CIVIL AND ENVIRONMENTAL ENGINEERING

https://www.uvm.edu/cems/cee/

OVERVIEW

Graduate programs in Civil and Environmental Engineering (CEE) that lead to the master of science and doctor of philosophy degrees are offered. The curricular and research programs emphasize engineering related to environmental and hydrological processes, sustainable transportation systems, materials, and geotechnical, geo-environmental and structural engineering.

Research in the department addresses critical issues facing the world related to sustainability and energy; infrastructure systems; climate change, hazard mitigation and adaptation; and environmental and public health. A wide range of research methods are employed from state-of-the-art laboratory and field testing to sensing to computational modeling to data analytics to artificial intelligence. Example projects include groundwater contamination modeling and remediation, environmental restoration and ecological engineering, hydrological processes, resource recovery from wastes, air pollution related health effects, sustainable materials, soil and structural dynamics, earthquake engineering, geo-energy, climate change impacts on natural and built infrastructure, structural health monitoring, and sustainable transportation systems.

CEE graduate students can concurrently pursue certificates of graduate study in Complex Systems, Ecological Economics, and Community Resilience & Planning, among others.

DEGREES

Civil and Environmental Engineering AMP

Civil and Environmental Engineering M.S.

Civil and Environmental Engineering Ph.D.

FACULTY

Aultman-Hall, Lisa M.; Professor, Department of Civil and Environmental Engineering; PHD, McMaster University

Badireddy, Appala Raju; Assistant Professor, Department of Civil and Environmental Engineering; PHD, University of Houston

Bomblies, Arne; Associate Professor, Department of Civil and Environmental Engineering; PHD, Massachusetts Institute of Technology

Dewoolkar, Mandar M; Professor, Department of Civil and Environmental Engineering; PHD, University of Colorado Boulder

Doran, Elizabeth; Research Assistant Professor, Department of Civil and Environmental Engineering; PHD, Duke University

Garcia, Luis; Professor, Department of Civil and Environmental Engineering; PHD, University of Colorado Boulder

Ghazanfari, Ehsan; Associate Professor, Department of Civil and Environmental Engineering; PHD, Lehigh University

Hamshaw, Scott; Research Assistant Professor, Department of Civil and Environmental Engineering; Ph.D, University of Vermont

Hernandez, Eric M.; Associate Professor, Department of Civil and Environmental Engineering; PHD, Northeastern University

Holmén, Britt A.; Professor Emerita, Department of Civil and Environmental Engineering; PHD, Massachusetts Institute of Technology

Pinder, George Francis; Professor, Department of Civil and Environmental Engineering; PHD, University of Illinois Urbana-Champaign

Rizzo, Donna Marie; Professor, Department of Civil and Environmental Engineering; PHD, University of Vermont

Rowangould, Dana; Research Assistant Professor, Department of Civil and Environmental Engineering; PHD, University of California, Davis

Rowangould, Greg; Associate Professor, Department of Civil and Environmental Engineering; PHD, University of California, Davis

Scarborough, Matthew; Assistant Professor, Department of Civil and Environmental Engineering; PHD, University of Wisconsin-Madison

Tan, Ting; Associate Professor, Department of Civil and Environmental Engineering; PHD, Princeton University

Underwood, Kristen L.; Research Assistant Professor, Department of Civil and Environmental Engineering; PHD, University of Vermont

Courses

CEE 5430. Transportation & Air Quality. 3 Credits.

Air pollution sources, measurement methods, legislation, vehicle emissions formation, control and transport processes. Emphasis on emission factor and dispersion multi-scale modeling using latest modeling tools. Project-based. Prerequisites: CEE 2120, CEE 3400.

CEE 5550. Phys/Chem Proc Water/Wastewater. 0 or 3 Credits.

Theory of physical/chemical processes for treating waters and wastewaters; reactor dynamics, mass transfer, adsorption, ion exchange, precipitation; project-based. Prerequisite: Graduate student or Instructor permission; content knowledge of water and wastewater engineering (such as CEE 3510 or CEE 3515) assumed.

CEE 5560. Biol Proc Water/Wastewater Tr. 0 or 3 Credits.

Theory and application of biological processes for treating industrial and domestic wastewaters and contaminated ground water; microbiological considerations; aerobic and anaerobic processes; reactor design, in-situ bioremediation; bench-scale and pilot-scale experimentation. Prerequisite: Graduate student or Instructor permission; content knowledge of water and wastewater engineering (such as CEE 3510 or CEE 3515) assumed.

CEE 5620. Advanced Hydrology. 3 Credits.

Introduces computer modeling of hydrological systems. Project-based. Simple overland flow, flood routing, water quality, and groundwater models are developed using finite difference techniques. Stochastic hydrology and hydrologic time series analysis are also introduced. Prerequisite: Graduate student or Instructor permission; content knowledge of hydrology (such as CEE 4600) assumed.
CEE 5630. Applied River Engineering. 3 Credits.
Application of fundamental principles of fluid dynamics and open channel flow to the design and retrofit of river-connected infrastructure, including road embankments, road drainage systems, berms, culverts, bridges and impoundments. Project-based.
Prerequisites: Graduate student or Instructor permission; content knowledge of hydraulics/flow mechanics (such as CEE 3600, CEE 3615, or ME 2230) assumed.

CEE 5660. Climate Change Impacts. 3 Credits.
Introduces the physical basis of climate change and explores a number of climate change impacts, particularly those that affect the built environment; primary focus on hydro-climate impacts, specifically flood risk, water resources, coastal flooding, and stormwater infrastructure; various modeling techniques are introduced and applied to engineering problems. Prerequisite: Graduate student or Instructor permission; programming skills (such as in Python or Matlab) and content knowledge of hydraulics/flow mechanics (such as CEE 3600, CEE 3615, or ME 2230) assumed.

CEE 5700. Advanced Structural Analysis. 3 Credits.
Virtual work, energy theorems, analysis of structures by the displacement method and the finite element method, non-linear structural analysis. Project-based. Prerequisite: Graduate student or Instructor permission; content knowledge of structural analysis (such as CEE 3700) assumed.

CEE 5720. Structural Dynamics. 3 Credits.
Vibrations, matrices, earthquake engineering, stability and wave propagation. Project-based. Prerequisites: Graduate student or Instructor permission; content knowledge of calculus through differential equations (such as MATH 3201) and Physics (such as PHYS 1500) assumed.

CEE 5730. Structural Design - Wood. 3 Credits.
Analysis and design of solid and glue laminated timber members and structural systems including tension members, beams, columns, beam-columns, diaphragms, shear walls, and connections; LRFD and ASD design methods; application of IBC for timber systems; current developments in wood design/ construction; project-based.
Prerequisite: Graduate student or Instructor permission; content knowledge of structural analysis (such as CEE 3700) assumed.

CEE 5850. Geo-energy Systems. 3 Credits.
An introduction to Geoenergy technologies for subsurface energy extraction (shallow and deep geothermal systems, enhanced oil recovery, shale gas extraction) and secure storage of byproducts of energy production (carbon dioxide and nuclear wastes); project-based. Prerequisite: Graduate student or Instructor permission; content knowledge of soil mechanics (such as CEE 3800 or CEE 3815) assumed.

CEE 5870. Design of Earth Structures. 3 Credits.
Soil and rock properties using laboratory, field and in-situ testing; analysis and design of slopes, embankments and retaining structures. Prerequisites: Graduate Student or Instructor permission; content knowledge of soil mechanics (such as CEE 3800 or CEE 3815) assumed.

CEE 5980. Numerical Methods for Engineer. 3 Credits.
Foundational concepts of numerical integration, numerical differentiation, and numerical approximation and solution of differential and partial differential equations of the type encountered in the analysis of engineering problems and data processing; project-based. Prerequisites: MATH 3201; MATH 2522 or MATH 2544. Cross-listed with: ME 5980.

CEE 5990. Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

CEE 6391. Master’s Thesis Research. 1-12 Credits.
Research for the Master’s Thesis.

CEE 6392. Master’s Project Research. 1-6 Credits.
Independent project related to Civil & Environmental Engineering under the supervision of a Civil & Environmental Engineering faculty member, concluding with a written technical report and an oral presentation to a committee of two Civil & Environmental Engineering faculty members. Prerequisite: Permission of Civil & Environmental Engineering Graduate Coordinator or Civil & Environmental Engineering Department Chair.

CEE 6840. Site Characterization. 3 Credits.
A comprehensive approach to subsurface site characterization for geotechnical and environmental designs and a systems approach for integrating the two. Prerequisites: Graduate Student or Instructor permission; content knowledge of hydraulics/flow mechanics (such as CEE 3600, CEE 3615, or ME 2230) and soil mechanics (such as CEE 3800 or CEE 3815) assumed.

CEE 6880. Advanced Geoenvironmental Eng. 3 Credits.
Site characterization, site restoration, geotechnical aspects of waste disposal and containment, landfill design, geosynthetics. Prerequisite: Content knowledge of soil mechanics (such as CEE 3800 or CEE 3815) assumed.

CEE 6930. CEE Graduate Seminar. 0 Credits.
Presentation and discussion of advanced problems, research, and current topics in Civil & Environmental Engineering by faculty, Graduate students, and outside guest speakers. Prerequisite: Civil & Environmental Engineering Graduate student.

CEE 6990. Special Topics. 1-18 Credits.
Advanced topics in recently developed technical areas.

CEE 6991. Internship. 1-18 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion.

CEE 6993. Independent Study. 1-18 Credits.
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.
CEE 6995. Graduate Independent Research. 1-18 Credits.
Graduate student work on individual or small team research projects under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.

CEE 7491. Doctoral Dissertation Research. 1-18 Credits.
Research for the Doctoral Dissertation.

CEE 7900. Uncertainty & Risk in Eng Sys. 3 Credits.
Modeling uncertainty and risk, random variables, modeling and simulation of functions of random variables and random processes, propagation of uncertainties in computational models, analytical and computational methods for computing failure probability of engineering systems, Bayesian updating of risk measures, communicating uncertainty and risk. Prerequisite: Content knowledge of probability and statistics (such as STAT 2430 or STAT 2510) is assumed.

CEE 7920. Applied Artificial Neural Networks. 1-3 Credits.
Introduction to artificial neural networks. A broad range of example algorithms are implemented in MATLAB. Research applications to real data are emphasized. Prerequisites: Programming skills (such as in Python or Matlab) and content knowledge of multivariate statistics (such as STAT 5230) are assumed. Cross-listed with: CSYS 7920.

CEE 7980. Applied Geostatistics. 3 Credits.
Introduction to the theory of regionalized variables, geostatistics (kriging techniques): special topics in multivariate analysis; Applications to real data subject to spatial variation are emphasized. Prerequisites: STAT 5230, CS 1210; or Instructor permission. Cross-listed with: CSYS 7980, STAT 7980.

CEE 7990. Special Topics. 1-18 Credits.
See Schedule of Courses for specific titles.

CEE 7991. Internship. 1-18 Credits.
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion.

CEE 7995. Graduate Independent Research. 1-18 Credits.
Graduate student work on individual or small team research projects under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.
