BIOCHEMISTRY (BIOC)

Courses

**BIOC 1010. Biochem: Modern Perspect I. 1 Credit.**
This is Part I of a sequence to help students develop an understanding of what the field of biochemistry is, its core principles, and what biochemists do. Prerequisites: Biochemistry major, First-year standing.

**BIOC 1011. Biochem: Modern Perspect II. 1 Credit.**
This is Part 2 of a sequence to help students develop an understanding of what the field of biochemistry is, its core principles, and what biochemists do. Prerequisites: Biochemistry major, First-year standing.

**BIOC 1990. Special Topics. 1-18 Credits.**
See Schedule of Courses for specific titles.

**BIOC 1991. Internship. 1-3 Credits.**
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion.

**BIOC 1993. Independent Study. 1-18 Credits.**
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.

**BIOC 2990. Special Topics. 1-18 Credits.**
See Schedule of Courses for specific titles.

**BIOC 2991. Internship. 1-18 Credits.**
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion.

**BIOC 2993. Independent Study. 1-18 Credits.**
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.

**BIOC 2994. Teaching Assistantship. 1-3 Credits.**
Undergraduate student service as a teaching assistant, usually in an introductory-level course in the discipline, for which credit is awarded. Offered at department discretion.

**BIOC 2995. Undergraduate Research. 1-18 Credits.**
Undergraduate student work on individual or small team research projects under the supervision of a faculty member, for which credit is awarded. Written report due at end of each semester. Prerequisite: Instructor permission.

**BIOC 3001. Fundamentals of Biochemistry. 3 Credits.**
Provides a broad introduction to the field of biochemistry. Students will explore the molecular basis and chemical principles of biochemistry pertinent to living systems. This course is taught by LCOM faculty and emphasizes the relevance of biochemistry to health, disease, physiology and medicine. Prerequisites: CHEM 1150, CHEM 1580, CHEM 1550, CHEM 2585, or equivalent; BIOL 1450, BCOR 1450, BCOR 2500, or equivalent.

**BIOC 3005. Biochemistry I. 3 Credits.**
Introduction to chemistry and structure of biological macromolecules; examination of mechanisms of chemical processes in biological systems including enzyme catalysis, biosynthesis, regulation, and information transfer. Prerequisite: BIOC 3005 or CHEM 2585. Cross-listed with: MMG 3050.

**BIOC 3006. Biochemistry II. 3 Credits.**
Continuation of Biochemistry I. Biochemistry of nucleic acids; nucleic acid based processes, such as replication and transcription; cellular information transfer, genomics, and proteomics. Prerequisite: BIOC 3005 or MMG 3050. Cross-listed with: MMG 3060.

**BIOC 3007. Biochemistry Lab. 3 Credits.**
Introduction to biochemical tools, including spectrometry, chromatography, and electrophoresis; natural and recombinant enzyme isolation; assays of DNA-modifying enzymes; computer-based structure/function exercises. Prerequisite: BIOC 3005 or MMG 3050. Cross-listed with: MMG 3070.

**BIOC 3063. Nutritional Biochemistry. 3 Credits.**
Comprehensive study of the metabolism of the macro-nutrients by humans with emphasis on hormonal control of biochemical pathways, nutritional and metabolic interrelationships and dietary disorders. The biochemistry of the micronutrients and vitamins will also be studied. Prerequisite: BIOC 3001, BIOC 3005, or NFS 2183.

**BIOC 3075. Adv Biochem of Human Disease. 3 Credits.**
The course takes a deep dive into five distinct areas of biochemistry related to a disease or group of diseases primarily through group learning. Key biochemical principles are reviewed and extended. Additionally students will read and discuss a primary literature article with each area. Prerequisites: NFS 2183, BIOC 3001, or BIOC 3005.

**BIOC 3990. Special Topics. 1-18 Credits.**
See Schedule of Courses for specific titles.

**BIOC 3991. Internship. 1-18 Credits.**
On-site supervised work experience combined with a structured academic learning plan directed by a faculty member or a faculty-staff team in which a faculty member is the instructor of record, for which academic credit is awarded. Offered at department discretion.

**BIOC 3993. Independent Study. 1-18 Credits.**
A course which is tailored to fit the interests of a specific student, which occurs outside the traditional classroom/laboratory setting under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.
BIOC 3994. **Teaching Assistantship. 1-3 Credits.**
Undergraduate student service as a teaching assistant, usually in an introductory-level course in the discipline, for which credit is awarded. Offered at department discretion.

BIOC 3995. **Undergraduate Research. 1-18 Credits.**
Undergraduate student work on individual or small team research projects under the supervision of a faculty member, for which credit is awarded. Offered at department discretion.

BIOC 4084. **Biochemistry Senior Seminar. 1 Credit.**
Oral and written presentation of a subject of current biochemical interest. Prerequisite: Senior standing.

BIOC 4996. **Honors. 1-6 Credits.**
College honors thesis or other department/program honors, under the supervision of a faculty member. Offered at department discretion.
