

THE COLLEGE OF NURSING AND HEALTH SCIENCES

<http://www.uvm.edu/cnhs/>

The College of Nursing and Health Sciences (CNHS) offers undergraduate and graduate programs in a variety of health disciplines. The entry-level degree programs prepare the student for initial entry into clinical or health-related practice and provide a solid foundation for further education. The curricula include rigorous academic preparation and most programs include extensive field experience at selected facilities. The graduate programs prepare students for advanced practice in the health care disciplines and to assume leadership roles in practice, education, and research. The faculty of the CNHS is committed to excellence in teaching, the conduct of research that extends knowledge and contributes to the science of each discipline, and public service to improve the health of citizens of state, national, and global communities.

The following entry-level degree programs are offered: Bachelor of Science degree programs in Communication Sciences and Disorders; Exercise Science; Public Health Sciences; Medical Laboratory Science; Medical Radiation Sciences; and Nursing. A post-baccalaureate program in Medical Laboratory Science to prepare students with a degree in another field to sit for the national certification exam is offered through Professional and Continuing Education. Professional and Continuing Education also offers a post-baccalaureate certificate program in Communication Sciences and Disorders that prepares students to practice as speech-language pathology assistants, and a post-baccalaureate certificate program that prepares students to enter a master's degree program.

A Master of Science degree, Accelerated Master's degree, and a Speech-Language Pathology Assistant Undergraduate Certificate are offered by the Communication Sciences and Disorders Department. The Biomedical and Health Sciences Department offers minors in Medical Diagnostics, Global Public Health, and Public Health, Equity, and Advocacy. The Department of Rehabilitation and Movement Science offers an entry-level Doctorate in Occupational Therapy with a 3+3 accelerated option for students in the B.S. in Public Health Sciences program, a doctoral degree in Physical Therapy, and minors in Integrative Health, Integrative Health and Wellness Coaching, and Emergency Medical Services. The Nursing Department offers a direct entry master's degree program for college graduates with a non-nursing background; an online master's degree; a doctoral program (D.N.P.) in Primary Care for practice as either a Family or Adult-Gerontological Nurse Practitioner, and a direct entry D.N.P. program. The Executive Nurse Leader credential may be achieved through the D.N.P. program. Post-graduate certificates in nursing are also available. The College also offers a doctoral degree in Interprofessional Health Sciences.

Certificates in Integrative Health and Integrative Health and Wellness Coaching are offered through Professional and Continuing Education.

Graduates of baccalaureate-level professional programs are eligible to sit for the appropriate licensure examination and enter practice or go on to other health-related fields. All of the professional programs needing accreditation and/or state approval for licensure eligibility have achieved and maintained such status.

Integrative Health

Integrative Health and Wellness Coaching

Medical Diagnostics

Public Health, Equity and Advocacy

Speech Language Pathology Assistant - Undergraduate Certificate

REQUIREMENTS

DEGREE REQUIREMENTS

Requirements for admission, retention and graduation are detailed below for each of the undergraduate degree programs. The College of Nursing and Health Sciences reserves the right to require the withdrawal of any student whose academic record, performance, or behavior in the professional programs is judged unsatisfactory. All candidates for admission and continuation must be able to perform the essential clinical, as well as academic, requirements of the CNHS programs. These requirements include, but are not limited to: the capacity to observe and communicate; sufficient motor ability to perform physical diagnostic examinations and basic laboratory and clinical procedures; emotional stability to exercise good judgment and to work effectively in stressful situations; and intellectual ability to synthesize data and solve problems. CNHS students must be able to meet these technical standards either with, or without, reasonable accommodations. Some professional licensing examiners, clinical affiliates and potential employers may require students and graduates to disclose personal health history, substance abuse history, and/or criminal convictions, which may, under certain conditions, impact eligibility for professional examinations, licensing, clinical affiliation, or employment. Some programs have additional clinical requirements

such as CPR certification and up-to-date-immunizations. Radiation therapy students must demonstrate professionalism, professional development, and competency in the clinical setting in addition to the aforementioned requirements.

COMPUTER REQUIREMENTS

Beginning with the Fall 2020 semester, all undergraduate students are required to have a laptop computer that meets the minimum specifications determined annually by the university (see Degree and University Requirements section of the Catalogue for more detailed information). Students are not required to purchase a new laptop if they have an existing laptop that meets the established specifications. If students need to purchase a laptop, they are not required to purchase it through UVM.

RESPONSIBILITIES

There are some special elements associated with clinical education. Students are responsible for their own transportation to and from clinical sites and, where relevant, the costs of housing for clinical experiences. Students may need to complete a criminal background check prior to clinical placement. Evidence of a criminal record may prevent students from being eligible for clinical placement and/or professional licensure. All students must carry professional liability insurance during clinical rotations and will be billed for this insurance.

Students engaging in clinical education experiences must comply with required health clearances including testing, immunizations, and titers for certain infectious diseases (costs vary depending on students' insurance). Applicants to the college's clinical programs must realize there is always an element of risk through exposure to infectious disease. The university is not responsible for medical costs resulting from injury during clinical rotation, or during any other curricular activity, unless this injury is due to negligence by the university.
