission to the program. With the prior approval of their graduate studies committee or advisor and the Graduate College, doctoral students may apply up to six credits of 100-level, or 200-level courses (not listed in the Graduate Catalogue as approved for graduate credit), towards their graduate program. A student's advisor must submit this request to the Graduate College for approval before the student enrolls in the course. Under no circumstances will a course numbered below 100 be applicable to a doctoral program. Doctoral students must achieve a 3.00 grade point average.

A maximum of 9 credit hours may be accepted in transfer from an accredited graduate program, and an additional 6 credits may be applied for courses taken at The University of Vermont prior to admission. Credits to transfer may be completed prior to admission to the Doctor of Education program provided that the credit is approved by the student's graduate studies committee and that the credit conforms to all other Graduate College requirements.

COMPREHENSIVE EXAMINATION
Consistent with Graduate College requirements, the Ed.D. program requires students to complete a comprehensive examination of core knowledge prior to the completion of the degree program. This examination occurs in the semester following the completion of the core course curriculum. The examination will test knowledge in areas of study germane to all Ed.D. students. Students may not sit for the comprehensive examination until they have successfully completed their core courses.

RESEARCH AND DISSERTATION
Each candidate, while in residence at the University of Vermont, must complete an acceptable original research project which contributes new knowledge or techniques in an academic field. Each candidate must enroll in a minimum of seventeen credits of dissertation research. Only a member of the graduate faculty may supervise dissertation research for the Ed.D.

DISSERTATION DEFENSE FORMS
Defense Committee Membership and Defense Notice forms must be submitted to the Graduate College by the designated deadlines. A Public Notice of the defense is required at least three weeks prior to the scheduled defense date in order for the student to defend. The Intent to Graduate form must be submitted to the candidate's department and the Graduate College by the published deadline for the cycle in which the student plans to complete all degree requirements.
DISSESSATION FORMATT

Students are required by the Graduate College to use a computer software program appropriate to the discipline to create the Table of Contents and the Lists of Tables and Figures from the dissertation text headings. A dissertation must be prepared and submitted in compliance with the "Guidelines for Writing a Thesis or Dissertation" available from the Graduate College website. A formatted copy of the dissertation must be reviewed by the Graduate College for a Format/Record Check at least three weeks prior to the scheduled oral defense. Each student must also provide defendable copies of the dissertation to members of the dissertation defense examination committee at least two weeks before the scheduled examination. A student's Graduate Studies Committee may require earlier deadlines.

The dissertation may be defended only after successful completion of the comprehensive examination and the submission of an original copy of the dissertation to the Graduate College for a Format/Record Check.

DISSESSATION DEFENSE EXAMINATION COMMITTEE

The dissertation defense examination committee consists of a minimum of four University of Vermont faculty members, all regular members of the graduate faculty. At least two graduate faculty members must be from inside the department or program. The chair must be both a member of the graduate faculty and from outside the candidate's department and program. The definition of outside faculty means the faculty member has no appointment of any kind in the department or program. For University-wide interdisciplinary programs, the chair must be outside the department of the candidate's advisor. The chair will be designated by the Graduate College dean upon nomination by the dissertation advisor. Individual programs may require more than four committee members or have other specific membership requirements. The dissertation defense examination committee must be approved by the Graduate College prior to the defense. The dissertation defense examination committee and the graduate studies committee do not have to be the same.

The chair of the dissertation defense examination committee has the responsibility for ensuring proper conduct of the examination, appropriate documentation of the results, and that the signatures of endorsement are added to the Defense Examination Record following a successful defense.

The acceptability of the dissertation is determined by the dissertation defense examination committee. The chair of the dissertation defense examination committee notifies the Graduate College of the outcome. The result of the defense and the date defended will be recorded as a notation on the academic transcript. If a student's defense examination performance is not satisfactory, then one reexamination, and one only, is permitted.

After a successful dissertation defense, candidates must electronically upload the corrected dissertation to http://www.etdadmin.com/uvm for approval by the Graduate College within the time period specified by the dissertation defense examination committee, and/or the Graduate College.

REQUIREMENTS FOR THE DOCTOR OF NURSING PRACTICE DEGREE

The Department of Nursing offers a graduate program leading to a Doctor of Nursing Practice (D.N.P.) degree. The program prepares nurses to assume leadership roles within health care systems in a variety of settings, to expand knowledge of the discipline of nursing, and to acquire the foundation for doctoral study and continued professional development. The ability to work collaboratively on an interdisciplinary team, provide patient-centered care, employ evidence-based practice, access information technology, and apply quality improvement strategies are basic competencies expected of all graduates of this program. The DNP program prepares graduates to provide primary care as advanced practice registered nurses (APRNs) in one of two tracks: Adult-Gerontology Nurse Practitioner (AGNP), or Family Nurse Practitioner (FNP). Additionally, the program offers nurses with an earned Master's Degree in nursing the opportunity to complete a post-MS DNP degree, either in primary care or as an executive nurse leader.

MINIMUM DEGREE REQUIREMENTS

The D.N.P. graduate curriculum includes nine core courses essential for all students that address the theoretical foundation of nursing care, professional issues and role development of APRNs, evidence based research utilization and practice, health policy and finance, ethics, health care informatics, quality of health care delivery, leadership of health care systems, genetics/genomics, population-based health, biostatistics and epidemiology. Students apply core content to their DNP Program. Upon successful completion of program requirements APRN students are eligible to complete a national certification exam as either FNP or AGNP.

Students on the Adult-Gerontology Nurse Practitioner (AGNP) track are required to earn 69.5 credits; students on the Family Nurse Practitioner (FNP) track are required to earn 76 credits. A course list for both tracks can be found on the College of Nursing and Health Sciences website. A minimum grade point average of 3.00 must be achieved.

As a CNHS graduate nursing student, students are required to complete the CNHS mandatories prior to matriculating into the program. Students must keep these requirements current throughout their program: Immunizations, CPR, HIPPA/OSHA training, annual PPD, and RN License. Some clinical sites require a criminal background check as well. It is essential to be compliant with this process to participate in clinical courses/experiences. Complete details on CNHS Mandatories are available on the college website.

COMPREHENSIVE EXAMINATION

The Comprehensive Examination is conducted by the Graduate Program in the Department of Nursing. The examination is designed to allow the student to demonstrate analysis and synthesis of knowledge gained through the program. Students may take the examination any time after the majority of the core courses have been
successfully completed, and must be completed prior to the final track courses and practicums. Students will be expected to orally present their D.N.P. Project proposal, clearly articulating, synthesizing, and applying the D.N.P. Essentials and the NP competencies and core content addressed throughout the program of study as they relate to their DNP Project.

The Comprehensive Examination is rated on a satisfactory/unsatisfactory basis. In the event that the student does not achieve a satisfactory on the oral comprehensive exam, one opportunity to provide written evidence of satisfactory achievement of the goal of the comprehensive exam will be allowed and is to be submitted by two weeks following the oral attempt.

DNP PROJECT
The project option is a scholarly academic experience of the graduate program where students develop and conduct an innovative project/production relevant to advanced nursing practice with faculty supervision. It is anticipated that the D.N.P. project will result in innovative practices that will improve health care delivery and patient outcomes. Students are required to present and defend the project orally upon its completion.

REQUIREMENTS FOR THE DOCTOR OF PHILOSOPHY DEGREE
In addition to the requirements described below, individual programs may have their own specific requirements. Students must consult and familiarize themselves with their program requirements.

CREDITS
The degree of Doctor of Philosophy requires a minimum of seventy-five credits earned in courses and in dissertation research, including a minimum of thirty credits of course work, at least fifteen of which must be graded and may not count towards a master’s degree, and a minimum of twenty credits of dissertation research. A minimum grade point average of 3.00 must be achieved. A minimum of fifteen credits in courses used in compilation of the grade point average must be taken in residence at the University of Vermont following matriculation for the Ph.D. Consult individual programs for additional information on credit hour requirements. Generally, the first year of each doctoral program consists of required courses. With the prior approval of their department and the Graduate College, doctoral students may apply up to six credits of 100-level, or 200-level courses (and not listed in the Graduate Catalogue as approved for graduate credit), towards their graduate program. A student’s advisor must petition the Graduate College for approval before the student enrolls in the course. Consult individual programs for further limitations. Under no circumstances will a course numbered below 100 be applicable to a doctoral program.

MINIMUM RESIDENCE REQUIREMENTS
Candidates for the doctoral degree must satisfactorily complete a minimum of 51 hours in residence. The residency requirement is completed by courses that:

1. are taken for graduate credit through the University of Vermont, and
2. are taken after the student has been admitted to the Graduate College.

Some programs may require more than the above minimum hours in residence.

TEACHING REQUIREMENT
All doctoral candidates must acquire appropriate teaching experience in their chosen fields prior to the award of the degree. The nature and amount of teaching, for which no academic credit is allowed, will be determined by each candidate’s program.

LANGUAGE REQUIREMENT
Demonstration of competency in foreign languages may be required in some programs. The requirement may be fulfilled by an examination administered by the program or in conjunction with the appropriate language department. The outcome of the language examination is reported to the Graduate College and will appear as a notation on the transcript. There is no fee for taking the exam.

GRADUATE STUDIES COMMITTEE
It is the responsibility of the graduate studies committee to supervise the graduate student’s program and to review progress at regular intervals. A graduate studies committee consisting of at least four regular members of the graduate faculty is appointed by the department chair or designated departmental representative and approved by the Dean of the Graduate College soon after first enrollment in the Graduate College, unless the student’s department employs an alternative approved procedure. The chair of the graduate studies committee serves as the student’s academic advisor and also as the dissertation advisor or supervisor. Only a regular member of the graduate faculty can serve as an advisor of a doctoral dissertation. On occasion, it may be appropriate for a professional other than a regular member of the graduate faculty to serve as a member of a graduate studies committee. In such cases, written approval must be obtained from the Dean of the Graduate College prior to the student’s beginning dissertation research.

COMPREHENSIVE EXAMINATION
A written comprehensive examination in the field of study must be passed by the candidate at least six months before the dissertation is submitted. The examination must be prepared by the program concerned, in consultation with the candidate’s graduate studies committee. Should the candidate fail the examination, only one reexamination is permitted. Success in the written comprehensive examination is prerequisite to standing for the Dissertation Oral Defense Examination. All examinations are taken on the University of Vermont campus in Burlington. Some programs also require an oral comprehensive examination.

There is no fee for the Doctoral Comprehensive Examination. The student’s program director or advisor must notify the Graduate College of the outcome of the examination. The result of the
examination and the date taken will be recorded as a notation on the academic transcript.

**RESEARCH AND DISSERTATION**

Each candidate, while in residence at the University of Vermont, must complete an acceptable original research project which contributes new knowledge or techniques in an academic field. Each candidate must enroll in a minimum of twenty credits of dissertation research. Only a member of the graduate faculty may supervise dissertation research for the Ph.D.

**DISSERTATION DEFENSE FORMS**

Defense Committee Membership and Defense Notice forms must be submitted to the Graduate College by the designated deadlines. A Public Notice of the defense is required at least three weeks prior to the scheduled defense date in order for the student to defend. The Intent to Graduate form must be submitted to the candidate’s department before the List of Potential Graduates is due.

**DISSERTATION FORMAT**

Students are required by the Graduate College to use a computer software program appropriate to the discipline to create the Table of Contents and the Lists of Tables and Figures from the dissertation text headings.

A dissertation must be prepared and submitted in compliance with the “Guidelines for Writing a Thesis or Dissertation” available on the Graduate College website and the program. A formatted copy of the dissertation must be reviewed by the Graduate College at the Format/Record Check at least three weeks prior to the scheduled oral defense. Each student must also provide defendable copies of the dissertation to members of the dissertation defense examination committee at least two weeks before the scheduled examination. Individual departments may require earlier deadlines.

Students must notify the Graduate College prior to defending their dissertations.

**DISSERTATION DEFENSE EXAMINATION COMMITTEE**

The dissertation defense examination committee consists of a minimum of four University of Vermont faculty members, all regular members of the graduate faculty. At least two graduate faculty members must be from inside the department or program. The chair must be both a member of the graduate faculty and from outside the candidate’s department and program. The definition of outside faculty means the faculty member has no appointment of any kind in the department or program. For University-wide interdisciplinary programs, the chair must be outside the department of the candidate’s advisor. The chair will be designated by the Graduate College dean upon nomination by the dissertation advisor. Individual programs may require more than four committee members or have other specific membership requirements. The dissertation defense examination committee must be approved by the Graduate College prior to the defense. The dissertation defense examination committee and the graduate studies committee do not have to be the same.

The chair of the dissertation defense examination committee has the responsibility for ensuring proper conduct of the examination, appropriate documentation of the results, and that the signatures of endorsement are added to the Defense Examination Record following a successful defense.

The acceptability of the dissertation is determined by the dissertation defense examination committee. The chair of the dissertation defense examination committee notifies the Graduate College of the outcome. The result of the defense and the date defended will be recorded as a notation on the academic transcript. If a student’s defense examination performance is not satisfactory, then one reexamination, and one only, is permitted.

After a successful dissertation defense, candidates must electronically upload the corrected dissertation to http://www.etdadmin.com/ uvm for approval by the Graduate College within the time period specified by the dissertation defense examination committee, and/or the Graduate College.

**REQUIREMENTS FOR THE DOCTOR OF PHYSICAL THERAPY DEGREE**

The Doctor of Physical Therapy (D.P.T.) program at the University of Vermont (UVM) consists of 102 graduate credits offered in a 2.5-year full-time program format, over 8 semesters inclusive of summers, that leads to a Doctor of Physical Therapy (D.P.T.) degree. The program is well recognized for preparing D.P.T. graduates as primary care movement system experts who translate evidence into contemporary best practice. Graduates advocate to improve health outcomes and well-being at the individual and community level.

Students engage in an array of active learning experiences with multiple opportunities for interprofessional education and community engagement. Integrated clinical experiences and 32 weeks of full time clinical internships broaden student professional preparation. Internships are offered throughout the U.S. in a variety of specialty areas and assignments are based on students’ educational needs and clinical site availability. Students are responsible for all costs associated with clinical internships.

Exceptional faculty role model clinical and research expertise across each of the specialty areas of physical therapist practice to facilitate student development as movement system experts.

**COMPREHENSIVE EXAMINATION**

The examination takes the form of a small group research project or a systematic review and an individual student portfolio. Both culminate in a written paper and an oral dissemination/defense. The written paper and presentations may take multiple formats and must be satisfactorily completed by the end of the program. Should students not pass the comprehensive examination, they will have one additional opportunity to remediate and provide evidence of achievement of the learning outcomes of the comprehensive examination prior to being able to graduate from the program.
MINIMUM DEGREE REQUIREMENTS

The UVM DPT program requires successful completion of 102 graduate credits. Students will be recommended for graduation by the D.P.T. faculty if they:

- Receive no more than 2 passing course grades below a B
- Obtain a cumulative GPA of 3.00 or higher at the end of their didactic course work
- Pass their Comprehensive Examination
- Pass all clinical internships and clinical education coursework expectations during their clinical experience and receive no more than one U grade in a clinical education course (that was successfully retaken for a S grade)
- Illustrate evidence of professional behaviors commensurate with professional doctoral practice in physical therapy

GRADUATE FACULTY

A
Abaied, Jamie L.; Associate Professor, Department of Psychological Science; PHD, University of Illinois Urbana-Champaign

Achenbach, Thomas Max; Professor, Department of Psychiatry; PHD, University of Minnesota Twin Cities

Acquisto, Joseph T.; Professor, Department of Romance Languages and Linguistics; PHD, Yale University

Adair, Elizabeth Carol; Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, Colorado State University

Ades, Philip A.; Professor, Department of Medicine-Cardiology; MD, University of Maryland College Park

Agnarsson, Ingi; Associate Professor, Department of Biology; PHD, George Washington University

Adair, Elizabeth Carol; Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, Colorado State University

Ahern, Thomas P.; Assistant Professor, Department of Surgery; PHD, Boston University

Aiken, Judith A.; Associate Professor, Department of Leadership and Developmental Sciences; EDD, Rutgers University New Brunswick/Piscataway

Alexander, Sarah C.; Associate Professor, Department of English; PHD, Rutgers University

Ali, Saleem Hassan; Adjunct Professor, Rubenstein School of Environment and Natural Resources; PHD, Massachusetts Institute of Technology

Allen III, Gilman B.; Professor, Department of Medicine-Pulmonary; MD, University of Florida

Almassalkhi, Mads; Assistant Professor, Department of Electrical and Biomedical Engineering; PHD, University of Michigan Ann Arbor

Althoff, Robert; Associate Professor, Department of Psychiatry; PHD, University of Illinois Urbana-Champaign

Amiel, Eyal; Assistant Professor, Department of Biomedical and Health Sciences; PHD, Dartmouth College

Anathy, Vikas; Assistant Professor, Department of Pathology and Laboratory Medicine; PHD, Madurai Kamaraj University

Andrews, Trevor; Adjunct Assistant Professor, Department of Radiology; PHD, University of Texas Health Science Center at San Antonio

Angelopoulos, Theodore; Professor, Department of Rehabilitation and Movement Sciences, PHD, University of Pittsburgh

Applebee, Angela; Clinical Associate Professor, Department of Neurological Sciences; MD, University of South Dakota School of Medicine, Vermillion, South Dakota

Arel, Barbara M.; Associate Professor, Grossman School of Business; PHD, Arizona State University

Aronsson, David D.; Professor Emeritus, Department of Orthopaedics and Rehabilitation; MD, University of Michigan

Ashikaga, Takamaru; Professor, Department of Mathematics and Statistics; PHD, University of California Los Angeles

Aultman-Hall, Lisa M.; Professor, Department of Civil and Environmental Engineering; PHD, McMaster University

Avila, Maria Mercedes; Associate Professor, Department of Medicine-Pediatrics; PHD, University of Vermont

B
Badireddy, Appala Raju; Assistant Professor, Department of Civil and Environmental Engineering; PHD, University of Houston

Bagrow, James; Assistant Professor, Department of Mathematics and Statistics; PHD, Clarkson University

Bai, Yang; Assistant Professor, Department of Rehabilitation and Movement Science; PHD, Iowa State University

Bailly, Jacques A.; Associate Professor, Department of Classics; PHD, Cornell University

Baker, Daniel H.; Associate Professor, Department of Community Development and Applied Economics; PHD, University of Vermont

Baker, Nancy; Adjunct Assistant Professor, Department of Communication Sciences and Disorders; PHD, University of Pittsburgh

Ballif, Bryan A.; Professor, Department of Biology; PHD, Harvard University

Ballysingh, Tracy Arambula; Assistant Professor, Department of Leadership and Developmental Sciences; PHD, University of Texas at Austin
Barbano, David Mark; Adjunct Professor, Department of Animal and Veterinary Sciences; PHD, Cornell University

Barlow, John; Associate Professor, Department of Animal and Veterinary Sciences; DVM, University of Illinois Urbana-Champaign; PHD, University of Vermont

Barnaby, Andrew Thomas; Professor, Department of English; PHD, Princeton University

Barrington, David Stanley; Professor, Department of Plant Biology; PHD, Harvard University

Barry, Jeremy; Assistant Professor, Department of Neurological Sciences; PHD, SUNY Downstate

Bartlett, Robert V.; Professor, Department of Political Science; PHD, Indiana University Bloomington

Baruth, Philip Edward; Professor, Department of English; PHD, University of California Irvine

Bates, Jason H. T.; Professor, Department of Medicine-Pulmonary; DSC, Canterbury University; PHD, University of Otago

Bauerly, Kim R.; Assistant Professor, Department of Communication Sciences and Disorders; PHD, University of Toronto

Beatson, Jean E.; Clinical Professor Emerita, Department of Nursing; EDD, University of Vermont

Beckage, Brian; Professor, Department of Plant Biology; PHD, Duke University

Beer, Caroline Charlotte; Associate Professor, Department of Political Science; PHD, University of New Mexico

Belliveau, Cynthia L.; Dean, Continuing and Distance Education; EDD, University of Vermont

Benson, Daisy S.; Library Associate Professor, Department of Howe-Information and Instruction; MLIS, University of Texas Austin

Bentil, Daniel E.; Associate Professor, Department of Mathematics and Statistics; DPHIL, University of Oxford

Berger, Christopher Lewis; Professor, Department of Molecular Physiology and Biophysics; PHD, University of Minnesota Twin Cities

Berlin, Linda; Extension Associate Professor, Department of Ext—Programming and Faculty Support; PHD, Tufts University

Bernard, Emily E.; Professor, Department of English; PHD, Yale University

Bernstein, Ira M.; Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD, University of Vermont

Bessette, Jean; Assistant Professor, Department of English; PHD, University of Pittsburgh

Beynonn, Bruce David; Professor, Department of Orthopaedics and Rehabilitation; PHD, University of Vermont

Bierman, Paul Robert; Professor, Department of Geology; PHD, University of Washington

Bishop, Penny; Professor, Department of Education; EDD, University of Vermont

Bishop-von Wettberg, Eric; Assistant Professor, Department of Plant and Soil Science; PHD, Brown University

Blauwikel, Ruth; University Veterinarian, Department of Animal and Veterinary Sciences, DVM, Michigan State University, PHD, Washington State University

Bomblies, Arne; Associate Professor, Department of Civil and Environmental Engineering; PHD, Massachusetts Institute of Technology

Bongard, Joshua C.; Professor, Department of Computer Science; PHD, University of Zurich

Bonifield, Carolyn Marie; Associate Professor, Grossman School of Business; PHD, University of Iowa

Bonney, Elizabeth Ann; Professor, Department of Obstetrics and Gynecology; MD, Stanford University

Borra, Antonello; Professor, Department of Romance Languages and Linguistics; PHD, Brown University

Bose, Pablo Shiladitya; Associate Professor, Department of Geography; PHD, York University

Bosek, Marcia Sue; Associate Professor, Department of Nursing; DNSC, Rush University

Bosworth, Sidney Carl; Extension Professor, Department of Programming and Faculty Support; PHD, University of Kentucky

Botten, Jason W.; Associate Professor, Department of Medicine-Immunobiology; PHD, University of New Mexico

Bottoms, Gregory Todd; Professor, Department of English; MFA, University of Virginia

Bouchard, Beth Ann; Assistant Professor, Department of Biochemistry; PHD, University of Vermont

Bouton, Mark Earhart; Professor, Department of Psychological Science; PHD, University of Washington

Bowden, William Breck; Professor, Rubenstein School of Environment and Natural Resources; PHD, North Carolina State University Raleigh

Boyson, Jonathan E.; Associate Professor, Department of Surgery; PHD, University of Wisconsin-Madison
Bradshaw, Terence; Research Assistant Professor, Department of Plant and Soil Science; PHD, University of Vermont

Brennan, Vicki L.; Associate Professor, Department of Religion; PHD, University of Chicago

Brewer, Matthias; Professor, Department of Chemistry; PHD, University of Wisconsin-Madison

Briggs, Charles F.; Senior Lecturer, Department of History; PHD, University of North Carolina, Chapel Hill

Brody, Alison Kay; Professor, Department of Biology; PHD, University of California Davis

Brown, Dona L.; Professor, Department of History; PHD, University of Maryland

Brown, Dona L.; Professor, Department of History; PHD, University of Massachusetts Amherst

Buck-Rolland, Carol L.; Clinical Professor, Department of Nursing; EDD, University of Vermont

Budd, Ralph Charles; Professor, Department of Medicine-Immunobiology; MD, Weill Cornell Medical College

Budolfson, Mark; Assistant Professor, Department of Philosophy; PHD, Princeton University

Bunn, Janice Yanushka; Research Associate Professor, Department of Mathematics and Statistics; PHD, Ohio State University

Burke, John P.; Professor, Department of Political Science; PHD, Princeton University

Burt, Keith B.; Associate Professor, Department of Psychological Science; PHD, University of Minnesota Twin Cities

Buskiewicz, Iwona A.; Assistant Professor, Department of Pathology and Laboratory Medicine; PHD, University of Witten

Butenas, Saulius; Associate Professor, Department of Biochemistry; PHD, Kaunas Tech University

Buzas, Jeff Sandor; Professor, Department of Mathematics and Statistics; PHD, North Carolina State University Raleigh

C

Cahan, Sara Irene; Associate Professor, Department of Biology; PHD, Arizona State University

Callas, Peter W.; Research Associate Professor, Department of Mathematics and Statistics; PHD, University of Massachusetts Amherst

Cannizzaro, Michael S.; Associate Professor, Department of Communication Sciences and Disorders; PHD, University of Connecticut

Carney, Jan Kirk; Professor, Department of Medicine-Pulmonary; MD, University of Cincinnati

Carr, Frances Eileen; Professor, Department of Pharmacology; PHD, University of Illinois Chicago

Carr, Jacqueline B.; Associate Professor, Department of History; PHD, University of California Berkeley

Carr, Jeanine M.; Associate Professor Emerita, Department of Nursing; PHD, University of South Carolina

Carthew, Jessica; Assistant Professor, Department of Education, PHD; University of Maryland

Cats-Baril, William Lawrence; Associate Professor, Grossman School of Business; PHD, University of Wisconsin-Madison

Chan, Sin-Yee; Associate Professor, Department of Philosophy; PHD, University of Michigan Ann Arbor

Chase, Lisa Cheryl; Extension Professor, Department of Ext-Programming and Faculty Support; PHD, Cornell University

Chen, Yolanda H.; Associate Professor, Department of Plant and Soil Science; PHD, University of California Berkeley

Cheney, Nicholas A.; Research Assistant Professor, Department of Computer Science; PHD, Cornell University

Chiang, Kevin C.; Professor, Grossman School of Business; PHD, Louisiana State University

Chiu, Angeline C.; Associate Professor, Department of Classics; PHD, Princeton University

CichoskiKelly, Eileen; Associate Professor, Department of Family Medicine; PHD, University at Albany

Cipolla, Marilyn Jo; Professor, Department of Neurological Sciences; PHD, University of Vermont

Clark, Anne L.; Professor, Department of Religion; PHD, Columbia University

Clark/Keefe, Kelly; Associate Professor, Department of Leadership and Developmental Sciences; EDD, University of Vermont

Classen, Aimee; Professor, Rubenstein School of Environment and Natural Resources; PHD, Northern Arizona University

Clemins, Patrick J.; Assistant Professor, Department of Computer Science; PHD, Marquette University

Cloougherty, Dennis Paul; Professor, Department of Physics; PHD, Massachusetts Institute of Technology
Coderre, Emily; Assistant Professor, Department of Communication Sciences and Disorders; PHD, University of Nottingham

Coghill-Wemple, Beverley; Professor, Department of Geography; PHD, Oregon State University

Cole, Bernard F.; Professor, Department of Mathematics and Statistics; PHD, Boston University

Colletti, Richard B.; Professor, Department of Pediatrics-Gastroenterology; MD, University of Pittsburgh

Comerford, Susan Ann; Associate Professor, Department of Social Work; PHD, Case Western Reserve University

Conner, David S.; Associate Professor, Department of Community Development and Applied Economics; PHD, Cornell University

Connolly, Declan A.; Professor, Department of Education; PHD, Oregon State University

Cope, Meghan S.; Professor, Department of Geography; PHD, University of Colorado Boulder

Cornbrooks, Carson Justis; Associate Professor Emeritus, Department of Neurological Sciences; PHD, Virginia Commonwealth University

Coutinho-Budd, Jaeda; Assistant Professor, Department of Biology; PHD, The University of North Carolina at Chapel Hill

Crock, John Gordon; Associate Professor, Department of Anthropology; PHD, University of Pittsburgh

Cushman, Mary; Professor, Department of Medicine-Hematology Oncology; MD, University of Vermont

Dale, Rosemary Louise; Clinical Professor, Department of Nursing; EDD, Ball State University

D’Amato, Anthony; Associate Professor, Rubenstien School of Environment and Natural Resources; PHD; University of Massachusetts Amherst

D’Amico, Michael A.; Associate Professor, Department of Pediatrics-Gastroenterology; MD, George Washington University

Danforth, Chris; Associate Professor, Department of Mathematics and Statistics; PHD, University of Maryland College Park

Danks, Cecilia Marie; Associate Professor, Rubenstien School of Environment and Natural Resources; PHD, University of California Berkeley

Dann, Heather; Adjunct Assistant Professor, Department of Animal and Veterinary Sciences; PHD, University of Illinois

Darais, David; Assistant Professor, Department of Computer Science; PHD, University of Maryland

Darby, Heather Marie; Extension Professor; Department of Ext-Programming and Faculty Support; PHD; Oregon State University

Del Maestro, Adrian G.; Associate Professor, Department of Physics; PHD, Harvard University

Delaney, Terrence Patrick; Associate Professor, Department of Plant Biology; PHD, University of Washington Seattle

Delaney, Thomas; Assistant Professor, Department of Pediatrics; PHD, University of Denver

Delay, Rona J.; Associate Professor Emerita, Department of Biology; PHD, Colorado State University

Deming, Paula B.; Associate Professor, Department of Biomedical and Health Sciences; PHD, University of North Carolina at Chapel Hill

Dempsey, Stephen Jeffrey; Associate Professor, Grossman School of Business; PHD, Virginia Polytechnic Institute and State University

De Roeck, Kenneth; Assistant Professor, Grossman School of Business; DBA, Université catholique de Louvain

deRosset, Louis; Professor, Department of Philosophy; PHD, University of California Los Angeles

Deslandes, Paul Raymond; Associate Professor, Department of History; PHD, University of Toronto

DeWitt, Rocki-Lee; Professor, Grossman School of Business; PHD, Columbia University

Dewoolkar, Mandar M.; Professor, Department of Civil and Environmental Engineering; PHD, University of Colorado Boulder

Dickinson, Jennifer; Associate Professor, Department of Anthropology; PHD, University of Michigan Ann Arbor

Diehl, Sean; Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, University of Vermont

Dimov, Luben D.; Senior Lecturer, Rubenstien School of Environment and Natural Resources; PHD, Louisiana State University

Dinitz, Jeffrey Howard; Professor, Department of Mathematics and Statistics; PHD, Ohio State University

Diouf, Moustapha; Associate Professor, Department of Sociology; PHD, University of Missouri Columbia

Dittus, Kim L.; Associate Professor; Department of Medicine-Hematology Oncology; PHD, Washington State University

Do, Hung Tuan; Assistant Professor; Grossman School of Business; PHD, Purdue University

Dodds, Peter Sheridan; Professor, Department of Mathematics and Statistics; PHD, Massachusetts Institute of Technology
Doiron, Amber L.; Assistant Professor; Department of Electrical and Biomedical Engineering; PHD, University of Texas Austin

Donnelly, Catherine Wright; Professor, Department of Nutrition and Food Sciences; PHD, North Carolina State University Raleigh

Donovan, Therese M.; Research Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Missouri Columbia

Dostmann, Wolfgang R. G.; Professor, Department of Pharmacology; PHD, University of Bremen; MD, University of Munich

Doublie, Sylvie; Professor, Department of Microbiology and Molecular Genetics; PHD, University of North Carolina Chapel Hill

Dougherty, Anne; Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD, Larner College of Medicine at the University of Vermont

Dubief, Yves C.; Associate Professor, Department of Mechanical Engineering; PHD, Institut National Polytechnique de Grenoble

Duffaut Espinosa, Luis; Research Assistant Professor, Department of Electrical and Biomedical Engineering; PHD, Old Dominion University

Dumas, Julie Anna; Associate Professor, Department of Psychiatry; PHD, University of North Carolina

Dupigny-Giroux, Lesley-Ann; Professor, Department of Geography; PHD, McGill University

Dupuy, Taylor; Assistant Professor, Department of Mathematics and Statistics; PHD, University of New Mexico

Eberhardt, Maeve; Assistant Professor, Department of Romance Languages and Linguistics; PHD, University of Pittsburgh

Ebert, Alicia; Associate Professor, Department of Biology; PHD, Colorado State University

Ellis-Monaghan, Joanna; Adjunct Professor, Department of Mathematics and Statistics; PHD, University of North Carolina at Chapel Hill

Emery, Marla; Adjunct Assistant Professor, Department of Geography; PHD, Rutgers University

Emery, Meaghan Elizabeth; Associate Professor, Department of Romance Languages and Linguistics; PHD, Ohio State University

Eppstein, Margaret Jean; Professor Emerita, Department of Computer Science; PHD, University of Vermont

Erdos, Benedek; Assistant Professor, Department of Pharmacology; MD, PHD, Semmelweis University, School of Medicine, Budapest, Hungary

Ergene, Bogac A.; Professor, Department of History; PHD, Ohio State University

Erickson, Jon; Professor, Rubenstein School of Environment and Natural Resources; PHD, Cornell University

Escaja, Tina Fernandez; Professor, Department of Romance Languages and Linguistics; PHD, University of Pennsylvania

Escorpizo, Reuben Samsuya; Clinical Assistant Professor, Department of Rehabilitation and Movement Science; DPT, Des Moines University

Esselstrom, Erik W.; Associate Professor, Department of History; PHD, University of California Santa Barbara

Etter, Andrea J.; Assistant Professor, Department of Nutrition and Food Sciences; PHD, Purdue University

Evans, John N.; Professor Emeritus, Larner College of Medicine at the University of Vermont; PHD, University of Florida

Evans, Mark Francis; Assistant Professor, Department of Pathology and Laboratory Medicine; PHD, University of Hertfordshire

Everse, Stephen Jay; Associate Professor, Department of Biochemistry; PHD, University of California San Diego

Ewald, Alec C.; Associate Professor, Department of Political Science; PHD, University of Massachusetts Amherst

F

Failla, Mathew; Assistant Professor, Department of Rehabilitation and Movement Science; PHD, University of Delaware

Falls, William A.; Dean, College of Arts and Sciences; Professor, Department of Psychological Science; PHD, Yale University

Farley, Joshua C.; Professor, Department of Community Development and Applied Economics; PHD, Cornell University

Faulkner, Joshua; Research Assistant Prof; Department of Ext - Programming and Faculty Support; PHD, Cornell University

Fenton, Elizabeth A.; Associate Professor, Department of English; PHD, Rice University

Field, Sean Linscott; Professor, Department of History; PHD, Northwestern University

Finette, Barry Alan; Professor, Department of Pediatrics; MD, Southwest Medical School Dallas; PHD University of Texas Austin

Fiorentino, Niccolo M.; Assistant Professor, Department of Mechanical Engineering; PHD, University of Virginia

Fisher, Brendan; Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Vermont

Fletcher, Douglas G.; Professor, Department of Mechanical Engineering; PHD, University of Virginia
Flynn, Sean; Assistant Professor, Department of Neurological Sciences; PHD, University of Utah

Fobare Erickson, Patricia Ann; Senior Lecturer, Department of Animal and Veterinary Sciences; DVM, Cornell University

Fogel, Daniel Mark; Professor, Department of English; PHD, Cornell University

Fondacaro, Karen Marie; Clinical Professor, Department of Psychological Science; PHD, University of Vermont

Foote, Richard Martin; Professor, Department of Mathematics & Statistics; PHD, University of Cambridge

Forehand, Cynthia Jean; Dean, Graduate College; Professor, Department of Neurological Sciences; PHD, University of North Carolina Chapel Hill

Forehand, Rex L.; Professor, Department of Psychological Science; PHD, University of Alabama

Fothergill, Alice; Professor, Department of Sociology; PHD, University of Colorado Boulder

Fox, Kathy; Professor, Department of Sociology; PHD, University of California, Berkeley

Francklyn, Christopher Steward; Professor, Department of Biochemistry; PHD, University of California Santa Barbara

Franklin, John C.; Professor, Department of Classics; PHD, University College London

Freeman, Kalev; Assistant Professor, Department of Surgery; MD, PHD, University of Colorado Boulder

Frietze, Seth; Assistant Professor, Department of Biomedical and Health Sciences; PHD, Harvard University

Frolik, Jeff L.; Professor, Department of Electrical and Biomedical Engineering; PHD, University of Michigan Ann Arbor

Fung, Mark K.; Professor, Department of Pathology and Laboratory Medicine; MD, PHD, University of Alabama School of Medicine

Furis, Madalina Ioana; Associate Professor, Department of Physics; PHD, University of Buffalo

Garavan, Hugh P.; Professor, Department of Psychiatry; PHD, Bowling Green State University

Garcia, Luis; Professor, Department of Civil and Environmental Engineering; PHD, University of Colorado

Garimella, Suresh; President, University of Vermont, Professor, Department of Mechanical Engineering; PHD, University of California at Berkeley

Garnett, Bernice Raveche; Associate Professor, Department of Education; SCD, Harvard University

Garvey, Jason C.; Assistant Professor, Department of Leadership and Developmental Sciences; PHD, University of Maryland, College Park

Garwood, Justin D.; Assistant Professor, Department of Education; PHD, University of North Carolina at Chapel Hill

Gedeon, Shirley Jean; Associate Professor, Department of Economics; PHD, University of Massachusetts Amherst

Gell, Nancy M.; Assistant Professor, Department of Rehabilitation and Movement Science; PHD, Auburn University

Gennari, John; Professor, Department of English; PHD, University of Pennsylvania

Geroski, Anne M.; Associate Professor, Department of Leadership and Developmental Sciences; EDD, University of Maine

Ghazanfari, Ehsan; Assistant Professor, Department of Civil and Environmental Engineering; PHD, Lehigh University

Giangreco, Michael Francis; Professor, Department of Education; PHD, Syracuse University

Gibson, William Arch; Professor, Department of Economics; PHD, University of California Berkeley

Gieder, Katherina; Adjunct Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, Virginia Tech

Gierzynski, Anthony Gerard; Professor, Department of Political Science; PHD, University of Kentucky

Gilmartin, Gregory Michael; Associate Professor, Department of Microbiology and Molecular Genetics; PHD, University of Virginia

Ginger, Clare A.; Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Michigan Ann Arbor

Glass, Karen C.; Adjunct Assistant Professor, Department of Biochemistry; PHD, University of Vermont

Glavas, Ante; Associate Professor, Grossman School of Business; PHD, Case Western Reserve University

Goldberg, Joel M.; Associate Professor, Department of Chemistry; PHD, University of Michigan Ann Arbor
Golden, Kenneth Ivan; Professor Emeritus, Department of Mathematics and Statistics; PHD, University De Paris

Goodnight, Charles James; Professor, Department of Biology; PHD, University of Chicago

Gordon, Jonathan; Assistant Professor, Department of Biochemistry; PHD; University of Western Ontario

Gorres, Josef H.; Associate Professor, Department of Plant and Soil Science; PHD, University of Manchester

Gotelli, Nicholas James; Professor, Department of Biology; PHD, Florida State University

Gould, Rachelle; Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, Stanford University

Gouli, Vladimir V.; Research Associate Professor Emeritus, Department of Plant and Soil Science; PHD, Institutes of Biology and Cytology

Gove, Steve; Associate Professor, Grossman School of Business, PHD, Arizona State University

Gramling, Robert; Associate Professor, Department of Family Medicine; MD, Dartmouth Medical School; DSC, Boston University

Grant, Richard; Adjunct Professor, Department of Animal and Veterinary Sciences; PHD, Purdue University

Green, John Thomas; Professor, Department of Psychological Science; PHD, Temple University

Greenwood, Sabrina Louise; Associate Professor, Department of Animal and Veterinary Sciences; PHD, University of Guelph

Griffin, Robert; Professor Emeritus, Department of Leadership and Developmental Sciences; PHD, University of Minnesota Twin Cities

Grimmer, Ian; Senior Lecturer, Department of History; PHD; University of Chicago

Grudin, Anthony E.; Associate Professor, Department of Art and Art History; PHD, University of California Berkeley

Guber, Deborah Lynn; Associate Professor, Department of Political Science; PHD, Yale University

Guo, Ming Ruo; Professor, Department of Nutrition and Food Sciences; PHD, University College Cork

Gustafson, Melanie Susan; Associate Professor, Department of History; PHD, New York University

Guth, Sarah; Assistant Professor, Department of Psychiatry; MD, University of Vermont

Halladay, Juliet L.; Associate Professor, Department of Education; PHD, Michigan State University

Hamel-Bissell, Brenda Pauline; Professor, Department of Nursing; EDD, Boston University

Hammack, Sayamwong E.; Professor, Department of Psychological Science; PHD, University of Colorado

Harder, Valerie Susan; Assistant Professor, Department of Pediatrics; PHD, Johns Hopkins University

Harp, Randall; Associate Professor, Department of Philosophy; PHD, Stanford University

Harrington, Susanmarie; Professor, Department of English; PHD, University of Michigan Ann Arbor

Harris, Jeanne M.; Associate Professor, Department of Plant Biology; PHD, University of California San Francisco

Hart, Stuart; Professor, Grossman School of Business; PHD, University of Michigan

Harvey, Jean Ruth; Professor, Department of Nutrition and Food Sciences; PHD, University of Pittsburgh

Hazelrigg, Ann; Extension Assistant Professor, Extension; PHD; University of Vermont; MS, Cornell University

Heading-Grant, Wanda; Clinical Associate Professor, Department of Social Work; EDD, University of Vermont

Headrick, Randall L.; Professor, Department of Physics; PHD, University of Pennsylvania

Heath, Jessica; Assistant Professor, Department of Pediatrics; Department of Biochemistry; MD, SUNY Stony Brook

Hébert-Dufresne, Laurent; Assistant Professor, Department of Computer Science; PHD, Université Laval, Québec, Canada

Heil, Sarah H.; Professor, Department of Psychiatry; PHD, Dartmouth College

Heintz, Nicholas; Professor Emeritus, Department of Pathology and Laboratory Medicine; PHD, University of Vermont

Heiss, Sarah Noel; Associate Professor, Department of Community Development and Applied Economics; PHD, Ohio University

Helms, Ken; Research Assistant Professor, Department of Biology; PHD, Arizona State University

Henry, Sharon Margaret; Professor Emerita, Department of Neurological Sciences; PHD, University of Vermont

Heppner, Thomas Jon; Assistant Professor, Department of Pharmacology; PHD, Iowa State University

Hernandez, Eric M.; Assistant Professor, Department of Civil and Environmental Engineering; PHD, Northeastern University

Haines, Shana Jackson; Assistant Professor, Department of Education; PHD, University of Kansas
Higgins, Stephen Thomas; Professor, Department of Psychiatry; PHD, University of Kansas

Hill, Jason M.; Adjunct Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, Pennsylvania State University

Hill-Eubanks, David Cameron; Research Assistant Professor, Department of Pharmacology; PHD, University of Vermont

Hindes, J. Churchill; Clinical Associate Professor, Department of Medicine; PHD, University of Iowa

Hines, Paul D.; Associate Professor, Department of Electrical and Biomedical Engineering; PHD, Carnegie Mellon University

Hitt, Darren Lee; Professor, Department of Mechanical Engineering; PHD, Johns Hopkins University

Holmen, Britt A.; Professor, Department of Civil and Environmental Engineering; PHD, Massachusetts Institute of Technology

Holmes, Chris Elaine; Associate Professor, Department of Medicine-Hematology Oncology; MD, University of Virginia

Holmes, Gregory; Professor, Department of Neurological Sciences; MD, University of Virginia

Hondal, Robert J.; Associate Professor, Department of Biochemistry; PHD, Ohio State University

Hood, Virginia Louise; Professor, Department of Medicine-Nephrology; MPH, Harvard School of Public Health

Howe, Alan K.; Associate Professor, Department of Pharmacology; PHD, Northwestern University

Hoza, Betsy; Professor, Department of Psychological Science; PHD, University of Maine

Hudziak, James Joseph; Professor, Department of Psychiatry; MD, University of Minnesota Twin Cities

Huener, Jonathan D.; Associate Professor, Department of History; PHD, University of Illinois Urbana-Champaign

Hughes, Jeffrey Winston; Associate Professor, Department of Plant Biology; PHD, Cornell University

Hughes, John M.; Professor, Department of Geology; PHD, Dartmouth College

Hughes, John Russell; Professor, Department of Psychiatry; MD, University of Massachusetts Amherst

Hughes, Susan; Associate Professor, Grossman School of Business; PHD, University of Cincinnati

Huh, Jinny; Associate Professor, Department of English; PHD, University of Southern California

Hunter, Deborah E.; Associate Professor, Department of Leadership and Developmental Sciences; PHD, Indiana University Bloomington

Hurley, Jennifer Jo; Associate Professor, Department of Education; PHD, Vanderbilt University

Hurley, Sean M.; Assistant Professor, Department of Leadership and Developmental Sciences; PHD, Vanderbilt University

Hurley, Stephanie E.; Associate Professor, Department of Plant and Soil Science; DDES, Harvard University

Huston, Christopher D.; Professor, Department of Medicine-Infectious Disease; MD, Cornell University

Huston, Dryver R.; Professor, Department of Mechanical Engineering; PHD, Princeton University

Hutchins, Tiffany L.; Associate Professor, Department of Communication Sciences and Disorders; PHD, University of South Florida

Irvin, Charles G.; Professor, Department of Medicine-Pulmonary; PHD, University of Wisconsin-Madison

Ivakhiv, Adrian J.; Professor, Rubenstein School of Environment and Natural Resources; PHD, York University

Jackson, Major L.; Professor, Department of English; MFA, University of Oregon

Jaffe, Dale J.; Professor, Department of Sociology; PHD, University of Chicago

Janssen-Heininger, Yvonne M.W.; Professor, Department of Pathology and Laboratory Medicine; PHD, Maastricht University, the Netherlands

Jaworski, Diane Marie; Professor, Department of Neurological Sciences; PHD, Texas Woman’s University

Jefferys, William; Adjunct Professor, Department of Mathematics and Statistics; PHD, Yale University

Jenemann, Tiffany; Associate Professor, Department of Leadership and Developmental Sciences; EDD, University of Vermont

Jenness, Robert; Professor Emeritus, Department of Engineering; PHD, University of Leeds

Jetton, Thomas Lawrence; Professor, Department of Medicine-Endocrinology; PHD, Vanderbilt University

Jewiss, Jennifer Lynn; Research Assistant Professor, Department of Leadership and Developmental Sciences; EDD, University of Vermont

Jiron, Haley Woodside; Associate Professor, Department of Education; PHD, SUNY Albany

Johnson, Paul D.; Professor, Department of Microbiology and Molecular Genetics; PHD, Purdue University
Johnson, Rachel K.; Professor Emerita, Department of Nutrition and Food Sciences; PHD, Pennsylvania State University

Jones, David A.; Professor, Grossman School of Business; PHD, University of Calgary

Jorgenson, Simon; Assistant Professor, Department of Education; PHD, University of Cincinnati

Kaelber, Lutz F.; Associate Professor, Department of Sociology; PHD, Indiana University Bloomington

Kaminsky, David Alan.; Professor, Department of Medicine-Pulmonary; MD, University of Massachusetts Amherst

Kanagala, Vijay; Assistant Professor, Department of Leadership and Developmental Sciences; PHD, Iowa State University

Kasser, Susan L.; Associate Professor, Department of Rehabilitation and Movement Science; PHD, Oregon State University

Keeton, William Scott; Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Washington

Keller, Stephen Robert; Assistant Professor, Department of Plant Biology; PHD, University of Virginia

Kelm, Robert; Associate Professor, Department of Medicine-Cardiovascular; PHD, University of Vermont

Kennedy, Amanda G.; Associate Professor, Department of Medicine-General Internal Medicine; PHARMD, Northeastern University

Kervick, Colby T.; Assistant Professor, Department of Education; EDD, University of Vermont

Kete, Mary Louise; Associate Professor, Department of English; PHD, Harvard University

Kien, Craig L.; Professor, Department of Pediatrics-Gastroenterology; MD, University of Cincinnati

Killeen, Kieran M.; Associate Professor, Department of Leadership and Developmental Sciences; PHD, Cornell University

Kilpatrick, Charles William; Professor Emeritus, Department of Biology; PHD, University of North Texas

Kindstedt, Paul Stephen; Professor, Department of Nutrition and Food Sciences; PHD, Cornell University

King, John Gridley; Professor, Department of Family Medicine; MD, University of Rochester School of Medicine & Dentistry

Kingsley, Allison F.; Assistant Professor, Grossman School of Business; PHD, Columbia University

Kinsey, C. Matthew; Assistant Professor, Department of Medicine-Pulmonary, MD, Albert Einstein College of Medicine, Bronx, NY; MPH Harvard School of Public Health

Kirkpatrick, Beth Diane; Professor, Department of Microbiology and Molecular Genetics; MD, Albany Medical College

Klepeis, Keith Andrew; Professor, Department of Geology; PHD, University of Texas Austin

Kolan, Matthew Peter; Senior Lecturer, Rubenstein School of Environment and Natural Resources; PHD, University of Vermont

Kolbe, Tammy G.; Assistant Professor, Department of Leadership and Developmental Sciences; EDD, University of Vermont

Koliba, Christopher J.; Professor, Department of Community Development and Applied Economics; PHD, Syracuse University

Kolodinsky, Jane Marie; Professor, Department of Community Development and Applied Economics; PHD, Cornell University

Kornbluh, Felicia A.; Associate Professor, Department of History; PHD, Princeton University

Kotov, Valeri N.; Associate Professor, Department of Physics; PHD, Clarkson University

Kraft, Jana; Associate Professor, Department of Animal and Veterinary Sciences; PHD, Friedrich-Schiller-University of Jena

Krag, David Nielsen; Professor, Department of Surgery-Oncology; MD, Loyola University Chicago

Krag, Martin Hans; Professor, Department of Orthopaedics and Rehabilitation; MD, Yale University

Krementsov, Dimitry N.; Assistant Professor, Department of Biomedical and Health Sciences, PHD, University of Vermont

Krymkowski, Daniel Harry; Professor, Department of Sociology; PHD, University of Wisconsin-Madison

Kuentzel, Walter Frederick; Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Wisconsin-Madison

Kurti, Allison; Assistant Professor, Department of Psychiatry; PHD, University of Florida

L

Lafko Breslend, Nicole; Research Assistant Professor, Department of Psychological Science; PHD, University of Vermont

Laher, Ismail; Adjunct Professor, Department of Pharmacology; PHD, Memorial University

Lakoba, Taras Igorevich; Associate Professor, Department of Mathematics and Statistics; PHD, Clarkson University

Lam, Ying Wai; Research Assistant Professor, Department of Biology; PHD, Chinese University of Hong Kong
Landry, Christopher C.; Professor, Department of Chemistry; PHD, Harvard University

Laurent, Jennifer S.; Associate Professor, Department of Nursing; PHD, Duquesne University

Lawson, Steven R.; Adjunct Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Vermont

Leahy, John L.; Professor, Department of Medicine-Endocrinology; MD, Virginia Commonwealth University

Leavitt, Bruce J.; Professor, Department of Surgery-Thoracic Cardiovascular; MD, University of Vermont

Lee, Andrea J.; Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, University of Wisconsin-Madison

Lee, Benjamin; Assistant Professor, Department of Pediatrics; MD, Case Western Reserve University

Lee, Byung S.; Professor, Department of Computer Science; PHD, Stanford University

Lewinter, Martin M.; Professor, Department of Medicine-Cardiology; MD, New York University

Lewis, Laura Foran; Assistant Professor, Department of Nursing; PHD, University of Connecticut

Li, Dawei; Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, Shanghai Jiao Tong University

Li, Jianing; Assistant Professor, Department of Chemistry; PHD, Columbia University

Lian, Jane; Professor, Department of Biochemistry; PHD, Boston University

Lidofsky, Steven D.; Professor, Department of Medicine-Gastroenterology; PHD; Columbia Business School

Lin, Julie; Associate Professor, Department of Medicine-Dermatology; MD, McGill University

Lindstrom, Eric Reid; Associate Professor, Department of English; PHD, Yale University

Ling, Alan Chi; Associate Professor, Department of Computer Science; PHD, University of Waterloo

Lini, Andrea; Associate Professor, Department of Geology; PHD, ETH-Zurich

Lintilhac, Philip; Research Associate Professor, Department of Plant Biology; PHD, University of California Berkeley

Liptak, Matthew D.; Associate Professor, Department of Chemistry; PHD, University of Wisconsin

Littenberg, Benjamin; Professor, Department of Medicine-General Internal Medicine; MD, Case Western Reserve University

Lloyd, John D.; Adjunct Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Montana

Lockwood, Brent; Assistant Professor, Department of Biology; PHD, Stanford University

Long-Middleton, Ellen; Associate Professor, Department of Nursing, PHD, Boston College

Losambe, Lokangaka; Professor, Department of English; PHD, University of Ibadan

Louisos, William; Senior Lecturer, Department of Mechanical Engineering, PHD; University of Vermont

Lounsbury, Karen M.; Professor, Department of Pharmacology; PHD, University of Pennsylvania

Lowensohn, Suzanne; Assistant Professor, Grossman School of Business; PHD, University of Miami

Lowey, Susan; Professor Emerita, Department of Molecular Physiology and Biophysics, PHD, Yale University

Lu, Huijie; Adjunct Assistant Professor, Department of Civil and Environmental Engineering; PHD, Columbia University

Lucas, Marilyn T.; Associate Professor, Grossman School of Business; PHD, University of Illinois Urbana-Champaign

Lyman, Ted; Professor Emeritus, Department of Art and Art History; MFA, University of California Berkeley

M

MacAfee, Lauren K.; Assistant Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; MD, University of Minnesota Medical School

Macias, Thomas E.; Professor, Department of Sociology; PHD, University of Wisconsin-Madison

Mackey, Michael Scott; Assistant Professor, Department of Psychiatry, PHD; McGill University, Montreal, Quebec

MacLean, Charles Duncan; Professor, Department of Medicine-General Internal Medicine; MD, McGill University

Madalengoitia, Jose S.; Associate Professor, Department of Chemistry; PHD, University of Virginia

Magistrale, Anthony Samuel; Professor, Department of English; PHD, University of Pittsburgh

Mahoney, Dennis Francis; Professor Emeritus, Department of German and Russian; PHD, University of Massachusetts, Amherst

Mahoney, John Matthew; Assistant Professor, Department of Neurological Sciences; PHD, Dartmouth College

Maltby, Hendrika J.; Professor, Department of Nursing; PHD, Curtin University of Technology
Manning, Kathleen; Professor Emerita, Department of Leadership and Developmental Sciences; PHD, Indiana University Bloomington

Mardeusz, Patricia Ellen; Library Associate Professor, Howe-Information and Instruction; MS, Simmons College

Mares, Teresa Marie; Associate Professor, Department of Anthropology; PHD, University of Washington

Marsden, J. Ellen; Professor, Rubenstein School of Environment and Natural Resources; PHD, Cornell University

Marshall, Jeffrey D.; Director of Research Collections, Silver Special Collections Library; MA, University of Vermont

Marshall, Jeffrey Scott; Professor, Department of Mechanical Engineering; PHD, University of California Berkeley

Martinsen, Ellen; Adjunct Assistant Professor, Department of Biology; PHD, University of Vermont

Massell, David Perera; Professor, Department of History; PHD, Duke University

Matrajt, Mariana Laura; Research Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, University of Buenos Aires

Mathews, Nancy; Professor and Dean, Rubenstein School of Environment and Natural Resources, PHD, State University of New York College of Environmental Science & Forestry

Matthews, Dwight E.; Professor, Department of History; PHD, Indiana University Bloomington

Mawe, Gary Michael; Professor, Department of Neurological Sciences; PHD, Ohio State University

Mazzoni, Mariacristina; Professor, Department of Romance Languages and Linguistics; PHD, Yale University

McCormack, John; Professor Emeritus, Department of Surgery; PHD, Yale University

McCullough, Robert L.; Professor, Department of History; PHD, Cornell University; JD, Hamline University

McGinnis, Ryan; Assistant Professor, Department of Electrical and Biomedical Engineering; DPHIL, University of Michigan

McGowan, Abigail S.; Associate Professor, Department of History; PHD, University of Pennsylvania

McGowan, Todd; Professor, Department of English; PHD, Ohio State University

McKay, Stephanie Dawn; Associate Professor, Department of Animal and Veterinary Sciences; PHD, University of Alberta

McKenna, Kevin James; Professor, Department of German and Russian; PHD, University of Colorado Boulder

McMahon, Edward; Adjunct Associate Professor, Department of Community Development and Applied Economics; EDD, University of Vermont

McLean, Kelley Carmelita; Assistant Professor, Department of Obstetrics and Gynecology-Maternal Fetal; MD, University of Colorado Health Sciences Center

McRae, Glenn; Adjunct Lecturer, Department of Community Development and Applied Economics; PHD, Union Institute and University

Mehrtens, Charlotte Jean; Professor, Department of Geology; PHD, University of Chicago

Mendez, Victor E.; Professor, Department of Plant and Soil Science; PHD, University of California Santa Cruz

Menon, Prema R; Assistant Professor, Department of Medicine-Pulmonary, MBBS; Sri Devaraj Urs Medical College, Tamaka, Kolar-India

Merrill, Scott; Research Assistant Professor, Department of Plant and Soil Science, PHD, Colorado State University

Meyer, Lori; Assistant Professor, Department of Education; PHD, University of Illinois

Meyer, Marjorie C.; Associate Professor, Department of Obstetrics and Gynecology-Maternal Fetal; MD, University of Florida

Meyer, Markus F.; Assistant Professor, Department of Medicine-Cardiology; MD, University of Freiburg

Meyers, Jason; Research Assistant Professor, Department of Mechanical Engineering; PHD, Univ. Libre de Bruxelles/ von Kármán Institute

Mickey, Ruth M.; Professor Emerita, Department of Mathematics and Statistics; PHD, University of California Los Angeles

Mieder, Wolfgang; Professor, Department of German and Russian; PHD, Michigan State University

Mierse, William Edwin; Professor, Department of Art and Art History; PHD, Brown University

Miller, Carol T.; Professor Emerita, Department of Psychological Science; PHD, Purdue University

Miller, Eleanor M.; Professor, Department of Sociology; PHD, University of Chicago

Miller, Mark; Research Associate Professor, Department of Molecular Physiology and Biophysics; PHD, University of Vermont

Mintz, Keith Peter; Associate Professor, Department of Microbiology and Molecular Genetics; PHD, University of Vermont

Mitchell, Brian; Adjunct Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, University of California Berkeley
Mitchell, John Joseph; Senior Lecturer, Department of Biology; PHD, University of Connecticut

Mohapatra, Sambit; Assistant Professor, Department of Rehabilitation and Movement Science; PHD, University of Illinois, Chicago

Molofsky, Jane; Professor, Department of Plant Biology; PHD, Duke University

Monsen, Erik; Associate Professor, Grossman School of Business, PHD, University of Colorado at Boulder

Morales, Ana Melinda; Assistant Professor, Rubenstein School of Environment and Natural Resources; DPHIL, Iowa State University

Morgan, Emily; Assistant Professor, Department of Nutrition and Food Sciences; PHD, London School of Hygiene and Tropical Medicine

Morgan Parmett, Helen; Associate Professor, Department of Theatre; PHD, University of Minnesota, Twin Cities

Morielli, Anthony D.; Associate Professor, Department of Pharmacology; PHD, University of California Santa Cruz

Morrical, Scott Walker; Professor, Department of Biochemistry; PHD, University of Wisconsin-Madison

Morse, Cheryl E.; Associate Professor, Department of Geography; PHD, University of British Columbia

Mount, Sharon Lee; Professor, Department of Pathology and Laboratory Medicine - Anatomic; MD, University of Texas Austin

Murdoch, James D.; Assistant Professor, Rubenstein School of Environment and Natural Resources; DPHIL, University of Oxford

Murray-Close, Dianna Katharine; Professor, Department of Psychological Science; PHD, University of Minnesota Twin Cities

Mutha, Akshay; Assistant Professor, Grossman School of Business; PHD, Pennsylvania State University

N

Nash, Robert James; Professor, Department of Leadership and Developmental Sciences; EDD, Boston University

Neal, Patrick Allen; Professor, Department of Political Science; PHD, University of Toronto

Near, Joseph P.; Assistant Professor, Department of Computer Science; PHD, Massachusetts Institute of Technology

Neher, Deborah; Professor, Department of Plant and Soil Science; PHD, University of California Davis

Neiweem, David; Professor, Department of Music and Dance; DMA, University of Wisconsin-Madison

Nelson, Ingrid L.; Assistant Professor, Department of Geography, PHD; University of Oregon

Nelson, Mark; Professor, Department of Pharmacology; PHD, Washington University in St Louis

Neroni, Hilary L.; Professor, Department of English; PHD, University of Southern California

Neumann, Maureen Doyle; Professor, Department of Education; PHD, University of Washington

Nicholas, Catherine F.; Assistant Professor, Department of Obstetrics and Gynecology-General; EDD, University of Vermont

Nickolas, Janice A.; Research Associate Professor, Department of Pediatrics; PHD, Princeton University

Niles, Meredith; Assistant Professor, Department of Nutrition and Food Sciences; PHD, University of California-Davis

Nilsen, Sarah Dawn; Associate Professor, Department of English; PHD, University of Southern California

Noel, Deborah; Senior Lecturer, Department of English; PHD, University of Georgia

Noordewier, Thomas Gerald; Professor, Grossman School of Business; PHD, University of Wisconsin-Madison

Novak, David C.; Associate Professor, Grossman School of Business; PHD, Virginia Polytechnic Institute and State University

O

Ogbunugafor, Brandon; Assistant Professor, Department of Biology; PHD, Yale University

Okech, Jane E.; Professor, Department of Leadership and Developmental Sciences; PHD, Idaho State University

Olsinski, Rachael Ann; Associate Professor, Department of Mechanical Engineering; PHD, Colorado State University

Osol, George Jury; Professor, Department of Obstetrics, Gynecology and Reproductive Sciences; PHD, University of Vermont

Ossareh, Hamid-Reza; Assistant Professor, Department of Electrical and Biomedical Engineering, PHD; University of Michigan Ann Arbor

Osten, Sarah Elizabeth; Assistant Professor, Department of History; PHD, University of Chicago

Oughstun, Kurt Edmund; Professor, Department of Electrical and Biomedical Engineering; PHD, University of Rochester

Oyarzabal, Omar A.; Extension Associate Professor, Department of Ext—Programming and Faculty Support; PHD, Auburn University

P

Page, Richard L.; Dean, Larner College of Medicine; MD, Duke University
Palmer, Bradley M.; Assistant Professor, Department of Molecular Physiology and Biophysics; PHD, Pennsylvania State University

Palumbo, Mary Val; Professor, Department of Nursing; DNP, Rush Medical College

Panikkar, Bindu; Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, Tufts University

Paris, Catherine Ann; Senior Lecturer, Department of Plant Biology; PHD, University of Vermont

Parker, Bruce Lawrence; Professor, Department of Plant and Soil Science; PHD, Cornell University

Parker, Jason; Research Assistant Professor, Department of Plant and Soil Science; PHD, The Ohio State University

Parrish, Donna; Research Professor, Rubenstein School of Environment and Natural Resources; PHD, Ohio State University

Parsons, Rodney; Professor Emeritus, Department of Neurological Sciences; PHD, Stanford University

Pederson, David Scott; Professor, Department of Microbiology and Molecular Genetics; PHD, University of Rochester

Perdrial, Julia Nathalie; Assistant Professor, Department of Geology; PHD, Université Louis Pasteur, Strasbourg, France

Perdrial, Nicholas; Research Assistant Professor, Department of Geology; PHD, Université Louis Pasteur, Strasbourg, France

Perkins, Timothy David; Research Professor, Department of Plant Biology; PHD, University of Vermont

Pespeni, Melissa H.; Assistant Professor, Department of Biology; PHD, Stanford University

Peters, Denise; Assistant Professor, Department of Rehabilitation and Movement Science; PHD, DPT, University of South Carolina

Petrucci, Giuseppe A.; Professor, Department of Chemistry; PHD, University of Florida

Peyser, Janis; Clinical Associate Professor, Department of Psychiatry; PHD, University of Vermont

Phelps, Nicole M.; Associate Professor, Department of History; PHD, University of Minnesota Twin Cities

Pinckney, Richard G.; Associate Professor, Department of Medicine-General Internal Medicine; MD, SUNY Buffalo

Pinder, George Francis; Professor, Department of Civil and Environmental Engineering; PHD, University of Illinois Urbana-Champaign

Pinel, Elizabeth C.; Professor, Department of Psychological Science; PHD, University of Texas at Austin

Pintauro, Stephen Joseph; Associate Professor, Department of Nutrition and Food Sciences; PHD, University of Rhode Island

Poleman, Walter Mallery; Senior Lecturer, Rubenstein School of Environment and Natural Resources; MS, University of Vermont

Pontius, Jennifer A.; Research Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, University of New Hampshire

Pope, Lizzy; Assistant Professor, Department of Nutrition and Food Sciences; PHD, University of Vermont

Potter, Alexandra S.; Associate Professor, Department of Psychiatry; PHD, University of Vermont

Poynter, Matthew; Professor, Department of Medicine-Pulmonary; PHD, University of Utah

Prelock, Patricia; Dean, College of Nursing and Health Sciences; Professor, Department of Communication Sciences; Professor, Department of Medicine-Pediatrics; PHD, University of Pittsburgh

Preston, Jill C.; Assistant Professor, Department of Plant Biology; PHD, University of Missouri

Previs, Michael; Assistant Professor, Department of Molecular Physiology and Biophysics; PHD, University of Vermont

Prevost, Andrew; Associate Professor, Grossman School of Business; PHD, Wayne State University

Price, Matthew; Associate Professor, Department of Psychological Science; PHD, Georgia State University

Quénet, Delphine; Assistant Professor, Department of Biochemistry, PHD, University of Strasbourg, France

Rabinowitz, Terry; Professor, Department of Psychiatry; MD, Case Western Reserve University; DDS, SUNY Stony Brook

Radermacher, Michael; Professor, Department of Molecular Physiology and Biophysics; PHD, Technical University of Munich

Rankin, Joanna Marie; Professor, Department of Physics; PHD, University of Iowa

Rawson, Richard; Research Professor, Department of Psychiatry; PHD, University of Vermont

Rayback, Shelly A.; Associate Professor, Department of Geography; PHD, University of British Columbia

Reed, Brian; Associate Professor, Department of Rehabilitation and Movement Science; PHD, Temple University

Relli, Alessandra; Associate Professor, Department of Psychological Science; PHD, University of Texas Austin

Renfrew, Rosalind Brent; Adjunct Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Wisconsin - Madison
Rettew, David C.; Associate Professor, Department of Psychiatry; MD, University of Vermont

Reyes, Cynthia C.; Associate Professor, Department of Education; PHD, University of Illinois at Chicago

Richardson-Nassif, Karen; Professor Emerita, Department of Family Medicine; PHD, University of Connecticut

Ricketts, Taylor H.; Professor, Rubenstein School of Environment and Natural Resources; PHD, Stanford University

Riley, Patricia; Professor, Department of Music and Dance, DMA, Shenandoah Conservatory

Rincon, Mercedes Rincon; Professor, Department of Medicine-Immunobiology; PHD, Autonomous University of Madrid

Rizzo, Donna Marie; Professor, Department of Civil and Environmental Engineering; PHD, University of Vermont

Roberts, Julie L.; Professor, Department of Romance Languages and Linguistics; PHD, University of Pennsylvania

Roche, Susan E.; Associate Professor Emerita, Department of Social Work; PHD, Rutgers University New Brunswick/Piscataway

Rodríguez, Guillermo A.; Associate Professor, Department of Romance Languages and Linguistics; PHD, University of Pittsburgh

Rohan, Kelly Joanna; Professor, Department of Psychological Science; PHD, University of Maine

Rohy, Valerie; Professor, Department of English; PHD, Tufts University

Roman, Joe; Research Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, Harvard University

Rombach, Puck; Assistant Professor, Department of Mathematics and Statistics; PHD, University of Oxford, Somerville College

Rose, Gail Lynne; Assistant Professor, Department of Psychiatry; PHD, University of Iowa

Rosowsky, David; Professor, Department of Civil and Environmental Engineering; PHD, Johns Hopkins University

Ross, Donald Savage; Research Professor, Department of Plant and Soil Science; PHD, University of Vermont

Roy, Eric; Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, Louisiana State University

Rubin, Alan Saul; Associate Professor, Department of Medicine-General Internal Medicine; MD, New York University

Ruggiero, Michael T.; Assistant Professor, Department of Chemistry; PHD, Syracuse University

Ruiz, Teresa; Professor, Department of Molecular Physiology and Biophysics; PHD, Brandeis University

S

Salembr, George B.; Associate Professor Emeritus; Department of Education; EDD, University of Vermont

Sanders, Nathan J.; Professor, Rubenstein School of Environment and Natural Resources; PHD, Stanford University

Sands, Jonathan Winslow; Professor, Department of Mathematics and Statistics; PHD, University of California San Diego

Sansoz, Frederic P.; Professor, Department of Mechanical Engineering; PHD, Ecole Des Mines de Paris

Sargent, Elizabeth; Clinical Assistant Professor, Department of Rehabilitation and Movement Science; SCD, Texas Tech University

Saule, Mara Rita; Associate Professor; MLS, University of California Berkeley

Schaberg, Paul; Adjunct Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Vermont

Schadler, Linda S.; Dean, College of Engineering and Mathematical Sciences; Professor, Department of Mechanical Engineering; PHD, University of Pennsylvania

Schall, Joseph J.; Professor Emeritus, Department of Biology; PHD, University of Texas at Austin

Schmerhorn, Alice C.; Associate Professor, Department of Psychological Science; PHD, University of Notre Dame

Schneebeli, Severin; Assistant Professor, Department of Chemistry; PHD, Columbia University

Schneider, David J.; Professor, Department of Medicine-Cardiology; MD, University of Cincinnati

Schnell, Lisa Jane; Associate Professor, Department of English; PHD, Princeton University

Schnitzlein, Charles; Professor, Grossman School of Business; PHD, Washington University

Schrafstetter, Susanna B.; Professor, Department of History; PHD, University of Munich

Schreckenberger, Helga; Professor, Department of German and Russian; PHD, University of Kansas

Schroth, Andrew W.; Research Associate Professor, Department of Geology; PHD, Dartmouth College

Scott, Helen C.; Associate Professor, Department of English; PHD, Brown University

Scott, Rodney; Professor, Department of Neurological Sciences; PHD, University of London

Seguino, Stephanie; Professor, Department of Economics; PHD, American University
Seward, David; Assistant Professor, Department of Pathology and Laboratory Medicine; MD, PHD, University of Colorado Anschutz Medical Campus

Shapiro, Robert Evan; Professor, Department of Neurological Sciences; MD, Columbia University; PHD; University of Pennsylvania

Sharma, Pramodita; Professor, Grossman School of Business; PHD, University of Calgary

Sharma, Sanjay; Dean and Professor, Grossman School of Business; PHD, University of Calgary

Shea, Jeanne Laraine; Associate Professor, Department of Anthropology; PHD, Harvard University

Shelton, Lawrence G.; Associate Professor, Department of Leadership and Developmental Sciences; PHD, University of Minnesota

Shen, Aimee; Adjunct Assistant Professor, Department of Microbiology and Molecular Genetics; PHD, Harvard University

Shepherd, Katharine; Professor, Department of Education; EDD, University of Vermont

Shiman, David Aaron; Professor Emeritus, Department of Education; PHD, University of California Los Angeles

Shukla, Arti; Associate Professor, Department of Pathology and Laboratory Medicine; PHD, Banares Hindu University

Shukla, Girja Shanker; Associate Professor, Department of Surgery-Oncology; PHD, Lucknow University

Sibold, Jeremy S.; Associate Professor, Department of Rehabilitation and Movement Science; EDD, West Virginia University

Sicotte, Richard A.; Associate Professor, Department of Economics; PHD, University of Illinois Urbana-Champaign

Sigmon, Stacey C.; Associate Professor, Department of Psychiatry; PHD, University of Vermont

Silveira, Jay R.; Assistant Professor, Department of Biochemistry; PHD, University of Vermont

Simone, R. Thomas; Professor, Department of English; PHD, Claremont School of Theology

Simpatico, Thomas A.; Professor, Department of Psychiatry; MD, Rush Medical College

Single, Richard M.; Associate Professor, Department of Mathematics and Statistics; PHD, SUNY Stony Brook

Sirkel, Riin; Associate Professor, Department of Philosophy; PHD, University of Western Ontario

Sisk, Jennifer L.; Associate Professor, Department of English; PHD, Yale University

Skalka, Christian Edward; Associate Professor, Department of Computer Science; PHD, Johns Hopkins University

Skinner, Margaret; Research Professor, Department of Plant and Soil Science; PHD, University of Vermont

Slaughterbeck, James R.; Professor, Department of Orthopaedics and Rehabilitation; MD, University of Arizona

Smith, Carmen Petrick; Assistant Professor, Department of Education; PHD, University of Texas-Austin

Smith, Julia M.; Research Associate Professor, Department of Animal and Veterinary Sciences; DVM, Cornell University

Smith, Lance C.; Associate Professor, Department of Leadership and Developmental Sciences; PHD, Syracuse University

Smith, Sherwood E.; Lecturer, Department of Leadership and Developmental Sciences; EDD, Washington State University

Soll, Roger F.; Professor, Department of Pediatrics-Neonatology; MD, University of Health Sciences, The Chicago Medical School

Solomon, Brenda M.; Associate Professor, Department of Social Work; PHD, Syracuse University

Solomon, Richard Jay; Professor, Department of Medicine-Nephrology; MD, Yale University

Spector, Peter Salem; Professor, Department of Medicine-Cardiology; MD, Albert Einstein College of Medicine

Spees, Jeffrey; Professor, Department of Medicine-Cardiovascular; PHD, University of California Davis

Sprague, Brian L.; Associate Professor, Department of Surgery; PHD, University of Wisconsin-Madison

Stafford, James M.; Assistant Professor, Department of Neurological Sciences; PHD, Oregon Health and Science University

Stapleton, Renee D.; Associate Professor, Department of Medicine-Pulmonary; MD, University of Washington

Starrett, Mark C.; Associate Professor, Department of Plant and Soil Science; PHD, North Carolina State University-Raleigh

Stein, Gary; Professor, Department of Biochemistry; PHD, University of Vermont

Stein, Janet; Professor, Department of Biochemistry; PHD, Princeton University

Steingard, Sandra; Clinical Associate Professor, Department of Psychiatry; MD, Tufts University

Steinweis, Alan E.; Professor, Department of History; PHD, University of North Carolina

Stepenuck, Kristine F.; Extension Assistant Professor, Rubenstein School of Environment and Natural Resources, PHD; University of Wisconsin-Madison
Stephens, Jennie; Adjunct Associate, Rubenstein School of Environment and Natural Resources; PHD, California Institute of Technology

Stevens, Lori; Professor, Department of Biology; PHD, University of Illinois-Chicago

Stevens Jr., Stanley M.; Adjunct Associate Professor, Department of Biochemistry; PHD, University of Florida

Stickle, Timothy R.; Associate Professor, Department of Psychological Science; PHD, University of Arizona

Stilwell, Sean Arnold; Professor, Department of History; PHD, York University

Stockwell, Jason Dana; Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Toronto

Stokowski, Patricia A.; Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Washington

Stratton, Donald Arthur; Senior Lecturer, Department of Plant Biology; PHD, SUNY Stony Brook

Strolin, Jessica S.; Associate Professor, Department of Education; PHD, University of Albany

Strong, Allan Matthew; Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, Tulane University

Stumpff, Jason K.; Assistant Professor, Department of Molecular Physiology and Biophysics; PHD, University of Colorado

Sun, Tao; Associate Professor, Department of Community Development and Applied Economics; PHD, University of Minnesota Twin Cities

Sundue, Michael A.; Research Assistant Professor, Department of Plant Biology; PHD, CUNY Graduate Center / The New York Botanical Garden

Suratt, Benjamin; Professor, Department of Medicine-Pulmonary; MD, Columbia University

Suter, Jesse C.; Research Associate Professor, Department of Education; PHD, University of Vermont

Teuscher, Cory; Professor, Department of Medicine-Immunobiology; PHD, University of New Mexico

Testroet, Eric D.; Assistant Professor, Department of Animal and Veterinary Sciences; PHD, Iowa State University

Thaler, Martin Andrew; Professor, Department of Theatre; MFA, Pennsylvania State University

Thali, Markus Josef; Professor, Department of Microbiology and Molecular Genetics; PHD, University of Zurich

Thomas, Scott L.; Dean, College of Education and Student Services; Professor, Department of Leadership and Developmental Sciences; PHD, University of California Santa Barbara

Thraillkill, Eric A.; Research Assistant Professor, Department of Psychological Science; PHD, Utah State University

Tierney, Mary Lauretta; Associate Professor, Department of Plant Biology; PHD, Michigan State University

Tinkler, Alan S.; Associate Professor, Department of Education; PHD, University of Denver

Tinkler, Barri E.; Associate Professor, Department of Education; PHD, University of Denver

Titcomb, Stephen; Associate Professor Emeritus, Department of Electrical and Biomedical Engineering; PHD, Lehigh University

Tobin, Daniel; Assistant Professor, Department of Community Development and Applied Economics; PHD, Pennsylvania State University

Todd, John; Research Professor Emeritus, Rubenstein School of Environment and Natural Resources; PHD, University of Michigan

Tomas, Amy M.; Senior Lecturer, Grossman School of Business; PHD, University of Memphis

Tomas III, Michael John; Associate Professor; Grossman School of Business; PHD, Syracuse University

Tompkins, Connie L.; Associate Professor, Department of Rehabilitation and Movement Science; PHD, University of New Orleans

Toolin, Regina; Associate Professor, Department of Education; PHD, University of Wisconsin-Madison

Toth, Michael; Professor, Department of Medicine-Cardiovascular; PHD, University of Maryland Baltimore

Toufexis, Donna J.; Associate Professor, Department of Psychological Science; PHD, McGill University

Tourville, Timothy; Assistant Professor, Department of Rehabilitation and Movement Science, PHD; University of Vermont

Townson, David H; Professor, Department of Animal and Veterinary Sciences, PHD, Ohio State University
Tracy, Paula Babiarz; Professor, Department of Biochemistry; PHD, Syracuse University

Tracy, Russell P.; Professor, Department of Pathology and Laboratory Medicine; PHD, Syracuse University

Trainor, Kevin M.; Professor, Department of Religion; PHD, Columbia University

Troy, Austin R.; Adjunct Professor, Rubenstein School of Environment and Natural Resources; PHD, University of California Berkeley

Trubek, Amy B.; Professor, Department of Nutrition and Food Sciences; PHD, University of Pennsylvania

Trybus, Kathleen M.; Professor, Department of Molecular Physiology and Biophysics; PHD, University of Chicago

Tschoepe, Barbara A; Clinical Professor, Department of Rehabilitation and Movement Science; PHD, University of Colorado

Turner, Sarah; Senior Lecturer, Department of English; PHD, Case Western Reserve University

Twery, Mark; Adjunct Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, Yale University

Tye, Coralee E.; Assistant Professor; Department of Biochemistry; PHD, Western University

Underwood, Kristen L.; Research Assistant Professor, Department of Civil and Environmental Engineering; PHD, University of Vermont

Usher, Mark David; Associate Professor, Department of Classics; PHD, University of Chicago

Van Amburgh, Michael; Adjunct Professor, Department of Animal and Veterinary Science; PHD, Cornell University

Van Buren, Peter C.; Associate Professor, Department of Medicine-Cardiology; MD, University of Vermont

van den Berg, Abby Katrien; Research Assistant Professor, Department of Plant Biology; PHD, University of Vermont

van der Vliet, Albert; Professor, Department of Pathology and Laboratory Medicine; PHD, University of Amsterdam

van Eeghen, Constance O.; Assistant Professor, Department of Medicine-General Internal Medicine; DRPH, University of North Carolina Chapel Hill

Vanegas, Juan; Assistant Professor, Department of Physics, PHD; University of California Davis

Van Houten, Judith; Professor Emerita, Department of Biology; PHD, University of California Santa Barbara

Vanden Bergh, Richard G.; Professor, Grossman School of Business; PHD, University of California Berkeley

VanSlyke, Gretchen Jane; Professor, Department of Romance Languages and Linguistics; PHD, University of Pennsylvania

Vatovec, Christine M.; Research Assistant Professor; Rubenstein School of Environment and Natural Resources; PHD, University of Wisconsin Madison

Velleman, Shelley L.; Professor, Department of Communication Sciences and Disorders; PHD, University of Texas Austin

Ventrius, Curtis L.; Professor Emeritus, Rubenstein School of Environment and Natural Resources; PHD, University of Southern California

Venugopal, Srinivas; Assistant Professor, Grossman School of Business; PHD, University of Illinois at Urbana–Champaign

Vigoreaux, Jim Osvaldo; Professor, Department of Biology; Molecular Physiology and Biophysics; PHD, University of Oklahoma

Villanti, Andrea C.; Associate Professor, Department of Psychiatry; PHD, Bloomberg School of Public Health, Johns Hopkins University

Vincent, Christelle; Assistant Professor, Department of Mathematics and Statistics; PHD, University of Wisconsin-Madison

Visser, Thomas Durant; Professor, Department of History; MS, University of Vermont

Vivanco, Luis A.; Professor, Department of Anthropology; PHD, Princeton University

Vizzard, Margaret A.; Professor, Department of Neurological Sciences; PHD, Thomas Jefferson University

Vogelmann, Thomas; Professor, Department of Plant Biology; PHD, Syracuse University

Voigt, Brian G.; Research Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Vermont

Walberg, Glenn C.; Associate Professor, Grossman School of Business; JD, College of William and Mary

Waldron, John Vincent; Associate Professor, Department of Romance Languages and Linguistics; PHD, University of California Irvine

Wallin, Kimberly F.; Research Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Wisconsin-Madison

Walls, Leon; Associate Professor, Department of Education; PHD; Purdue University

Wang, Qingbin; Professor, Department of Community Development and Applied Economics; PHD, Iowa State University
Ward, Gary E.; Professor, Department of Microbiology and Molecular Genetics; PHD, University of California San Diego

Wargo, Matthew; Associate Professor, Department of Microbiology and Molecular Genetics; PHD, Dartmouth College

Warrington, Gregory S.; Assistant Professor, Department of Mathematics and Statistics; PHD, Harvard University

Warshaw, David; Professor, Department of Molecular Physiology and Biophysics; PHD, University of Vermont

Wasserman, Richard C.; Professor, Department of Pediatrics; MD, Jefferson Medical College

Waterman, Rory; Professor, Department of Chemistry; PHD, University of Chicago

Watts, Richard; Lecturer, Geography; PHD, University of Vermont

Weaver, Donald Lee; Professor, Department of Pathology and Laboratory Medicine - Anatomic; MD, University of Vermont

Webb, Laura E.; Associate Professor, Department of Geology; PHD, Stanford University

Weinstock, Jacqueline S.; Associate Professor, Department of Leadership and Developmental Sciences; PHD, University of Vermont

Weiss, Daniel; Professor, Department of Medicine-Pulmonary; MD, PHD, Mount Sinai School of Medicine

Welch, Nancy Ellen; Professor, Department of English; PHD, University of Nebraska Lincoln

Welkowitz, Julie A.; Lecturer; Department of Leadership and Developmental Sciences; PHD, University of Vermont

Wellman, George C.; Professor, Department of Pharmacology; PHD, University of Vermont

Westervelt, Karen C.; Clinical Assistant Professor, Department of Rehabilitation and Movement Science; PHD, Bond University-Robina, Queensland, Australia

Weston, Matthew; Assistant Professor, Department of Neurological Sciences; DHSC, Baylor College of Medicine

Whalley, Adam C.; Assistant Professor, Department of Chemistry; PHD, Columbia University

Whitaker, Emmett E.; Assistant Professor, Department of Anesthesiology; MD, University of Rochester School of Medicine and Dentistry

White, Matthew S.; Assistant Professor, Department of Physics; PHD, University of Colorado Boulder

White, Sheryl Lynne; Assistant Professor, Department of Neurological Sciences; PHD, University of Vermont

Whitfield, Harvey Amani; Professor, Department of History; PHD, Dalhousie University

Whitney, Stuart Luhn; Clinical Professor, Department of Nursing; EDD, University of Vermont

Widrick, Gary Charles; Research Associate Professor Emeritus, Department of Social Work; PHD, University of Vermont

Williams, Clayton; Research Assistant Professor, Rubenstein School of Environment and Natural Resources; PHD, Florida International University

Williams, Tamara; Lecturer, Department of Nursing; PHD, University of Chicago

Willmuth, Mary E.; Clinical Associate Professor, Department of Psychiatry; PHD, University of Vermont

Wilson, James Michael; Professor, Department of Mathematics and Statistics; PHD, University of California Los Angeles

Witkin, Stanley L.; Professor Emeritus, Department of Social Work; PHD, University of Wisconsin-Madison

Witters, Sean A.; Senior Lecturer, Department of English; PHD, Brandeis University

Wollenberg, Eva (Lini); Research Professor, Rubenstein School of Environmental and Natural Resources; PHD, University of California, Berkeley

Wong, Cheung; Associate Professor, Department of Obstetrics and Gynecology- Gynecologic Oncology; MD, New York University

Wood, Marie E.; Professor, Department of Medicine-Hematology Oncology; MD, University of Colorado Boulder

Woolf, Arthur George; Associate Professor, Department of Economics; PHD, University of Wisconsin-Madison

Wshah, Safwan; Assistant Professor, Department of Computer Science; PHD, State University of New York at Buffalo

Wu, Junru; Professor, Department of Physics; PHD, University of California Los Angeles

X

Xia, Tian; Professor, Department of Electrical and Biomedical Engineering; PHD, University of Rhode Island

Y

Yamamoto, Britt; Adjunct Associate Professor, Rubenstein School of Environment and Natural Resources, PHD; University of Washington Seattle

Yang, Jianke; Professor, Department of Mathematics and Statistics; PHD, Massachusetts Institute of Technology

Yang, Jie; Associate Professor, Department of Physics; PHD, Princeton University
Yoo, Hyon Joo; Associate Professor, Department of English; PHD, Syracuse University

Yu, Jun; Professor, Department of Mathematics and Statistics; PHD, University of Washington Seattle

Z

Zaidi, Sayyed Kaleem; Associate Professor, Department of Biochemistry; PHD, University of Punjab

Zakai, Neil A.; Associate Professor, Department of Medicine-Hematology Oncology; MD, University of Virginia

Zdatny, Steven M.; Professor, Department of History; PHD, University of Pennsylvania

Zhang, Chun; Associate Professor, Grossman School of Business; PHD, Michigan State University

Zhao, Feng-Qi; Professor, Department of Animal and Veterinary Sciences; PHD, University of Alberta

Zia, Asim; Professor, Department of Community Development and Applied Economics; PHD, Georgia Institute of Technology

Zydlewski, Gayle Barbin; Adjunct Associate Professor, Rubenstein School of Environment and Natural Resources; PHD, University of Maine
